FORTIETH ANNUAL REPORT

OF THE

Ontario Municipal Board to December 31, 1945

In pursuance of Section 108 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60), the Ontario Municipal Board beg leave respectfully to submit their Fortieth Annual Report.

"THE ONTARIO MUNICIPAL BOARD ACT"

Since the revision of the Statutes of Ontario in 1937, "The Ontario Municipal Board Act" was amended by Statutes of Ontario, 1938, Chapter 37, Section 18; 1939, Chapter 47, Section 26; 1940, Chapter 20, and 1941 Chapter 40. See also Ontario Statutes 1942, Chapter 34, Section 41 and Section 42 (6) and Ontario Statutes 1943, Chapter 15, Section 1 and 2 and Section 11.

APPLICATIONS TO THE BOARD

There were 1112 applications to the Board during 1945 (exclusive of Public Vehicle and Public Commercial Vehicle License applications), and in regard to these applications not disposed of in 1944, 195 public hearings were held. The applications included a great variety of matters falling within the jurisdiction of the Board and those granted are set out in a list contained in the "Abstract and Summary" appended to this Report, indexed under "Orders issued by the Board". Copies of formal Decisions issued are also contained in the Abstract and Summary, indexed under "Decisions of the Board" and also under the names of the parties.

SITTINGS OF THE BOARD

The Board held meetings for the transaction of routine business and the disposal of applications every juridical day throughout the year. Many of these applications, though dealt with informally and disposed of without the necessity of Hearings, entailed in many instances a considerable amount of inquiry and consideration on the part of the Board, especially those coming under the provisions of Section 70 of the Board's Act, which section requires all capital undertakings and expenditures therefor by Municipalities to be approved by the Board.

APPROVAL OF UNDERTAKING OF CAPITAL EXPENDITURES BY MUNICIPALITIES

(Section 70 of "The Ontario Municipal Board Act" R.S.O. 1937, C. 60)
(Subsection (3) re-enacted O.S. 1940, C. 20, s. 4)
(Subsection (1) amended O.S. 1941, C. 40, s. 3)

On the 18th April, 1935, legislation came into effect whereby a Municipality is prohibited from exercising any of its powers to proceed with, authorize or provide any moneys for any undertaking, work, project, scheme, act, matter or thing, the cost of, or any portion of the cost of which is intended or required to be provided or raised by the issue of debentures of the Municipality, until the approval of this Board is first obtained. This enactment overrides the provisions of any general or Special Act and necessitates a great many applications to the Board. A list of these applications granted will be found in the Summary, included in the list indexed under "Orders issued by the Board".

One thousand and sixty-six applications in respect to proposed expenditures totalling \$36,002,190.45 were considered by the Board. It should be noted, however, that since Municipal representatives are now aware of the fact that they must obtain the Board's approval of proposed capital undertakings, a large percentage of themselves of the opportunity of discussing their proposed borrowings with

Board and in many instances are advised that the Board would not be willing to grant approval. Accordingly formal applications in these instances are not filed and do not show in the Board's records.

It should also be noted that the existence of this legislation gives the Board an opportunity to advise and control with regard to the type and term of the debentures to be issued. In this connection the Board has pursued the policy of approving only instalment debentures as opposed to sinking fund debentures and, believing that the saving of interest effected thereby accrues to the benefit of the municipal rate-payers, is generally requiring the term of repayment to be shorter than formerly.

The following list, (generally speaking), shows the maximum debenture term allowed by the Board under this restrictive policy:—

Sidewalks	10 years
Curbs and Gutters	10 years
Pavements	10 years
Watermains	15 years
Sanitary Sewers	15 years
Trunk Sewers	20 years
Buildings, including School	20 years

A recital in the debenture by-law of the Board's approval under said Section 70 is obligatory, pursuant to an amendment passed at the 1939 Session of the Legislature (Chapter 30, Section 17) adding paragraph (e) to subsection (1) of Section 305 of "The Municipal Act".

APPROVAL OF RATEPAYERS

By Section 59 (f) of "The Ontario Municipal Board Act" the Board is given power to direct that before any approval is given to the exercise of any powers by a Municipality or to any By-law passed by it, the assent of the electors thereof or of those qualified to vote on money by-laws shall first be obtained, notwithstanding such assent is not otherwise requisite. By virtue of this legislation the Board is continuing its policy, adopted in 1938, of insisting that major capital expenditures, the cost of which would be met out of general rates, be submitted to the ratepayers for their approval before being presented to the Board, and further the Board is of opinion that a representative vote can be taken only at the same time as the municipal election. The result of this policy in many instances has been the rejection of the proposed expenditure by the ratepayers.

ANNEXATIONS

Pursuant to Section 17 of "The Municipal Act" (R.S.O. 1937, C. 266) the Board considered one application for annexation, pursuant to Section 20 of "The Municipal Act" the Board considered eight applications for annexations, and four applications pursuant to Section 23 of the same Act as re-enacted by Ontario Statutes 1939, Chapter 30, Section 2. The last mentioned legislation also provides for amalgamation of Municipalities and requires a Special Act of the Legislature to validate the Board's Order.

IMPROVEMENT DISTRICTS

In 1943, Legislation was enacted by an amendment to "The Municipal Act" (Section 44a) under which, by Order of this Board a locality may be erected into an Improvement District. In 1945 there were five such applications dealt with. Copies of the Board's Orders, issued herein, will be found in the Summary indexed under "Orders of the Board".

ARBITRATIONS

In 1945 the Board acted as Arbitrators in connection with two applications, one of which was made pursuant to Section 28 of "The Public Works Act" (R.S.O. 1937, C. 54) for the fixing of compensation to be paid to the Claimants for property expropriated in connection with construction of the King's Highways, where the amount could not be arranged between the Parties, and on which a settlement was reached before coming on for Hearing, and one application was made pursuant to Section 79 (a) of the "The Highway Improvement Act" (R.S.O. 1937, C. 56) (as amended by Section 7, Chapter 19, O. S. 1939) which provides for the closing by the Department, with the Board's approval, of any road which intersects or runs across a divided highway.

SUPERVISED MUNICIPALITIES

Pursuant to the provisions of Section 32 of "The Department of Municipal Affairs Act" (R.S.O. 1937, C. 59), the Board during 1945 considered and approved a plan for funding and refunding the bonded indebtedness of the Town of Haileybury, and a new refunding plan for the City of Windsor.

EXTENSION OF PUBLIC UTILITIES

(Section 407 (2) of "The Municipal Act")

During 1945, the Board approved of extensions to Public Utilities in an amount totalling \$1,009,000, covering eleven applications. These are shown in the Summary in the list of "Orders issued by the Board."

FLOATING INDEBTEDNESS

(Section 59 (d) of Part IV, R.S.O. 1937, C. 60) (as re-enacted by O. S. 1939, C. 47, s. 26 (1))

Under this legislation the Board issued Orders in 1945 in respect to two Municipalities authorizing a debenture issue of \$50,000.00. It should be noted that this meant a considerable saving of expense to the Municipality concerned, as a Special Act of the Legislature would otherwise have been necessary.

RETIREMENT OF UNMATURED DEBENTURES

(Section 59 (dd) of Part IV, R.S.O. 1937, C. 60, as enacted by O.S. 1939, C. 37, s. 26 (1))

Seven Municipalities took advantage of this legislation, which came into effect on April 27th, 1939, and applied to the Board for authority, without assent of the electors, to retire certain of their debentures redeemable before maturity. The total amount authorized by the Board was \$2,573,455.77.

ASSESSMENT APPEALS

There were seven Assessment Appeals to the Board during 1945, pursuant to Section 84 of "The Assessment Act" (R.S.O. 1937, C. 272), involving property assessed at \$3,711,511.00. Formal hearings were held in respect to all of them, four of the appeals being dismissed and revisions in the assessment rolls being ordered in respect to the other three.

Copies of the Board's written decisions will be found in the Summary, indexed under "Assessment Appeals", "Decisions of the Board" and also under the names of the Parties.

VALIDATION OF MUNICIPAL BY-LAWS AND DEBENTURES

(Section 64 of Part IV, R.S.O. 1937, C. 60)

One hundred applications were made to the Board in 1945 for validation of Municipal By-laws and certification of the debentures authorized thereunder. The total of such debenture issues was \$8,326,833.01.

While purchasers of debentures are frequently satisfied with Orders of the Board under Section 70 of the Board's Act, it has been found, particularly in regard to the large issues, that a further Order of the Board validating By-law and providing for certification of the debentures, facilitates the marketing of the issue.

PLANS OF LAND SUBDIVISIONS

Under "The Planning Development Act" (R.S.O. 1937, C. 270), (amended O. S. 1941, C. 55, S. 24), "The Land Titles Act" (R.S.O. 1937, C. 174, S. 112) and "The Registry Act" (R.S.O. 1937, C. 170, S. 83 (15)), one hundred and fifty-five plans were presented to the Board in 1945 for approval and certification.

Before disposing of these applications the Board confers with the Surveys Branch of the Department of Highways and the Planning and Development Department.

PROVINCIAL RAILWAYS

Extensions to and improvements of Railways operating under Pro Charter in 1945 as reported to the Board will be found in the Summary, arranged alphabetically under the names of the several systems reporting.

Annual Reports, to December 31st, 1945, by Railway Companies under the Board's jurisdiction were received, of which a summarized tabulation has been prepared for publication herein. The Board has no means of auditing these reports as received and cannot therefore guarantee that the figures taken therefrom are correct or accurate.

Under "The Railway Act" there were three applications to the Board in 1945.

A tabulation of Accident Reports received by the Board from Provincial Railways during the year 1945 is included in the Summary and shows that twenty-two persons were killed and one thousand nine hundred and twenty-five injured during the year.

PUBLIC VEHICLE AND COMMERCIAL LICENSES

Pursuant to "The Public Vehicle Act" (R.S.O. 1937, C. 289), and "The Commercial Vehicle Act" (R.S.O. 1937, C. 290), no Public Vehicle or Commercial Vehicle License respectively, may be issued by the Department of Highways without the approval of the Board being first obtained as evidenced by a Certificate of Public Necessity and Convenience of the said Board furnished to that Department, and then only in accordance with such Certificate. Upon the granting of a Certificate by the Board the Department may then, in its discretion, issue or refuse a license.

The Board set aside twenty-seven days during the year for hearing the applications for Certificates of Public Necessity and Convenience. In addition the Board has set aside each Friday morning to deal with the matter of transfers and other details brought before it by the Public Vehicle Division.

During the year ninety-three applications were made for Public Vehicle Licenses and five hundred and eighty-three for Commercial Vehicle Licenses. These include applications for extensions to and clarification of existing licenses, and the following is a classification of these and the disposition made of same:—

	Public Vehicle	School Vehicle A	B	C	D	E	F	H	Total	
Applications Received	93	199	28	1	131	45	97	263	18	676
Applications Granted	63	197	9	0	79	31	83	216	8	489
Applications Dismissed	15	2	18	0	36	6	6	28	7	116
Applications Cancelled	1	0	0	0	4	1	6	10	0	22
Applications Withdrawn	3	0	0	0	2	1	0	2	2	10
Applications Reserved	11	0	1	1	10	6	2	7	1	39

In supporting an application before the Board, the applicant may appear in person or be represented by his solicitor, or, under exceptional circumstances, if unable to attend, may submit evidence in the form of letters, petitions, or affidavits. The Board hears and considers the evidence for and against and also takes into consideration the facilities extended by existing licensed operators, and its decision is based on whether public necessity and convenience requires the service for which the application is made. The Board has required that sufficient evidence be filed with each application for a license or extension to a license to justify the application being listed for hearing. This has tended to shorten the list as well as to insure that applications are supported when listed for hearing.

All transfers of Public Vehicle and Public Commercial Vehicle Licenses are subject to the approval of the Board and care is taken to prevent anything that might appear to be trafficking in licenses. Transfers of important licenses are usually made the subject of a Hearing and evidence is heard for and against.

Through the co-operative efforts of the Department of Education and the Public Vehicle Division of the Department of Highways, an effort was made to have all motor vehicles carrying school children licensed under a school bus permit. These applications were dealt with by the Board and permits issued for which no fees were charged and the result has been that one hundred and ninety-nine School Bus applications were received during the year. Of these, one hundred and ninety-seven were granted and two applications dismissed. The chief objective of this effort has been to require all such vehicles to carry insurance as provided by "The Public Vehicle Act"

REDEMPTION CLAUSE IN DEBENTURE BY-LAWS

("The Municipal Act" (R.S.O. 1937, C. 266, S. 305 (15) (d))

By an amendment in 1944 (C. 39, S. 22 (5)), to Section 305 (15) of "The Municipal Act" the inclusion in a debenture By-law of a provision for redemption of

all or a portion of the debentures at the option of the Corporation is now mandatory. This Board's approval of Notice to be given on such redemption, in addition to the Statutory Notice, is required by paragraph (d) of the said subsection (15).

RESTRICTED AREAS

Under Section 406 of "The Municipal Act" (R.S.O. 1937, C. 266), (as re-enacted by O.S. 1941, C. 35, S. 13), the Board considered sixty-three applications for approval of Municipal By-laws placing restrictions on certain areas as to use of land, the erection and use of buildings thereon; also sixty-six applications for variation of restricted areas already established. The applications granted are shown in the Summary in the list of "Orders of the Board."

RETIREMENT OF UNMATURED DEBENTURES

(Section 59 (dd) of Part IV, R.S.O. 1937, C. 60 as enacted by O.S. 1939, C. 37, S. 26 (1).)

Eight Municipalities took advantage of this legislation, which came into effect on April 27th, 1939, and applied to the Board for authority, without the assent of the electors, to retire certain of their debentures redeemable before maturity. The total amount of the new debentures authorized by the Board was \$1,779,455.17.

REVENUE

By Ontario Statutes, 1939, Chapter 47, Section 26 (3), Section 107 of "The Ontario Municipal Board Act" being the section respecting the Board's fees, was repealed and re-enacted. The new section came into effect on the 27th day of April, 1939, and the fees are now payable in cash ON THE APPLICATION instead of Law stamps on the Board's Order.

During 1945 the Board's fees on applications amounted to \$37,838.61. In this amount is included the fees on applications for Public Vehicles and Public Commercial Vehicle Licenses—collected by the Department of Highways and credited to the Board.

SUPERVISED MUNICIPALITIES

Pursuant to the provisions of "The Department of Municipal Affairs Act", the Board in 1945 considered and approved plans for funding and refunding the bonded indebtedness of the Corporations of the City of Windsor and the Town of Haileybury, and of the Board of Trustees of the Roman Catholic School Board of the City of Ottawa. One application for variation of a water and sewer area rate was also approved.

VALIDATION OF MUNICIPAL BY-LAWS AND DEBENTURES

(Section 64 of Part IV, R.S.O. 1937, C. 60)

Fifty applications were made to the Board in 1945 for validation of Municipal By-laws and certification of the debentures authorized thereunder. The total of such debenture issues was \$8,326,833.01.

While purchasers of debentures are frequently satisfied with Orders of the Board, under Section 70 of the Board's Act, it has been found, particularly in regard to the larger issues, that a further Order of the Board, validating the By-law and providing for certification of the debentures, facilitates the marketing of the issue.

FORMS

The Board has (for distribution to parties interested) the following forms and specifications, namely:—

1. The Board's Rules of Practice and Practice Forms.
2. Regulations, Specifications and forms respecting Railways.
3. Standard Specifications for Bridges, Viaducts, Trestles or other structures.
4. Memorandum of material required in support of application for approval of undertaking capital expenditure involving debenture issue, under Section 70 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60).
5. Forms of By-laws and Notices which may be used when carrying out the provisions of Sections 280 and 305 of "The Municipal Act" (R.S.O. 1937, C. 266) in respect to voting on Money By-laws.

6. Forms for Annual Reports by Railway Systems.
7. Forms for Reports as to Examination of Motormen.
8. Forms for Reports of Accidents by Railway Systems.
9. Directions for guidance of applicants under subsection (2) of Section 407 of "The Municipal Act".
10. Tariff of the Board's Fees.
11. Forms under "The Planning and Development Act" with directions for guidance of applicants thereunder.
12. "The Telephone Act".
13. Form of Annual Report to be furnished to the subscribers to a Telephone System established under Part II of "The Telephone Act".
14. Instructions for preparation of Annual Report as mentioned in No. 13.
15. Pamphlet containing information regarding Municipal Telephone Systems and including:—
 - (a) Form of By-law providing for the establishment of a telephone system under Part II of "The Telephone Act".
 - (b) Form of By-law providing for the issue of debentures to pay for the cost of establishing a telephone system under Part II of "The Telephone Act".
 - (c) Form of Account for use by Telephone Companies using the "Discount System" of Collections.
 - (d) Form of Municipal Debentures—Instalment Plan.
16. Form of By-law to regulate the management and operation of a telephone system established under Part II of "The Telephone Act" (draft form).
17. Draft Form of By-law to regulate the management and business of a telephone company.
18. Form of Petition praying for the establishment or extension of a telephone company under Part II of "The Telephone Act".
19. Form of By-laws granting to a telephone company the right to use the highways of a Township.
20. Form for Return by Municipality, operating a telephone system.
21. Form for Return by Company, etc., operating a telephone system.
22. Form for Tariff of Tolls for telephone system.
23. Form for Return by Telephone Companies required by Order of the Board to set up a reserve for depreciation.

MISCELLANEOUS MATTERS UNDER THE BOARD'S JURISDICTION

Copies of the Board's written Decisions and a list of Orders issued in 1945 appear in the Summary. These relate to:—

Annexations and amalgamations—Section 20 and 23 of "The Municipal Act."

Arbitrations—"The Niagara Parks Act" and "The Public Works Act."

Assessment Appeals—Section 84 of "The Assessment Act."

Assessments—Fixed—Section 405 (1), paragraph (b) of "The Municipal Act" (as re-enacted by O.S. 1941, C. 35, s. 12, s.s. (1)).

Bridges—Relief from rebuilding—Section 480 of "The Municipal Act."

Detachment of farm lands from urban Municipalities—Section 21 of "The Municipal Act."

Extension of Debenture Issue Period—Section 305 (11) and (12) of "The Municipal Act."

Extension of Municipal Utilities—Section 407 (2) of "The Municipal Act."

Fuel, approval of By-laws for purchase, storage and sale of—Section 405 (38) of "The Municipal Act."

Highways—Closing of, by Department of Highways—Section 79 (a) of "The Highway Improvement Act."

Highways, Narrow—Section 502 (2) of "The Municipal Act."

Improvement Districts—Erection of—Sections 44 (a) and (e) of "The Municipal Act."

Increased Borrowings by Municipalities—Section 339 (2) of "The Municipal Act."

Interest Rate—Reduction of on debentures—Section 310 of "The Municipal Act."

Lanes—Opening and paving of—Section 29 (3) of "The Local Improvement Act."

Legislation, Special—Approval of By-laws under.

License Fee, approval of fixing of, to residents of a Municipality owning and using a bicycle on any highway thereof—Section 420 (11) and 423 (3) of "The Municipal Act."

Local Improvements, approval of undertaking of and passing of a By-law therefor—Section 8 of "The Local Improvement Act."

Local Improvements, approval of abandonment of part of work—Section 18 of "The Local Improvement Act."

Plans (Land Subdivision), Approval of—"The Planning and Development Act," "The Land Titles Act" and "The Registry Act."

Redemption Clause, Approval of in Debenture By-laws—Section 305 (15) (d) of "The Municipal Act."

Restricted Areas, Approval of By-laws for establishment of—Section 406 of "The Municipal Act" (as re-enacted by O.S. 1941, C. 35, s. 13).

Restricted Areas, repeal of, or amendments to—Section 406 of "The Municipal Act" (as re-enacted by O.S. 1941, C. 35, s. 13).

Retirement of unmatured debentures—Section 59 (dd) of "The Ontario Municipal Board Act" (as enacted by O.S. 1939, C. 47, s. 26 (1)).

Sinking Funds, use of Surplus and authority to dispense with further levy for, where amount in Sinking Fund sufficient—Section 321 (a) and (b) of "The Municipal Act" (as enacted by Section 18, O.S. 1939, C. 30).

Supervised Municipalities, Refunding Plans—"The Department of Municipal Affairs Act."

Supervised Municipalities, Variation in Local Improvement Rates—Sections 32 (h) and 64 (b) of "The Department of Municipal Affairs Act."

Tariff of Fees, Approval of Board's—Sections 106 and 107 of "The Ontario Municipal Board Act."

Tax Rate, Approval of further debt and levy therefor—Section 315 (2) of "The Municipal Act."

Telephone Companies and Systems—

Validation of Municipal Debentures—Section 64 (Part IV) of "The Ontario Municipal Board Act."

Vote of Electors, Applications to dispense with—Section 69 of "The Ontario Municipal Board Act."

Wards, Division of Township into—O.S. 1943, C. 49, Section 1.

Weigh Scales and weighing of coal and coke—Section 408 (11) (c) of "The Municipal Act."

(Sgd.) M. B. SANDERSON,

Secretary.

THE ONTARIO MUNICIPAL BOARD

REPORT OF THE INSPECTOR OF TELEPHONE SERVICE FOR THE YEAR 1945

The following applications under the provisions of "The Telephone Act" (R.S.O. 1937, Chapter 261) were dealt with by the Board in 1945:

Under Section 31: For the approval of the purchase of an existing telephone system or any portion thereof, by a municipality	2
Under Section 51: For an Order approving appointment of Commissioner to fill vacancy	1
Under Section 56: For the approval of by-laws of a municipal telephone system	3
Under Section 58: For an Order prescribing the date for holding the annual meeting of subscribers	6
Under Section 79: For the approval of municipal by-laws granting the right to erect poles and wires upon the highways	8
Under Section 87: For the approval of by-laws of a telephone company	8
Under Section 92: For the consent to erection of poles and wires parallel with existing lines	1
Under Section 93: For an Order preventing the duplication of pole leads upon the same highway	1
Under Section 96: For the approval of agreements providing for interchange of service	6
Under Section 101: For the approval of sale of telephone systems	5
Under Section 103: For the approval of charges for telephone service	43
Under Section 109: For authority to expend a portion of the moneys set aside for depreciation, upon new construction or extensions or in the purchase of securities	32
Total Number of Applications	116

The continued policy of the Board in endeavouring to secure an amicable settlement in matters in dispute between the applicant and respondent has proved successful in the majority of cases.

In addition to the applications and complaints referred to, a vast amount of correspondence relating to telephone matters has been dealt with by the Board's Telephone Department, through the medium of which much information and assistance has been given to municipalities, companies and other persons interested, and many difficulties which might otherwise have necessitated a formal application and public hearing have been satisfactorily adjusted.

The number of telephone systems within the jurisdiction of Ontario of which the Board has record is 560, operating 144,615 telephones, 36,062 miles of pole lead carrying 210,781 miles of wire and representing an investment of over \$12,500,000.00.

During the year the following changes were made in the Board's records of telephone systems coming within its jurisdiction:

The Plant and Assets of the Champlain Point Telephone Company, Limited were acquired by The Bell Telephone Company of Canada.

The Plant and Equipment of the Slate River Local Municipal Telephone System were acquired by the Corporation of the City of Fort William.

The Plant and Equipment owned and operated by Mr. M. Foster under the name of the Yarker Telephone Company were acquired by the Yarker Rural Telephone Company, Limited.

There are ten systems owned and operated by municipalities under the provisions of Part I of "The Telephone Act" viz: The Cities of Fort William and Port Arthur, the Towns of Cochrane, Dryden, Fort Frances, Kenora, Keewatin and Rainy River, and the Townships of Alberton and Caledon.

One hundred and sixteen systems are now established and operating under Part II of "The Telephone Act" and furnishing service in two hundred and seventy-seven towns, villages and townships.

There are seventy systems owned and operated by individuals or partnerships of less than five persons, three hundred and forty-three by Incorporated Telephone Companies, ten by Incorporated Companies other than Telephone Companies, and ten by Federal and Provincial Government Departments and Commissions.

In addition to the before-mentioned systems, the Forestry Branch of the Department of Lands and Forests is operating an extensive system in connection with its work of fire prevention. This system comprises 860 telephone stations, 2,283 miles of pole lead, 1,097 miles of tree line, and 6,272 miles of wire, the total investment being \$356,077.23.

Detailed statistics and other information relative to these systems will be found in the appendix to this report, entitled "Telephone Systems, 1946".

(Sgd.) JAS. A. McDONALD,

Inspector of Telephone Service

*Note:—Data as of December 31st, 1944.

Statistics for 1945 not yet available.

MEMORANDUM OF LEGISLATION

EXCLUSIVE OF SPECIAL ACTS, UNDER WHICH THE ONTARIO MUNICIPAL BOARD EXERCISES JURISDICTION

Additional Expenditures: By Subsection 3 of C. 40, O.S. 1941, which is an amendment to subsection (1) of Section 70 of the Board's Act, authority is given to the Board to approve of expenditures "not provided for in the estimates of the current year." This approval is given only where it can be shown that such expenditure will not create a deficit at the end of the year's operations.

Annexations: R.S.O. 1937, C. 266, Section 16, 17, 20 and 23 (as re-enacted by O.S. 1939, C. 30, Section 2).

The Corporation of any municipality may, by By-law, ask the Municipal Board for amalgamation or annexation. After a hearing, the Board may make rules and regulations as to the Government, etc., of the Municipality as formed.

Any Order of annexation or amalgamation (Subsection 2 of Section 14) shall take effect only after and when confirmed by Act of the Legislature.

Arbitrations: R.S.O. 1937, C. 62, Section 22.

Reference may be made to the Board for the fixing of the amount of compensation to be paid to owners for lands and rights-of-way taken by expropriation under "The Power Commission Act" where parties are not in agreement.

R.S.O. 1937, C. 56, Section 79:

Reference may be made to the Board for the fixing of the amount to be paid by the Department of Highways for land expropriated under "The Highway Improvement Act" where parties are not in agreement.

R.S.O. 1937, C. 56, Section 79a, as re-enacted by O.S. 1945 (1st Session) C. 9, Section 8.

Approval of closing, by the Department of Highways, of certain County Township or other roads which intersect or run into a controlled access highway.

O.S. 1942, C. 34, Section 41:

An expropriating body may elect that the amount of compensation for lands taken shall be heard and determined by the Ontario Municipal Board.

Assessment Appeals: R.S.O. 1937, C. 273, Sections 83 and 84:

The Board may hear an appeal from the County Judge in assessment matters where the amount involved exceeds \$10,000.00 in a municipality without county organization and \$40,000.00 in any other municipality.

"The Grand River Conservation Act"—O.S. 1938, C. 15, Section 15:

The Board is appointed to hear appeals from the findings of the Board of Engineers as to the compensation to be paid to owners for lands expropriated; also appeals from the Board of Engineers as to the amounts to be contributed by the separate municipalities toward the cost of the work.

Assessments, Fixed: O.S. 1942, C. 34, Section 42 (5 and 6):

The Ontario Municipal Board may, upon the application of certain municipalities approve of an agreement between the municipalities and Wartime Housing Ltd., or may amend or vary the agreement for fixing the assessment and taxation of lands and houses erected by Wartime Housing Ltd.

Section 405 of "The Municipal Act" sub-section 1 (b) (as re-enacted by O.S. 1941, C. 35, Section 12 (1)):

No fixed assessment shall be granted by any municipality and no By-law shall be passed therefor until approval has been given by the Ontario Municipal Board, and then only after a vote of the ratepayers of the municipality has been taken.

The Beaches and River Beds Act—R.S.O. 1937, C. 34:

Gravel may be taken from shores or streams, if approval therefor is given by the Ontario Municipal Board.

Bridges—R.S.O. 1937, C. 266, Section 480 (9):

The Ontario Municipal Board may grant relief from the rebuilding of a bridge. R.S.O. 1937, C. 266, Section 483:

Provides for the issue of debentures for re-flooring of a bridge, with the approval of the Ontario Municipal Board, without a vote of the ratepayers.

R.S.O. 1937, C. 56, Section 30:

Where there is a disagreement between two or more municipalities in respect to a bridge or highway on a boundary line between Counties, the matter shall be decided by the Ontario Municipal Board.

Busses—R.S.O. 1937, C. 266, s. 424 (4):

The Ontario Municipal Board may from time to time increase or decrease the rates and fares charged once in any one year within a defined area within a Township on the application of the Township in consequence of any deficit or surplus resulting in the operation of the service.

By-laws—R.S.O. 1937, C. 266, Section 560:

A municipality may apply to the Board for approval as to the form of a municipal by-law.

Capital Expenditures—R.S.O. 1937, C. 60, Section 70:

A municipality shall not proceed with or authorize any works or provide any moneys for any undertaking, the cost of which is to be provided for by the issue of debentures, until the approval of the Ontario Municipal Board has been obtained.

Cemeteries—R.S.O. 1937, C. 351, Sections 45 and 46:

A Municipality may, with the approval of the Ontario Municipal Board incorporate additional lands for cemeteries and close road allowances.

Closing of Roads—R.S.O. 1937, C. 56, Section 79:

Subject to the approval of the Ontario Municipal Board, the Department of Highways may close any County, Township or other road which intersects or runs into a Divided Highway.

Detachment of Farm Lands—R.S.O. 1937, C. 266, Section 21:

The Board may hear and determine any application for the detachment of Farm Lands from any municipality.

Dissolution of Corporations—R.S.O. 1937, C. 266, Section 2:

Upon the application of any municipality, the Board may dissolve the municipality after a public hearing.

Extension of Debenture Issue Period Under Money By-law—R.S.O. 1937, C. 266, Section 305 (11 and 12):

The Board may, upon the application of any municipality, extend a debenture issue period.

Extension of Time to Pass Money By-laws—R.S.O. 1937, C. 266, Section 297:

Where a By-law has been passed with the approval of ratepayers, it must be passed by the Council within six weeks after the voting, but by sub-section (5), the Municipal Board may, upon the application of the Council extend the time for the passing of the By-law.

The Federal District Commission Act—R.S.O. 1937, C. 276, Section 1:

The Councils of Ottawa, Carlton, Russell and any municipality in either of the said Counties, may, with the approval of the Municipal Board, convey to the Federal District Commission any Highway, etc., vested in the municipality upon such terms and subject to such conditions as may be agreed upon.

Fire Halls—Purchase of land for and erection thereof and purchase of Fire Engines by Urban Municipalities: R.S.O. 1937, C. 266, Section 407 (16) (b):

The Board's approval is required to an issue of debentures when debentures issued for the same purpose under a By-law previously passed are outstanding and unpaid.

Floating Indebtedness—R.S.O. 1937, C. 60, Section 59 (d), as re-enacted by O.S. 1939, C. 47, Section 26 (1) and amended by O.S. 1941, C. 40, Section 1:

The Board is given power to allow a municipality to issue debentures to cover a floating indebtedness.

Under the amendment of 1941, it is also provided that a municipality may issue debentures with the approval of the Board, but without the assent of the electors, for retiring debentures which are redeemable before maturity, and raising a sum sufficient to pay off the said debentures.

Franchise, Granting of—R.S.O. 1937, C. 277, Sections 4, 6 and 8:

A franchise for the construction of railway, or gas, heat, or light, shall not be granted by a municipality without the approval of the Board, after a hearing.

Fuel and Food—R.S.O. 1937, C. 266, Section 405 (38):

By-laws of municipalities may be passed for buying, storing and selling of fuel and food, providing the money therefor, with the approval of the Board.

Highways—

R.S.O. 1937, C. 266, Section 468:

A County may abandon a Highway with the approval of the Board.

R.S.O. 1937, C. 266, Section 348 (12):

The Board may appoint one of three arbitrators for the fixing of compensation payable in respect to street widening.

R.S.O. 1937, C. 266, Section 502 (2):

A Municipality may with the approval of the Board, open or establish a highway of less width than 66'.

R.S.O. 1937, C. 270, Section 12:

In lieu of the approval of the interested municipalities, no highway shall be established, laid out, widened, altered, diverted, stopped up or closed in any urban zone or joint urban zone, without the approval of the Board.

Improvement Districts—Erection of—O.S. 1943, C. 16, Sections 1 and 2.

Increased Borrowings By Municipal Councils—R.S.O. 1937, Chapter 266, Section 339 (2):

Provides with the approval of the Board for an increase in the amount to be borrowed by a Municipal Council in any one year to meet current expenses until taxes are collected.

Incorporation of Towns in Unorganized Territory—R.S.O. 1937, C. 266, Section 18:

Subject to Subsection (2) of Section 13 of the same Act.

Interest Decrease or Increase on Municipal Debentures—R.S.O. 1937, C. 255, Section 310 (as re-enacted by O.S. 1938, C. 22, Section 6):

Provides for a decrease or increase in the rate of interest on any municipal debentures with the Board's approval.

Land Subdivision Plans—R.S.O. 1937, C. 170, Section 85; C. 174, Section 112 and C. 270, as amended by O.S. 1941, C. 55, Section 24:

All Plans of Subdivisions, before registration, must be submitted to and approved by the Board.

License Fee For Bicycles—R.S.O. 1937, C. 266, Section 420 (11) as amended by O.S. 1941, C. 35, Section 15 (2):

The fixing of an annual fee for the operation of bicycles in municipalities by residents thereof must be approved by the Board.

Local Improvements—

R.S.O. 1937, C. 269, Section 8:

Approval of the Board of Construction By-laws for local improvements.

R.S.O. 1937, C. 269, Section 27 (3):

Fixing of the apportionment of the cost by the Board.

R.S.O. 1937, C. 269, Section 29 (3):

Approval by the Board of a By-law for the opening etc., of lanes.

R.S.O. 1937, C. 269, Section 29 (3):

Provides for the hearing by the Board of Claims for exemption from assessment for the opening, etc., of lanes.

R.S.O. 1937, C. 269, Section 19:

Approval of the Board as to the deviation in the course or location of local improvements.

R.S.O. 1937, C. 269, Section 6:

Hearing by the Board of objections against widening or extension of a street, or construction of a bridge.

R.S.O. 1937, C. 269, Section 18:

A portion of the work may be abandoned with the approval of the Board.

R.S.O. 1937, C. 269, Section 10 (2):

Where petitions are filed against a local improvement work, such objections will be considered by the Board.

Ontario Municipalities Fund—R.S.O. 1937, C. 331, as re-enacted by O.S. 1941, C. 35, Section 9:

Disposition of moneys held by a Council in the Ontario Municipalities Fund for educational purposes, with the approval of the Board.

Parks—R.S.O. 1937, C. 285, Section 12:

Approval of By-laws setting aside a part of a Park for athletic purposes.

The Public Utilities Act—R.S.O. 1937, C. 286, Section 32:

Gives power to a municipality, with the approval of the Board, for disposing of properties purchased for the Public Utilities Commission and not required for public utilities.

The Public Health Act—R.S.O. 1937, C. 357, Section 16:

Provides for an application to the Municipal Board for an Order prescribing the manner in which a sewerage project shall be carried on. The Board has power to stop up and close highways, impose such terms and conditions as may seem just and remove restrictions where necessary, and fix compensation to be paid.

Public School Areas—R.S.O. 1937, C. 357, Section 16:

The Board has power to appoint a Referee to fix School Areas, and to adopt his Report respecting adjustment of assets and liabilities of several School Sections involved.

Railways—R.S.O. 1937, C. 259.

Redemption of Debentures—R.S.O. 1937, C. 266, Section 305 (15), (d):
Approval of notice of

Repeal of Money By-Laws as to Residue Not Required—R.S.O. 1937, C. 266, Section 311 (2):

Restricted Areas—R.S.O. 1937, C. 266, Section 406 (re-enacted O.S. 1941, C. 35, Section 13):

Approval of By-laws of municipalities prohibiting the use of land and the erection and use of buildings for certain purposes and regulating the cost and the type of construction thereof, which By-laws shall not come into force until approval is granted.

Retirement of Unmatured Debentures—O.S. 1939, C. 47, Section 26, as amended by O.S. 1941, C. 40, Section 1:

This amendment to the Ontario Municipal Board Act, gives the Board power to approve of the issue of debentures, without the assent of the electors, for the retirement of debentures which are redeemable before maturity, and of the issue of debentures to pay for the money required for such purposes.

Sewage and Sewage Disposal Works—R.S.O. 1937, C. 299, Section 101:

Subsection 12 provides for the stopping up of a highway for the purpose of sewage system, with the approval of the Board, upon an application made to it for such purpose, and imposing terms and conditions.

Sinking Funds—

R.S.O. 1937, C. 266, Section 326:

Approval of the Board is necessary to the purchase of debentures by a municipality from its Sinking Fund. The total investment of Sinking Funds of a Municipality in its own debentures is limited to 25% of the total fund.

O.S. 1939, C. 30, Section 18:

Use of surplus in the Sinking Funds, where there is sufficient to take care of all the debentures.

O.S. 1939, C. 30, Section 18:

Authority to a municipality, with the approval of the Board, to dispense with a further levy where the amount in the Sinking Fund is sufficient to take care of the debentures.

Sterling, Issue of Debentures In—R.S.O. 1937, C. 266, Section 306 (3):

Debentures may be issued in sterling with the approval of the Board.

Suburban Area Development Act—R.S.O. 1937, C. 271, Section 6:

Approval of the Board of an agreement with reference to setting up of a Suburban area development.

Supervision of Municipalities—R.S.O. 1937, C. 59.

Tariff of Board's Fees—R.S.O. 1937, C. 60, Section 107; as re-enacted by Section 26 (3), C. 47, O.S. 1939:

The fixing by the Board, with the approval of the Lieutenant-Governor-in-Council, of a tariff of fees to be collected by the Board for the performance of its duties.

Tax Rate—R.S.O. 1937, C. 266, Section 315, Subsection (2):

A Municipality may levy a sum greater than 2½% on the dollar of the assessed value or properties, with the approval of the Board.

This section provides that a Council may not levy more than 2½ % on the dollar for municipal purposes.

Telephones—R.S.O. 1937, C. 261:

Provides for the Board's jurisdiction over municipal and other telephones within the province.

Towns Erected Into Cities—R.S.O. 1937, C. 266, Section 19 (amended O.S. 1944, C. 39, Section 2):

The Municipal Board may erect a town having a population of not less than 15,000 into a City and declare the name which it is to bear.

Township—R.S.O. 1937, C. 266, Section 30:

Separation, by the Municipal Board, of a junior Township in unorganized territory from a union of Townships.

Townships Erected Into Cities—R.S.O. 1937, C. 266, Section 19 (amended O.S. 1944, C. 39, Section 2):

The Municipal Board may erect a township having a population of not less than 25,000 into a City and declare the name which it is to bear.

Townships, Incorporation of—R.S.O. 1937, C. 266 (re-enacted O.S. 1944, C. 39, Section 3).

Townships, Unorganized—R.S.O. 1937, C. 266, Section 426:

Passing of By-laws by the Council of a Township in an unorganized territory, having a population of not less than 5,000 and which has been declared, by the Order of the Municipal Board, to be a Township, and the erection of such Township or part of it into a Town.

Validation of Debenture By-laws—R.S.O. 1937, C. 60, Section 64:

Authority to validate debenture By-laws and to certify the debentures to be issued thereunder; after the issue of the validation Order the By-law is binding upon the Corporation and its validity may not be contested or questioned for any cause whatsoever.

Villages Erected Into Towns—R.S.O. 1937, C. 266, Section 19: (amended O.S. 1944, C. 39, Section 2):

The Municipal Board may erect a village having a population of not less than 2,000 into a Town and declare the name which it is to bear.

Villages, Police—R.S.O. 1937, C. 266, Section 527 (4):

Approval by the Board of an extension of the boundaries of Police Villages. R.S.O. 1937, C. 266, Section 526 (3):

Approval of the formation of Police Villages.

Vote of Electors—R.S.O. 1937, C. 60, Section 69 (d):

The Board may, where the assent of the electors qualified to vote on Money By-laws is required, dispense with the vote of the ratepayers after due enquiry, providing that a Public Hearing is held and that all the members of the Board are unanimous in dispensing with such vote.

Wards, Division of Cities, etc., Into—R.S.O. 1937, C. 266, Section 44:

The division of Cities and Towns into Wards, with the approval of the Municipal Board.

Water Rates, Fixing of—O.S. 1940, C. 20, Section 1:

The determination by the Board of the application by any municipality to confirm, vary, or fix rates charged or to be charged in connection with water supplied thereto by any other municipality.

Weigh Scales, and Weighing of Coal—R.S.O. 1937, C. 266, Section 408:

With the approval of the Municipal Board, and within the limitations, restrictions and under the conditions prescribed by an Order of the Board. By-laws may be passed by municipalities as to the weighing of coal and coke.

Works Ordered by the Dominion Railway Board, and the Ontario Municipal Board—R.S.O. 1937, C. 266, Section 307:

As to borrowing of money by a municipality for works ordered by these two Boards.

In addition there is much legislation which comes before the Private Bills Committee, referring particularly to the municipalities asking for such legislation, in which certain matters are referred to the Board for approval.

G. W. Mason, Esq., K.C. Counsel for Respondent

DECISION OF THE BOARD

This is a claim for damages by flooding, arising from the construction of a culvert under Highway Number 21, made by B. R. Robinson and his wife, Gertrude M. Robinson. The claimants purchased Lot 8 in the 1st Concession of Township of Goderich in the County of Essex from George Johnston, in March, 1942, for \$8,000.00, giving in payment therefor a conveyance of a house in Windsor and a Mortgage back for \$3,300.00. The farm is immediately west of Highway Number 21, and extends to the lake. The farms in the vicinity, including this farm, are flat and they, as well as the farms east of the highway, drain towards the lake.

The claimants contend that the water from the road ditch should not be allowed to come on their land, but that the ditch should be deepened so that it could take the water southerly to a creek. In cross-examination the male claimant said that he realized that he could have constructed a ditch through the farm to drain it but he had neither the money nor the time to do this.

After purchasing the farm, claimant planted some fruit trees in the places where some trees had died. He cultivated some of the fields, but claims that his crops were damaged by flooding, to such an extent that he was unable to pay the mortgage interest and, in April, 1945, he gave a Quit Claim Deed to his Mortgagee. He says that, after the Fall rains in 1942, he noticed the flooding. He ploughed a furrow as light as he could with a plough, two or three inches deep, and thought this would take care of the water, but he did not carry this to the gully and the back fields of his farm became flooded and remained covered with water. From this, the water backed up into the low places in his other fields and damaged his crops. He said the lowest part of his farm is shown by the wavy line on the plan, Exhibit Number 10A, filed on his behalf.

Robert W. Code, Ontario Land Surveyor, London, called by the claimants, produced a plan, Exhibit Number 1, showing the claimants' land and the ditch. He said by deepening the ditch, the water could be taken along the road to the creek. He admitted, in cross-examination, that if there were no road, the water from East of the road would flow to the claimants' lands and that the road and the ditches did not bring any more water on their lands.

Benson Sowerby, a farmer living one and one-half miles from Claimant's farm, said that he had often noticed water on this farm and that, in 1944, he helped cut the Fall wheat which was only a partial crop and that this farm, although it had not been cultivated for many years, should produce as good a crop as other farms in the vicinity. He said the road had been widened about four feet and new ditches had been constructed since the road was taken over by the Department of Highways.

For the Respondent, A. F. Flintoft, Ontario Land Surveyor, said that he took the levels on this farm in the Fall of 1944 and started work on the plan, Exhibit D, in May. He was on the farm in May, 1945. There were no ditches on the farm but there was some water in the ditch at the culvert.

Hugh C. McPherson, Engineer for the Department of Highways, stationed at Goderich, had been in charge of this road since 1934, when it was taken over by the Province. He said the road had not been widened; no new ditches had been constructed; and the only work which had been done was levelling, putting on some new gravel, and cleaning the ditches at the culverts; no cut was made into the fields at any culverts; and that there were culverts every 700 or 800 feet along the road. In 1936, the old 16" culvert was removed because some of the tile were broken and a new 24" culvert put in. The Province uses not less than 24" culverts.

George Johnston, called by the Respondent, said he purchased this farm in 1919. It had been used as pasture land and the buildings had not been occupied. The orchard had not been trimmed for years and he did nothing with it. He repaired the house and lived there for three and one-half years. He tried to cultivate some of the fields and, to drain them, he ploughed furrows five or six inches deep to a gully near the lake. After 3½ years he moved from the farm and rented it as pasture land until March, 1942, when it was purchased by the claimant. There is a swale on the north-west part of the farm. He says that the only time water gave him any trouble was during the Spring freshets and after heavy rains during the Summer and Fall. He says that there is a depression in the field East of the road from which the water drains toward the road and through the culvert to the lake. He said that the water lay on the fields at the back until he put in a furrow to the gully. He said that there were low pockets in the fields but these could be drained by ploughing furrows through to the gully at the back. He said that in 1919 the orchard was in such a condition that he did not think it was worth while to try to save it.

The evidence submitted has not satisfied the Board that any damage has been suffered by the Claimants by reason of the work done on the road by the Department of Highways. The Claim will be dismissed.

The Department shall pay the Board's fee fixed at \$50.00.

DATED at Toronto, this 24th day of July, A.D. 1945.

R. S. COLTER,

Chairman.

W.P. NEAR,

Vice-Chairman.

ASSESSMENT APPEALS

P.F. B-2525.

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, Chapter 272).

BETWEEN:

The Corporation of the City of Windsor

Appellant

—and—

Ford Motor Company of Canada, Limited

Respondent

(Appeal from Decision of His Honour the County Judge respecting corporation income assessment made by the City of Windsor against Ford Motor Company of Canada, Limited.)

L. R. Cumming Solicitor for Appellant

J. B. Aylesworth, K.C.

G. C. Richards

..... Solicitors for Respondent

DECISION OF THE BOARD

The Ford Motor Company of Canada, Limited, was incorporated by Letters Patent dated the 18th December, 1911, to take over the assets and liabilities of Ford Motor Company of Canada, Limited, a Company manufacturing and dealing in Ford Motor cars and accessories at the City of Windsor and throughout Canada. The Rights and Powers of the new Company are enumerated in the Letters Patent (Exhibit 4), and included the right and power

- “(a) To purchase, manufacture and place on the market for sale automobiles, parts of automobiles, motors and devices and appliances incident to their construction or operation;
- “(c) To apply for, purchase or otherwise acquire any trade-marks, patents, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the Company, or the acquisition of which may seem calculated directly or indirectly to benefit the Company, and to use, exercise, develop or grant, licenses in respect of or otherwise turn to account the property, rights or information so acquired;
- “(e) Notwithstanding the provision of Section 44 of the said Act, to purchase, take or acquire by original subscription or otherwise, and to hold, sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds, and other obligations in any other Company, and to pay for such shares, stock, debentures or bonds, either wholly or partly in cash or wholly or partly in shares, bonds, debentures, or other securities of the Company or otherwise, and to vote all shares owned or held by the Company through such agent or agents as the directors may appoint;
- “(h) To invest and deal with the moneys of the Company not immediately required in such manner as may from time to time be determined;
- “(j) To enter into any arrangements with any government authorities, municipal, local or otherwise, that may seem conducive to the Company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the Company may think it desirable to obtain, and to carry on or exercise and comply with any such arrangements, rights, privileges and concessions;
- “(k) To promote any Company or Companies for the purpose of acquiring or assuming all or any of the property and liabilities of this Company, or for any other purpose which may seem directly or indirectly calculated to benefit this Company, and generally to purchase, take on or lease in exchange, or otherwise acquire any real and personal property, and any rights or privileges which the Company may think necessary or convenient for the purposes of its business;
- “(p) To procure the Company to be registered and recognized in any foreign country, and to designate persons therein to represent the Company, and to accept service on its behalf in any suit or legal proceeding;
- “(q) To make advances to customers or others having dealings with the Company, and to guarantee the performance of contracts by any such persons; The operations of the Company to be carried on throughout the Dominion of Canada and elsewhere.

The place within the Dominion of Canada which is to be the chief place of business of the Company is the Township of Sandwich East, in the Province of Ontario.”

That part of the Township of Sandwich East mentioned as the chief place of business of the Company is now within the City of Windsor.

The Company manufactured Ford motor cars and parts and sold these to persons and corporations, called Ford agents, at wholesale prices. It fixed the price at which the cars and parts were to be sold at retail.

Prior to 1923 the Company also sold cars to brokers and exporters for shipment complete to foreign countries. The cars were boxed and shipped to these brokers and exporters generally at New York.

In 1923, the Company decided that these brokers and exporters were not sufficiently developing the foreign markets for Ford products; that because of the high rates of freight and duties on completed automobiles, the price which had to be charged in those markets was too high and that it would be in the interests of the Company to make a change. Shipping a car "knocked down" would decrease the freight rates, and to perform work and labor on the car within the foreign country would decrease the rate of duty, and the cost of cars in those markets could thus be reduced.

Instead of proceeding under its powers (Article p. Exhibit 4) to have the Company registered and recognized in South Africa and India, there was incorporated in each of those countries a Company known as Ford Motor Company of South Africa Limited and Ford Motor Company of India Limited. The proceedings in the formation of these Companies, the Powers contained in the Charters, and the work performed by the Companies is similar. The head office of the South African Company was at Port Elizabeth and the head office of the Indian Company was at Bombay. The capital stock of the South African Company was £200,000 divided into 200,000 shares of £1 each, afterwards increased to £500,000 divided into 500,000 shares of £1 each. The capital stock of the Indian Company was £25,000 divided into 25,000 shares of £1 each, afterwards increased to £75,000 divided into 75,000 shares of £1 each. In each incorporation the liability is limited.

The objects for which the Companies were incorporated are set out in the "Memorandum and Articles of Association" and include the manufacture, purchase and sale of automobiles; the purchase of trade marks and Patents; and the purchase of land; the purchase and disposal of shares and almost every other business which could be carried on by any Company.

The Charter provided that the business of the Company was to be carried on by the Directors, but that the holders of two-thirds of the issued shares could appoint, dismiss, or change directors or officers at any time by notice in writing to the Company and make regulations declaring who should be entitled to sign cheques, &c., on behalf of the Company. As the evidence with reference to both the South African Company and the Indian Company is similar, the Board will refer particularly to the evidence given on behalf of the South African Company.

The South African Company proceeded to acquire land and a "Notarial Deed of Servitude expressed to be between this Company of the one part and the Council of the Municipality of the City of Port Elizabeth" was approved by the Directors on the 12th December, 1939 (No. 56, ex. 14). Buildings were erected and machinery was installed.

Ford cars and trucks were ordered by the South African Company from the Ford Motor Company of Canada Limited in a knocked-down condition. The South African Company assembled these parts; in some cases constructed the bodies, and painted them, and the cars were sold in a completed condition. The cost of the cars and trucks shipped was charged to the South African Company. The cost of transportation and work done by the South African Company and the duty were added to the cost by the South African Company. Dealers were appointed throughout the country and the cars and trucks after completion were sold by the South African Company to these dealers at wholesale prices.

The Ford Motor Company of Canada Limited held all the issued shares except qualifying shares.

The South African Company carried on its business, held its meetings (Exhibit 14), appointed its officers and declared dividends.

Mr. Aylesworth referred to the following as evidence of control of the Company:

- (1) From time to time Ford Motor Company of Canada Limited would issue instructions for the appointment of certain officers or directors and these instructions would be carried out;
- (2) When the Companies' premises were to be enlarged, the Ford Motor Company of Canada Limited was consulted. In one case that Company did not approve the purchase of certain land and the land was not purchased. Ford Motor Company of Canada Limited approved of the plans for enlarging the building, and engineers of that Company were consulted. Ford of Canada was consulted with reference to the amount to be expended;

- (3) From time to time employees of Ford of Canada are loaned to the subsidiary but those employees were paid by the subsidiary. Also men from the subsidiary were at times sent to Ford of Canada to improve their knowledge of the work to be done by them;
- (4) W. R. Campbell, who lives at Windsor, is the Treasurer of Ford Motor Company of South Africa Limited. He is also President of Ford Motor Company of Canada, Limited. There is also an Assistant Treasurer of Ford Motor Company of South Africa Limited. Letters were written to different Banks giving the names of the persons authorized to sign on behalf of the Company (Exhibit 16). These letters were signed by Ford Motor Company of South Africa Limited. The evidence shows that financial statements were sent to the Ford Motor Company of Canada Limited monthly. Ford Motor Company of Canada Limited from time to time asked for payments by Ford Motor Company of South Africa Limited to Ford Motor Company of Canada Limited on account of indebtedness for cars and parts, and also for payment of Dividends.

Ford Motor Company of Canada Limited was assessed for business as carrying on the business of a manufacturer on all Ford properties owned by it in Windsor, 60% of \$5,284,070.00 or \$3,170,440.00, as well as for other properties occupied for the purposes of its business, and paid the taxes thereon in each of the years 1941-2-3. There is no dispute as to these assessments. There is no dispute as to the amount assessed in 1943, 1942 and 1941 for Income received by the Company in 1942, '41 and '40.

In his Judgment allowing the appeal, the Learned County Court Judge referred to the provisions in the Articles of Association, giving certain powers to the holders of two-thirds of the issued shares of the Company by notice in writing to the Company, and particularly those under Section 74:

- (a) Appointment of Director, Managing Directors, Secretary Cashier or other Officer;
- (b) Removal of those officers;
- (c) Fixing the remuneration of those officers;
- (d) Calling a general meeting;
- (e) Making regulations as to the conduct of the business;
- (f) Making regulations as to signing officers;

and he said

"When it is borne in mind that the only holder of two-thirds of the stock must be the Appellant who owns all the stock the completeness of the control of the Appellant is manifest."

Some of these powers were from time to time exercised by the Respondent herein and the learned Judge in his Judgment referred particularly to:

Resolution of March 15, 1929, approving of the action of the Vice-President, instructing South Africa Limited to declare a dividend;

Resolution of April 7, 1930, approving of action of Vice-President in instructing South Africa Limited to cause to be erected premises at a cost not to exceed \$60,000.00;

Resolution of April 24, 1933, approving action of South Africa Limited in granting credit to its dealers not to exceed \$300,000.00;

Resolution of September 13, 1936, directing that the Respondent herein should subscribe for 10,000 shares of stock in South Africa Limited;

Resolution of November 18, 1936, approving of action of its officers in concurring in the recommendation of South Africa Limited providing for an addition to existing premises at a cost of \$100,000.00;

Resolution of February 10, 1938, approving of action of Vice-President, in recommending to South Africa Limited the payment of certain bonuses to employees;

and he also referred to Resolutions of the Directors of South Africa, Limited, reciting requests of the Respondent that certain dividends be declared and concurring in the requests, and he says:

"From these and from many other written documents such as letters and cablegrams as well as from the evidence of Mr. Kew, I am satisfied that in as far as a subsidiary company can carry on business as an agent of its parent company this is a case of such an agency.

"That there is authority for the proposition that one company can act as an agent for another appears to be clear from the Judgment of the Master of the Rolls in Commissioners of Inland Revenue vs. Hanson (1921) 2 K.B. 492."

His Honour must have referred to the statement of Lord Sterndale, Master of the Rolls, at Page 503, where he says:

"There may, as has been said by Lord Cozens-Hardy, M.R., be a position such that although there is a legal entity within the principle of Salomon vs. Salomon & Company (1), that legal entity may be acting as the agent of an individual and may really be doing his business and not its own at all. Apart from the technical question of agency it is difficult to see how that could be, but it is conceivable."

In that case, Sansom, who had been carrying on a lumber business, formed his business into a Joint Stock Company with a capital of 2,500 shares of £10 each, 2499 of these shares were allotted to Sansom. No dividends were paid but from time to time loans were made by the Company to Sansom. Eventually the Company was wound up, and Sansom, who was naturally entitled to practically all the assets, was debited with the loans which had been made to him. Sansom, as holder of the majority of the shares, appointed himself as managing director of the Company and managed the business. The Commissioners of Inland Revenue sought to charge Sansom on Income. It was contended that the Company was an agent for Sansom, and that the loans were really payments on account and should be treated as Income. The Commissioners had found that the Company was a properly constituted legal entity; that it had power to make loans; that loans were made to Sansom and that such loans were not part of Sansom's income.

Lord Sterndale, M.R., said:

"You cannot make a loan to a man out of his own business, and therefore that finding seems to me necessarily to negative the first question which the learned Judge wishes to put.

"An agent cannot make a loan to a principal out of the principal's assets; it is not conceivable; it cannot be done."

It is true that the holders of two-thirds of the shares in Ford Motor Company of South Africa Limited are given greater authority than is usual for shareholders, but does that greater authority constitute the shareholders the body that is carrying on the business of Ford Motor Company of South Africa Limited, so that Ford Motor Company of South Africa Limited is the agent of Ford Motor Company of Canada Limited.

An agent is an appointee of the Principal and has only such authority and power as is given to him by his Principal, and the principal is responsible for debts contracted in his name by his agent. Any profits made by the agent for his principal belongs to the principal and is at his disposal at all times. Ford Motor Company of South Africa Limited obtained its powers through the Memorandum and Articles of Association issued under the authority of the Companies Act of South Africa (1892) to seven men who were subscribers for shares in the Company—not from its shareholders. The business of the Company is managed by the Directors (Article 76), not by the Shareholders. The assets belong to the Company, not the shareholders, and the shareholders can take out money only as dividends and after dividends have been declared (Article 82); dividends may be declared only out of profits arising from the business of the Company (Article 83); a declaration of the directors as to the amount of net profits shall be conclusive (Article 85). In addition to this, the shareholders would not be responsible for the debts of the Company. In the opinion of the Board, the finding of the County Judge that the South African Company is the agent of Respondent cannot be sustained.

In his address to the Shareholders of Ford Motor Company of Canada, Limited (Ex. 6—for the year 1941) at page 12 Mr. W. R. Campbell said:

"Remittances for materials supplied by us to subsidiary companies continued with normal regularity, although subject to restrictions under the regulations of foreign exchange control in their respective countries.

"The financial statements of subsidiary companies show an increase of \$2,561,936 during the year in surplus and general reserves, which on December 31st, 1940, amounted to \$7,010,621.

"War conditions have placed an exceptional strain upon the cash resources of subsidiary companies. They have had to make unusually heavy expenditures for materials and labour used in the production of vehicles sold on open account to their respective Governments. This situation should be improved in 1941 by reason of arrangements which have been made to obtain partial advance payments on account of government purchases. These companies must also meet their responsibility for supporting the war efforts of their respective countries by subscriptions to war loans and the payment of taxes on an increasing scale. In view of the difficulty of exporting capital from Canada, subsidiary companies must be prepared to rely upon their own resources to finance their operations. For these reasons they have considered it advisable to retain as additional working capital all of their net earnings for the year."

By its Letters Patent, Ford Motor Company of Canada Limited was authorized:

- (1) To carry on its operations throughout the Dominion of Canada and elsewhere;

and:

- (2) To procure the Company to be registered and recognized in any foreign country and to designate persons therein to represent the Company and to accept service on its behalf in any suit or legal proceedings. (Letters Patent (p. 7)).

The Company did not apply to have itself registered and recognized in either South Africa or India. Had it done so, it would have been liable for its debts and obligations in respect to the business carried on by it in those countries. Lord Sernedale, M.R., in *Commissioners of Inland Revenue v Sansom*, 2 K.B.D., 492, at p. 500 said:

"Now the great reason why so many people form their businesses into limited companies and others invest their money in them is in order that they may be under no personal liability in respect of the transactions of those companies, and that is a perfectly legitimate object, as was decided by the House of Lords in *Salomon v. Salomon & Company A.C. 22*."

Ford Motor Company of South Africa Limited is separate entity. It was created to carry on its business in South Africa, not the business of Ford Motor Company of Canada Limited, because at that time Ford Motor Company of Canada Limited had no business in South Africa. It carried on its business through its directors, in pursuance of its Powers granted to it by Section 76 of the Memorandum and Articles of Association. It did not confine its operations to the purchase of Ford cars and parts from Ford of Canada. It purchased other cars, trucks, and tractors from other companies in England and the United States and when it could purchase parts from others, at a lower price, it purchased them. It assembled the parts that were used to make the chassis of a Ford car. It purchased the materials necessary to construct the bodies, either from Ford of Canada or others. It constructed the bodies and completed them. In its dealing with Ford of Canada it was dealt with by that Company as any other purchasers were.

Notwithstanding the fact that the Respondent, as shareholders, had authority to dismiss officers or directors on notice in writing, and appoint other officers and directors, those officers and directors when so appointed became officers and directors of Ford Motor Company of South Africa Limited, and carried on the business of that Company. In the Corporation Income Tax cases, *City of Toronto and Aluminium Company of Canada Limited*, 1943, O.W.N. 107, 1944, O.R. 66; *City of Toronto and Russell Industries*, 1941, O.R. 44, and all other decisions, the majority of shareholders had authority to appoint the Directors, but it was held that such authority did not constitute the carrying on of the business of the Company by the shareholders. In all those cases, it was held that the dividends declared by the Company were not income derived from the business of the Company which held all the shares and were assessable under the provisions of Section 9 of the Assessment Act.

The income of the Respondent sought to be assessed by the Appellant was paid to the Respondent as dividends declared by Ford Motor Company of South Africa Limited out of profits made by that Company from its business carried on in South Africa. None of these profits could be taken by Ford Motor Company of Canada Limited without some action being taken by Officers of Ford Motor Company of South Africa Limited and they did not belong to the Respondent until declared as dividends and paid by the Officers of Ford of South Africa to the Respondent as dividends declared.

Section 8 of the Assessment Act provides:

"Irrespective of any assessment of land under this Act, every person occupying or using land for the purpose of any business mentioned or described in this section shall be assessed for a sum to be called "business assessment" to be computed by reference to the assessed value of the land so occupied or used by him, as follows:"

The Respondent was assessed for a sum "called business assessment" for 60% of the assessed value of the land occupied in Windsor for the purposes of its business. Counsel for the Respondent contends that that business assessment includes the occupation of the land so assessed (1st) for the purpose of carrying on the business of Ford Motor Company of South Africa Limited in South Africa, because the Respondent, by increasing its plant in Windsor to manufacture goods ordered by Ford Motor Company of South Africa Limited (for which that Company was to pay), (2nd) advising Ford Motor Company of South Africa Limited (for which advice that Company was not asked to pay), and (3rd) appointing officers and directors of the Company and advising those officers and directors; and that the dividends received were income "from the business for which it has been assessed for a sum called business assessment".

The Board finds that such a contention cannot be upheld and that the dividends for which the Respondent has been assessed by the Appellant are dividends declared by Ford Motor Company of South Africa Limited and paid to the Respondent out of the profits of the business carried on by Ford Motor Company of South Africa Limited in South Africa and "is income not derived from the business in respect of which the Respondent is assessable under Section 8 of the Assessment Act." (Sec. 9, 1 B).

The Board further finds that Ford Motor Company of Canada Limited does not carry on the business of the Ford Motor Company of South Africa Limited and that Ford Motor Company of South Africa is not an agent of the Respondent.

These findings apply also to dividends received by the Respondent from the shares which it holds in Ford Motor Company of India Limited.

Counsel for the Respondent contended that (1) the assessments were illegally made and (2) that there is no appeal from the decision of the County Court Judge and asked that the argument of Mr. Carson in *City of Windsor v. Hiram Walker-Gooderham and Worts Limited* be applied in this case. In that case this Board held that there was the right of appeal by the City of Windsor and that on the appeal the Board could, if necessary, open the whole question of assessment so that the proper assessment might be made. Therefore the contention on both (1) and (2) is overruled.

The Board finds that the Respondent, in addition to the income for which the Judge has held it was properly assessed, received in 1941, \$877,215.42 and in 1942, \$989,368.16 income not derived from the business in respect of which it was assessable under Section 8 of the Assessment Act, and that it was properly assessed in 1942 for \$877,215.42 received in 1941 and in 1943 for \$989,568.16 received in 1942. The appeal is therefore allowed.

The Respondent shall pay the costs of the Appellant to be taxed by the proper taxing officer at Toronto on the Supreme Court scale and shall also pay the Board's fee fixed at \$300.00.

Judgment accordingly.

DATED at Toronto this 24th day of July, A.D. 1945.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

P.F. B-2526 and
P.F. B-2527

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, Chapter 272)

BETWEEN:

The Corporation of the City of Windsor

Appellant

—and—

Hiram Walker-Gooderham & Worts, Limited,

and

Subsidiaries Holding Company, Limited,

Respondents.

(Appeal from decision of His Honour the County Judge respecting corporation income assessment made by the City of Windsor against Hiram Walker-Gooderham & Worts, Limited, and Subsidiaries Holding Company, Limited.)

Lorne R. Cumming, Esq. Solicitor for Appellant

C. F. H. Carson, Esq. K.C.

Paul J. G. Kidd, Esq.

..... Solicitors for Respondents

DECISION OF THE BOARD

This is an appeal by the Corporation of the City of Windsor from the decision of His Honour J. J. Coughlin, Senior Judge of the County Court of the County of Essex, allowing the appeal by the Respondents herein against the assessment for Income for the years 1941, 1942 and 1943. It was agreed that the evidence as taken before the Judge was to be used, as applicable, in each case.

The Respondent, Hiram Walker-Gooderham & Worts, Limited, as shown by the Chart, Page 2 of Exhibit 45, is the owner of 100% of the shares of the Respondent, Subsidiaries Holding Company, Limited, 100% of the shares of sixteen companies in Great Britain, 100% of the shares in four Ontario companies, 25.8% of the shares of Canadian Industrial Alcohol Company, Limited (Hiram Walker & Sons, Ltd. own 25.5% of the shares of that company, giving control.), which Company owns 100% of the shares of five other companies in Canada.

The Respondent, Subsidiaries Holding Company, Limited, owns 100% of the shares of five United States companies and 99.1% of the shares of another United States Company.

All of these Subsidiaries of Hiram Walker-Gooderham & Worts, Limited, except Subsidiaries Holding Company, Limited, are in the business of manufacture or sale, or both, of Spirits of all kinds.

To understand the scope of the operation of the Respondents, a great mass of evidence was produced, but one of the difficulties in understanding that evidence is that the witness, Hatch, so often used the words "we" and "the Company" without definitely stating whether he is referring to one of the Respondents or one of the subsidiaries. This arose by reason of the fact that he held office in, or was a director of, not only the Respondent, Hiram Walker-Gooderham & Worts, Limited, but also in at least seven of the subsidiaries.

Hiram Walker & Sons, Limited, is and has since 1858 been a manufacturer of liquor.

On December 31, 1926, Hiram Walker Limited was incorporated with a capital stock of 400,000 shares without nominal or par value with, amongst others, the following purposes and objects:

- (a) 1. To purchase or otherwise acquire, hold, sell or otherwise dispose of stock, bonds, debentures or other securities of any other corporation or company;

- (d) To take part in the management, supervision or control of the business or operations of any company or undertaking and for that purpose to appoint and remunerate any directors, accountants or other experts or agents, and to investigate and examine or to employ experts to investigate and examine into the condition, prospects, value, character and circumstances of any undertakings and generally of any assets, property or rights;

On the 5th January, 1927, a Prospectus (Exhibit 25) was issued for the sale of 160,000 shares of Hiram Walker Limited at \$25.00 per share, stating that, upon the financing, the Company would own the entire Capital Stock of Hiram Walker & Sons, Limited, and showing the Balance sheet of the Company as follows:

Assets	
Investment in Shares of Hiram Walker & Sons, Limited	\$14,000,000.
Liabilities	
Bankers' Advances	\$4,000,000.
Capital Stock, 400,000 Shares	
No Par Value	\$10,000,000.
	\$14,000,000

The sale of the 160,000 shares paid the Bankers' advances.

On the 19th November, 1927, Supplementary Letters Patent were issued changing the name from Hiram Walker, Limited, to Hiram Walker-Gooderham & Worts, Limited, and increasing the Capital Stock from 400,000 shares to 750,000 shares without nominal or par value. The Company at that time acquired all the Stock, being 200,000 shares of Gooderham & Worts Limited and paid therefor 200,000 shares of the newly authorized shares. These 200,000 shares, although of no par value, were credited in the Books of the Company at \$25.00 per share, making \$5,000,000.

Shortly afterwards, 60,000 of the newly authorized shares were sold at \$50.00 each—\$3,000,000.

On the 13th May, 1928, second Supplementary Letters Patent were issued, subdividing the 750,000 shares into 2,250,000 shares of no par value and increasing the Capital Stock to 3,500,000 shares of no par value. After this division, there would be 1,980,000 of the 3,500,000 shares outstanding, 660,000 of these outstanding shares were sold at \$15.00 per share for \$9,900,000.00.

On 31st March, 1932, third Supplementary Letters Patent were issued, converting the 3,500,000 authorized shares into 875,000 cumulative dividend redeemable preference shares of no par value, redeemable at \$20.00 per share, and 875,000 common shares, 660,000 of each class of stock had been issued. Within three years, 200,000 of the 660,000 preference shares had been bought on the market at a cost of \$1,908,367.13, or \$9.05 per share. These shares had been sold at \$20.00 per share so there was a profit of \$2,074,632.87.

On December 16, 1938, 215,000 of the preference shares were offered for sale at \$20.00 per share and 100,000 were sold for \$2,000,000.00.

Previous to 1935 a claim had been made by the United States Government against Hiram Walker & Sons Limited and Gooderham & Worts Limited for about \$19,000,000 for tax and duty on liquor said to have been shipped to the United States during prohibition in that Country. Hiram Walker-Gooderham & Worts, Limited, owned all the shares in these Companies, against which the claim was made, and the Witness, Hatch, said that his Company feared that some action might be taken against the American Companies, the shares of which were owned by the Hiram Walker-Gooderham & Worts Limited, and Hatch explained "that they decided that the thing to do was to get the shares of those United States subsidiariers into the hands of a Company in Canada which had not been in existence during the period that the claim covered". Subsidiaries Holding Company, Limited, was incorporated on the 18th October, 1935, with a Capital Stock of \$3,000,000.00, divided into 30,000 shares of \$100.00 each, for the following purposes:

- (a) To underwrite, subscribe for, purchase or otherwise acquire and hold, &c, stock, shares, &c.
- (b) To take part in the management, &c.

All shares held by Hiram Walker-Gooderham & Worts, Limited, in American Companies, were transferred to the new Company, the consideration being 25,990 shares in the new company.

The claim was later settled for \$1,000,000.00, by making a small payment on account and the collection by the United States Government of an extra 20c per gallon duty on liquor exported to the United States by the subsidiaries.

Hiram Walker Distilleries Inc. operated a Distillery in the United States, the shares of which were owned by Hiram Walker-Gooderham & Worts Limited, in 1936 this Company issued and sold \$8,000,000 of 10 year 4¼ % convertible debentures. These debentures were guaranteed by Hiram Walker-Gooderham & Worts, Limited. All but \$3,747,000.00 of these debentures were redeemed by the Company by 1941 when a new issue of \$15,000,000, serial debentures of Hiram Walker & Sons Distilleries Inc., guaranteed by Hiram Walker-Gooderham & Worts Limited, was issued. Of this issue \$2,000,000 was paid by December 31, 1943. These transactions are shown, but it is not shown whether all payments were made by Hiram Walker & Sons Distilleries Inc., which Company was supposed to receive the amount derived from the sale of the debentures, or what, if any, profits were made directly by Hiram Walker-Gooderham & Worts, Limited, in the matter. The money received from the sale of these debentures was for the purposes of the American Company, but, in Exhibit 47, the \$8,000,000 and the \$15,000,000 are accounted for by Hiram Walker-Gooderham & Worts, Limited, as Loan Capital.

Exhibit 48 was filed to show that, between January 17th, 1927, and August 31st, 1938, very substantial loans by banks were made to Hiram Walker-Gooderham & Worts Limited. The evidence shows that many loans were made by Hiram Walker-Gooderham & Worts, Limited, to subsidiaries and it was explained that, in many instances, Hiram Walker-Gooderham & Worts, Limited, could borrow from the banks at a lower rate than could the subsidiaries.

As explained by Mr. Carson, these transactions were shown, not for the purpose of showing that the Parent Companies were carrying on the business of the subsidiaries but that they were carrying on the business of buying and selling and holding shares, and loaning money to their subsidiaries to assist them in their operations.

In considering the Excerpts from the Minutes of Hiram Walker-Gooderham & Worts Limited meetings, it appears that the Financial Records placed before the shareholders are the Consolidated Balance Sheets of the Parent Companies and all of the subsidiaries, and the Bank Balances and all other assets of the subsidiaries are spoken of as if they were the assets of the Parent Companies. The Shareholders and Officers and Directors at those meetings do not take into consideration the fact that the assets, and even the bank balances, are the property of the subsidiaries until they are paid to the shareholders as Dividends. Each subsidiary was treated as a separate entity. Its directors conducted its operations; it had its own Profit and Loss Statements and Balance Sheets; it made its own contracts, sales and purchases: But the Parent Companies issued a Profit and Loss Statement, consolidating the returns of the operating subsidiaries.

Hiram Walker-Gooderham & Worts Limited also purchased from time to time all the shares of sixteen operating Companies in Great Britain, two other Companies in Canada, and controls more than 50% of the shares in Canadian Industrial Alcohol Company, Limited, which said Company owns 100% of the shares in four Canadian Companies and one Company in Great Britain. The present holdings of shares in the different Companies is shown in Chart 1, page 2, of Exhibit 45.

The Officers and Directors of Hiram Walker-Gooderham & Worts, Limited, are as follows.

Officers:	H. C. Hatch	Pres. and Chairman of the Board
	Howard R. Walton	Vice-President
	T. H. Gibbons	Vice-President
	Fletcher Ruark	Secretary
	W. G. Cook	Assistant Secretary
	H. O. C. Palmer	Treasurer
	B. E. Ford	Comptroller

Directors: H. C. Hatch
 T. H. Gibbons
 Howard R. Walton
 F. K. Morrow
 J. F. Lash, K.C.
 E. D. Gooderham
 Geo. T. Chisholm
 Leigh M. McCarthy
 R. A. McKinlay
 B. E. Ford

The Officers and Directors of Subsidiaries Holding Company Limited are as follows:

Officers:	Fletcher Ruark	President
	H. O. C. Palmer	Vice-President
	W. G. Cook	Secretary and Treasurer
	W. J. Miller	Assistant Secretary
	Fred J. Cook	Assistant Treasurer

Directors: Fletcher Ruark
 H. O. C. Palmer
 W. G. Cook
 W. J. Miller
 Fred J. Cook

H. C. Hatch is Chairman of Board
 of Directors of:

Gooderham & Worts Limited;
 Hiram Walker & Sons Grain
 Corporation Limited;

Director of:

Hiram Walker-Gooderham &
 Worts, Limited;
 Gooderham & Worts, Limited;
 James Barclay & Company Ltd.;
 Hiram Walker & Sons Grain
 Corporation Limited.

Hiram Walker & Sons, Limited, is the owner of land and buildings shown on Exhibit 59, and occupies all of the said buildings, except 23A (marked in red on the plan) for the purposes of its business, and is assessed for business taxation thereon. The building numbered 23 is the main office of the Company. Building 23A is a two-storey addition to the main office and is connected thereto by a corridor. There is an entrance to Building 23A from the south but the door is marked "Subsidiaries Holding Company Limited—Private—Use Main Entrance"—with a hand pointing easterly to the main entrance to building Number 23.

On the 1st day of January, 1936, Hiram Walker & Sons Limited leased to Hiram Walker-Gooderham & Worts Limited the ground floor in building 23A for one year, the lessee to pay business tax and all other taxes levied in respect of "the personal property, business or income of the lessee". The lessees were to hold as monthly tenants after the expiry of the lease.

On the 1st day of January, 1939, Hiram Walker-Gooderham & Worts, Limited, sublet to Subsidiaries Holding Company, Limited, "the four ground floor offices on the west side of the entrance on Sandwich Street to the new office building of Hiram Walker & Sons Limited" for one year. The lessee covenanted to pay

"as the lesser may direct, as and by way of rent for the demised premises during the term hereby granted, the same proportion of the municipal taxes and charges assessed against the building of which the demised premises form a part, or against the Lessor and/or Hiram Walker & Sons Limited on account thereof, as the floor area of the demised premises bears to the whole floor area of the said building.

"The Lessee covenants with the Lessor to pay business tax and all other taxes, rates and charges levied in respect of the personal property, business or income of the Lessee as and when the same become due and payable."

The lease also provided:

"And it is hereby agreed by and between the parties hereto, that, upon the determination of this lease by effluxion of time, a tenancy from year to year shall not be created by implication of law, but the Lessee shall be deemed to be a monthly tenant only at the rental and on the terms and conditions herein set out, except as to length of tenancy.

"The Lessee agrees with the Lessor that so long as any part of the demised premises is not actually required for the use and occupation of the Lessee, the Lessor may use and occupy such portion in which event the rental payable hereunder shall be adjusted accordingly."

Exhibit 56 is a plan of the ground floor of building 23A. The four offices "hatched" are the offices leased to Subsidiaries Holding Company, Limited. It should be noted that, although the vault is "hatched", it is not mentioned in the lease.

Section 4 of the Assessment Act provides:

"All real property in Ontario and all income derived, whether within or out of Ontario, by any corporation, or received in Ontario on behalf of any corporation, shall be liable to taxation, subject to the following exemptions."

Section 8 of the Assessment Act provides:

"(1) Irrespective of any assessment of land under this Act, every person occupying or using land for the purpose of any business mentioned or described in this section shall be assessed for a sum to be called "business assessment" to be computed by reference to the assessed value of the land so occupied or used by him, as follows:

"(e) Every person carrying on the business of a wholesale merchant, of an insurance company, a loan company or a trust company, as defined by this Act, or of an express company carrying on business on or in connection with a railway or steamboats or sailing or other vessels or of a land company, or of a loaning land corporation, or of a bank or a banker, or of any other financial business for a sum equal to seventy-five per centum of the said assessed value.

"(g) Every person practising or carrying on business as a barrister, solicitor, notary public, conveyancer, physician, surgeon, oculist, aurist, medical electrician, dentist, veterinarian, civil, mining, consulting, mechanical or electrical engineer, surveyor, contractor, advertising agent, private detective, employment agent, accountant, assignee, auditor, osteopath, chiropractor, masagist, architect and, subject to sub-section 8, every person carrying on a financial or commercial business or any other business as agent, for a sum equal to fifty per centum of the said assessed value; but where a person belonging to any class mentioned in this clause occupies or uses land partly for the purposes of his business and partly as a residence thirty per centum of the assessed value of the land occupied or used by him shall for the purpose of the business assessment be taken to be the full assessed value of the land so occupied or used.

"(k) Every person carrying on the business of a photographer or of a theatre, concert hall, or skating rink, or other place of amusement, or of a boarding stable, or a livery, or the letting of vehicles or other property for hire, or of a restaurant, eating house, or other house of public entertainment, or of a hotel or any business not before in this section or in clause 1 specially mentioned, for a sum equal to twenty-five per centum of the assessed value.

Section 9 of the Assessment Act provides:

"9 (1) Subject to the exemptions provided for in sections 4 and 8,—

- (a) every corporation not liable to business assessment under section 8 shall be assessed in respect of income;
- (b) every corporation although liable to business assessment under section 8 shall also be assessed in respect of any income not derived from the business in respect of which it is assessable under that section.

"(2) The income to be assessed shall be the income received during the year ending on the 31st day of December then last past."

The Respondent, Subsidiaries Holding Company, was assessed for business as agency under (g) of Section 8, subsection (1), for 50% of the assessed value of the four rooms in Number 23A, and the Respondent, Hiram Walker-Gooderham & Worts, Limited, was assessed for business as office under the same sub-section for 50% of the assessed value of the balance of the ground floor of 23A.

The Assessment Commissioner, Mr. Green, said that, when he visited the premises for the purpose of making the assessment upon which taxes for 1941, 1942 and 1943 would be levied, he was shown through the building and was told that Subsidiaries Holding Company Limited was occupying the four offices and he assessed that Company as "agency" for 50% of the assessed value of that part of the building. He was told that Hiram Walker-Gooderham & Worts, Limited, was occupying the balance of the offices, and he assessed that Company for business purposes as "office" for 50% of the assessed value of those offices.

The following business taxes on those assessments were paid by the Company in 1941, 1942 and 1943:

Hiram Walker-Gooderham & Worts Limited

1941	\$557.57
1942	\$593.60
1943	\$600.40

Subsidiaries Holding Company, Limited

1941	\$178.04
1942	\$182.60
1943	\$182.60

Early in each of the years, 1941, 1942, and 1943, the Respondents filed with the Assessment Commissioner Corporation Income Tax Return (Exhibits 1, 2, 3, 4, 5 and 6) showing the income of each Company for the previous year and deducting the amount of that income because they were assessed for business in Windsor.

On the 24th June, 1943, the Assessment Commissioner wrote to each of the Respondents (Exhibits 77 and 78), stating that the returns filed showed income to August 31st in each year and asking for a Return showing the income received to December 31st in each of the years 1940, 1941, and 1942. Further Returns (Exhibits 7, 8, 9, 10, 11 and 12), with copies of the Annual Accounts, as audited (Exhibits 13, 14, 15, 16, 17 and 18), of each of the Respondents for the years 1940, 1941 and 1942, were filed August 26th, 1943. On September 1st, 1943, the Assessment Commissioner wrote to the City Clerk of Windsor, reporting the omission to assess Hiram Walker-Gooderham & Worts, Limited, as follows:

1941	\$6,397,960.26	Income received in 1940.
1942	\$5,552,724.66	Income received in 1941.

and the omission to assess Subsidiaries Holding Limited:

1941	\$2,281,000.00	Income received in 1940.
1942	\$3,271,000.00	Income received in 1941.

and asking that the said assessments be entered on the proper rolls.

The City of Windsor Assessment and Collector's Department use mechanical methods in the preparation of the Rolls (Section 104, sub-section 3 of the Assessment Act) and in each year separate sheets for Assessment of Land, Business and Income have been compiled, bound in book form, and delivered to the Collector.

In each of the years, 1941, 1942 and 1943, a by-law was passed, fixing the tax rate and in each of those years the rate was the same.

No by-law under the provisions of Section 123 of the Assessment Act had been passed prior to July 20th, 1943, when By-law Number 425 was passed, providing: that every person liable to assessment in respect of Income should furnish to the Assessment Commissioner a Statutory Declaration showing the Income received by that person during the year ending on the 31st December then last past; for the preparation of a special Roll and the completion thereof; for the collection of the taxes due; and for the addition of 4% to the amount remaining unpaid after the 1st day of October of the year in which the Roll is prepared.

In the 1943 Assessment Roll, W. W. Green, Assessment Commissioner, assessed:

Hiram Walker-Gooderham & Worts, Limited

For income received in 1942 \$7,971,422.26

Subsidiaries Holding Company, Limited

For income received in 1942 \$3,719,085.00

The Returns made by the Companies show the income received up to the 31st August in each of the years 1940, 1941 and 1942. Mr. Hatch said that the Companies' financial year ended August 31st and that it would be impossible to show the amount of income up to December 31st in each year.

Mr. Carson contended that, by reason of the actions of the employees of the Appellants, the Respondents have been illegally assessed. The Board finds that, notwithstanding anything improper or illegal which might have been done or omitted by the Municipality or its Officers in making the assessments, the appeal before the Board is in the nature of a new trial (Section 78, sub-section 2) and the Board has power to decide not only as "to the amount at which the property in question shall be assessed, but also all questions as to whether any persons or things are liable to assessment or exempt from assessment under the provisions of this Act" (Section 84, sub-section 5).

The Learned Judge has found "The place in Windsor designated as the head office of the appellant (Hiram Walker-Gooderham & Worts Limited) is part of the general office building of Hiram Walker & Sons, Limited. It consists of five rooms plus vault and corridors, having an area of 1,271 square feet" and "The only part of the Appellant's said head office used wholly and exclusively for the Appellant's purposes is the vault where tis securities, vouchers and private documents are kept".

There is nothing either in the evidence or in the exhibits to show that any part of those premises were designated or even used as the head office of Hiram Walker-Gooderham & Worts, Limited. There is nothing to show that the vault was wholly and exclusively used for the appellant's purposes.

The evidence, page 252, from line 4, reads as follows:

"MR. CUMMING: Q Just a few more questions, Mr. Hatch, as to the physical arrangements of the office. It was touched on briefly yesterday. I see here a copy of Exhibit 56 which is a plan of the ground floor of the building 23A. Can you advise me whether the officers of Hiram Walker-Gooderham & Worts Limited or any of them have their offices in those premises?

A. I can advise you none of them do.

Q. None of them do?

HIS HONOUR: In what premises?

MR. CUMMING: In the premises shown on Exhibit—

WITNESS: 23A

HIS HONOUR: You mean the office—

MR. CUMMING: Exhibit 56.

HIS HONOUR: The office building, it is.

MR. CUMMING: The main office.

WITNESS: No, this is the main office. The main office, as I told you yesterday, is down here. This is the new office, the ground floor of the new office.

Q. These are the premises covered by the lease by Hiram Walker-Gooderham & Worts Limited from Hiram Walker & Sons Limited, the entire ground floor of this building 23A, as I understand it. That is right is it?

HIS HONOUR: What was your question again?

WITNESS: He is asking me, Your Honour, if any of the officers of Hiram Walker-Gooderham & Worts Limited occupy any of these premises and my answer is no, they don't.

MR. CARSON: Q. That is the premises shown on Exhibit 56?

A. Yes.

HIS HONOUR: Where are your offices then?

A. All right, if you will show me the other plan—

MR. CARSON: Exhibit 59, I think it is.

WITNESS: That is it, Your Honour (indicating). You remember yesterday I said this is Sandwich Street and this is the property between Sandwich Street and the river and I explained to you yesterday that building 23 is the old original office and building 23A was the building put on some twenty years ago or thereabouts. The property covered by the lease is 23A and the officers of Hiram Walker-Gooderham & Worts Limited have their offices in 23 which is adjoining it by corridor and so on. That part there (indicating), the part outlined in red here.

HIS HONOUR: Yes. The floor area of Hiram Walker-Gooderham & Worts Limited—

WITNESS: That is in this portion that is outlined in red.

HIS HONOUR: Q. And you say that none of the officers of the company which has the lease have their offices in the property leased?

A. None, no.

Q. Why have you them leased?

A. Well, other people who do work for them are in there, sir.

MR. CUMMING: Q. Well, I think you said, to be quite fair, that these offices shown on this plan, Exhibit 54—

A. 56.

Q. 56, are occupied by the accounting and clerical staffs of one or more of the various subsidiary companies?

A. I said that they were occupied—I gave you the three occupancies.

Q. Yes, the three types?

A. Three types of people. I said the auditors of the company occupy them for about three months of the year.

Q. Yes?

A. That the legal department, that is Mr. Lash when he comes up here, utilizes them; that the A-2's were compiled in there, the underwriters sent people up there that occupied these offices. That in addition they are occupied by employees of subsidiaries who do work from time to time, who do work for Hiram Walker-Gooderham & Worts Limited.

Q. By employees of subsidiary companies?

A. That is right.

Q. Not Subsidiaries Holding?

A. That is right.

Q. And would you attempt to give the Court any division as to the time, or length of time by months or weeks when you could say that it is exclusively occupied by the company or is it ever exclusively occupied?

A. It is not exclusively occupied by the company.

Q. It is not exclusively occupied by—

A. No.

Q. By Hiram Walker-Gooderham & Worts Limited. And can you say of your own knowledge—

HIS HONOUR: Can you do any better on that than that, except the allocation set out in the—

MR. CUMMING: I don't know. I think if we knew at the time we made that business assessment what we know now as to the actual use of those offices, we might have had a little different idea—the assessor might have had a little different idea—I am not quite so sure in their involved method—

WITNESS: Perhaps I should say if the assessor in '43 had come along and had said "We are going to come and assess the office Mr. Walton sits in right there", we might have made our point too, Mr. Cumming.

Q. From a very practical point of view I think you are right. Now you agree with me, Mr. Hatch, that by no means are all the books of record, particularly accounting books of record of Hiram Walker-Gooderham & Worts kept in these particular premises?

A. I think they are.

Q. You say they are?

A. I think so.

Q. All books of accounting record?

A. I think so. These are big vaults. I can remember back when that lease was given that one of the reasons Mr. Palmer chose that premises was because of the vault accommodation.

Q. I concede perhaps that the Minute Book and records are but what about your ordinary books of record?

A. They are all in there.

Q. Cheque books and bank books and all those?

A. They are all in there.

Q. Are they worked on in there?

A. No, there are no desks. I mean they are kept in there at night.

Q. Just kept in there at night?

A. Yes.

Q. Now are you personally familiar with the use that Subsidiaries Holding Company Limited make of the four western offices and the particular vault that they have?

A. Yes, the same remarks apply there.

Q. Yes, none of their officers have their offices in there?

A. Mr. Ruark—who are the other officers—I have lost my—

Q. There is the list. Mr. Ruark, Mr. Palmer?

A. No, none of those men have their offices in there.

Q. None of the officers of Subsidiaries Holding have their offices in there?

A. No.

Q. And they have in fact private offices in another building?

A. In 23, yes.

The Head Office of Hiram Walker-Gooderham & Worts, Limited, is "Walkerville, Ontario" (now Windsor). There is no definite address. A few of the meetings of the Company are shown to have been held "at the Head Office of the Company, Walkerville"; some were held at the Prince Edward Hotel, Windsor, but nearly all were held at different places in the City of Toronto. Some, at least, of the officers and directors of Hiram Walker-Gooderham & Worts, Limited, and of Subsidiaries Holding Company, Limited, have offices in Building Number 23, the head office of Hiram Walker & Sons, Limited, but whether they occupy those offices as officers and directors of either of the Respondents; as officers or directors of the so-called subsidiaries, whose employees occupy the ground floor at building Number 23A, or as officers or directors of Hiram Walker & Sons, Limited, is not disclosed. No officer or director of either of the Respondents occupies, and none of the Directors' meetings were held in, any part of the ground floor at 23A. Neither of the Respondents had any employees or office furniture. Hatch said that some work was done for Hiram Walker-Gooderham & Worts, Limited, by the employees of the subsidiaries. Such work would naturally be given them by one of the officers or directors but there is no evidence showing whether he was acting as an officer or director of Hiram Walker-Gooderham & Worts, Limited, or of one of the so-called subsidiaries. He also said that some of the copies of A-2 (Exhibit 42), as well as Minute Books and records of a confidential nature of Hiram Walker-Gooderham & Worts, Limited, were stored in the vaults of 23A. In his evidence he said that there was vault space in the main office building Number 23, where he and other officers of the Parent Companies and the so-called subsidiaries had their offices. Why such "records of a confidential" nature of Hiram Walker-Gooderham & Worts, Limited, should be stored in vaults adjoining offices occupied by clerks and stenographers of other companies, who must have access to those vaults, is hard to understand.

Both Counsel argued at length as to the meaning of "carrying on business".

Mr. Carson contended that, by reason of the extensive activities of the Respondent involving millions of dollars, it is carrying on a business and argued that that business could not be carried on without occupying premises. As to the meaning of "carrying on business" he referred to:

Commissioners of Inland Revenue v
Korean Syndicate, 1921 3 K.B., p. 258, and
South Behar Railway Company v
Commissioners of Inland Revenue, 1925, A.C., p. 476.

In the Korean case it was held that the Defendants who had acquired a mining concession and had leased it to an agent, who was to work the Concession and pay the Company royalties, was carrying on a business so that it became taxable under the Finance Act of England. Lord Sterndale held that the Company had been carrying on a business and that it has continued the business by receiving the profits from the Concession in which it retained an interest. He said (p. 272):

"In my opinion the effect of that agreement is that it is a carrying out of the object which the Syndicate undertook to attain, and which is mentioned in sub-clause 1 of clause 3 of memorandum which I have already read, of acquiring a concession and working, exploiting and turning the same to account, the same words as are used in the agreement of February 7, 1905. That is not in any way like the case of a person who holds certain investments and merely draws the interest from them, or of an owner of mines who simply leases them in consideration of the payment to him of royalties."

In the South Behar Railway case the facts and decision were very similar.

He also referred to Commissioners of Inland Revenue v Westleigh Estates, 1924, 1 K.B., p. 390. In that case the Executors formed a Joint Stock Company to carry on the mercantile business of the deceased. It was held that the Company was carrying on a business.

He referred to an Article by Howard Stikeman in Canadian Bar Review, February, 1942, in which he says:

"The term "carrying on business" does not contemplate action in affairs; all that is required, other factors being the same, is some positive attitude to the undertakings in hand. A Holding Company, for example, is certainly carrying on business although the activity involved may be negligible, by the fact that it regularly accepts the receipt of dividends or interest as income."

However, in *Hatch v Minister of National Revenue, 1938, Exch. Ct. Rep., p. 208*, where Trinity Securities, Limited, a Company in which H. C. Hatch owned all the shares (except qualifying shares), operated a breeding stable, and dealt in securities turned over to it by Hatch, Mr. Justice Angers, at p. 223, said:

"I am satisfied that Trinity Securities, Limited, did not carry on two separate businesses and that the investment of its funds was not in itself a business. The only business exercised by the company was the operation of its breeding farm and, as an adjunct, its racing stable. Mere investment for investment's sake is not a business."

Mr. Cumming referred to several cases heard by this Board and the Judgements on the appeals in those cases, and also to *Smith v Anderson, 15 Chy. Div. 247*, in which case James L. J., at page 276, said:

"Then supposing that what is to be done here is to be done by the trustees, is what the trustees are to do under this deed the carrying on a business? In my opinion, nothing that is to be done under this deed by the trustees comes within the ordinary meaning of "business", any more than what is done by the trustees of a marriage settlement who have large properties vested in them, and who have very extensive powers of disposing of the investments, changing the investments, and selling them and re-investing in other investments, according to their discretion and judgment, with or without the consent of their cestuis que trust. That is not a business."

Gret, L.J., in the same case, at page 279, said:

"They were joined together for the purpose of once for all investing certain money which was delivered into their hands, and not for the purpose of obtaining gain from a repetition of investments. In other words, they were not associated together for the purpose of speculating in shares. That was not their business."

Cotton, L.J., at page 283, said:

"Clause 18 provides that under certain circumstances the securities may be sold, and then by clause 20 they may be reinvested. If it appeared that the real object of the deed was that the trustees should speculate in investments, even though confined to this particular class, the case would have stood in a very different position."

and on the same page:

"In my opinion that is not a deed providing for carrying on a business within the meaning of the Act, it is a deed providing for the holding trust property, with such provisions only as are necessary to enable that to be conveniently done. I am of opinion, therefore, that there is no carrying on business within the meaning of the Act."

and:

"They may do it for the purpose of profit, and most persons when they invest their money do it for the purpose of profit, that is to say, they expect to get a profit in the shape of dividends and probably also expect that the investment will go up and will produce them a profit when hereafter they may wish to realize. But, in my opinion, what must be shown is that the association by themselves or by their agents carry on a business. Now, here how can that be said?"

and on page 284, referring to the meetings held, he said:

"The only business done at them was to receive and consider a report from the trustees on the condition and affairs of the trust, to appoint auditors to audit the accounts, and to elect new trustees to fill up vacancies. It is impossible, in my opinion, to say that the certificate holders are by themselves in any way carrying on any business by reason of what is done at these meetings."

If the object of the Respondents had been to speculate in shares for the purpose of profit, their activities could be classed as carrying on a business; the profit (if any is made by purchasing when the market is low and selling when the market is high) would be a profit from that business. However, it is not the contention that the Respondents' business was to speculate in shares, not even in shares of Distillery

Companies, and, if such a contention were advanced, the Board would hold that that was not the activity carried on. The main activity of both Respondents has been the purchase as an investment of shares of Distillery Companies and the holding of these shares. They are, and are described by Mr. Carson and Mr. Hatch as, holding companies, and although they do from time to time loan money to or become security for loans made to their so-called subsidiaries, they are not in the loaning of money business and do not loan to other than their so-called subsidiaries. They do not manage their subsidiaries, although through the Reports of the Directors of the so-called subsidiaries, they consider those Reports. Each has a head office at Windsor but the location of neither head office is described. Neither used or occupied the building leased by Hiram Walker & Sons, Limited, to Hiram Walker Gooderham & Worts, Limited, for which it has been assessed for business.

In *Russell Industries v Toronto*, it was claimed by the appellant that, at Number 207 Weston Road S., Toronto, it was carrying on the business of acquiring, holding, lending upon, and dealing in securities of all kinds; that it held all or the controlling interest in shares of three so-called subsidiaries; that it was therefore assessable for business and that the dividends received by it were not assessable as Income. It was shown that the Company had no other business, that it had rented two rooms at 207 Western Road, S., from a subsidiary; that that was the address of its head office and that it kept its books and held its meetings at that address and there received reports from committees, and elected its officers. The Board there held that the Company was not carrying on a business at those premises and was assessable for the Income received.

In *re International Metal Industries, Limited, v The City of Toronto, 1940, O.R., p. 271*, the facts were similar. The appellant owned and controlled several subsidiaries, and had rented a room in a building in which one of those subsidiaries was carrying on its manufacturing business. The appellant was not a manufacturer but claimed that its business was the investment of its capital in shares of the subsidiaries and the management of those subsidiaries. The room was occupied by the Canadian General Manager of the appellant who was also President of the Canadian subsidiary Companies. The books and records of the appellant were kept in that room and its meetings were held there. It was held that the appellant was not occupying and using that office for the purpose of a business.

In this case the Respondents say that they are carrying on a business, that their business is not managing and controlling their subsidiaries, but is the investment of their shareholders' money in shares of Distillery Companies, and making a profit for those shareholders by receiving and disbursing the dividends received from the subsidiaries; that they are occupying and using the ground floor of the building Number 23A for the purpose of that business; and that they are assessable for business assessment on those premises.

After careful consideration of the evidence and the Exhibits filed and the very able argument of Counsel heard, the Board finds:

1. That the Respondents were not during any of the years in question occupying or using the offices at 23A; that they should not have been assessed for business at those premises; and that the business taxes paid by them, as follows:

Hiram Walker-Gooderham & Worts, Limited

1941	\$557.57
1942	\$593.60
1943	\$600.40
Total	<u>\$1,751.57</u>

and

Subsidiaries Holding Company, Limited

1941	\$178.04
1942	\$182.60
1943	\$182.60
Total	<u>\$543.24</u>

should be repaid to them by the Municipality.

2. Even if it could be held that the Respondents were occupying and using the offices at 23A, and the purpose for which they were so occupying and using those premises could be said to be the carrying on of a business, the dividends and other income received by them and hereafter set out were not received by them from that business.

3. That the application by the appellants to have the assessment of the Respondents for the years 1941, 1942, and 1943 re-opened should be and is hereby granted.

4. That under the provisions of Section 4, Sub-section 18, of the Assessment Act the Respondent, Hiram Walker-Gooderham & Worts, Limited, should not be assessed for the amount of dividends received by it from Subsidiaries Holding Company Limited.

5. That the expenses mentioned in Exhibits 13, 14, and 15 should be divided proportionately between the total income received by Hiram Walker-Gooderham & Worts, Limited, and the balance left after deducting the dividends received from Subsidiaries Holding Company, Limited, (In re Wallace Realty Company, Limited, 1930 S.C.R., 387).

6. That the Respondents should be assessed as follows:

Hiram Walker-Gooderham & Worts Limited

1941.	Income received in 1940.....		\$6,426,459.45
	Dividends from Subsidiaries Holding Co. Ltd.		\$2,652,000.00
			\$3,774,459.45
	Income		\$3,774,459.45
	Deduct proportionate share of expenses	\$37,809.15	
	Less business tax to be refunded	\$ 557.57	\$ 37,251.58
			\$3,737,207.87
	Assessable income		\$ 1,500.00
	Statutory Exemption		
	Taxable income		\$3,735,707.87
1942.	Income received in 1941		\$5,607,511.32
	Dividends from Subsidiaries Holding Co. Ltd.		\$2,990,000.00
			\$2,617,511.32
	Income		\$2,617,511.32
	Deduct proportionate share of expenses	\$27,965.61	
	Less business tax to be refunded	\$ 593.60	\$ 27,372.01
			\$2,590,139.31
	Assessable income		\$ 1,500.00
	Statutory Exemption		
	Taxable income		\$2,588,639.31
1943.	Income received in 1942		\$8,051,795.11
	Dividends from Subsidiaries Holding Co. Ltd.		\$3,549,000.00
			\$4,502,795.11
	Income		\$4,502,795.11
	Deduct proportionate share of expenses	\$30,756.38	
	Less business tax to be refunded	\$ 600.40	\$ 30,155.98
			\$4,472,639.13
	Assessable Income		\$ 1,500.00
	Statutory Exemption		
	Taxable income		\$4,471,139.13

Subsidiaries Holding Company, Limited

1941. Income received in 1940		\$2,923,791.72
Expenses	\$641.34	
Less business tax to be refunded	178.04	463.30
Assessable income		\$2,923,328.42
Statutory Exemption		1,500.00
Taxable Income		\$2,921,828.42
1942. Income received in 1941		\$3,608,329.70
Expenses	\$260.27	
Less business tax to be refunded	182.60	77.67
Assessable income		\$3,608,252.03

BETWEEN:

TEMISKAMING REAL ESTATE, LIMITED,

Appellant,

—AND—

THE CORPORATION OF THE TOWNSHIP OF TECK,

Respondent.

(Cancellation or reduction of taxes payable in the year 1943 on business assessment made in the year 1942 respecting certain property known as the "Park Lane Hotel", erected on Lot Number 12 and the south half of Lots Number 10, Plan M 32, Temiskaming, in the Township of Teck (Kirkland Lake)).

S. A. Coldbeck, Esq. Solicitor for the Appellant
L. A. Lillico, Esq. Solicitor for the Respondent

DECISION OF THE BOARD

This is an appeal by Temiskaming Real Estate Limited from the decision of His Honour Judge G. H. Hayward who had dismissed a similar appeal.

The appeal is for a reduction in taxes payable in 1943 on Business Assessment made in 1942 under Section 125 of "The Assessment Act", Clause 1, (d), in respect of the business carried on in the premises known as the Park Lane Hotel, Kirkland Lake. The appeal is not against the assessment nor the levy but is for the cancellation or reduction of the taxes, and came before this Board for Hearing at a special sitting held on the 11th day of January, 1945, at the Township Hall in Kirkland Lake.

In August 1942, the Assessor had assessed the Park Lane Hotel to the owners Max and Mary Greenberg and at Mr. Greenberg's direction assessed for business tax the "Teck Hotel Company, Limited", being the name used, it was said, by the Greenbergs in operating the said hotel.

Bruce Williams, President of Temiskaming Real Estate Limited, a company incorporated September 17, 1942, stated that this company purchased the Park Lane Hotel October 19th, 1942, with adjustments made as of October 31st, 1942. Mr. Williams had told the Assistant Assessor to change the assessment to Temiskaming Real Estate, Limited, and the Assessor had appealed to the Court of Revision to have this change made; the appeal was heard November 26, 1942, and was granted by the Court of Revision. Mr. Williams did not appear in connection with this appeal.

Mr. Williams stated before the Board that Walscott Securities, Limited, who were the 2nd mortgagees had foreclosed and had negotiated with one Desgroseilliers to lease the hotel and operate the same; that the lease was dated September 26 to take effect October 1st and that Desgroseilliers did take possession on October 10th, 1942. The Witness stated he saw the lease signed and saw the copies when returned fully signed, but the original copy is apparently lost. Subsequently a verbal agreement was made altering the terms of the lease by which no rent was to be paid until January 1st, 1943. Mr. Williams stated that Temiskaming Real Estate Limited took over the property on the understanding that Desgroseilliers would operate the hotel until a suitable purchaser could be found. Desgroseilliers insisted on a option to purchase. About June 1st, 1943, the property was sold to Princess Hotel Limited, under an agreement to deposit in the bank, monthly, one-twelfth of the annual taxes for the remainder of the year 1943.

The Appellant made application to the Township of Teck on December 16th, 1943, for cancellation of business tax for the year, and this application came before the Court of Revision December 30th, 1943. The decision of the Court of Revision refused the application and the Appellant then appealed to the District Judge. This appeal was heard March 27th, 1944, and judgment given that the application did not lie and dismissing the appeal accordingly.

The Temiskaming Real Estate Limited, is still in existence but has no further interest in the Park Lane Hotel, according to Witness Williams. Mr. Williams stated he did not make further appeal in 1943 until he would know whether the appellant company would operate the hotel during the year 1943.

His Honour Judge Hayward found as a fact that the Appellant, Temiskaming Real Estate, Limited, was carrying on the business of the Park Lane Hotel from November 1st to December 31st, 1942, and was properly assessed for business tax for the year 1943. This Board agrees with and confirms this decision.

The Appellant is asking for the cancellation of or reduction of taxes payable in 1943 and not for the year in which the assessment was made. (See Section 125 of "The Assessment Act" 1, (d) "for business, who has not carried on such business for the whole year in which the assessment was made"). This Board, therefore, agrees with and confirms His Honour, Judge Hayward's decision that the application does not lie and the appeal must therefore be dismissed.

The Appellant having paid the Board fee of \$25.00, there will be no further or other costs allowed.

DATED at Toronto this 8th day of February, A.D. 1945.

1937, Chapter 272)

BETWEEN:

The Richmond Bay Company, Limited

Appellant

—and—

The Corporation of the City of Toronto

Respondent

W. Zimmerman, Esq., K.C. Counsel for the Appellant

F. A. A. Campbell, Esq., K.C. Counsel for the Respondent

DECISION OF THE BOARD

This is an appeal by the Richmond Bay Company, Limited, from the decision of one of the Judges of the County Court of the County of York, wherein he reduced the assessment on the building at 372 Bay Street, Toronto, known as Sterling Tower, from \$530,000.00 to \$520,000.00. The Appellant asks that the assessment on the building be reduced to \$450,000.00.

The building was erected in 1928 and was completed in 1929; the first assessment of \$530,000.00 of the completed building was made in 1929, for taxation in 1930. There has been no change in building assessment until this year. It is a 21 storey office building and has at all times been maintained in first class condition. It is not completely modern.

For the Appellant, Mr. Forsey Page, an architect, said that he had examined this building and the Victory and Northern Ontario buildings, and compared them. In his opinion, the Victory building, which had a content of 1,425,051 cubic feet, was a more modern building, and was assessed at 36.3c per cubic foot. The Northern Ontario Building, which had a cubic foot content of 1,629,640, was assessed at 32c per cubic foot; while the building in question, which he considered had a cubic foot content of 1,425,051 cubic feet, was assessed at 36.5c per cubic foot. Mr. V. Edwards figured the cubic foot content of the building in question as 1,429,989 or 4,738 cubic feet more than that given by Mr. Page. If Mr. Edwards' figures are correct, the assessment per cubic foot is 36.3c, the same as that on the Victory Building. He did not place a value on the building but, in cross-examination, he said that, if materials could be obtained, it would cost 55c per cubic foot to build, and that depreciation at 2½% per year should commence as soon as the building was completed. Clifford J. Dick, who audited the accounts of the Company, said that the vacancies were practically nil, but that in the years 1941-2-3 and 4 there was a net loss in each year. He allowed a depreciation of \$21,089.36 in 1944 on the following valuation:

Building	\$574,596.53
Heating and plumbing	\$ 69,374.97
Elevators	\$ 99,801.60
Total	\$743,773.10

In his Profit and Loss Account he allowed interest on the Bond Mortgage at 6½%, \$42,218.19, and if such were not allowed, the profit would have been \$39,865.85. The insurance carried on the building and fixtures in 1944 was \$798,000.00.

For the defence, H. A. Wickett, a building contractor, estimated that the cost of erection of the building today would be 53c per cubic foot and said that the value of the building today is \$572,400.00. In his opinion, in an office building such as this, no depreciation should be allowed for the first five years.

Mr. V. Edwards valued the building today at \$589,870.46 and stated that the building added that value to the land. He estimated the building at 1,429,989 cubic feet and, in his opinion, the cost would be 55c per cubic foot today. He allowed 2½% depreciation for ten years, and said that he would not allow depreciation for the first five years in a building such as this. He described the building and

its advantages, such as location, light, type of construction and repair. He also compared this building with the Victory Building and the Northern Ontario Building and said that, in his opinion, the building in question was more valuable, had a better location, and better light for the offices.

This building has an excellent location, corner of Bay and Richmond streets. It has full exposure on two sides, with a lane at the rear, and on the South it has full exposure with the exception of the first three floors. It is in the A class, there being few buildings in Toronto to equal it in construction and appearance and only two which surpass it.

The evidence for the Appellant consisted of comparison of assessments of two buildings not so well situated and the income. These are two matters which must be considered by the Board, but only two.

The evidence for the Respondent consisted of a valuation of the building by taking today's cost of construction, depreciated by subtracting $2\frac{1}{2}$ % of cost per year after the first five years, and also of a valuation placed on the building by a competent and experienced realtor, at the amount which the building added to the value of the land. This is a matter which must be considered by the Board in fixing the value for assessment purposes.

In the opinion of the Board, value should carry more weight than either comparison of assessments or income.

Another matter to be considered is that, when an assessment has been made by a competent assessor, it should not be lightly interfered with.

This building was assessed by the Assessment Commissioner for Toronto at \$530,000.00. The assessment was affirmed by the Court of Revision. The County Judge, on the evidence produced before him, reduced the assessment to \$520,000.00. The evidence before the Board does not justify a further reduction.

The appeal will, therefore, be dismissed.

The Appellant, having paid the Board's fee fixed at \$25.00, there will be no further order as to costs.

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, Chapter 272)

BETWEEN:

Barret Montfort

Appellant

—and—

The Corporation of the City of Toronto

Respondent

Mrs. B. G. Gibson Counsel for the Appellant

F. A. A. Campbell, Esq., K.C. Counsel for the Respondent

DECISION OF THE BOARD

This is an appeal by Barret Montfort from the Judgment of His Honour Judge Barton, dismissing an appeal by the Appellant from the decision by the Court of Revision which reduced the assessments of lands at the south-west corner of York and Adelaide streets as follows:

- 2' 9" x 90' 6" to \$350.00 per foot
- 43' 2" x 104' 6" to \$350.00 per foot
- 25' x 104' 6" to \$400.00 per foot
- 20' x 104' 3" to \$600.00 per foot

on part of Lot 9 on the West side of York Street, and

- 63' 3" x 90' 6" to \$350.00 per foot

on part of Lot 9 on the west side of York Street.

George H. Dinsmore, Real Estate expert, called by the Appellant, compared the assessment herein with the assessments of other vacant land in the vicinity to show that the purchase price paid for other lands sold in the vicinity was about 54 or 55% of the assessment, while the purchase price of the lands in question is 46% of the assessment as reduced by the Court of Revision. He also contended that the property at the south-west corner of Richmond and York Street was more valuable than the land in question and was assessed at a lower rate. He said that, in his opinion, the land on the west side of York Street was of less value than that on the east side because the land on the east side had been improved and that no development had been made on the west side in fifteen years. He stated that the income on the land was \$1,800.00 per year, which would not pay the expenses and suggested that the assessments should be reduced to:

Corner 20'	@ \$450.00 per foot	\$9,000.00
The next 25' x 104' 6"	@ \$325.00 per foot	\$8,125.00
The next 43' x 104' 6"	@ \$300.00 per foot	\$12,950.00
The next 66' x 90' 6"	@ \$275.00 per foot	\$18,150.00
Total		<u>\$48,225.00</u>

For the Respondent, Vernon Edwards said that, at the present time, these lands cannot be developed but, in his opinion, they were almost as valuable as lands on the east side; that they are more valuable than the lands farther north and the values on York Street increased from Richmond Street towards King Street. In his opinion, from sales in the vicinity, he valued the lands as follows:

Corner property 45'	@ \$500.00 per foot	\$22,800.00
The next 45'	@ \$400.00 per foot	\$18,366.00
The next 63' 3 1/4"	@ \$375.00 per foot	\$23,726.66
Total		<u>\$65,717.66</u>

The property was purchased by the Appellant in May, 1944, in two parcels from different estates, the corner property having a frontage of 90' on York Street at \$20,500.00 or about \$225.00 per foot, while the inside property having a frontage of 64' 8" was purchased at \$7,903.00 or about \$124.00 per foot. The total purchase price was \$28,403.00. When Mr. Dinsmore, witness for the Appellant, suggested an assessment of \$48,225.00 on this property, it must be admitted that the sale price on some of these down town properties bears very little evidence of real value.

In his evidence, Mr. Dinsmore did not place an actual value on these lands. He suggested that the assessment be \$48,225.00. On the other hand, Mr. Edwards said that, in his opinion, the actual value is \$65,717.66. During cross-examination, Mr. Dinsmore said: "The value of vacant land is what you can get for it". This is not the true test for assessment. The Statute provides that land shall be assessed at its actual value and, in determining what is actual value, many principles must be taken into consideration. Each case must stand on its own evidence, but one principle that must be followed is that a valuation arrived at honestly by a competent Assessor is not lightly to be interfered with. That the Assessment Commissioners of Toronto are competent is not denied.

In this case, evidence has been given as to the assessments of adjacent properties, and those assessments seem to be uniform.

After careful consideration of the evidence, the Board is unable to find that the assessments, as found by the Court of Revision and confirmed by His Honour the County Judge, are not correct, and the appeal accordingly is dismissed.

The Appellant having paid the Board's fee fixed at \$25.00, there will be no further Order as to costs.

DATED at Toronto the 28th day of March, A.D., 1945.

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, C. 272).

BETWEEN:

The Corporation of the City of Toronto,

Appellant,

and

The Governors of the University of Toronto

and

Business Properties Limited,

Respondents

(Appeal from decision of His Honour Judge Barton, in respect to assessment of premises at 415 Yonge Street, in the City of Toronto, occupied by the Respondent, the Governors of the University of Toronto and by Eaton Girls' Club, and owned by the Respondent, Business Properties Limited.)

J. P. Kent, Esq., K.C. Solicitor for Appellant
 H. Cassels, Esq., K.C., Solicitor for Governors of University of Toronto
 J. D. Arnup, Esq. Solicitor for Business Properties Limited

DECISION OF THE BOARD

This is an appeal by the Corporation of the City of Toronto from the Judgment of His Honour Judge Barton allowing, in part, an appeal by the University of Toronto from the decision of the Court of Revision confirming the assessment of Real Property at 415 Yonge St., Toronto, owned by Business Properties Limited and leased to the Governors of the University of Toronto.

The building is owned by Business Properties Limited, a wholly owned subsidiary of T. Eaton Co., Ltd. Two stores with basements, facing on Yonge Street, a part of the building occupied by Canadian Broadcasting Corporation, and a part of the third floor occupied by the caretaker, were separately assessed. The balance of the building was occupied by The Margaret Eaton School and The Eaton Girls' Club.

The Margaret Eaton School was, prior to 1941, an institution the purpose of which was the physical and health education of girls, and the premises used by it consisted of Lecture Rooms, Libraries, Swimming Pool, Lounges, a cafeteria and all conveniences necessary for the purposes of the school.

The Eaton Girls' Club was formed to provide activities for the physical, intellectual and spiritual betterment of female employees of The T. Eaton Company, Ltd. A fee of \$3.00 per year was paid by active members to be used toward the payment of the expenses. All deficits of the Club were paid out of a fund set up by the Company and known as the Sir John Eaton Memorial fund.

Early in 1941, it was proposed that the Margaret Eaton School should be merged with the University of Toronto and, on May 22, 1941, R. Y. Eaton, the President of the T. Eaton Company, Ltd., the owners of all the shares in Business Properties Limited wrote a letter (Exhibit 1) to the President of the University, assuring him of the willingness of those concerned to permit the merger and to grant to the University "the day-time use of the present school premises and facilities on the same basis with regard to operating expenses as are now in effect with the Margaret Eaton School, namely: 30% of the cost of Hydro power and one-half of the City water rates for the School and Hall premises, a total of approximately \$300 per year, and to maintain in reasonable repair the equipment now contained therein which is to be used for the purposes of this course.

On the 1st of July, 1941, a lease between Business Properties Limited and The Governors of the University of Toronto of the whole premises "situate at the south-east corner of Yonge Street and McGill Street, having a frontage on Yonge

Street of Sixty-eight feet (68') more or less and a depth along McGill Street of One Hundred and Ninety-eight feet (198') more or less and width in the rear of One Hundred and Thirty-nine (139') more or less which said premises are commonly known as civic number 413A-415 Yonge Street, excepting thereout and therefrom those store premises fronting on Yonge Street, situate on the ground or main floor of said premises and at the north-west corner thereof and being now known as 413A and 413B Yonge Street, and those parts of the main, second and third floors of said demised premises comprised in and known as The Margaret Eaton Hall and that part of the third floor of the demised premises now partitioned off and occupied by the janitor as an apartment", for the term of five years, at a rental of \$1.00 per year, subject to the payment by the Lessee of 30% of the Electric rates and 50% of the water rates charged in connection with the premises and subject to the payment of all taxes, rates dues and assessments whatsoever, whether municipal, parliamentary or otherwise now charged or hereafter to be charged, assessed or levied upon or in respect to the demised premises or the activities or business to be carried on thereon including the Lessee's business tax (if any).

The lease also provided that "The Lessee further undertakes not at any time to allow or permit the leased premises or any part thereof to be used by any person or persons other than as part of and solely in connection with the activities of the Physical and Health Education Department of the University of Toronto with or without consideration therefor without first obtaining the consent in writing of the Lessor."

There is nothing in the lease limiting the Lessee to "the day-time use of the premises".

On July 5th, 1941, the Bursar of the University wrote a letter (Exhibit 3) to the Eaton Girls' Club, advising it that it was at liberty to use available portions of the premises including equipment, at such times as the University was not using them until further notice and stating:

"As we shall not require the use of the premises in the evenings and on Saturday afternoons after the times set out below respectively you will be free to make use of the premises until further notice during every evening of each week and every Saturday afternoon after the times respectively specified below:

Monday	5 P.M.	Thursday	5 P.M.
Tuesday	5 P.M.	Friday	5 P.M. excepting the swimming pool where the time will be 10.30 P.M.
Wednesday	6.30 P.M.	Saturday	1 P.M.

all times mentioned being according to the time in effect in the City of Toronto from time to time."

The premises leased to the Governors of the University consist of 34,771 sq. feet and the evidence shows that this was used as follows:

25,638 sq. feet used by University in day-time and by the Girls' Club in the evening.

2,072 sq. feet used by the University exclusively.

7,061 sq. feet used by the Club exclusively.

The assessment in question was as follows:

Name of Tenant or Occupant—	Board of Governors, University of Toronto School of Physical and Health Education.
Name of Owner	— Business Properties Limited.
Actual value of land	— \$98,858.00
Value of Building	— \$40,000.00 — \$138,858.00

The University claimed exemption under the University of Toronto Act, R.S.O. 1937, Chapter 372, Sec. 15 (1), and The Assessment Act, R.S.O. 1937, Chapter 272, Sec. 4 (3). The Court of Revision dismissed the appeal and on appeal to the County Judge it was held that under the provisions of The University Act, R.S.O. 1937, Chapter 372, Sec. 15 (1), the interest of the University was not taxable and he allowed the appeal, but held that the Eaton Girls' Club was the

user of one-half of the premises and that Club should be assessed for fifty per cent of the assessment.

From this finding the Appellant appealed to this Board, and claimed that the University should be liable for taxation on the whole assessment.

The University of Toronto Act (R.S.O. 1937, Chapter 372, Sec. 15 (1)) provides:

"The property real and personal vested in the Board shall not be liable to taxation for provincial, municipal or school purposes, and shall be exempt from every description of taxation; but except as mentioned in subsection 2 the interest of every lessee and occupant of real property vested in the Board shall be liable to taxation."

The Assessment Act (R.S.O. 1937, Chapter 272, Sec. 4 (3)) provides: "4.

"All real property in Ontario and all income derived whether within or out of Ontario, by any corporation, or received in Ontario on behalf of any corporation, shall be liable to taxation, subject to the following exemptions:

(3) The buildings and grounds of and attached to or otherwise bona fide used in connection with and for the purposes of a university, high school, public or separate school, whether vested in a trustee or otherwise, so long as such buildings and grounds are actually used and occupied by such institution, but not if otherwise occupied."

It is not even suggested that there was any ulterior motive on the part of either the Lessor or the Lessee in the execution of the lease. The Margaret Eaton School was one eminently qualified to be merged with the Department of Health and Physical Education of the University and the premises provided every facility for the continuation of those studies by pupils of the University which has not yet provided, in its own buildings, proper premises for those studies by female students.

It is true that, at the date of the lease and up to the present time, the University has not required the continuous use of all the rooms in the building, nor any use of some of those rooms, but the University is the lessee of the whole of the premises, and out of a total of 34,771 square feet the University uses 27,710 square feet for its purposes. It does not use that area every hour of the day and night and because it says to the Eaton Girls' Club or any other Club, or organization:

"You are at liberty until further notice to use, for the purpose of your Club, available portions of our premises at the southeast corner of Yonge and McGill Streets, Toronto, formerly occupied by The Margaret Eaton School including the equipment at present in such premises and any that may be placed there by you from time to time at such times as we are not using all of the premises for the purpose of the Physical and Health Education Department of the University, it being understood that you will not commit any breach of the terms of our lease of the premises.

As we shall not require the use of the premises in the evenings and on Saturday afternoons after the times set out below respectively you will be free to make use of the premises until further notice during every evening of each week and every Saturday afternoon after the times respectively specified below:

Monday	5 P.M.	Thursday	5 P.M.
Tuesday	5 P.M.	Friday	5 P. M. excepting the swimming pool where the time will be 10.30 P.M.
Wednesday	6.30 P.M.	Saturday	1 P.M.

all times mentioned being according to the time in effect in the City of Toronto from time to time."

should it be held that it is not in occupation of that area?

And because there are some rooms in the basement and elsewhere in the premises, which are not required for the purposes of the University at the present

e, and those rooms are used by the Girls' Club, should it be held that the University is not in occupation of those rooms under its lease?

Exhibit 3 gives to Eaton Girls' Club the right to use the premises at such times as the University is not using them for the purpose of Physical and Health Education, and mentions the times when they will not be in use for such purpose. This is not a lease. It is a license or permission to use the premises only when not required by the University, by an organization which has objects somewhat similar to the objects of the Department for which the premises were leased by the University, namely; the physical, intellectual and spiritual betterment of girls. The premises had been and still are equipped for that one purpose.

The University of Toronto, although it is controlled by the Governors, is to a great extent maintained through Public and Private grants and donations and the decision of the Governors to allow the use of its facilities by associations, properly organized and controlled, should, in the opinion of the Board, be most highly commended. Notwithstanding this opinion, the Board must decide whether the City is legally entitled to assess and collect taxes on these premises.

In delivering his judgment in *Re City of Ottawa and Grey Nuns, 29 O.L.R., 8*, at p. 573, the Honourable the Chief Justice referred to *Salem Lyceum v City of Salem, 1891, 154 Mass. 15, 17*: "If the principal occupation is . . . for those purposes" (i.e., for the purposes for which the plaintiff was incorporated), "occasional or incidental use for other purposes might not render it liable to taxation". This statement was quoted with approval by Morton, J., in delivering the judgment of the Supreme Judicial Court of Massachusetts, *Phillis Academy Trustees v Inhabitants of Andover (1900), 175 Mass. 118*, at p. 126, who spoke of it as "recognizing that it is or may be the dominant purpose which gives character to the occupation;" and in that view I agree.

In *Ottawa Young Men's Christian Association v City of Ottawa, 29 O.L.R., 74*, a new building was being erected and the question to be decided was whether the building was subject to taxation during the course of construction. The Chief Justice, in delivering the Judgment of the Court, said:

"In order that the buildings and land shall be exempt from taxation they must be "occupied by and used for the purposes of the association." That they were in 1909 used for the purposes of the association I have no doubt; but were they "occupied by the association"? In the popular sense of the word "occupied" they were unoccupied until the buildings were made the "headquarters" of the association; but that would, I think, be too narrow a meaning to give to the word as it is used in sec. 11. Occupation does not necessarily involve residence; an enclosed field used in connection with a residence on other land would not be unoccupied, although no one lived there, and I have no doubt that the land of the association was occupied by it within the meaning of sec. 11. But were the buildings occupied by it? They were being used for the purposes of the association, as I have said—i.e., in getting them ready for the transfer to them of the "headquarters" of the respondents—and, upon the whole, I have come to the conclusion that they were also in that way occupied by the association."

The Memorandum, Division of Space, Exhibit 6, shows that some of the rooms were used exclusively by the Eaton Girls' Club. The word "exclusively" is hardly application. The Exhibit refers to the exclusive use by the Girls' Club of 1,798 square feet of lockers and locker space. These locker rooms are an adjunct of the Swimming Pool and Showers, and, according to the evidence, some of the lockers are used by the Girls' Club. The four basement rooms, shown to be used exclusively by the Girls' Club are a part of the premises, perhaps not necessary for University purposes, but a necessary part of the premises. The "Cafeteria" is a large room on the third floor, not at the present time necessary for University purposes, but a necessary part of the premises. No value of the premises, said to be used by Eaton Girls' Club has been proven before the Board, and the Board could not, under any circumstances, on the evidence, even if it were satisfied that the Girls' Club had exclusive use of a part of the premises, decide that that part should be assessed for one-half or any other portion of the value of the premises.

To hold that the University, to be entitled to claim exemption under Sec. 4 (3) of The Assessment Act, must have the exclusive use and occupation of land and buildings, or to hold that it must use and occupy them twenty-four hours a day to the exclusion of others, would in the opinion of the Board be to place a construction on that Statute that the words of the Statute do not convey.

The Board therefore finds, that the University of Toronto is in possession of the said premises under its lease; that the premises are actually used and occupied by it and are not otherwise occupied and that by virtue of The University of Toronto Act, R.S.O. 1937, Chapter 372, Sec. 15 and The Municipal Act, R.S.O. 1937, Chapter 272, Sec. 4, the premises while so used and occupied are exempt from taxation.

Although there was no cross appeal by the Respondent against the decision of the County Court Judge holding that the Eaton Girls' Club should be assessed for fifty per cent. of the assessed value of the premises, the Board under the authority conferred by Sec. 86 of The Assessment Act, finds that that Club should not be so assessed and orders that the Assessment Roll be amended accordingly.

Decision accordingly. The Appellant having paid the Board's fee there will be no order as to costs.

DATED at Toronto, this 18th day of September, A.D. 1945.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, Chapter 272)

BETWEEN:

THE CORPORATION OF THE CITY OF TORONTO

Appellant

—and—

SIMPSONS, LIMITED

Respondent

(Appeal from Decision of His Honour the County Judge respecting taxable income of Simpson's, Limited for year 1940, 1941, 1942 and 1943.)

F. A. A. Campbell, Esq., K.C.

J. P. Kent, Esq., K.C.

..... Counsel for Appellant

C. F. H. Carson, Esq., K.C. Counsel for Respondent

DECISION OF THE BOARD

This is an appeal by the Corporation of the City of Toronto from the decision of His Honour Judge Parker allowing an appeal by Simpsons, Limited, from the decision of the Court of Revision. The County Court Judge found:

"That the premises occupied by Simpsons, Limited, at 108 Mutual Street is occupied and used for the purpose of carrying on its business as an investment, financing and holding company, and that such business is within the contemplation of The Assessment Act and liable for business assessment; and I further find that the dividends on shares held by Simpsons, Limited, in the Robert Simpson Company, Limited, is income derived from the business for which it (Simpsons, Limited) is liable for business assessment."

Upon the opening of the appeal, Mr. Carson contended that the Municipality had no right of appeal and asked that his argument on this point in the City of Windsor v. Hiram Walker & Sons, Limited, be considered. The Board found in that case that the Municipality had the right of appeal, and Mr. Carson's objection is, therefore, overruled.

Simpsons, Limited, was incorporated by Letters Patent dated 22nd June, 1929. It owns real estate in Toronto, Montreal, Halifax, and Regina, and all of the shares of stock in The Robert Simpson Company, Limited, a Company incorporated by Letters Patent, dated the 18th June, 1895, which has for many years been carrying on a mercantile and manufacturing business at the city of Toronto. The Robert Simpson, Company, Limited, owns all the shares in the Robert Simpson Company, Montreal, Limited; The Robert Simpson Company Eastern, Limited; The Robert Simpson Company Western, Limited; Thompson Manufacturing Company, Limited; Keens Manufacturing Company Limited; central Indoor Parking Garage, Limited; and the Robert Simpson Drug Company, Limited. The companies have interlocking Directorates. Mr. Frank Hay is Secretary and Treasurer of Simpsons' Limited, and is Secretary of each of the other companies. Simpsons, Limited, lease its real estate to Robert Simpson Company, Limited, and to the companies in which the Robert Simpson Company, Limited, own all the shares, which companies have been referred to as the Robert Simpson Company, Limited, subsidiaries.

The leases provide that the Lessees shall:

"during the said tenancy well and sufficiently repair, maintain, amend and keep the said demised premises, with the appurtenances, in good and substantial repair and all fixtures and things thereto belonging or which at any time during the said tenancy shall be erected and made by the Lessor when, where and so often as need shall be, reasonable wear and tear and damage by fire, lightning and tempest only excepted."

and shall keep the premises insured.

On the 29th May, 1936. The Robert Simpson Company, Limited, surrendered to Simpsons, Limited. "that part of the eleventh floor of the building owned by Simpsons, Limited, and leased to The Robert Simpson Company, Limited, and known as 108 Mutual Street, as is marked in red on the sketch (Exhibit 19) and being composed of approximately ninety-six square feet more or less of floorspace", and by Resolution of the Board of Directors of Simpsons, Limited, passed at a meeting held on the 29th day of May, 1936, it was resolved that the principal office of the Company be in these premises and that the Assessment Commissioner be asked to assess the Company for business at those premises.

On the 30th day of April, 1940, an additional space, about 655 square feet, on the eleventh floor of the building at 108 Mutual Street, was surrendered by The Robert Simpson Company, Limited, to Simpsons', Limited. At these premises, Respondent employed an accountant and one stenographer in the years 1939, 1940, 1941 and 1943, and in the years 1940, 1941 and 1943 it employed a supervisor of buildings, who had his office at said premises. It also employed Mr. Frank Hay, Secretary and Treasurer, and Mr. J. D. H. Hutchinson, assistant to Mr. Hay, on part time only, and one Clerk in 1939; and in 1940, in addition to Hay and Hutchinson, it employed two Clerks in 1940 and 1941, three Clerks in 1942, and two Clerks in 1943, all of whom were located not in the "Principal Office" but in The Robert Simpson Company, Limited, store in Toronto.

In the four years in question, 1940-41-42-43, the Respondents were assessed for and paid business tax on \$750.00, being 75% of \$1,000.00, the assessed value of that part of the building at 108 Mutual Street occupied by it. This assessment was made under the provisions of Section 8 (1) (e) of the Assessment Act, which is as follows:

"8 (1) Irrespective of any assessment of land under this Act, every person occupying or using land for the purpose of any business mentioned or described in this section shall be assessed for a sum to be called "business assessment" to be computed by reference to the assessed value of the land so occupied or used by him, as follows:

"(e) Every person carrying on the business of a wholesale merchant, of an insurance company, a loan company or a trust company, as defined by this Act, or of an express company carrying on business on or in connection with a railway or steamboats or sailing or other vessels or of a land company, or of a loaning land corporation, or of a bank or a banker, or of any other financial business for a sum equal to seventy-five per centum of the said assessed value."

In each of these years the Respondent was assessed for Income as follows:

"Income Assessment in 1940 in Respect of 1939		Taxes Claimed
Dividends	\$845,875.00	
	75,788.50	
	<hr/>	
	\$921,663.50	
Exemption	1,500.00	
	<hr/>	
Assessment	\$920,163.00	\$32,343.73
	<hr/>	
Income Assessment in 1941 in respect of 1940		
Dividends	\$854,250.00	
	187,109.31	
	<hr/>	
	\$1,041,359.31	
Exemption	1,500.00	
	<hr/>	
Assessment	\$1,039,859.00	\$35,979.12
	<hr/>	

**Income Assessment in 1942
in respect of 1941**

Dividends	\$368,500.00	
	189,897.17	
	<u>\$558,397.17</u>	
Exception	1,500.00	
	<u>\$556,897.00</u>	\$18,154.84

**Income Assessment in 1943
in respect of 1942**

Dividends	\$176,261.37	
Dominion of Canada Bond Interest	354.37	
	<u>\$176,515.74</u>	
Exemption	1,500.00	
	<u>\$175,015.00</u>	\$5,530.47"

In each of these years an appeal was taken by the Respondent to the Court of Revision, where the assessment was confirmed. Notice of appeal from the decision of the Court of Revision was given in each year but, by agreement, the four appeals were delayed and came on together before His Honour Judge Parker.

The Corporation Income Return for 1941 (Exhibit 27A), filed by the Respondent, shows:

"Page 1.	Nature of business	—(Blank)
Page 2, Item 1.	The profit or gain directly or indirectly received by the corporation from its business or undertaking including income from Subsidiary—The Robert Simpson Company, Limited, but not including income from investments.	\$954,957.99
Page 2, Item 3.	Rent or other income derived from real estate situate outside Ontario, without any deduction. Included in Item No. 1— derived from business.	
Page 2, Item 4.	Income from Governmental and municipal bonds, debentures and securities.	None
Page 2, Item 3.	Income from all other stocks, shares, bonds, debentures and other securities, but not including income from Ontario mining stock.	None
Page 2, Item 6.	Income from money loaned upon any security or without security.	None
Page 2, Item 7.	Income from bank deposits. Included in Item No. 1.	
Page 2, Item 8.	Income from any trade or business carried on outside Ontario. Included in Item No. 1.	
Page 2, Item 9.	Income from any other source, but not including reut from real estate in Ontario.	None
Page 3, Item 11.	Statutory exemption.	\$1,500.00
Page 3, Item 12.	Income derived from the business in respect of which the corporation is liable to business assessment under Section 8 of The Assessment Act, as shown in Item 1.	\$954,957.99
Page 3, Item 13.	Expenses in respect of real estate situate outside Ontario (Item 3). Included in determining Item No. 1.	

Page 3. Item 15.	Total deductions and exemptions claimed	\$956,457.99
	Total income (Item 10)	\$954,957.99
	Total deductions and exemptions claimed (Item 15).	\$956,457.99
Page 3. Item 16.	Assessable Income	None
Page 3. Item 17.	Names and addresses of parent, subsidiary and affiliated corporations having head office or chief place of business in this municipality.	
	The Robert Simpson Company, Limited, Toronto, Ontario.	
Page 3. Item 18.	Did your corporation make a corporation income return to this municipality in each of the two years last past?	Yes"

The Statement of Revenue and Expenses and Surplus for the fiscal year ending January 3, 1940, shows:

"Revenue:

Property rentals		\$1,000,000.00
Dividends on investments in shares of the Robert Simpson Company, Limited.		
On common shares	\$845,875.00	
On preference shares	75,788.50	921,663.50
Interest credited but not received on current account with The Robert Simpson Eastern Limited	4,389.00	4,389.00
		<u>\$1,926,052.50"</u>

The Expenses and Provisions deducted are:

"Provision for depreciation of buildings and equipment	\$240,575.00	
Miscellaneous interest	4,081.54	
Directors' remuneration other than salaries	2,780.00	
Remuneration of solicitors and counsel	2,007.80	
Proportion of underwriting and refunding expense and of premium on acquisition of Preference Shares of The Robert Simpson Company, Limited—written off	175,670.00	
Provision for income taxes	68,750.00	
Miscellaneous expenses	30,216.93	"

Presumably "Miscellaneous Expenses" of \$30,216.93 includes salaries of Directors and also salaries of the Accountant, Clerks, &c. The salaries of Accountant, Clerk &c. for 1939, amounted to \$7,033.00 (Exhibit 21). What payments (if any) other than salaries of Directors are included in this item is not disclosed. The Taxes, Insurance and Repairs to Real Estate were paid by the tenants, all of whom were subsidiaries, either of the Respondent or of its subsidiary, The Robert Simpson Company, Limited.

The Corporation Income Returns for the years ending 1940, 1941 and 1942 were made up in similar form, and in each of the years 1940, 1941, 1942 and 1943, the appellant claimed taxes on the amount of the Dividends received by it from The Robert Simpson Company, Limited, as Income as follows:

1940.	On dividends received in 1939, less \$1,500.00 exemption.	\$32,343.73
1941.	On dividends received in 1940, less \$1,500.00 exemption.	\$35,979.12
1942.	On Dividends received in 1941, less \$1,500.00 exemption.	\$18,154.84

and in:

1943, in respect of Income received in 1942:		Taxes Claimed
Dividends	\$176,261.37	
Dominion of Canada		
Bond Interest	254.37	
	<u>\$176,515.74</u>	
Exemption	1,500.00	
	<u>\$175,015.00</u>	
Assessment		\$5,530.47"

There is no dispute as to the amount of the Income received.

The Appellant says the Respondent is not carrying on a business at 108 Mutual Street, Toronto, and that, even if the purpose for which the Respondent used or occupied those premises can be said to be the carrying on of a business, the dividends earned by The Robert Simpson Company, Limited, and paid to the Respondent are not income derived from the business in respect of which it is assessable under Section 8.

The Respondent claims that it is carrying on a business at 108 Mutual Street, Toronto, that it is properly assessed for business assessment on the assessable value of the land which it is occupying and using for the purpose of its business and that the dividends received by it from The Robert Simpson Company, Limited, and the Bond Interest (received in 1942), as well as all other income, including rents, is income derived from the business in respect of which it is assessable under Section 8 of the Assessment Act.

Respondent claims that the decisions in Russell Industries v. Toronto, 1941, O.R., 44; Aluminum Company of Canada v. Toronto, 1944 O.R., 66; and other Corporation Income Tax cases should be disregarded because, in each of these cases, the Company was carrying on a business, that the dividends received by them were dividends from investments in other Companies, and that, in this case, the Company was formed for the express purpose of carrying on the business of investing the money of its shareholders in the shares of The Robert Simpson Company, Limited, and otherwise, and protecting the interests of those shareholders.

The evidence taken before the County Court Judge was submitted, and no new evidence was adduced before the Board.

The Robert Simpson Company, Limited, was incorporated by Letters Patent, dated the 12th June, 1896, for the purposes and objects following:

"Under the name of "The Robert Simpson Company (Limited)" to buy, sell, manufacture, and deal in goods, wares and merchandise generally and for the said purpose to acquire the necessary real and personal property including the stock-in-trade and business now carried on by the said Robert Simpson as a departmental store at the corner of Queen and Yonge Streets in the said City of Toronto."

and the Company continued to carry on that business. The Company issued some 6% Preference Stock and 5% first mortgage Gold Bonds which were financed in England, subject to certain restrictive agreements which, the evidence shows, "placed a very serious limitation on further financing and expansion of the business". A new Company, "Simpsons, Limited", was formed in 1925 for the purpose of acquiring the outstanding and issued paid-up stock in The Robert Simpson Company, Limited, which then owned several subsidiary companies, namely: Robert Simpson, Montreal, Limited—formerly John Murphy, Limited; Robert Simpson, Western, Limited—head office, Regina, Saskatchewan; Robert Simpson, Eastern, Limited—head office, Halifax, N.S.; Thompson Manufacturing Company, Limited—head office, Toronto; Keens Manufacturing Company, Limited—head office, Toronto.

On the 22nd June, 1929, a new company "Simpsons, Limited" was incorporated and the Charter of "Simpsons, Limited", incorporated in 1925, was surrendered. The new company proceeded to finance and on or about the 29th June, 1929, issued and placed on the market \$4,500,000.00 first mortgage, and Collateral 13½ year bonds, 4¼ % Series A Bonds. Later, on or about the 25th February, 1941, it issued \$1,300,000.00 first mortgage and Collateral Trust Bonds 4¼ % Series A, due in 1951. On or about 15th August, 1944, it issued \$12,500,000.00 in the same

class of Bonds due 15th August, 1945-1960 and, on or about 21st December, 1944, it offered \$11,250,000.00 4½% Cumulative Redeemable preferred shares.

The purposes and objects of Simpsons, Limited, as stated in its Charter, include:

- (a) To buy, sell, manufacture and deal with goods, wares and merchandise of every kind and description, both wholesale and retail, and to carry on a general trading and commercial business;
- (b) To purchase, underwrite, take in exchange, subscribe, apply for or otherwise acquire, hold, sell, exchange, or otherwise dispose of shares in the capital stock of any other company, also the bonds, debentures, debenture stock, or other securities or evidences of indebtedness of any other company and to guarantee the performance of contracts by any such other company;
- (c) To invest and deal with the moneys of the Company not immediately required in such manner as from time to time may be determined by the Board of Directors.

Frank Hay, the Secretary and Treasurer of the Company, said that it was not the intention of the Company to engage in business activity under (a) at that time but might do so eventually. At page 27 of the evidence, a letter, dated June 22, 1929, written by the President of the Company, read:

"Simpsons Limited (new company) has been incorporated under the laws of the Dominion of Canada and will acquire from the present company of the same name all the outstanding common shares of The Robert Simpson Company, Limited, of Toronto, which, in turn, owns all of the issued shares of "The John Murphy Company, Limited, Montreal (to be known as Robert Simpson, Montreal, Limited); The Robert Simpson Western, Limited, Regina; The Robert Simpson Eastern, Limited, Toronto and Halifax; Keens Manufacturing Company, Limited, Toronto; and Thompson Manufacturing Company, Limited, Toronto. The new company, therefore, will control the operations of two of the oldest established departmental stores in Canada, as well as a mail order business extending over the whole Dominion.

"The new Company will acquire direct title to substantial properties now owned by The Robert Simpson Company, Limited, and its subsidiary companies, including the new addition to the Toronto store, the eleven-storey warehouse on Mutual Street, Toronto, and all fixed properties of such subsidiary companies in Montreal, Regina and Halifax.

"The business of The Robert Simpson Company, Limited, was established in 1872 and was incorporated under its present name in 1896. The Robert Simpson Company, Limited, has enjoyed steady and continuous development and dividends have been paid on its common shares continuously during the past thirty years."

At page 29 of the evidence, Mr. Carson referred to further provisions in the Charter, as follows:

"FURTHER ORDAINED AND DECLARED that, if authorized by by-law, sanctioned by at least two-thirds of the votes cast at a special general meeting of the shareholders, duly called for considering the by-law, the directors may from time to time:

- "(a) Borrow money upon the credit of the company;
- (b) Limit or increase the amount to be borrowed;
- (c) Issue bonds, debentures, debenture stock or other securities of the company and pledge or sell the same for such sums and at such prices as may be deemed expedient;
- (d) Hypothecate, mortgage or pledge the real or personal property of the company, or both, to secure any such bonds, debentures debenture stock or other securities and any money borrowed for the purpose of the company."

Simpsons, Limited, appoints its Directors, who meet once a month. Those Directors issue a proxy to one of their members to attend the meetings of The

Robert Simpson Company, Limited, and he appoints the Directors of that Company. The Directors of The Robert Simpson Company, Limited, issue a proxy or proxies to one or more of their members to appoint Directors of the companies in which The Robert Simpson Company, Limited, own all the shares.

At page 60 of the evidence, the witness, Hay, said;

"Q. Then, coming back to the directors of Simpsons Limited, will you go on and describe what they do and accomplish?"

A. They meet on call, as I say, at a minimum of once a month, but I think it would be closer to say that they meet about twice a month and there they go quite exhaustively into the statements of profit and loss, and the balance sheets, because the figures which go into the making up of these documents are kept current day by day, week by week, month by month, and the directors frequently meet to consider these statements, and go into them quite exhaustively.

And, arising out of their studies of these statements, they make whatever recommendations they wish, to pass on to the directors of any of the other subsidiary companies.

Q. Then, do they report their views on policy?

A. Oh, definitely."

There is also an Advisory Committee of three members who meet before the "is the last Court of Appeal. They determine the policies. They decide what should be done in the interest, not only of Simpsons, Limited, but what should be done by the individual subsidiary company."

Then, at page 64, line 5:

"Q. May I put it this way: That the income of Simpsons Limited depends upon the success of the direct subsidiary, The Robert Simpson Company, Limited, and the indirect subsidiaries?"

A. I think that is true. That is the reason, I would say, that the directorate of The Robert Simpson Company, Limited, as a whole, and the advisory committee, as a subcommittee of the Simpsons Limited directorate, give such a constant scrutinizing care to the guidance of the subsidiary company."

Since its incorporation Simpsons, Limited, has been acquiring real estate which it leases to The Robert Simpson Company, Limited, and to the so-called subsidiaries of The Robert Simpson Company, Limited, and others. In general, at least, the lessees repair and keep in repair, pay all taxes and insurance.

Wilson, who is described as "Supervisor of Buildings", supervised the accounts which were necessary to be set up in connection with the acquisition of properties, the demolition of old buildings, the awarding of contracts for new buildings, and the keeping of records as to the cost of new buildings. He is not a construction man, purely an accountant.

Mr. Hay's salary is paid partly by Simpsons, Limited, and partly by the subsidiary, The Robert Simpson Company, Limited, and the subsidiaries of The Robert Simpson Company, Limited.

At page 73, Hay says:

"A. Well, there is a multitude of accounting, clerical and stenographic work to be done.

Q. Exclusively for Simpsons, Limited?"

A. I am speaking now only of Simpsons, Limited, work, because that is all that is done in these premises.

These individuals, whose names are registered in this statement made up and just referred to, are Simpsons Limited employees, only, so that everything I say in connection with them is in respect of work done by them for Simpsons Limited, only.

"There are general ledgers; there are budgetary controls, depreciation accounts, insurance accounts, and there are such a variety of them that they require a pretty special knowledge on the part of these people who are there for the express purpose of looking after these accounts and records.

Q. So that in a way that we will understand it, when you speak of "budgetary controls", is that a bringing together by Simpsons Limited, the parent company, in a consolidated way, the budget situations not only for itself, but its direct subsidiary, The Robert Simpson Company Limited, and, in turn, these indirect subsidiaries?

A. That is right.

MR. CAMPBELL: My friend is putting very leading questions on matters which go very much to the heart of this case, and I think this witness should give the evidence himself. Ever since he was speaking as to the business of this Company, done in these premises—I do feel it is not quite fair, the way he is putting it."

At page 76:

"Q. I take it you are drawing a distinction between the Company as an independent corporation, and the consolidated picture, to which you have referred.

A. Oh, yes, there is a distinct difference.

Q. You are now speaking of Simpsons Limited as a corporation?

A. Yes, because it is Simpsons Limited, as a corporation, which receives its dividends from its investments and shares and the moneys covering rentals.

Simpsons Limited it is which distributes its bond interest and distributes its dividend cheques, and attends to the manifold duties which are, of course, necessary in the wake of all these activities, which are very important, as you can imagine.

Q. Now, may I ask you this? Referring to what you described as "receipt of dividends from The Robert Simpsons Company Limited" and "the receipt of rentals", and the like, are the accounts and records of Simpsons Limited with reference to those transactions kept on the premises?

A. Oh, yes.

Q. That is, the premises at Mutual Street?

A. Yes. All the control accounts are there, and the general ledgers."

At page 77:

"A. No, the control accounting within Simpsons Limited, and the general ledgers are all there. We have certain—what we call "controls"—I do not know whether you will know what I mean by "controls"—but we have controls of all offices, to compare records with records, and those go into the general ledgers.

Q. But the general ledger of Simpsons Company is kept in the Mutual Street premises?

A. Oh, yes, definitely.

Q. And the other accounting records which are necessary in connection with ledgers of that kind are kept there?

A. Yes, if I may volunteer this explanation, sir: all the individual companies, like The Robert Simpson Company of Montreal, in Montreal, and The Robert Simpson Company of Halifax, in Halifax, and The Robert Simpson Western Limited, in Regina, keep their own separate accounting records. These records come through to Toronto, and eventually find their way to the offices of Simpsons Limited—

Q. That is, at Mutual Street?

A. At Mutual Street, 108 Mutual Street, because, naturally, Simpsons Limited is interested in seeing all those in connection with its own books of account, and its own investments.

Q. That is, its holding shares, and so forth?

A. Naturally."

At page 78, line 13:

"A. When we declare dividends at the directors' meeting there is presented a statement which is the basis of the payment of these dividends. Naturally, we cannot pay dividends out unless we have earnings, and it is the earnings' statements which are presented at the Board meeting, and which are considered by the directors of Simpsons Limited, which are in respect of Simpsons Limited as a corporation, and the certificate as to the statements which appear before the directors is what justifies their declaration of dividends quarterly, or whenever they are declared, and this is the statement of Simpsons Limited as a corporation.

Q. And not a consolidated statement?

A. Not a consolidated statement, no.

Q. And those are prepared on these premises?

A. Yes.

At page 79, line 1:

Q. Then, you have made some reference to figures which come from the direct and indirect subsidiaries which, as you say, find their way to the Mutual Street premises of Simpsons Limited?

A. Yes, because they are worked out and prepared in the several offices of the several subsidiaries. For instance, each branch or each organization—The Robert Simpsons Eastern Limited, as an example—

Q. Yes.

A. — has records in Toronto, and it has records in Halifax, because that company has two individual operations. They control the mail order in Halifax and the mail order in Toronto. They make up their own records. They do all their own accounting, and eventually their final statements in respect of that particular company come through to Toronto, and eventually find their way into the offices of Simpsons Limited, 108 Mutual Street.

Likewise with the Western Company, and likewise with the Montreal Company and the indirect subsidiaries, Thompsons and Keen's. They are all prepared in their respective branch offices."

At page 60, line 1:

"A. Simpsons Limited do the consolidating, because naturally no one of the other individual companies has all the records of the others. Simpsons Limited is the only organization or corporation which has the records of the other individual component companies."

The witness described the activities of the Respondent with reference to the payment of Bond Interest and dividends, and the collection and disposal of coupons.

In cross-examination by Mr. Campbell, witness said that all subsidiaries incur their own liabilities and pay their own debts. Simpsons Limited "do not buy or sell stocks or Bonds for any one other than Simpsons Limited" and "are not in competition with any Investment houses or brokerage firms". The Dividends paid by The Robert Simpson Company, Limited, to Simpsons, Limited, are paid by cheque.

In his Judgment, the County Court Judge said:

"It was submitted by Counsel for the Appellant that Simpsons Limited was carrying on business at 108 Mutual Street and that the nature of the business was within the contemplation of the above sections.

Under the authorities referred by me in my Judgment of January 14, 1932, and on the evidence before me, I find that the company is carrying on business at 108 Mutual Street and that business might well be designated as that of an investment, financing and holding company, and therefore liable for assessment under Section 8 (1) (k)."

The Respondent did invest money provided by its shareholders in the shares of The Robert Simpson Company, Limited. It did purchase real estate and demolish and erect buildings. It did lease its Real Estate. It did issue and sell its own shares to the public. It did issue and sell First Mortgage and Collateral Gold Bonds to the public, and it did issue cheques to its shareholders for payment of dividends and to the holders of Bonds for payments of Interest. That may be carrying on a business within the purview of the Statute.

But it did not buy and sell shares and bonds so as to take advantage of the rise and fall of the price of those shares and bonds on the market.

At page 6 of the Judgment filed with the Board, the County Court Judge says:

"Exhibit 16 was filed showing the Directors of Simpsons Limited and its direct and indirect subsidiaries. There is an overlapping of directors, but every company is a distinct entity, and every company manages its own business. It is true that the directors of Simpsons Limited, apart from managing that Company, keep a watchful eye on the operations of every subsidiary, and more or less direct the policy of those subsidiaries, all of which are merchandising companies."

The evidence does not satisfy the Board that "the directors of Simpsons, Limited, apart from managing that Company, keep a watchful eye on the operations of every subsidiary, and more or less direct the policy of those subsidiaries, all of which are merchandising companies". There is no doubt the Directors of each of the subsidiaries manage and control the business and direct the policy of that subsidiary and, when so managing, controlling, and directing, they are acting as Directors of that Company and not as Directors of Simpsons, Limited.

It is also true that C. L. Burton is President of the Respondent and also President of each of the subsidiaries and that at least one of the Directors of the Respondent is also Director of one of the subsidiaries and that Frank Hay is Secretary-Treasurer of the Respondent, of The Robert Simpson Company, Limited, and each subsidiary of The Robert Simpson Company, Limited, but, as such, they are acting on behalf of the subsidiary, not on behalf of the parent Company.

The Respondent contends that it is occupying and using premises at 108 Mutual Street, Toronto, for the purpose of carrying on its business, which business consists of the purchase of real estate, the erection of buildings, the rental of those buildings and real estate, the purchase of shares in The Robert Simpson Company, Limited, and the holding of those shares; that it has been assessed and should be assessed for a sum to be called business assessment; and that the income received by it from rents, and the dividends received from its shares in The Robert Simpson Company, Limited, is income derived from its business.

The activities carried on at 108 Mutual Street consist:

- (1) of the work done by the Supervisor of buildings, who is instructed by the Directors of Simpsons, Limited, and who purchases properties, demolishes and erects buildings and performs other duties in connection with the Real Estate of Simpson's Limited;
- (2) of the work done by an accountant and stenographer, who receive reports from the subsidiaries and consolidate those reports for submission to the Directors of Simpsons, Limited.

No Directors' meetings, or other meetings, of Simpsons, Limited, are held at 108 Mutual Street.

It has not been argued and surely could not be argued that the activity of the Supervisor of Buildings in any way contributed to the making of the Income received by the Respondent, as dividends on the shares held in The Robert Simpson Company, Limited. The rentals paid to Simpsons, Limited, are not included in the amounts which the appellants are seeking to tax as Income.

With reference to the second activity said to be carried on at 108 Mutual Street, the evidence shows that an accountant and one and sometimes two accountants are employed. Each subsidiary works out and prepares its report for the parent company and does its own accounting, and those reports are sent to Toronto. Whether the subsidiaries of The Robert Simpson Company, Limited, send these reports to the head office of The Robert Simpson Company, Limited, at Toronto, or to Simpsons, Limited, is not shown. Its most important employees, the Secretary and Treasurer and the Assistant Secretary and Treasurer, and two and sometimes three stenographers, are stationed at the store and not at 108 Mutual Street. However, the evidence shows that Simpsons, Limited, do the consolidating of the records for submission to the shareholders as "it is the only organization which has the records of the individual component companies". The evidence does not show where the shares held by The Robert Simpson Company, Limited, in its subsidiaries, or where the shares held by Simpsons Limited in The Robert Simpson Co. Limited, are located. The evidence does not show what activities of Simpsons, Limited, are carried on at "the store". Simpsons, Limited, is not assessed for business on the premises used by it in "the store".

Section 9 of the Assessment Act reads:

"9 (1) Subject to the exemptions provided for in sections 4 and 6,—

- (a) every corporation not liable to business assessment under section 8 shall be assessed in respect of income;
- (b) every corporation although liable to business assessment under section 8 shall also be assessed in respect of any income not derived from the business in respect of which it is assessable under that section."

Mr. Carson contends that the Respondent is carrying on business at 108 Mutual Street, that it is occupying the premises at 108 Mutual Street, and asks: "If it is not occupying those premises for the purpose of its business, for what purpose is it occupying them? It can't have any other purpose than a business purpose"; and he said:

"And it isn't possible for a company to receive as much as twenty million dollars of public monies, and with those monies invest in a merchandising company without that company and its directors having a great deal of responsibility and having a staff to keep track of what is going on, keep account of the success of the companies in which the monies are invested, so as to obtain the object of gain and profit for the shareholders. Surely that is a business and, if that is the business, then I agree with my friends, that the monies that are in question here are derived from that business."

It is not sufficient to say that this Company is carrying on a business. It must be shown that the Company is carrying on a business and that the Income claimed to be assessable is derived from that business.

Section 1 of the Assessment Act provides that:

"(f) "Income" shall mean the profit or gain directly or indirectly received by a corporation from its business or undertaking, and shall include interest, dividends or profits directly or indirectly received from money at interest upon any security or without security, or from stocks, or from any other investment, and also profit or gain from any other source;"

Section 4 provides:

- "4. All real property in Ontario and all income derived, whether within or out of Ontario, by any corporation, or received in Ontario on behalf of any corporation, shall be liable to taxation, subject to the following exemptions:
- (13) The dividends or income from stock held by any person, in an incorporated company, the income of which is liable to assessment in Ontario, but this paragraph shall not apply to exempt such dividends or income from stock in an incorporated company by reason of the assessment or taxation of the income of such company under The Corporations Tax Act."

This section would not apply in this case, because the Income of The Robert Simpson Company, Limited, is not liable to assessment. It is assessed for a sum to be called business assessment.

The activities of the accountant and stenographers at 108 Mutual Street are the compiling and consolidating of the reports of the subsidiary companies for Simpsons, Limited. They have nothing to do with the Dividends declared by The Robert Simpson Company Limited, until after those dividends have been declared by that Company.

Mr. Carson argues that this case can and should be distinguished from other Corporation Income Tax cases decided by this Board because, in the other cases, the argument was that the business of the parent company was operating, controlling, &c, the subsidiary companies, and it was claimed that they were liable to business assessment, while in this case the argument is that the business of the holding Company is investing in and receiving the dividends from the subsidiaries.

It would be no more reasonable to find that, because Simpsons, Limited, invest in and hold all the shares in The Robert Simpson Company, Limited, it is carrying on a business than to find that each of one hundred persons who invest in and hold a share in a company is carrying on the business of holding shares.

In *Hatch v Minister of National Revenue*, 1938, Exch. Court Reports, 209, Mr. Justice Angers, at page 223, said:

"The only business exercised by the Company was "the operation of its breeding farm and, as an adjunct, its racing stable. Mere investment for investment's sake is not a business."

The income assessed is income received by the Respondent in the form of Dividends declared by The Robert Simpson Company, Limited, from the profits derived from the business of that Company. Mr. Carson contends that, when these dividends come into the possession of the Respondent by reason of its ownership of all the shares in The Robert Simpson Company, Limited, they then become income derived from the business (the business of holding shares) of Simpsons, Limited, in respect of which Simpsons, Limited, is assessable at 108 Mutual Street under the provisions of Section 8 of the Assessment Act. The Board cannot agree with this contention.

The Board finds that, even if the purposes for which the Respondent was occupying and using the premises at 108 Mutual Street could be said to be the carrying on of a business, the dividends received by it from The Robert Simpson Company, Limited, and assessed to it by the appellant are not income received by it from that business.

The appeals are, therefore, allowed, with costs to be taxed by the proper taxing office at Toronto. The Respondent shall pay the Board's fee fixed at \$200.00.

DATED at Toronto this 24th day of July, A.D., 1945.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

P.F. B-2509

IN THE MATTER of Section 44a of "The Municipal Act" (R.S.C. 1937, C. 266) (as enacted by O.S. 1944, C. 16, S. 1), and

IN THE MATTER of Section 44a of the said Act (as enacted by O.S. 1944, C. 39, S. 3), and

IN THE MATTER of the Application (by way of Petition) of Peter Gonzalez and others for the erection of the unorganized Township of Mountjoy into an Improvement District.

DECISION OF THE BOARD

Under date of March 21st, 1944, a petition signed by Peter Gonzalez and others containing in all 59 signatures of male residents was filed with the Board. An affidavit attached stated that the signatures were all affixed in the presence of Rene Leduc and that all who signed were residents and of the age of 21 years or over. This petition called upon the Ontario Municipal Board to declare the Township of Mountjoy an Improvement District as provided for in Sections 44a, 44b, 44c, 44d of "The Municipal Act".

The Board gave an appointment and directions for the giving of notice and for the filing of objections with the Acting Secretary of the Board on or before April 8th, 1944. As a result a number of objections were filed and it was decided to take no further action until a public hearing before the Board at Timmins could be arranged.

The Board appointed Wednesday, January 10th, 1945, at 9.30 a.m. in the Council Chambers at the Town of Timmins for the hearing of interested parties. This hearing did not open until 11 o'clock due to the late arrival of the train.

Mr. R. S. Colter, Chairman and Mr. W. P. Near, Vice-Chairman were present and heard representations for and against the application.

Mr. Gregory T. Evans represented the applicant petitioners and evidence was submitted to indicate that the Board's directions respecting notices by mail, in the Timmins Press and direct to those who had previously filed objections had been carried out.

Mr. S. A. Caldbick appeared on behalf of 97 residents, the Wicks Lumber Company, Limited and Feldman Lumber Company Limited, in opposition.

Mr. Caldbick submitted:

1st That the scheme of an Improvement District is not applicable to Mountjoy which is partly urban and partly rural; the district should be wholly rural or wholly urban, and stated there are three townsites or areas subdivided and substantially built upon. He admitted it is unhealthy to permit growth without government but suggested the areas near Timmins boundary should be annexed.

2nd. That the construction of water, sewers and pavement should be deferred until after the war and contended that there is not the same ability to pay by farmers in this section as there is amongst urban dwellers.

3rd. If the district is organized then it should be confined to the area whose residents desire it and he would welcome the submission of the matter to a vote.

Other objections were voiced by 10 individuals. These expressed a fear that taxes would be greatly increased, and thought that the organization should be deferred until after the war; that the Government should build and maintain all the roads, etc.

Mr. G. T. Evans in support of the petition to organize submitted:

1st. That no district in the north is wholly rural or wholly urban.

2nd. That there are approximately 3,000 population in the area and 400 ratepayers and the population is largely along the river and the highway.

3rd. That his clients generally have no roads and hence are greatly handicapped in reaching the markets; that they do not object to increased taxes if there are corresponding benefits.

4th. That the petitioners are largely rural.

Two men spoke in support of organization so that roads could be properly improved.

Mr. Gorrie, District Engineer of Municipal Roads for Department of Highways, in answer to a question explained that Mountjoy, when organized, would receive 70 to 75% subsidy on roads and 80% on bridges.

The Board finds that no valid reason has been advanced for the further deferment of organization in the Township of Mountjoy. The petitioners ask for an Improvement District and the Board's decision is that an Improvement District shall be erected and Order will issue accordingly.

The name of the Improvement District shall be Mountjoy or such other name as may be designated by By-law of the Board of Trustees to be appointed by the Lieutenant-Governor-in-Council, and the erection shall take effect on date to be fixed by Order of this Board.

DATED at Toronto the 14th Day of February, A.D. 1945.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

ORDERS OF THE BOARD

ORDERS ISSUED BY THE BOARD UNDER SECTION 70 OF "THE ONTARIO MUNICIPAL BOARD ACT"
(R.S.O. 1937, CHAPTER 60), APPROVING OF THE UNDERTAKING OF CAPITAL EXPENDITURES

NOTE: Where approval granted under additional legislation, applications marked as follows:

"THE LOCAL IMPROVEMENT ACT"

- (a) Section 8 Approval of undertaking of work
- (b) Section 29 (3) Assessment for opening of lane

"THE MUNICIPAL ACT"

- (c) Section 297 (5) Extension of time for passing By-laws
- (d) Section 305 (15) (d) Redeemable before Maturity
- (e) Section 310 Reduction in rate of debenture interest
- (f) Section 315 (2) Approval of further debt and levies
- (g) Section 407 (2) Approval of By-law—Extension of Municipal Utilities

THE ONTARIO MUNICIPAL BOARD ACT"

- (h) Section 49 Amendment of Board's Order
- (i) Section 59 (dd) Approval of retirement of unmaturred debentures
- (j) Section 64 (Part IV) Validation of debenture by-laws
- (k) Section 68 Inquiry of the Board
- (l) Section 69 Authority to Dispense with Vote of Electors

"THE DEPARTMENT OF MUNICIPAL AFFAIRS ACT"

- (m) Section 32
- (n) Section 64 (b)

SPECIAL LEGISLATION

- (o) Sections 1 and 2, "The City of Port Arthur Act 1945".

During the year 1945 the following legislations was enacted:—

Lake Erie and Detroit River Railway Co.—ratification of Agreement with Pere Marquette Railway Company.

Dom. Statutes 1945, C.40

FORM TO BE USED BY COMPANIES IN REPORTING ACCIDENTS

Accidents: Regulations under and in pursuance of Sections 281 and 282 of "The Railway Act," (R.S.O. 1937, C. 259)

Accidents—Every Company upon the happening of an accident shall give to the Ontario Municipal Board notice thereof in writing by delivering the same at the office of the Board in the City of Toronto or by mailing it, postage prepaid, in a registered letter and addressed to the Board.

Such notice shall contain a statement signed by duly authorized officer of such company setting forth the information and particulars hereinafter mentioned.

Such statement shall be divided into paragraphs, each of which shall include and refer to one (or one group) only of the numbered particulars hereinafter mentioned, and the paragraph referring to each respective numbered particular shall bear the number corresponding to the number hereinafter given for each such particular.

The numbers of paragraphs and the particulars to which each shall refer as aforesaid are as follows:

1. Name or names of company or companies concerned in accident.
2. Numbers of train, engine, car or motor.
3. Date and time of accident.
4. Nature of accident.
5. Exact location.
6. Name in full, address and legal addition of each person injured or killed.
7. Age.
8. Married or single.
9. Passenger, employee or other.
10. If employee, length and nature of service with dates and periods of different occupations (if more than one).
11. If employee, character, experience, skill and fitness with respect to occupation at time of accident.
12. How engaged at time of accident and how long on duty.
13. Cause of accident, how same occurred, with full particulars and details and diagram, if required.
14. Persons in charge, with full names, addresses and the particulars referred to in paragraphs 10, 11 and 12.
15. Result to person and particulars of injury.
16. Result to property, including amount of damage.
17. Names and addresses of all persons present at, or eye witness of, the accident.
18. What investigation (if any), and the result of same.
19. Verdict (if any).

The Board reserves the right to require such further and other details, particulars, maps, plans, profiles, documents, models and information or illustration of any kind as to the nature of the accident and a full understanding thereof may suggest or require.

In pursuance of Sections 281 and 282 of said Act, the Board declares that all such information so given in pursuance of this regulation shall be privileged.

Signature of Officer.

N.B.—Give name of officer who fills out this report.

**FORMS THAT MAY BE USED IN CONNECTION WITH THE
EXAMINATION OF MOTORMEN**

Name of City or Town

..... 19.....

Name of Railway

This is to certify that, acting under "The Railway Act," (R.S.O., 1937, C. 269), Section 265, I have examined the who is years of age and feet inches high, weights lbs., complexion, as to fitness as a motorman, that the said is of steady habits, and is in physical ability, intelligence and general knowledge of, and experience in, this work, qualified to act as motorman on any electric car of said Company.

I have been duly appointed an examiner under the said Act, my appointment being dated

Name
Examiner.

REGULATIONS

REGULATIONS AS TO HEIGHT OF CAR STEPS

Under and in pursuance of a certain order of the Board bearing date the 2nd day of June, A.D., 1909, the Ontario Municipal Board made the following regulations.

The steps on all cars hereafter constructed and used by the Toronto Railway Company and all other street and electric railways under the jurisdiction of this Board shall have steps conforming to the following regulations.

On closed single truck cars the height of the first step above the ground shall not be less than twelve nor more than fifteen inches.

On closed double truck cars the height of the first step above the ground shall not be less than fourteen nor more than sixteen inches.

On open single truck cars the height of the first step above the ground shall not be less than twelve nor more than fifteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and nine inches respectively.

On open double truck cars, the height of the first step above the ground shall not be less than fourteen nor more than sixteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and fourteen inches respectively.

REGULATION RE DRINKING WATER ON PASSENGER CARS

Every Electric Railway in Ontario, subject to the jurisdiction of the Board, shall provide in each passenger car which runs 20 miles or more, a suitable receptacle for water with paper cups attached upon or near such receptacle, and shall keep such receptacle, while the car is in use, constantly supplied with cool drinking water for the use of passengers and the conductor and motorman in charge of such car.

This regulation shall not apply to street railways in towns or cities.

Dated at Toronto, this 10th day of April, A.D., 1928.

ELECTRIC AND STEAM RAILWAYS UNDER PROVINCIAL JURISDICTION, YEAR ENDING DECEMBER 31st, 1945

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Annual Report upon the Ontario Training Schools for the year ending 31st March, 1945.

Respectfully submitted,

G. H. DUNBAR
Provincial Secretary.

HONOURABLE G. H. DUNBAR,

Provincial Secretary of Ontario.

Sir:—

It is a privilege to present for your consideration the annual report of the Training Schools Advisory Board, the reports of the Superintendents of the Training Schools, and the statistics for the year ended March 31st, 1945.

It is a privilege because of the quality and value of the work those Schools are doing in salvaging the juvenile delinquents placed in their care. It is quite unlikely that anyone can accurately state the number of children in one year who are known as "Problems". Parents, friends, religious and social service organizations, officials and others study and plan and work with these children, and certainly succeed in varying degree with most of them. Many of them never come before the juvenile courts. Those who are sent to the Training Schools are the so-called failures.

This Department having jurisdiction over these Training Schools, has rather complete case histories of these children and their families, all kinds from the most sordid to good. In the course of a year many letters are received from the parents, and many parents visit the Department. There is a good opportunity therefore to study them. Most of them are reputable citizens, but some are not. Most of them are slow in accepting responsibility for the delinquency of their children, and blame others. Almost always they express their opinion that their child is cured of delinquency, and are sincere in their belief. Almost always they write or come with the request that their child be returned to their care. Generally it is for the natural reason that they love their child and wish to take charge again and to complete the family circle. Quite a number frankly want the child to help in the home, or work and contribute financially to the family budget. It is apparent that many, although having the best of intentions, just do not know how to be good parents. Most are reasonable when the facts are candidly presented to them, and they realize that all officials concerned have only the one desire, that is to help the child to develop into a good citizen, and do whatever is necessary to achieve that result. A few blame some social service organization, accuse the courts of injustice, the School officials for failure, the Advisory Board for refusing parole, and go away angry. Thus during the year there is a rather complete cross-section of all the types of parents.

In some cases the School training is short because the child's only real need is transplanting to proper home conditions, and such homes are found, the School paying board and lodging, and providing clothing, school books and other necessities until the child can begin to earn and become self supporting. The stay in the School in other cases is of varying length according to the training needed, rarely exceeding two years. Most are eventually returned to their own homes. Some require several placements before success is reached, and some are

failures and go to the Reformatories. Some apparent failures eventually find a useful niche in life. School officials sometimes discouraged with failures have had their spirits revived by meeting or hearing of School graduates who in the armed services or in civil life in these recent years, have done their share in achieving victory.

The reports of the Advisory Board and the Superintendents are sufficiently complete, showing the detail work of the Schools, that further comment is unnecessary. Perhaps a word should be said concerning the physical make up of each of the Schools.

PRIVATE TRAINING SCHOOLS

These are owned and operated by Roman Catholic organizations.

(1) St. Joseph's Training School for Boys, Alfred, had the serious misfortune in the summer of 1944 of a fire which completely destroyed the workshops. Now it appears that by the end of this year a new, fireproof trades building will be completed, placed in use, and a credit to that fine School.

(2) St. John's Training School for Boys, Toronto, is seriously handicapped because its buildings are old, not fireproof, difficult to keep in repair, and quite insufficient for the School's needs. It is a constant source of wonderment that in spite of the disadvantages there is such high morale and real success.

(3) St. Mary's Training School for Girls, Toronto, is fortunate that a few years ago it was completely rebuilt on a new location, and is taking full advantage of its modern plant and equipment.

ONTARIO TRAINING SCHOOLS

These are owned and operated by the Province.

(1) The Ontario Training School for Girls at Cobourg has developed marked success in its work, particularly since the second house and property was provided. It needs further residence space, more and larger classrooms, and special facilities for a School of that kind. The vicissitudes of war removed this School from its former location at Galt. That was a near tragedy. However there have been valuable compensating factors at Cobourg, which can be even more valuable if needed facilities are provided.

(2) The Ontario Training School for Boys, Bowmanville, still in its temporary quarters—also because of the vicissitudes of war—has clearly demonstrated the value of proper foster home placement. At any one time in recent years, it has had about forty boys in the School, and over five hundred outside the School under supervision, some in their own homes, and a great many of them in other homes. This has been a forced experiment carried almost to the extreme. There has been a large measure of success, but there are boys who need more training in the School before being placed outside. That, the School cannot give with its limited facilities. It is certainly the hope of officials, and of a great many interested citizens, that this School will quickly be again using its permanent buildings and property. Then, because of the experience gained in these

recent years, it should be able to attain results not previously reached in its notable record.

(3) The Ontario Training School for Boys, Guelph, is an adjunct of the Ontario Reformatory, Guelph. There are some older, sophisticated boys with whom the other Training Schools for Boys cannot properly cope. They are regarded as being more or less incorrigible, often commit serious crimes, and persist in their dangerous, irresponsible actions. Safe custody and rather prolonged training and discipline are necessary. That is being provided for them in a section of the Reformatory, as no other suitable accommodation has been available. Some of these boys are transfers from other Training Schools, some are committed direct by the courts. The gratifying results with these so-called incorrigibles are stated in the Superintendent's report. Some of them and many who are committed to the Reformatory are much the same type, and we hope that a separate, suitable place will soon be provided for them.

Any public institution needs plant and equipment suited to its particular needs. Just as important, it needs trained staff. All the Training Schools have had difficulty in these war years in obtaining the services of competent, trained personnel. Many of these loyal workers knew intense mental and physical fatigue. The situation has been eased at Cobourg and Bowmanville by applying the forty-eight hour week, but obviously this still does not, and perhaps cannot, apply to the executive officials. Now with the ending of the war, staffing problems should ease. In these more favourable conditions and based on the solid experience of the recent past, and careful experimentation, steady consistent progress should result.

C. F. NEELANDS,
Deputy Provincial Secretary

REPORT OF
TRAINING SCHOOLS ADVISORY BOARD

TO THE HONOURABLE G. H. DUNBAR,
Provincial Secretary of Ontario.

Sir:—

The Training Schools Advisory Board presents herewith its fourteenth annual report for the year ending March 31st, 1945. Fifty-One meetings were held, and it is interesting to note that during the last five years only four meetings had to be postponed.

The Board welcomes the growing movement for community centres. Past reports have emphasized the overwhelming significance of poor surroundings as one of the main factors in the creation of juvenile delinquency. We should remember that people form a part of those surroundings, and that the pattern of adult conduct is too often merely copied by children who may be haled into juvenile courts, and there dealt with, while the adults concerned continue their misconduct. One has only to learn the facts of evidence in the case of each boy or girl committed to the Training Schools to realize the overwhelming significance of poor surroundings and undesirable patterns of conduct in moulding the child's acts. It seems clear to us that adults are in need of special training—call it parent education, or whatever you will—to help them realize their place in helping children to become good citizens in a community. Community centres may well create activities and interests which many young people now lack, develop parental education, and help to prevent juvenile delinquency.

The physical and mental health of each pupil receives particular attention in our Training Schools.

It is advisable that there be no break in the usual educational courses outlined for youth in our Province when a boy or girl is committed by the Courts to one of the Training Schools. In fact in most cases, these incorrigible children were unsatisfactory pupils in their communities, and the Training Schools are giving them a more definite, determined academic course than they would accept in their previous schools. In addition all the Training Schools give what they can in handicrafts and vocational work.

These Training Schools are not to be considered as penal institutions, but have for their object the training, educating, and guidance of delinquent boys and girls, so that they may become capable of taking their places in the community again as good citizens as soon as possible.

To assure adequate academic and vocational training for these children the Board encourages:—

(1) An auxiliary opportunity class with a qualified teacher in each School, for all pupils with intelligence quotient of 75 or under. These classes should meet the requirements of the Regulations for Auxiliary Classes of the Department of Education. If these children are still under thirteen when paroled, they should be placed in localities where this type of class is in operation.

(2) Continuance and extension of vocational work in household economics, woodcraft, shoe shop, tailoring, printing and gardening.

(3) The course of study for Grades IX and X for all who have the capacity. Training in typewriting should be encouraged.

(4) Since farm placement is the usual procedure in the case of many boys, it is desirable that the Schools give attention to agriculture. It is possible to have on the staff a teacher who holds an agriculture certificate of the Department of Education.

(5) Special consideration must be given in all Training Schools for pupils in the dull normal non-academic group (approximately 80 to 90 I.Q.) since the majority of commitments are in this group. Being below average in academic capacity they need extensive drill and teaching in the English subjects and arithmetic if they are to be at all capable as a literate people. In addition handwork in the shops and in the fields and garden will be of inestimable value.

(6) Physical training—health, sports programme, gymnasium work, and personal hygiene and fitness—is a most important part of training.

Although under the Training Schools Act commitments are for an indefinite period, it is a fact that paroles from the Schools are granted in every case as soon as the individual delinquent proves worthy. Recently in the case of Bowmanville especially, these paroles have had to be much sooner than we could have wished, but the results have been surprisingly gratifying. However, we hope it will be only a matter of a short time now until the original Bowmanville Training School will be returned to this Department. We do feel that a certain number of boys and girls require fairly prolonged institutional training in order to establish desirable habits before they can be paroled. In many cases the parole is to a foster home because it has been clear from the court evidence taken at the time of commitment that the home has contributed very much to the child's delinquency. If on careful investigation it is found that these home conditions have not improved, it is thought advisable to give the child the benefit of wholesome home surroundings elsewhere, which may be either in the country, town or city, but which will permit the child to continue his education.

The Board is watching closely in cases where our boys and girls are paroled on a working basis, that the wages paid are in keeping with present conditions, and as a consequence there is a marked improvement along this line. We are constantly placing before the School superintendents and staffs the importance of the boys and girls saving a percentage of their wages, and as a result hundreds of them have been buying Government war bonds, opening saving accounts, and quite a number have purchased life insurance.

An experiment in providing leadership for the boys at Bowmanville is being watched with interest. A number of successful business men have visited Bowmanville Training School as "Guest Speakers" at the Sunday and week-day meetings. They have given the boys classification talks, telling them the fascinating highlights of their own businesses, and in some cases showing the boys moving pictures of interesting places and historical events. The boys have enjoyed these talks very much and are most anxious to have them continued. The Board is giving this phase of the work serious consideration and a Fall programme is being planned.

During the year wardship was terminated in 499 cases as follows:—

- 289 Satisfactory adjustments in community, or 58 per cent. of all terminations.
- 48 Enlisted in Armed Forces.
- 28 Married.
- 58 In other Institutions.
- 17 Moved out of Province.
- 44 Whereabouts unknown.
- 15 Further wardship unavailing.

The Board wishes to reiterate its opinion that:—

1. The Department of Indian Affairs at Ottawa should have a training school for its own delinquent wards. We have now 10 Treaty Indians and 29 Non-Treaty Indians in our Schools.

2. That the question of training mentally defective delinquents could be greatly improved. In the first place, they do not belong in our Training Schools at all, but rather in such a training school as exists at Orillia. Their training must be of a special type with teachers who understand conditions of their pupils, and are competent to deal with them. The training must be simple, practical, and capable of being repeated so many times that the boy or girl in question thoroughly acquires the habit of doing this particular work. We know that there is not enough room at the Ontario Hospital School, Orillia, but it has been known for years, at least in the Department of Health, that there should be other training schools in the Province to do work similar to the Orillia School. One member of our Board has suggested that Judges should commit mental defective delinquents directly to Orillia. This would involve having every delinquent seen by a Clinic and diagnosed.

If they are sent to the Training Schools, then it is absolutely necessary that advantage be taken of the Opportunity Class training outlined by the Department of Education of the Province. If these boys and girls are to be in these Schools, then there should be an Opportunity Class with a qualified teacher in each School for all pupils whose intelligence quotient is 75 or under.

The Board feels that under the conditions which the Department has been forced to face in recent years, it has not been possible to give this type of delinquent long enough training in the Schools. It is definitely of the opinion that the defectives should not be in these Schools, and it suggests that the Department of the Provincial Secretary and the Department of Health might consult together to see whether more accommodation can be obtained in the Hospital Training Schools, or whether a special type of school for defective delinquents might be added. Such a school would have the type of training now provided by Orillia, but would ensure greater discipline needed in some instances, and more prolonged supervision.

During the year the members of the Advisory Board visited each one of the Training Schools, and welcomed at meetings of the Board visits from the Superintendents of two of the Schools.

The Board appreciates reports received from the Ontario Department of Education, from the Mental Health Clinics of the Department of Health, and from the Children's Aid Societies of the Department of Public Welfare.

The Board wishes to extend a word of keen appreciation and commendation to the staff members of each of the Training Schools for their earnest and unselfish efforts in the rehabilitation of these delinquent children. These Schools are doing a wonderful work in training and guidance which deserves more adequate recognition.

Because of illness, Mr. George Hambly, Chairman, resigned from the Training Schools Advisory Board on April 1st, 1944, after serving faithfully and efficiently for ten years. It was with sincere regret that the Board learned of the death of Mr. Hambly on June 1st, 1944.

On September 14th, 1944 Mrs. W. E. West, whose work for the Federal Government prevented her attendance at our meetings, resigned from the Board.

At the request of the other members of the Board, Dr. E. P. Lewis was appointed Chairman in September 1944. The Board also welcomed two new members, Mrs. C. R. Sanderson and Mr. H. J. Terry.

REPORT OF THE
ONTARIO TRAINING SCHOOL FOR GIRLS, COBOURG

APRIL 1, 1944 TO MARCH 31, 1945

Through the past fiscal year the population of the school has continued to tax our capacity despite the addition of the Strathmore residence. The number of new commitments is approximately the same as last year, but there has been an increase in the number of girls returned from placement. The number of girls placed during the year shows a decrease, but the number of girls placed and returned during the year compares very favourably with that of other years.

The same general practice of dividing the girls into two main groups for training has been continued. The use of tests for gauging interest and aptitudes has been more closely followed during the past year and the service of the Mental Health Clinic at Cobourg has been much appreciated.

MEDICAL REPORT

On admission to the school, every girl is given a medical examination by the doctor in charge. During the past year a considerable number of girls have been brought to the school for medical re-checks. A summarized report is as follows:

Girls examined by doctor	377
G. C. Smears	682
Wassermann	127
Girls pregnant	6
Abortions	2
Tonsillectomy	5
Appendectomy	3
Minor operations	4
Boils and infections	20
Trench Mouth	4
Flu	20
Measles	2
Pediculi	75
Scabies	26
Eye examinations and glasses	49
T.B. Tests	105
Chest X-rays	15
Other X-rays	4
Smallpox Vaccinations	14
Typhoid Vaccinations	65
Scarlet Fever Toxin	84
Diphtheria Toxoid	41
Gonorrhoea	53
Syphilis	5
Penicillin treatments	14
Fever treatments	9

DENTAL REPORTS

The dental work during the past year has shown a marked need for restorative work as compared to that required in previous years. The following is the summary,—

Examinations	551
Extractions	102
Fillings	533
Prophylactic treatments	11
Dentures	4

A number of girls received training as the nurse's assistant. Usually these girls are able to make use of this training when they leave the school by entering hospitals in various capacities.

ACADEMIC REPORT

Until the end of June, 1944, regular academic classes were continued in one classroom, under the supervision of one qualified teacher. Fifteen Entrance candidates successfully obtained their year's standing without writing departmental examinations. Another thirteen were successful after writing, making a total of twenty-eight successful candidates from a possible twenty-nine.

Beginning in September, 1944, two additional classrooms, under the supervision of qualified teachers, were established. These provide facilities for High School Classes and more individual training for the junior groups.

VOCATIONAL REPORT

The vocational group is subdivided into six units, namely,—Sewing, Laundry, Household Care, Gardening, Cooking and General Maintenance. The following are the reports submitted by each unit:

SEWING

The number of girls in this class taking either full or part time work was forty-eight. They were instructed in general stitch forms, darning, patching, plackets, seams, cutting to a pattern, the use of treadle sewing machines, electric sewing machines and power operating machines. After their initial training, the girls have produced the following for general use in the school:

Pyjamas	14 dozen pair
Nightgowns	2 dozen
Housecoats	1-5/6 dozen
Utility Holders	10 dozen
Tea Towels	5-5/6 dozen
Roller Towels	4-1/3 dozen
Curtains	16 pairs
Cotton Slips	9 dozen
Shirt Blouses	5/6 dozen
Repairs to linen, etc.	688 pieces
Alterations	145 pieces

LAUNDRY

The girls in this group are taught general methods of washing, ironing and stain removal. No commercial equipment is used, but rather domestic type models for more practical training. Under present conditions, it is not possible to handle the laundry for the entire school and a considerable portion of the flat work is sent to the Andrew Mercer Reformatory, Toronto. Seventy-one girls were trained in this unit during the year and the following figures show the amount of work accomplished:

Number of articles of girls' clothing	28,953
Number of articles of staff clothing	2,307
Number of articles of cottage linen	5,788

Total	37,048

HOUSEHOLD CARE

This unit is under the supervision of the House Mothers. Their object is to develop habits of cleanliness and neatness in the care of the home, together with the sense of responsibility for and pride in its general appearance. Every girl in the school has her daily duties to perform in this regard as well as being responsible for the care of her own room and personal belongings.

GARDENING

Gardening consists of the care of the lawns, shrubs, flower gardens and greenhouse, as well as the garden proper. During the summer months when academic courses are discontinued, the majority of the girls are engaged in this work. While we are unable to be self-supporting the year round, due partly to lack of storage space, we are able to produce sufficient vegetables for our needs throughout the summer and fall.

COOKING

The course in cooking consists of training in the preparing and serving of meals for the entire school. It is supervised by qualified dietitians. Of the seventy-two taking the training during the year, fifteen girls have shown special talent, previously undeveloped.

GENERAL MAINTENANCE

This group has been organized during the past year for the first time since moving from Galt. The girls have been taught to prepare a room for painting, to properly mix the paint and apply it and have redecorated eleven rooms in the McCook residence. Several chairs and window seats have been re-upholstered, the garden furniture has been repainted, as has the front fence at the McCook residence.

EXTRA CURRICULAR ACTIVITIES

COMMERCIAL

Two girls have had an opportunity to receive training in general office routine under supervision of the assistant bursar. They have also worked part time in the maintenance stores at the direction of the store keeper.

RELIGIOUS INSTRUCTION

All girls attend chapel service each morning. Once each week this service is taken by the Minister of the United Church of Canada. During the past year special visits have been made by the Minister of the Baptist Church, the Captain of the Salvation Army and the Inspector of Public Schools. Morning Service is attended alternate Sundays at the United and Anglican Churches.

Special evening classes were held during the past winter for girls wishing to prepare for membership in the United Church of Canada and for those desirous of being confirmed in the Anglican Church. Twelve girls attended the latter class for confirmation in the late Spring and thirteen girls were accepted as members of the United Church of Canada.

Whenever possible, girls belonging to other denominations are permitted to attend Sunday Evening Service at their own church.

Music

Throughout the school, music is supervised by the Supervisor of Music for Cobourg Schools. Regular classes are held twice weekly and during the year the girls have given of their talent on the following occasions:

April, 1944—Choir Service, United Church of Canada, Cobourg.

July, 1944—Operetta "Five O'Clock Tea"—McCook grounds.

October, 1944—Choral Work in Community Programme for the Launching of Victory Loan Drive, Town Hall.

December, 1944—"The Nativity" and "Night Before Christmas" at Community Concert, Collegiate Institute.

February, 1945—Minstrel Show—Aid of Cobourg Food Merchants' War Savings Stamp Drive, Collegiate Institute.

In March, we were honoured by a visit from Dr. G. Roy Fenwick, Provincial Supervisor of Music, who gave credit to the work of the group as a whole and noted particularly two girls with outstanding talent and recommended special training.

PHYSICAL TRAINING

The gymnasium, which was completed early last Fall, was first used when the girls of the baseball team had as their guests, members of the other teams in the Town League. Regular classes in physical training were begun at the new year and have been carried on ever since. The gymnasium has also been used for special events, such as the Hallowe'en and Valentine Parties and for Folk Dancing. Badminton and volley ball have been enjoyed by both girls and staff. The Ontario Training School "Gliders" represented the school in the Cobourg Softball League, winning third place in the playoff series.

RECREATION

Recreational activities include picnics at the lake, at nearby Baltimore and at Rice Lake in the summer, skating and tobogganing in the winter, and cross country hikes during spring and fall. Attendance at the Saturday Matinee may be earned, when it is substituted for other activities. Evenings are spent in the

Common Rooms, where the girls may prepare their studies for the next day, read, knit, write letters, or engage in hobbies or dancing. The library has been supplemented further and girls may exchange their books once a week, when they are given help and encouragement in their choice of reading.

We would like to record our appreciation of the courtesies extended to the school in the past year by,—

The Anglican Young Peoples' Association of St. Peter's Church, Cobourg, for their invitation to attend the play "Sunbonnet Sue".

The Young Peoples' Society of the United Church, Baltimore, for their invitation to attend play "Aunt Tillie Goes to Sea".

Cobourg Town Officials, for arranging visit to the Corvette "Cobourg".

Boys' Work Committee, Rotary Club of Toronto, for individual Christmas Gifts to the girls.

Rotary Club of Cobourg, for their invitation to the Staff to attend Dinner on Ladies Night.

Management Committee, United Church, Cobourg, for their invitation to attend Artists' Series Concerts.

Catholic Youth Organization, Cobourg, for their invitation to attend the play "Smiling Irish Eyes".

Salvation Army Young Peoples' Society, Cobourg, for their invitation to attend their Easter Service and Pageant.

The Shriners for their special gifts of candy for the girls.

PLACEMENT REPORT

During the year wardship was terminated over 79 girls, bringing the total number of terminations over the twelve year period since the School was established to 435. The total number of wards in the same period was 816.

Supervision is given to the girls who are returned to the community by Placement Officers located in Galt, Hamilton, London, Peterborough and Toronto. Some indication of the extent of their work is shown in the following summary:

Number of visits to girls	6,415
Homes and jobs investigated	685
Visits to clinics and other Social Agencies	413
Attendance at court	62
Psychological interviews	36
Lectures	24

REPORT OF THE ONTARIO TRAINING SCHOOL FOR BOYS, BOWMANVILLE

APRIL 1ST, 1944 TO MARCH 31ST, 1945

The close of the fiscal year 1944-45 brings to an end a period of two years and five months under the War Emergency set-up and the carrying on of the work of retraining delinquent boys by means of the foster placement scheme. It will be recalled that in November 1941, the school property was taken over by National Defence Headquarters and used as an Internment Camp for enemy officer prisoners and that when efforts failed at obtaining suitable quarters in which to continue a training programme, two properties were rented in the town of Bowmanville in which the work of the school could be continued. It was realized that the limited capacity of these properties curtailed, to some extent, the valuable intramural training possible in the larger institution, and that means must be devised to provide for the major objective of training school commitments, namely the stabilization of youngsters who had failed to make a go of it socially in their own homes. The scheme devised was not at all new but merely an enlargement of the placement idea in which selected homes, far removed from their own, take the place of the institution.

The plan has much to commend it. It has frequently been said that no matter how good the institution, a good home is better. With this in mind the school now does its training in the home. If the homes are carefully chosen to fit the need of the boy it can be said that our boys are deriving the benefits of good homes and are under intensive supervision whilst living in normal communities. In effect, all persons in whose care the lads are placed are members of our Staff. Training in foster homes is further strengthened by frequent visitation by members of our placement staff.

Comparative figures appear to bear out the opinion that many boys committed to institutions can attain a satisfactory adjustment without institutional training if carefully placed and adequately supervised.

In 1940, 226 boys remained out for one year.

In 1945, 263 boys remained out for one year.

Apart from the readily adjustable group mentioned it is apparent that there are two other classes of delinquents for whose treatment an institution is a necessity. A—The Defective. B—The Sophisticated Adolescent.

The first of these rightfully belongs to the sphere of the Mental Hospital Schools which are geared for the auxiliary type of curriculum. The second under normal conditions was largely handled here, but under the emergency set-up cannot be successfully treated with the limited facilities available.

The hopeful outlook at the close of this fiscal year is that there is definite evidence that the School is to be returned to its pre-war status. In this event institutional training can once more be resumed for boys requiring it.

ACADEMIC REPORT

The Academic Department under the War Emergency set-up serves the very useful purpose of ensuring that no time is lost in a boy's schooling between his commitment and the time at which he is to resume his work in a country

school. The classroom teacher has the difficult problem of adapting her timetable to fit all grades and to receive new pupils at any time. There is as well a considerable number of admissions in the low learning and mentally defective levels. These are provided for in accordance with their abilities in Auxiliary type of programme.

The Academic subjects as prescribed by the Department of Education are taught in grades one to ten, together with Auxiliary Class work.

The boys in the different grades were as follows:

Grade 10	4	Grade 5	47
Grade 9	18	Grade 4	48
Grade 8	38	Grade 3	20
Grade 7	44	Grade 2	17
Grade 6	58	Grade 1	11
	Auxiliary		55

All new boys are first received into the Academic Department and given an Intelligence Test. During the year one hundred and seventy-four Group Intelligence Tests were given.

Handwork was provided and various enterprises were carried out. Particularly, did the boys enjoy making the decorations for their playroom where parties for the boys were held at Christmas, Valentine, St. Patrick's and other special occasions.

Community singing was a delight to the boys together with music appreciation and theory.

Supplementary reading and the radio special features assisted with different academic subjects.

During July and August months a Summer school was held outside. This took the nature of practical lessons in horticulture and gardening. When the weather was unfavourable, handwork, nature study, scrap-books and story periods proved very interesting indoors.

Each boy receives a set of new school supplies when foster placed. Two hundred and forty-seven sets were issued throughout the year.

Monthly fire-drill was held throughout the year.

DENTAL REPORT

Number of patients at clinic	189
Number of prophylactics	162

Superintendent.

REPORT OF THE ONTARIO
TRAINING SCHOOL FOR BOYS, GUELPH

APRIL 1ST, 1944 TO MARCH 31ST, 1945

The statistical report of the Ontario Training School, Guelph, covers the fiscal year ending March 31, 1945.

The new commitments or admissions numbered 47, which gave us a total number in residence during the year of 68. 28 placements were made of whom 6 were failures and were returned to us. 4 were for violation of parole and 2 on Court Order. 23 remained out for the whole year. 1 placed out in other years was returned during this year.

While it is admitted that a Reformatory may not be the best place to house a juvenile, every precaution is taken by our staff to keep these boys as a separate unit. They have individual rooms in a separate block, work in a body with their own officers, eat at separate dining tables, have their own waiting room and have a separate play yard and the use of the gymnasium for exercises when no other inmates are present. They go to Church and the picture show and sit as a separate body.

As most of the boys sent to us have had experience in other training schools and are failures there, or on placement, our discipline for them is rigorous. The results from their confinement here look rather good at the present time. Their average length of stay is 7.57 months.

J. D. HEASLIP, M.D.

Superintendent.

REPORT OF
ST. MARY'S TRAINING SCHOOL FOR GIRLS, TORONTO
APRIL 1ST, 1944 TO MARCH 31ST, 1945

The spiritual and material growth, development, progress of any nation should be a subject of supreme importance as well as interest to every unit which goes to make up the whole. So general a statement needs clarification. Not in degree is the interest to be awaited, not in measure, not in enthusiasm. The diversified elements contributing to the ego of any unit, the all but infinite varieties of types, create a vision which differs with each unit, therefore, in measure and in degree the differences are all but infinite. Not thus should be the interest in kind. If the core of the individual be sound and wholesome, an extension of this soundness acts on countless numbers of individuals. When the heart of the home is sound, so, by extension, is the heart of the nation.

"How can such generalities have bearing on the subject in hand?" you ask. Let it be conceded that they are far apart. It does not follow that they cannot be drawn together and merged. Moreover, they are not so far removed from each other as the casual observer might judge. Today's children are tomorrow's citizens and all who work with youth face grave and far-reaching obligations.

Premature mental development widens its circumference, children grasp with precocity what the senses convey, impressions formed thus early influence for good or for ill the behavior of later years. Men and women in obscure walks of life, hidden and unknown, are weaving the web of human acts daily and steadily. Their words and deeds whether lofty or mean, noble or base, stupid or shrewd strike against the sounding board of social structure and thence react on society generally as well as particularly.

This line of argument can be developed appropriately by contact with, and observation of, the children admitted to St. Mary's in recent years. Health is more robust, stature more developed, infection less frequent. There is a harmony and a continuity of interests among past and present groups but the moral pattern changes to a pattern of lesser value, poorer texture. Dishonesty, untruthfulness, irresponsibility work with united front and this front is formidable. Training counteracts the poison but it cannot eradicate nor transform. Only in those instances where a child realizes her defects and forms the determination to cure herself does training achieve one hundred per cent success. Follow up work proves that the majority become worthy citizens but a number carry into social life that obstinacy in wrong doing which strikes at the foundations of civic life. They follow their destiny through devious ways, they marry and they pass on a heritage of turbulence and opposition to established authority.

The teaching year was happy and cheerful. Good, intelligent approach to class room duties prevailed and this did not diminish through the months. The desire for learning and advancement kept active and few loitered or showed little interest. The Entrance Examinations gave satisfactory results, the High School and Commercial classes were full. Each pupil has the secret ambition to be em-

ployed in "office work." They find an irresistible appeal in "being a typewriter" in an office. It is comic, too, when such aspirations are cherished by a dull, indolent girl who is unwilling to make the effort to climb out of Grade 6.

Since this survey seems to have a crusading spirit we presume to criticize the Department of Education for its curriculum. A successful pass is the goal. Once this is accomplished the future looks reasonably secure. Is it not obvious that sound merit is ruled out in many instances? Certificates without ability are given preference while ability without a certificate is ignored, too frequently. Some procedure is desirable by which a grading in ability, character and manner should rate a value equivalent to a grading in shorthand, mathematics and literature.

Decided and eager choice for the domestic arts did not weaken and this helped to lessen the cares of the household. Time does not allow a training in household as thorough as could be desired. The greater number of pupils are placed in domestic employment for the first year on parole and this year forms them into competent housewives. In private homes they acquire a poise, a pretty vocabulary, a manner of acting and dressing which are splendid assets for their years of maturity. When she leaves the School each child who has passed her fifteenth birthday can cook, make pastry, arrange a house with proper regard to furnishings, draperies, pictures. She has, furthermore, a moderate degree of skill in needlecraft, knitting, mending etc. Their vocation is to be wives and mothers hence the need for formation in household duties.

Recreation periods were pleasant. Instructors were employed to teach and direct outdoor and indoor games, national dancing and other recreational devices. The gardens were creditable and produced fresh flowers for five months of spring and summer. They enjoy preparing amateur dramatics and concerts with operettas which call for much singing. Their lure to coax visitors is, "If you come we'll get up a concert for you." To act a part is second nature and their interpretation of character is good. One of the prepared concerts is worthwhile, and impromptu entertainments are delightful. Time is no laggard here and this fact surprises the children. Amazement shows on the countenance when it is announced that Christmas or Easter or Labor Day "will be in three weeks."

Sickness did not visit the School during the twelve months and we thank God for this blessing of good health. Apart from the regulation calls from doctors no medical care was needed. Teeth, vision, tonsils, were attended with care and circumspection. At the close of summer the pupils were tanned to a very dusky hue.

After care work was free from any great trouble. Placement was accepted with docility and adjustment was good, generally. Fewer broke the terms of parole than in other years. A better sense of values unfolded among the wards under supervision. A shallow and futile yearning or sentiment which gave concern in other years was lacking. They were more interested in a bank account and a hope chest than in Frank Sinatra or an army uniform. This morale is constructive and it is to be hoped that it will last. They are frank in discussing plans

for the future. They want to marry and to have something that they can call their own, some small territory over which they reign as queens.

We thank God with profound reverence for His love and His care granted to this work among His littlest ones. We offer all our thanks to the Department under which we are fortunate to operate and we thank each member of the Department. Words cannot reach the depths of our gratitude. We thank the Advisory Board for its unfailing courtesy and attention and for an interest which is quite detached from any material gain.

We have the honor to remain, your obedient servants,

THE SISTERS OF THE GOOD SHEPHERD.

REPORT OF
ST. JOHN'S TRAINING SCHOOL FOR BOYS, TORONTO

APRIL 1, 1944 TO MARCH 31, 1945

Many changes have taken place in staff, buildings and boys since our last annual report. In September a new Superintendent, Brother Francis, replaced Brother Stephen who for six years faithfully and conscientiously directed the affairs of the School. Taking the several changes in staff personnel into consideration, we have had a very successful year from our viewpoint and from remarks passed by the Training Schools Advisory Board and the Grand Jury. We hope and trust that this all important work of readjustment of youth may continue, so that these boys may have their outlook on life directed along the proper lines and may grow up to be honorable and loyal citizens of tomorrow.

ACADEMIC WORK

During the past year our academic work, according to our Inspector, Dr. J. M. Bennett, has been kept at a high standard. Thirteen boys were successful in passing their high school entrance examinations and were promoted to grade nine. In the auxiliary class the boys were given instruction in academic work, and a practice in the use of hand and power tools. A number of projects in wood and metal were undertaken, and while the products varied according to the ability of the boys, most of them were fairly good.

GARDENING

The greenhouse which is kept running all year provides an activity for a number of boys whose interests lie in this particular field. Although the structure was considerably damaged this past winter, a partition was put up enclosing one end thus enabling the work to be continued during repairs.

A large number of annuals and our garden vegetables were given a good start in the greenhouse before being transplanted in the garden. From the garden we procured lettuce, tomatoes, radishes and green beans which kept the tables supplied with fresh vegetables.

SHOPS

The shop activities may be best inferred from a glance at the following table.

DISTRIBUTION PER SHOP		DISTRIBUTION PER CLASS	
Culinary	15	Auxiliary	20
Barber Shop	4	Grade 1	4
Carpentry	3	Grade 2	8
Garden and Horticulture	15	Grade 3	10
House Maintenance	20	Grade 4	12
Print Shop	10	Grade 5	15
Shoe Shop	25	Grade 6	18
Tailor Shop	30	Grade 7	25
		Grade 8	20
		Grade 9	12

TAILOR SHOP

Winter Shirts	125	Boys' suits cleaned, pressed	
Summer Shirts	40	and repaired	375
Long Trousers	110	Pants repaired on return from	
Short Trousers	40	laundry	1650
White Coats	18	Socks darned	3380
White Aprons	36	Underwear repaired	2275
Work Aprons	40	Every day shirts repaired	2257
Boys' Towels	150		
Roller Towels	135	SHOE SHOP	
Sheets	200	New Shoes made	131 pr.
Pillow Cases	150	Shoes Repaired	1863 pr.
		Leather balls repaired	96
		Skates sharpened	439 pr.

BUILDINGS

A considerable amount of money has been spent during the year on repairs to our buildings. During the winter several sections of the greenhouse collapsed as a result of the heavy snows. Several panes of glass and eight pieces of sash were required to put it into working order. The roof of the gymnasium was reshingled at considerable cost. The entire plumbing system had to be gone over and quite an amount of repairs had to be made in the boys' lavatories, washroom and shower room. Two furnaces, and ten lengths of pipe had to be replaced.

Practically, the whole interior of the main building and one shop building were completely redecorated. Two boys are kept in full time occupation, during shop hours, as painters.

PLACEMENT

Our placement officer on his visits to the homes, foster homes and boarding homes where we have boys on parole is usually besieged with questions as to what is going on at the school. We have approximately two hundred boys scattered over quite a large area, who have to be visited four times a year. In order to keep in contact with these boys we inaugurated a school letter which is sent out once a month. This letter describes everything of interest that happened around the school; outings the boys have had, how the different teams have fared, amusing incidents etc. Each issue also contains a word of encouragement to continue on in the proper manner. To date this news letter has proven quite successful as almost eighty per cent of the boys have written in, thanking us for it and expressing their desire to continue receiving it. Most of their letters are quite well written and from them we gain information that possibly might not be obtained on a regular visit.

MEDICAL REPORT

We have been very fortunate during the past year in regards to the health of the boys. Outside of the usual number of colds and emergency cases that have arisen from time to time, the general health has been quite good. Frequent and meticulous examinations by our physician, Dr. J. J. Hurley, and a consistent check-up by our nurse, go a long way in keeping the health standard up.

Visits to St. Michael's Hospital and clinic when necessary are made in order to insure the health of the boys.

MEDICAL SUMMARY

Appendectomy	11
Hernia	2
Fracture	3
Pneumonia	2
Infections	8
Surgical Treatments	10
Doctor's visits	45
Boys examined	700
Boys to St. Michael's Clinic	150
Nurses' visits	150

DENTAL REPORT

Our Dental Clinic is served by Dr. W. H. Godsoe who for many years has worked devotedly in this capacity. An epidemic of trench mouth broke out but after prompt treatment and the stringent precautions, was soon cleaned up.

The clinic room was completely redecorated and to a large extent refurnished with more modern equipment, which included the following: Fixed cuspidors unit with running water replaced a hand pump unit. The engine was overhauled and put on a wall bracket with extension arm and Doriot hand piece which replaced the old type cable overhead engine. New cluster lights and new sterilizers were installed.

ATHLETICS

Here at the school we have an athletic program that gives the boys an opportunity to learn games and to take defeat and victory. Last summer our Bantam Lacrosse entry in the O.A.L.A. won the Toronto and District championship, losing out to St. Catharines in the Ontario finals. Besides this team there were seven other teams operating in a house league, so that all the boys had a chance to play. The schedules were run through twice, followed by playoffs to decide school champions in each group.

During the winter months hockey reigns supreme. Besides our regular school league in which all the boys participate, two teams were entered in the C.Y.O. league: a Minor Bantam team and a Pee Wee team. The latter team won the Toronto C.Y.O. championship but lost the Ontario finals to a Niagara Falls team by two goals.

When the weather prevented us from taking our recreation outdoors, a program was put into operation in the gymnasium. Owing to our limited space for such purposes it was necessary to work in shifts. While one group took

mat work, another group sought their pleasure in the games room while the remainder adjourned to the library in which we have about four hundred excellent boys' books. Gymn work consists of tumbling, pyramid building, exercises on the parallel bars, the vaulting horse, and the high bar. Periods for Physical Training were also included in our gymn course.

The ever popular art of boxing is not neglected at the school. Approximately twenty pair of boxing gloves, several exercisers and a punching bag were procured during the year.

Another form of recreation at the school is handball. Leagues are organized for the different groups, and tournaments are run off during the seasons when the mud prevents our use of the playing field. Keen competition is displayed during these tournaments. In the spring as many as fifty teams participated in the league and a total number of one hundred and fifty games were played.

Baseball and softball also have their rightful place in our program. Last season several leagues were successfully formed, giving everyone a chance to learn to play these games. Baseball is played by the seniors and by the intermediates divided into eight teams; while the juniors and minims make up seven teams to play softball. A bantam hardball team was entered in the C.Y.O. and successfully met all comers until they entered the finals when they met their defeat.

Brother Damien, who is responsible for all Athletics in the School, aided by two part time assistants unselfishly give of their time to coach teams and to supervise the various group activities. Brother Damien has an immense fund of athletic knowledge gained from many years experience and from attendance at courses in Physical Training and Coaching Duties in all the different sports. The athletic periods are all outside the regular class and shop time; every evening from four-thirty until six, after supper until bed time, and on Saturday and Sunday afternoon. The athletic program has proven its worth; as some boys respond to it, who are indifferent to other forms of activities in the school.

SPIRITUAL

No matter how well integrated an academic, industrial and athletic program is, the rehabilitation of boys is not usually accomplished unless great care is taken in their spiritual education. We have been unusually fortunate this year in having the services of Rev. Father Hennessy, S.J., in addition to those of the regular chaplain, Rev. Father Barron. Father Hennessy has freely given many hours of his time and the boys look forward to his visits. With quiet and insistent kindness he builds up their confidence and their self-respect. We feel that he has made a contribution to the re-education of the boys that cannot be over-estimated, and our gratitude to him is very heartfelt indeed.

In conclusion may I take this opportunity of thanking all those who in any way, whether by word or otherwise, have helped us in our work; to the Training Schools Advisory Board for their inestimable advice and untiring efforts in helping us solve many of the problems that have confronted us during the past year; to the Grand Jury for their very kind remarks and observations. Above all, to Mr. Neelands and staff we extend our gratitude for their unstinted help during the year.

BROTHER FRANCIS,
Superintendent.

REPORT OF

ST. JOSEPH'S TRAINING SCHOOL FOR BOYS, ALFRED, ONTARIO

APRIL 1ST, 1944 TO MARCH 31ST, 1945

During the year just closed, the School has received sixty-three new commitments from different parts of the Province. This is an increase of four over last year's total. Our readmissions numbered twenty-two, an increase of six for the period. The placements were made in good homes where the boys were well cared for by the foster-parents.

There was a great demand for farm help, but we found much difficulty in coping with requirements as our wards were much younger than before and preferred to be sent home on the termination of their detention. Some of the boys were kept over two years, mainly because they were slow to improve their general behaviour. In order to be sent home on parole, the lads have to show their willingness to behave properly; to fulfil their school and other duties well; and above all, they have to show plainly that their dispositions are better; and that if they are sent home they will no longer be a nuisance to their family and environment.

The parents paid frequent visits to the institution in the course of the year. Most of them showed their satisfaction when they saw how their children were treated and how neat and comfortable was everything in and around the house.

ACADEMIC REPORT

As usual the boys were divided into four different groups. We placed in each room students of at least two grades. The boys of Grade Eight wrote the Entrance examinations, ten of them were successful candidates.

Following is the grouping of the classes:

Grade 9	8
Grade 8	16
Grade 7	20
Grade 6	32
Grade 5	9
Grade 4	36
Grade 3	19
Grade 2	14
Grade 1	9
	—
	163

The School received many important visitors during the year ending March 31st. Those visits were the occasion of interesting and varied activities. They were a means of breaking the monotony of the daily routine; also a means of training the boys to appear in public, to read, sing and speak properly.

Every month the National Film Board sent a man to the institution to give the lads a very interesting programme on Canadian and War topics. After each showing one of them was asked to send a letter to the operator, thanking him for his visit and inviting him to come again as soon as possible.

Most of the boys were full-time pupils. In fact, after the vacation, we had practically no part-time pupils as buildings sheltering the shops were burnt during the night, July 15.

LIBRARY

The Library activities were about the same as previously mentioned in former reports. However, the boys used the Ontario Travelling Library advantageously. They read 120 books coming from this source. On the whole, the books sent were well chosen, and interesting to young readers.

A friend of the Institution sent 200 High School Library standing books. 117 boys frequented the library regularly. 5,762 books were read during the year. 28 boys read 20 books; 25 boys read 40 books; 30 boys read 60 books.

SPIRITUAL TRAINING

Chapel service was held every morning, and occasionally at some other times during the day. As the spiritual development is essential in a school of this type, we see that our residents get all the assistance they need from the Chaplain. To be sure that his formal teaching was properly understood, we asked him to give his religious talks, sometimes in French, sometimes in English. He and the teachers in the classes are very faithful in observing this regulation of the School.

Twenty-nine boys were confirmed by His Grace Bishop Belleau. The ceremony was the occasion of much rejoicing, not only in the Chapel but also in the refectory and on the recreation grounds.

PHYSICAL TRAINING

The Cadet Corps numbering 111 boys followed a regular training programme of about three hours a week, comprising Squad Drills, Swedish Drill, Rifle Drill and P. T. proper.

In June 1944, our cadets won the Strathcona Trophy for physical training competing with sixty-three other schools of the Military District Number Three. This much-coveted trophy was taken possession of by the boys at a public meeting in the Assembly Hall in the presence of a representative of the Army. The boys celebrated the event by a banquet and a good base-ball game.

Eighty boys enjoyed the privilege of a few weeks at our summer camp on the Ottawa River, with the usual camp activities, fishing, swimming, boating and hiking.

The boys were invited to give gymnastic displays at several places around the village, specially at Ottawa, Fournierville, Rockland, Bourget and Cornwall.

Few changes were made in the Recreational Hall. One billiard table was replaced by a ping-pong table; basket ball was introduced with eight competing teams which played twelve games each. As the lads were interested in their games, and maybe for other reasons, they seemed to forget the idea of running away. In fact although the boys of this senior group number fifty-five not one of them tried to run away, for the last six months, a record unknown in previous years.

A work which took three weeks to complete was the cementing of two sides of the swimming pool. It was finished and ready to be used in the first hot days of July.

HOBBIES

Twenty-three boys took stamp-collecting as a hobby; eight of them have now a very good collection of several hundreds of old stamps. Wood-carving and hand-saw cutting was also taken as a hobby by many of the younger boys. As a result, they succeeded in carving 450 small objects, and 278 of them were considered good enough to be exhibited in one of the dining-halls.

HEALTH

The health of the boys was good. There was no case of contagious disease.

X-Rays	4
Tonsilectomies	10
Fractures	1
Operations	11

Doctor J. R. Tittley visited the lads 48 times.

Boys treated at the clinic, an average of 20 per day.

Boys confined to bed 484.

DENTAL

Doctor H. H. Kirby from Hawkesbury came to the school regularly, every Tuesday morning.

Fillings	54
Extractions	112
Examinations	316

VOCATIONAL REPORT

Number of boys in each department:

Woodworking	58
Shoemaking	19
Tailoring	7
Printing	11
Kitchen	18
House Maintenance	104
Farming and Horticulture	19
Laundry	6
Barber Shop	3

SHOESHOP

Due to the fire that burnt the shops in July 1944, this department had to be transferred to the First Division Recreation Hall where it still occupies the west side. Our instructor got over this handicap and soon organized the work which continued as usual with 26 apprentices. Most of the time was devoted to repairs although some new articles were made to order.

Made:

Shoes	180 pairs
Boots	50 pairs
Skating-boots	12 pairs
Base-balls	20
Hockey pads	8

Repaired:

Shoes, rebuilt	120 pairs
Boots and Shoes	800 pairs
Braces	75 pairs
Mittens	80 pairs
Ball gloves	25
Balls	35
Footballs	10
Mattresses	6
Wrist bands	125
Skis	60
Harnesses	8 pairs
Pouches	125
Skates sharpened	1200

WOODWORKING

One instructor and eight boys worked most of the time doing repairs in and around the buildings. They painted the basement and the first floor of the Main Buildings. They made repairs in the dormitory of the Second Division changing eighteen windows damaged by the fire that burnt the shops. They cleaned the debris, working at it at different intervals for five weeks. An alteration was made in our summer camp refectory.

FARMING AND HORTICULTURE

Last year the general farming conditions were good with an excellent potato crop of 2500 bags. The best year so far. The grain crop was above the average with 1869 bushels.

Products:

Hay	75 tons
Ensilage	65 tons
Beets	30 tons
Onions	1 ton
Grain	1,869 bushels
Potatoes	2,500 bags
Turnips	200 bags
Carrots	80 bags
Preserves	2,108 gallons (beans and tomatoes)
Swine killed	7,711 lbs.
Swine sold	6,150 lbs.
Milk	9,150 gallons

We drained three acres of the property, putting 1,600 feet of pipes in the ground, getting ready for this summer's work and preparing the installation of a new water system.

We broke eight acres of new land.

In horticulture, one instructor and two helpers prepared in two hotbeds, 200 plants and 1,500 others for the flower garden.

The instructor and the boys took good care of the parterres and the season was specially successful with all kinds of diversified flowers.

TAILOR SHOP

After July 15, 1944, the tailor shop had to be organized in one of the class rooms, in the Main Building. All the clothes, cut and prepared at the School, were sewed and completed by some of the needle-women of the village. The four boys who worked in the shop could do nothing else but the weekly repairs.

As all the material and tools were burnt, we bought as temporary equipment:

- 2 Sewing Machines,
- 2 Irons,
- 2 Tailor scirrors, Rulers, Squares etc.

Thirteen apprentices worked here during the year.

They Made:

Pants	600
Shirts	225
Shorts	56
Nightgowns	156
Short pants	168
Pyjamas	9
Baseball suits	2
Altar boy cassocks	2
Suits	192
Handkerchiefs	156

Repaired:

Pants	1,883
Shirts	1,004
Nightgowns	534
Shorts	230
Coats	51
Sheets	138
Sweaters	6
Underwear	672

PRINTING

This department had to be changed after the fire and organized in the Junior Recreation Hall. Ten boys worked in the printing room; they printed envelopes, circulars, programmes and songs and also bound and repaired 120 books for the school library.

PLACEMENT OFFICER'S REPORT

Number of visits to boys	406
Boys on Farms	15
Miscellaneous positions	2
Boys receiving supervision at their own home	28
Boys released from guardianship	54
Boys receiving supervision at end of Period	78
Boys in foster-homes	6
Boys returned home to attend school	10
Boys discharged during period	61
Boys returned to the school during period	22
Our former Boys enlisted	224
Casualties	11
Answers to letters	72

BROTHER JEROME,
Superintendent.

NOTE

The names recorded on the Frontispiece to this Annual Report as those of the staff of The Hydro-Electric Power Commission of Ontario who died on Active Service in the war of 1939 to 1945 have been compiled with painstaking care by the Commission.

The names recorded as of the Municipal Hydro Utilities were secured by enquiry from the managers and superintendents of the Municipal Hydro or Public Utility Commissions served by The Hydro-Electric Power Commission.

In neither group is it possible at the present time to be sure that every name has been recorded. The Commission would be grateful, therefore, to have any errors or omissions drawn to its attention.

IN MEMORY OF THOSE HYDRO EMPLOYEES WHO DIED ON ACTIVE SERVICE - 1939-1945

CHAIRMAN'S LETTER OF TRANSMITTAL

To His Honour

THE HONOURABLE ALBERT MATTHEWS, LL.D.,

Lieutenant-Governor of Ontario

MAY IT PLEASE YOUR HONOUR:

The undersigned respectfully presents the Thirty-eighth Annual Report of The Hydro-Electric Power Commission of Ontario for the fiscal year which ended October 31, 1945.

The record of the Commission's work presented in this Annual Report relates to three principal fields—the co-operative municipal field, the field of rural supply, and the northern Ontario field. The first two cover the Commission's activities on behalf of the co-operative systems, and the last relates to its trusteeship of the Northern Ontario Properties on behalf of the Province. Throughout the various sections of the Report dealing broadly with physical operation of the plants, constructional activities and financial statements, these fields of activity are clearly differentiated.

The Report also presents for the calendar year 1945 financial statements and statistical data relating to the municipal electric utilities operating in conjunction with the co-operative systems for the supply of electrical service throughout the Province.

HYDRO IN 1945

For the second time in its history Hydro has withstood the test of war. Having successfully met the many and varied demands of Ontario's vast war production programme through nearly six years, Hydro turns to its peacetime tasks with assurance and vigour.

LOAD CONDITIONS SINCE VE-DAY

A remarkable feature of the Commission's operations during 1945 was that the demand for power following VE-Day, as measured in primary peak load of the Southern Ontario system, continued month by month to exceed the demand for the corresponding month of the previous year.

The Southern Ontario system served most of the war loads. In certain large industries served by the Commission there has, of course, been some recession of load but this was more than made up by the general increase in demand of the municipalities. This, itself, is the result of many factors. The lifting of war restrictions, the return to standard time for the winter months, the ending of the need for rigid economy in the use of electricity in the home have, at least for the time being, more than offset the reduction in the demand for war industry.

The main decreases in power use since the war have been in the large industries producing basic materials such as aluminum, magnesium, nickel products and abrasives. For much of this type of production little or no conversion problem is involved, but for a time at least the peacetime production will be much less than production for war, and may be temporarily affected also by the existence of stocks accumulated during the closing period of the war. In the general industrial factories which were converted to peacetime production excellent progress is being made in conversion into a higher and better line of activity.

New and less efficient means are favored in the energy group handled by the Commission in 1945 was about 55 per cent greater than in the year 1938, the last complete year before the war started. It will be recalled that industrial output even as early as 1939 was in part limited by a shortage of electrical energy. The Commission's program of industrial conservation is being carried out in various sections of the Province. Through the various sections of the Report dealing broadly with physical operations, financial and administrative activities and financial

OPERATING CONDITIONS 1944-45

The 1944-45 winter season was an exceptionally dry one with water storages in many areas below normal levels. Consequently, reservoirs and water storages were maintained throughout the winter to the spring freshets which began in early June. In 1945, approximated normal expectancy and practically all storages were filled by the end of June. There was greater than average precipitation during the summer over most areas and storage water conditions at the beginning of the winter of 1945-46 were very satisfactory.

Operating conditions on the whole were quite favourable throughout the year. Nearly 80,000 horsepower of generating capacity was added, about 60,000 in Northern Ontario and 19,000 in the Thunder Bay district, bringing the aggregate normal capacity of the Commission's generating stations up to 1,720,000 horsepower. All generating plants were operated to the maximum extent, units being removed from service only to perform absolutely essential maintenance work. Except at a few of the smaller generating stations where adverse ice conditions are a normal experience each winter, no special trouble from ice-runs was experienced. No major failure of equipment occurred until December 21, 1945 when the Commission

The output for primary power purposes also reached levels never before attained. The maximum primary peak demands, which usually occur during the fall and winter months, were in 1945, reaching 2,470,000 horsepower. Compared with the maximum demand of the previous year this was an increase of 2.7 per cent or 122,000 horsepower. In all areas municipal and rural demands held well above the levels of the previous year but industrial demands received somewhat following the ending of the war in Europe and in the Pacific.

DISTRIBUTION OF POWER TO SYSTEMS

PRIMARY POWER

20-MINUTE PEAK HORSEPOWER—SYSTEM COINCIDENT PRIMARY PEAKS

	1944	1945
Southern Ontario system	1,981,428	2,027,361
Thunder Bay system	122,252	124,397
Northern Ontario Properties	207,075	212,673
Total	2,295,755	2,364,431

Production from all sources was nearly 12,500,000 kilowatt-hours in 1945, an increase of 3.7 per cent over 1944. This was 3.7 per cent or approximately 450,000 kilowatt-hours more than the production during the previous year. Energy output for the primary power purposes rose 3 per cent from 10,787,000 kilowatt-hours in 1944 to 11,100,000 kilowatt-hours in 1945.

	1944	1945
Southern Ontario system	2,044,416	2,079,382
Thunder Bay system	220,936	204,345
Northern Ontario Properties	220,936	204,345
Total	2,384,655	2,410,805

Primary energy demands on all of the Commission's operating systems, Southern Ontario, Thunder Bay and the Northern Ontario Properties, were higher than the corresponding demands in the previous year. On the Southern Ontario system the primary power demands were 11.7 per cent higher than the previous year by 2 per cent on the Thunder Bay system by 4.8 per cent and on the Northern Ontario Properties by 11.7 per cent. The increase on the Northern Ontario Properties however, was influenced by the taking over of the Northern Ontario Power Company's system in March, 1945; otherwise the primary demands of the Northern Ontario would have shown a decrease of 1.7 per cent.

	1944	1945
Southern Ontario system	2,043,646	2,177,763
Thunder Bay system	245,299	136,863
Northern Ontario Properties	245,299	285,247
Total	2,416,157	2,599,873

FINANCIAL OPERATING RESULTS

	December 31, 1944	December 31, 1945
Southern Ontario system	2,084,275	2,185,012
Thunder Bay system	122,252	124,397
Northern Ontario Properties	207,075	212,673
Total	2,393,602	2,522,082

With cessation of hostilities first in Europe and later in the Pacific, utilization of power in special war industries was rather sharply curtailed, lost the output of the 70,000 horsepower, 25-cycle unit at the DeCew Falls extension generating station. The average demands of consumers served through the co-operating municipalities however continued to increase throughout the year. Substantial reductions in interim rates were granted to a large number of municipalities in January 1, 1945, affecting the total peak demand of power from all sources, throughout the fiscal year 1945-46, was equal to or greater than in any former year. The maximum output was 2,027,361 horsepower and exceeded the maximum output of the previous year by 6.7 per cent or about 122,000 horsepower.

Record Peak Loads

Relaxation of wartime conditions, restrictions which had been permitted at the close of the previous year, especially in the earlier months of the year, had been permitted at the close of the previous year. Relaxation of wartime conditions, restrictions which had been permitted at the close of the previous year, especially in the earlier months of the year, had been permitted at the close of the previous year.

The output for primary power purposes also reached levels never before attained. The maximum primary peak demands, which usually occur during the fall and winter months, occurred in the spring of 1945, reaching 2,470,000 horsepower. Compared with the maximum demand of the previous year this was an increase of 5.2 per cent or 122,000 horsepower. In all areas municipal and rural demands held well above the levels of the previous year but industrial demands receded somewhat following the ending of the war in Europe and in the Pacific.

Energy Production Again Reaches All-Time High

Total energy production from all sources was nearly 12,500,000,000 kilowatt-hours. This was 3.7 per cent or approximately 450,000,000 kilowatt-hours greater than the production during the previous year. Energy output for primary power purposes rose 3 per cent from 10,787,000,000 kilowatt-hours in 1944 to 11,110,000,000 kilowatt-hours in 1945.

Primary energy demands on all of the Commission's operating systems, Southern Ontario, Thunder Bay and the Northern Ontario Properties, were higher than the corresponding demands in the previous year. On the Southern Ontario system primary energy demands exceeded those of the previous year by 2 per cent, on the Thunder Bay system by 4.8 per cent and on the Northern Ontario Properties by 11.7 per cent. The increase on the Northern Ontario Properties however, was influenced by the taking over of the Northern Ontario Power Company's system in March, 1945; otherwise the primary demands of Northern Ontario would have shown a decrease of 3.0 per cent.

FINANCIAL OPERATING RESULTS

Revenues for the year ended October 31, 1945, were influenced by important changes in conditions. Relaxation of wartime power conservation restrictions which had been permitted at the close of the previous year stimulated total deliveries of power, especially in the earlier months of the year. With cessation of hostilities first in Europe and later in the Pacific area, utilization of power in special war industries was rather sharply curtailed, particularly in later months. The aggregate demands of consumers served through the co-operating municipalities, however, continued to advance throughout the year. Substantial reductions in interim rates were granted to a large number of municipalities as of January 1, 1945, affecting the Commission's revenues from this source to the extent in ten months of some \$1,300,000. Increase in load from supply of power to rural power districts was large, and despite a further reduction in rates to consumers, there was a moderate increase in revenues from that source.

The composite result of all factors was to produce revenues for the Southern Ontario system substantially unchanged in the aggregate from those of 1944. Costs for power, operation, maintenance and interest, were also very close to those of 1944. Even though the year's expenditures for maintenance cover a programme less extensive than is normally desirable, nevertheless the financial outcome of operations, with virtually stationary costs in conjunction with increased deliveries of power other than for war purposes, is to be regarded with satisfaction.

On the Thunder Bay system, rates for power customers, mines and interim rates to municipalities were all reduced. Revenues on the whole, however, due to moderately increased aggregate load, held up well. With the new generating unit coming into operation only towards the end of the year, costs of operation and interest in the aggregate were not greatly changed from those of 1944.

The Northern Ontario Properties' revenues reflect the sharp reduction in rates to mining customers that was put into effect January 1, 1945, together with a reduction in rates to municipalities. Curtailment of operations at many gold mines below the peace-time scale continued, and a substantial reduction in power demands for nickel production occurred towards the end of the year. Nevertheless, the exceptionally rapid rate of progress towards liquidation of capital liabilities that has characterized the Northern Ontario Properties in previous years was maintained, with only a small charge to surplus account. The acquisition of the undertaking of the Northern Ontario Power Company as at December 1, 1944, was a factor in making possible these favourable results.

Assistance to Small Municipalities With Higher Wholesale Unit Costs

During 1945, in accordance with the resolution adopted by the Ontario Municipal Electric Association in March, 1944, the Commission continued to limit to \$39 per horsepower the wholesale cost of power to small cost contract municipalities whose cost in accordance with their contracts made prior to 1945 would have exceeded this maximum. It is now possible to assess the results of this municipal co-operative action.

With the guaranteed lowering of wholesale cost, the Commission was enabled immediately to authorize the municipal Hydro utilities to put into effect a downward price adjustment in the rates to consumers which in 1944 and again in 1945, led to increased use, larger revenues, and lower unit costs. Until the wholesale cost per horsepower was reduced it was not possible to establish a rate or price structure for retail service low enough to encourage increased use.

When the scheme of reducing the wholesale cost to certain municipalities by means of a small levy per horsepower was put into effect in 1944, there were about 63 small municipalities whose wholesale cost of service in 1943 had been more than \$39 per horsepower. At the end of 1944 only 30 required assistance and at the end of 1945 for only 21 municipalities had the actual cost per horsepower to the Commission exceeded the \$39 maximum. Due to the decreasing assistance required each year the original levy of 2 cents per horsepower made in 1944 was sufficient to take care of the requirements for 1944 and 1945.

The prevailing conditions of heavy loads and low unit costs to all municipalities contributed to the results achieved and to the fact that they were obtained at so small a cost as to be scarcely noticeable in the general cost of power.

Financial Progress of Municipal Electric Utilities

The record of financial progress of the municipal electric utilities has some outstanding and indeed impressive features. The results as at December 31, 1945 are especially informative. Under ordinary conditions substantial new capital expenditures for extensions of utilities would be made each year. This tends to obscure in financial statements the progress with respect to liquidation of liabilities incurred for earlier additions to plant. For several years up to and including 1945, however, wartime restrictions limited capital expenditures to a minimum and the rapidity with which the Hydro utilities are achieving debt-free status is evident.

The investment in plant by the 304 urban Hydro utilities exceeds one hundred million dollars. Because much of the plant has been financed by use of surplus and reserve funds, debenture issues to finance this capital investment have been made to the extent of only 55 per cent of the plant cost. Principal repayments on these debentures have equaled about 45 per cent of plant cost and further specific provision of sinking funds for this purpose equals nearly 5 per cent of plant cost, so that the net amount of debenture debt still outstanding equals less than 6 per cent of plant cost.

But the relation of plant investment to debentures is only part of the financial picture. As long as a utility is a going concern it is likely to have at the end of any year current assets and current liabilities. The liabilities of the 304 municipal utilities other than debentures are recorded as less than 3 per cent of the plant cost, and their current assets of a quickly realizable nature are equal to 26 per cent of plant cost. Thus the excess of current assets over current liabilities is more than four times as great as the remaining balance of debenture debt over accumulated sinking funds.

The figures cited are, of course, simply a summation of 304 separate utilities. Considering them individually, 190 have actually paid off their

deberent liabilities completely and others have found a bank sufficient to discharge their total liabilities. Even in the case of the remaining utilities, the necessity of their liabilities occasionally could be met at amounts to only 12 per cent of their investment in plant.

At Scarborough a frequency-changer station with an initial unit of 25,000 kva will connect the line and be connected by a 25-cycle transformer station.

CONSTRUCTION AND PLANNING

The year 1945 was characterized by intensive planning rather than by active construction. However, as a result of extensive studies certain major projects were authorized and in some cases work was started.

In the Niagara division of the Southern Ontario system the construction of a second unit at DeCew Falls was commenced during the summer of 1945. Certain provisions were made for this work at the time of construction of Unit No. 1. The new unit with a capacity of 70,000 horsepower, under 280 ft head, will deliver its output to the Southern Ontario system. It is estimated that its construction will extend over a period of two years and that its cost will be about \$7,700,000.

To meet the immediate growth requirements in eastern Ontario, a 54,000 horsepower development at Stewartville on the Madawaska river has been authorized and its construction commenced. The head to be developed at this site, which is about eight miles southwest of Arnprior, is 150 feet. It is estimated to cost almost \$9,000,000 and that it will become available for use during the fall of 1947. The new development in head and in capacity, is similar to that completed during the war, at Barrett Chute higher up the same river, where 56,000 horsepower in two units is developed under a head of 154 feet.

The third and most important hydro-electric development authorized by the Commission during 1945 and destined to increase the power resources of the Southern Ontario system, is that at the des Joachims site on the Ottawa river situated forty miles upstream from the town of Pembroke. The initial programme will comprise the installation of six units with a total capacity of 360,000 horsepower under a gross head of 135 feet, to be created by a dam across the river. Work will commence during 1948 and present plans call for its completion in 1949. Present estimate of cost for initial installation is \$51,000,000.

Associated with these new generating plants at Stewartville and des Joachims are important new transmission lines. From Stewartville to Oshawa a new 60-cycle transmission line will be constructed and will tie into Barrett Chute. This may cost in the neighbourhood of \$3,000,000. To carry the power generated at des Joachims, transmission lines about 235 miles long will be required to deliver the power to distribution centres at Burlington and Islington. These transmission lines are estimated to cost \$24,000,000.

The third transmission line of importance, authorized during 1945, is a 60-cycle line from Oshawa west to Scarborough and thence northerly to Barrie. This line will provide an important 60-cycle tie between the Eastern Ontario and Georgian Bay divisions.

At Scarborough a frequency-changer station with an initial unit of 25,000 kva will connect up with the above 60-cycle tie line and be connected by a 25-cycle tie to Leaside transformer station. The 60-cycle tie line is scheduled for completion during the summer of 1946 and the frequency-changer station, with the line to Leaside, in the summer of 1947.

Throughout southern Ontario the process of amalgamating and strengthening the great transmission networks goes steadily on. The great metropolitan district of Toronto with its suburbs and satellite towns demands constant revision and additions to its transformer and transmission facilities. In the St. Thomas district, around Sarnia and Essex county, in the Cornwall area on the St. Lawrence river, in the Eugenia district, in connection with the recently acquired Caledon Electric Company, and elsewhere in the area served by the Southern Ontario system, changes and additions are in progress.

Increased Power for Thunder Bay System

To increase power supplies for the Thunder Bay system a fourth unit was placed in service at Alexander generating station on October 1, 1945. This installation produces an additional 19,000 horsepower. The site and transformers have been purchased for a 15,000 kva, step-down transformer station in Port Arthur.

Careful consideration was given during the year to the sequence in which additional hydro-electric resources in the Thunder Bay district should be developed, having regard to the geographical distribution of the immediate known demands for additional supplies of Hydro power.

It was finally decided to develop a site on the Aguasabon river about seventy miles east of the Alexander generating station on the Nipigon river, and in close proximity to a pulp and paper mill to be constructed near the mouth of the Aguasabon river.

The hydro-electric development will have a capacity of 53,000 horsepower under a head of 300 feet and will cost about \$8,500,000. A transmission line from Aguasabon to Alexander to tie in with the Thunder Bay system network is estimated to cost \$1,500,000, and an additional circuit from Alexander to Fort William will be required costing approximately \$2,000,000.

Northern Ontario Activities

In northern Ontario, the Commission commenced, in March 1945, operation of the generating stations and other properties acquired under a

purchase agreement from the Northern Ontario Power Company, Ltd. These properties comprise eight hydro-electric plants with a total capacity of 60,000 electrical horsepower, complete with transmission lines and distribution facilities. Included also in the purchase was a hydro-pneumatic station utilized for production of compressed air for distribution to mining customers in the neighbourhood of Cobalt. Five of the hydro-electric plants, with a capacity of 35,000 horsepower, are situated on the Matabitchuan and Montreal rivers in the Cobalt area. The remaining three are on the Mattagami river in the Timmins area. It is anticipated that the acquisition of these sources of energy will enable the Commission to extend rural service in the area and also reduce the cost of power to the mines.

REDUCTIONS IN RATES AND REFUNDS TO CONSUMERS

During 1945 the Commission recommended and approved an adjustment in rates for domestic, commercial and power consumers in urban municipalities receiving power from the Commission. These reductions involved 255 municipal utilities, the consumers of which will benefit by an aggregate amount exceeding \$3,300,000 per annum.

The Commission also recommended and approved refunds to consumers in urban municipalities where the municipal Hydro surplus in the form of cash or bonds had accumulated during recent years in excess of the amounts estimated as required for plant construction, maintenance, etc., in the next few years. The total refunds to consumers amounted to more than \$485,000.

In addition the Commission adopted a uniform rate for most mining townsites served by the Northern Ontario Properties, the local distribution systems of which are owned and operated by the Commission. This will benefit the consumers by more than \$19,000 per annum.

The mines of northern Ontario continued to benefit by rate reductions announced last year, which came into operation on January 1, 1945. It is estimated that the total annual saving in power costs to the mines as a result of these rate reductions will exceed \$500,000.

Average Annual Consumption for Domestic Service

The average use of electricity by domestic consumers has become a recognized criterion of the standard of living. A recent statement made by the Edison Electric Institute announces that a new milestone of 100 kilowatt-hours per month average residential use of electricity has been reached in the United States.

The attainment of this level of consumption, however, is an old story in Ontario. This average level was attained in the 250 urban utilities then supplied under cost contracts by The Hydro-Electric Power Commission,

In the year 1920, in cities the 100 kilowatt-hour record was reached for 100,000 in 1929, and even in villages in 1937. But the Ontario in the 1930's average monthly consumption by domestic consumers has now passed the 200 kilowatt-hour mark. It was reached in 1941 in the average monthly consumption per domestic consumer in the 300 urban communities now supplied was more than 190 kilowatt-hours. In 1941, 100 villages and one town had an average consumption per domestic consumer exceeding 400 kilowatt-hours per month and no less than ten had an average consumption exceeding 250 kilowatt-hours per month.

The average cost per kilowatt-hour is very largely a function of use. It is nevertheless noteworthy that the average cost per kilowatt-hour to domestic consumers in the 300 urban municipalities operating their own Hydro utilities is only 1.15 cents.

RURAL ELECTRICAL SERVICE DURING WAR YEARS

The extension of rural electrical service in Ontario was a casualty of the war. However, the effect of war restrictions on progress was greatly ameliorated by the fact that in the five years previous to the end of 1940 there had been unusual activity in this branch of Hydro service. In the five years, 1936 to 1940, the Commission actually constructed 9,373 miles of rural primary line to supply a total of 55,000 consumers. This was an increase of 94 per cent in miles of line and 81 per cent in consumers. The relative increase in farm consumers was even greater; they more than doubled in this five year period. There can be little doubt that the progress made in rural electrification of farms, just prior to the war, had a beneficial effect upon food production in Ontario during the critical war years.

In 1941 the Dominion Metals Controller placed restrictions on the use of non-ferrous metals, and from September 1941 to April 1944 no rural primary lines were constructed except a few short connections for war purposes, less than 100 miles in all. In March 1944, the Metals Controller eased the restrictions by permitting short extensions in urgent cases for war production, but shortage of materials, equipment and labour prevented full advantage being taken of this improvement. On June 1, 1945, restrictions governing use of non-ferrous metals were cancelled and the Commission was able to proceed with construction to the extent that both labour and materials were available.

In 1944, therefore, 350 miles of primary line were completed and service was given to 8,050 new consumers. In 1945, 1,073 miles were constructed and there was a net increase in the consumers served of 11,442; of these however, 9,600 were served by short extensions from existing lines. These figures are for the fiscal years ending October 31, 1944 and 1945. In addition, the Commission purchased the Caledon Electric Company properties which included 59 miles of rural primary line serving more than 900 consumers.

The total mileage of lines constructed or under construction, at the end of 1945 was 22,309 and after allowance for the usual adjustments, including transfer of some rural consumers to service from municipal utilities, the total rural consumers served or to be served number 159,608.

Increased Rural Consumption

Removal of power restrictions by the Dominion Power Controller on October 1, 1944 is reflected in the consumption of electricity by rural consumers. Notwithstanding a general decrease in power taken by certain war industries served by rural lines, the use of power in rural areas, stimulated by rate reductions, increased during the year by nearly 13 per cent. In August the power sold was approximately 132,600 horsepower, the highest load ever recorded in rural areas.

Rural Rate Reductions

The effect of the general rate reduction incorporated in the new uniform rural rate structure was so satisfactory that the Commission after detailed study considered it would be advantageous to make further reductions. The two reductions made are as follows:

- (a) The first block rate of 4 cents per kilowatt-hour was reduced to 3.5 cents per kilowatt-hour for all rural consumers. This reduction came into effect on May 1, 1945. It reduced the amount that consumers would pay by approximately \$300,000 per annum;
- (b) Power rates to industrial power consumers in rural districts have been reduced in all areas where it was practicable to do so. This reduction came into effect on January 1, 1946 and will benefit power consumers by approximately \$47,000 per annum.

Extensions and Increased Capacity

On October 31, 1945, there were on hand enough applications for rural service to warrant the construction of 5,630 miles of new primary line. Construction plans call for the erection in 1946 of about 2,000 miles, providing materials and equipment can be obtained.

There is, however, another limiting feature to the programme of extensions. During the war, even after certain restrictions had been eased, material was so short that in the interest of food production it was used for extensions rather than for improvements to service. Meantime, the load on all rural lines steadily increased and on many existing lines capacity became insufficient to supply satisfactory service. It is now imperative in many districts to increase the capacity of certain lines before satisfactory service can be given, by means of further extensions.

RESEARCH AND TESTING

When victory was achieved in 1945 approximately one-third of the Commission's Laboratories' staff was engaged on work for the Dominion government having to do directly or indirectly with the war. This work covered a wide field, including besides research work, testing of electrical coils, testing of waxes, adhesives, packings, insulants and many other items.

With the ending of hostilities these activities ceased and the staff thus made available was transferred to the many pressing research problems of the Commission, deferred during the war years. Work was expanded in the fields of grounding, insulation, electronics, stress analysis and the treatment of wood poles, to mention some of the more important.

The Commission's post-war programme has also been responsible for much new work. Field surveys for the purpose of locating suitable sources of concrete aggregate have been carried out in several places where major construction projects are planned. Existing structures have been inspected and tested to obtain data on service behaviour as a guide to future design and construction. New materials and methods developed during the war are being studied to determine whether they can be usefully applied in the Commission's work.

The Hydro undertaking of Ontario is greatly benefited by the efforts of engineers and scientists everywhere who contribute to the world's scientific knowledge. The scientific staff of the Commission recognizes its obligation to add something to this knowledge and the Commission encourages its staff to participate actively in the work of scientific societies, standardizing organizations and other bodies by the presentation of papers, the contribution of scientific data and the preparation of standard specifications.

EFFICIENT USE—ADEQUATE WIRING—BETTER LIGHTING

The staff of the Commission formerly engaged in promotional activities continued to encourage the most efficient use of electricity by all classes of consumers. Guidance was given to many industrial consumers in efficient power application, and lighting plans were supplied for schools, factories, public buildings, stores, offices and streets. Information was made available calling attention to the varied operations and war work of the Commission and urging consumers to plan their power needs well in advance.

In the rural field, activities generally were of an educational nature. Farmers were asked to plan for adequate wiring of their farm premises. Booklets were distributed to aid farmers to operate more efficiently their existing electrical equipment. Efficient methods of homemaking with Hydro were explained to domestic consumers.

Hydro motion pictures were shown to more than 500 audiences throughout the Province, comprising service clubs, schools and other organizations, with an aggregate attendance of approximately 100,000. A new educational motion picture was produced, entitled "More Power to the Farmer." This film stresses the need for safe, adequate wiring.

THE COMMISSION AND ITS EMPLOYEES

Some 1,200 employees of the Commission joined the services. Of these 350 have already returned to Hydro work and about 75 others are taking educational courses or have taken other positions. All former employees who enlisted from the Commission's service are being reinstated if they so desire. In many cases it has been found possible to re-employ them in better positions. Former employees who might benefit by taking courses sponsored by the Training Division of the Department of Veterans' Affairs are encouraged to do so and positions are held for them for a period of one year after discharge.

In the expanding construction programme of the Commission preference is given to veterans and during the past year the Commission has employed some 400 ex-servicemen who were not in the Commission's employ prior to enlistment.

Linemen's Training School

The Commission, in cooperation with the Ontario Municipal Electric Association, is operating a school to train linemen. It is estimated that the Commission and the municipalities will need in the next two years some 300 linemen for post-war construction work. The men selected are veterans and after two or three months' introductory practical work are given three months' training—two months' theoretical work in the school and one month's practical work in the field. The school is situated on the outskirts of Toronto and the men live in camp and are paid while taking training. The results to date are very promising.

Resuscitation Training

For almost thirty years training in artificial respiration has been carried on among the employees of the Commission and field employees are required to practice by approved methods at least once a month. During the past year three Canadian Electrical Association resuscitation medals and one President's medal of the National Safety Council have been awarded to groups of employees for the successful resuscitation from electrical shock of three fellow employees. In one case a member of the public was saved from drowning by artificial respiration.

The hazard of electric shock is ever present in an electric public utility and for this reason training and practice in manual artificial respiration have been closely followed with excellent results.

Hydro motion pictures were shown to more than 500 audiences through-
 out the Province, comprising 67,000 children, schools and other organizations,
 with an aggregate attendance of approximately 100,000. A new educational
 motion picture was produced, entitled "More Power to the Farmer". This

CAPITAL INVESTMENT AND RESERVES

Capital Investment

The total capital investment of The Hydro-Electric Power Commission
 of Ontario in power undertakings is \$375,361,480.44 exclusive of government
 grants in respect of construction of rural power districts' lines (\$22,022,423.79)
 and the investment of the municipalities in distributing systems and other
 assets is \$146,282,082.87, making in power undertakings a total investment
 of \$521,643,563.25.

The following statement shows the capital invested in the respective
 systems, properties and municipal undertakings, etc.

Thunder Bay system	21,329,829.55
Office and service buildings	1,762,476.98
Construction plant and inventories	3,978,830.69

Total capital investments in co-operative systems	\$321,312,369.69
Northern Ontario Properties—Operated by H-E.P.C. on behalf of the Province of Ontario	53,653,771.79
Northern Ontario Properties—Construction plant and inventories	395,308.96
Total Commission capital investments	375,361,480.44
Municipalities' distribution systems	106,346,101.06
Other assets of municipal Hydro utilities	40,590,881.73
Total	\$521,643,563.25

Reserves of Commission and Municipal Electrical Utilities

The total reserves of the Commission and the municipal electrical util-
 ities for depreciation, contingencies, stabilization of rates, sinking fund and
 insurance purposes, amount to \$382,287,778.39, made up as follows:

Thunder Bay system	1,675,607.48
Office and service buildings and equipment	1,762,476.98
Total reserves in respect of co-operative systems, properties	\$218,100,298.87
Northern Ontario Properties	158,809,000.00
Miscellaneous reserves	562,685.75
Employers' liability insurance, and staff pension reserves	11,762,476.98
Total reserves of the Commission	\$252,283,472.87
Total reserves and surplus of municipal electrical utilities	129,004,305.52
Total Commission and municipal reserves	\$382,287,778.39

REVENUE OF COMMISSION
COMPARATIVE FINANCIAL STATEMENTS 1944-1945

The revenue of the Commission at interim rates from the municipal utilities operating under special contracts for power in rural power districts and from other customers with whom one-half of the municipalities—the Commission has special contracts, all within the Southern Ontario and Thunder Bay systems, aggregated \$51,385,412.45. The revenue of the Commission from customers served by the Northern Ontario Properties, which are held and operated in trust for the Province, was \$6,154,893.74, making a total (excluding \$233,941.70 of Northern Ontario Properties revenue transferred to Thunder Bay system in respect of power supplied) of \$57,540,364.49.

Summarized operating results of these co-operative systems and rural power districts and of the Northern Ontario Properties follow:

10,335,403.49	10,307,513.45	Power purchased

MUNICIPAL ELECTRIC UTILITIES

The following is a summary of the year's operation of the local electric utilities conducted by municipalities receiving power under cost contracts with the Commission:

Total revenue collected by the municipal electric utilities		\$43,702,261.90
Cost of power	\$26,149,578.07	
Operation, maintenance and administration	7,309,690.52	
Interest	703,359.39	
Sinking fund and principal payments on debentures	1,226,578.43	
Depreciation and other reserves	3,886,947.26	
Total		39,276,153.67
Surplus		\$ 4,426,108.23

With regard to the local Hydro utilities operating under cost contracts, the following statements summarize for each of the co-operative systems administered by the Commission, the financial status and the year's operations as detailed in Section X of the Report.

SOUTHERN ONTARIO SYSTEM

The total plant assets of the Southern Ontario system utilities amount to \$101,855,073.37. The total assets, including an equity in the H-E.P.C. of \$71,015,455.54 aggregate \$211,029,500.92. The reserves and surplus accumulated in connection with the local utilities, exclusive of the equity in the H-E.P.C., amount to \$124,368,748.80, an increase of \$9,157,642.70 during the year 1945. The percentage of net debt to total assets is 6.9, a reduction of 0.4 per cent.

The total revenue of the municipal electric utilities served by this system was \$42,518,703.28, an increase of \$865,285.97 as compared with the previous year. After meeting all expenses in respect of operation, including interest, setting up depreciation and other reserves amounting to \$3,826,193.11 and providing \$1,221,323.59 for the retirement of instalment and sinking fund debentures, the total net surplus for the year for the municipal electric utilities served by the Southern Ontario system amounted to \$4,262,101.59, as compared with \$3,729,360.56 the previous year.

THUNDER BAY SYSTEM

The total plant assets of the Thunder Bay system utilities amount to \$2,832,850.28. The total assets, including an equity in the H-E.P.C. of \$3,986,895.84, aggregate \$8,180,939.77. The reserves and surplus accumulated in connection with the local utilities, exclusive of the equity in H-E.P.C., amount to \$3,818,209.26 an increase of \$104,455.75 during the year 1945. The percentage of net debt to total assets is 6.1, a reduction of 0.1 per cent.

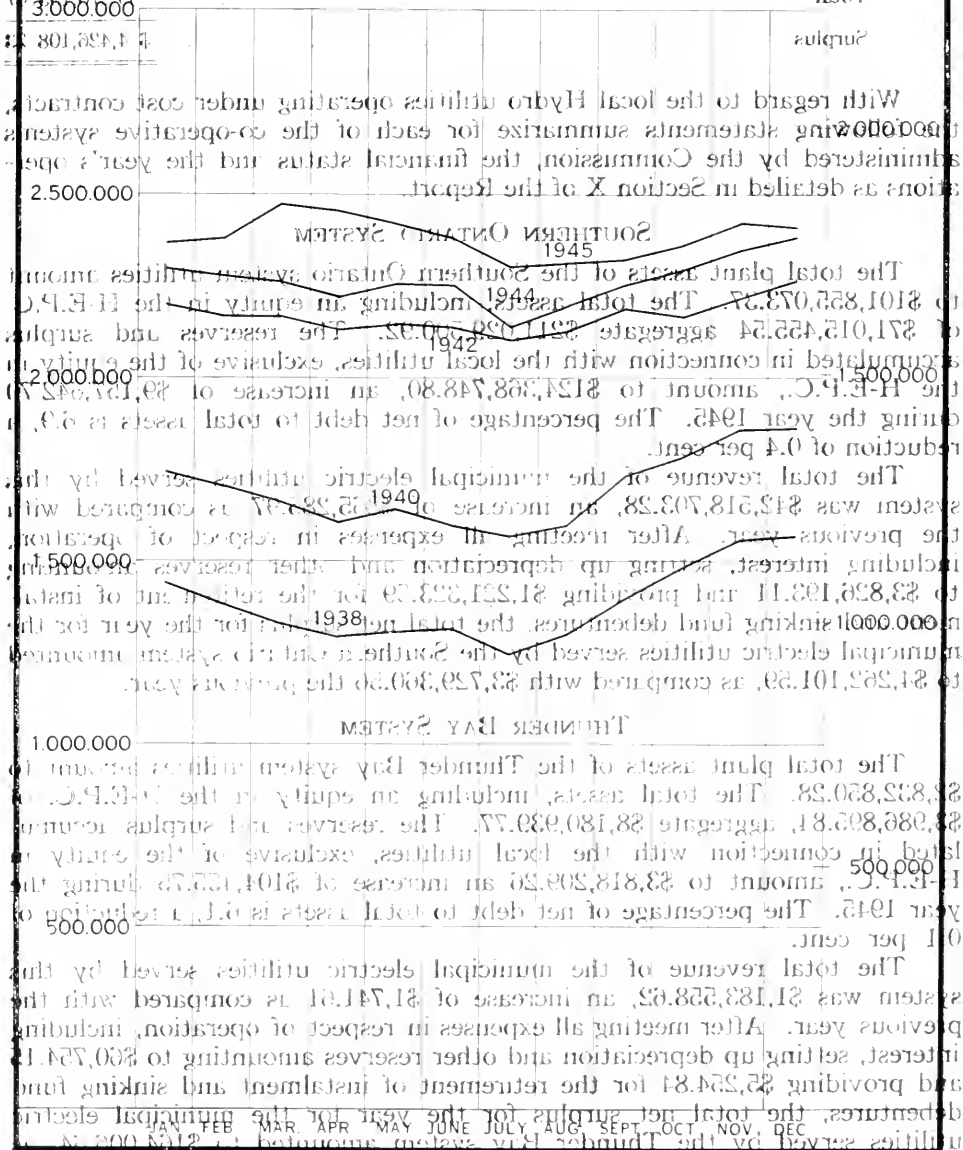

The total revenue of the municipal electric utilities served by this system was \$1,183,558.62, an increase of \$1,741.61 as compared with the previous year. After meeting all expenses in respect of operation, including interest, setting up depreciation and other reserves amounting to \$60,754.15 and providing \$5,254.84 for the retirement of instalment and sinking fund debentures, the total net surplus for the year for the municipal electric utilities served by the Thunder Bay system amounted to \$164,006.64, as compared with a net surplus of \$172,198.32 for the previous year.

MUNICIPAL ELECTRIC UTILITIES

HYDRO POWER LOADS THROUGH THE WAR YEARS

The following summary of the hydro power loads of the local electric utilities conducted by municipalities receiving power under cost contracts with the Commission is shown in the following table. The total revenue collected by the municipal electric utilities

PRIMARY PEAK LOADS — ALL SYSTEMS
 Total revenue collected by the municipal electric utilities
 Cost of power
 Depreciation, maintenance and administration
 Sinking fund and principal payments on debentures
 Depreciation and other reserves

comparing with a net surplus of \$12,198.32 for the previous year.

HYDRO MOVES FORWARD

In closing this review of the year which brought final victory, it is satisfactory to recall that during the whole period of the war no war industry in Ontario lacked sufficient power for its needs and no major breakdown curtailed essential production.

The Commission entered the war with adequate reserves of power and with future deliveries planned for normal growth several years ahead. The tremendous expansion in munitions of war which accompanied the adverse war trend of the early years quickly absorbed all Hydro power reserves. As the war progressed the Commission, by construction and purchase, augmented its power supplies to keep pace with demand, trying always to limit new construction to a minimum in conformity with the national policy of husbanding the limited supplies of men and materials.

With victory achieved the Commission turns with confidence from the problems of war to the problems of peace.

Within the orbit of the municipal environment, where Hydro service is chiefly utilized, much may be done to steady and guide the movements that are at present causing difficulties as the people of all nations restlessly strive for security and stability. Those associated with Hydro utility administration can accomplish much by grasping the opportunities for service, by making improvements in urban and farm homes, by friendly helpfulness in business and industry, and particularly by active participation in all worthwhile plans for the betterment of Ontario communities.

In all these things Hydro stands ready to lend a helping hand by providing at very low cost the electrical service which is a basic essential of all modern wealth producing activity, and the ingredient which by well directed work in factory and mine, forest and farm will help bring to Canada an era of peace and prosperity. Let us then move forward with Hydro.

Respectfully submitted,

T. H. HOGG,

Chairman

TORONTO, ONTARIO, MARCH 31, 1946.

T. H. HOGG, ESQ., B.A.Sc., C.E., D.ENG.,

*Chairman, The Hydro-Electric Power Commission of Ontario,
Toronto, Ontario.*

Sir:

I have the honour to submit, herewith, the Thirty-eighth Annual Report of The Hydro-Electric Power Commission of Ontario for the fiscal year which ended October 31, 1945. This report covers the operations of the Commission with regard to the supply of power to, or on behalf of, the partner Municipalities of the Co-operative Systems, as well as the administration of the Northern Ontario Properties, which are held and operated by the Commission in trust for the Province of Ontario.

I have the honour to be, Sir,

Your obedient servant,

OSBORNE MITCHELL,

Secretary.

THIRTY-EIGHTH ANNUAL REPORT
OF
**The Hydro-Electric Power Commission
of Ontario**

FOREWORD
and
Guide to the Report

THE Hydro-Electric Power Commission of Ontario administers a co-operative municipal-ownership enterprise, supplying power throughout the Province of Ontario. The Commission was created in 1906 by special act of the Legislature and followed investigations by advisory commissions appointed as a result of public agitation to conserve the water powers of Ontario as a valuable asset of the people and to provide a more satisfactory supply of low-cost power in southern Ontario. In 1907 the Power Commission Act (7-Edward VII Ch. 19) was passed amplifying and extending the Act of 1906, and this Act—modified by numerous amending acts which now form part of the Revised Statutes of Ontario, 1937, Chap. 62, and subsequent amending Acts—constitutes the authority under which the Commission operates.

The Hydro-Electric Power Commission of Ontario consists of a Chairman and two Commissioners, all of whom are appointed by the Lieutenant-Governor-in-Council to hold office during pleasure. One of the Commissioners must be a member of the Executive Council and two may be members.

In 1909, work was commenced on a comprehensive transmission system and by the end of 1910 power was being supplied to several municipalities.

The Commission has now been supplying electrical energy for more than thirty-five years and the Report contains diagrams depicting the growth of the enterprise. During this period the costs of electricity to the consumer have been substantially reduced and the finances of the enterprise have been established on a secure foundation.

At the end of 1945 the Commission was serving 922 municipalities in Ontario. This number included 26 cities, 124 towns and mining townsites, 300 villages and police villages and 472 townships. With the exception of 14 suburban sections of townships known as "voted areas," the townships and 120 of the smaller villages are now served as an amalgamated rural division of Hydro service with a uniform rate structure. Thus, no matter where rural service is given in Ontario by the Hydro, the rural consumer for the same class of service with the same consumption of electricity, pays the same amount on his quarterly bill.

Financial Features of Co-operative Systems

The basic principle governing the financial operations of the undertaking is, that electrical service be given by the Commission to the municipalities

and by the municipalities to the ultimate consumers at cost. Cost includes not only all operating and maintenance charges, interest on capital investment and reserves for renewals or depreciation, for obsolescence and contingencies, and for stabilization of rates, but also a reserve for sinking fund or capital payments on debentures.

The undertaking from its inception has been entirely self-supporting and no contributions have been made from general taxes except in connection with service in rural power districts. In this case, the Province, in pursuance of its long established policy of assisting agriculture and with the approval of the urban citizens, assists extension of rural electrical service by a grant-in-aid of the capital cost and in other ways as specified and detailed in the Report.

As the principle of "service at cost" is radically different from that obtaining in private organizations, where profit is the governing feature, it naturally results in different and in some ways unique administrative features.

The undertaking as a whole involves two distinct phases of operations as follows:

The *First* phase of operations is the provision of the electrical power—either by generation or purchase—and its transformation, transmission and delivery in *wholesale* quantities to individual municipal utilities, to large industrial consumers, and to rural power districts. This phase of the operations is performed by The Hydro-Electric Power Commission of Ontario as trustee for the municipalities acting collectively in groups or "systems", and the financial statements relating to these collective activities of the municipalities are presented in Section IX of the Report. Each system of municipalities, as provided in *The Power Commission Act*, forms an independent financial unit and the accounts are therefore segregated and separately presented for each system. In order, however, that there may be a comprehensive presentation of the co-operative activities of the undertaking as a whole, there are presented, in addition, for the two main systems and miscellaneous co-operative activities, a balance sheet of assets and liabilities, a statement of operations, a tabulation of fixed assets, and summary combined statements respecting the various reserves.

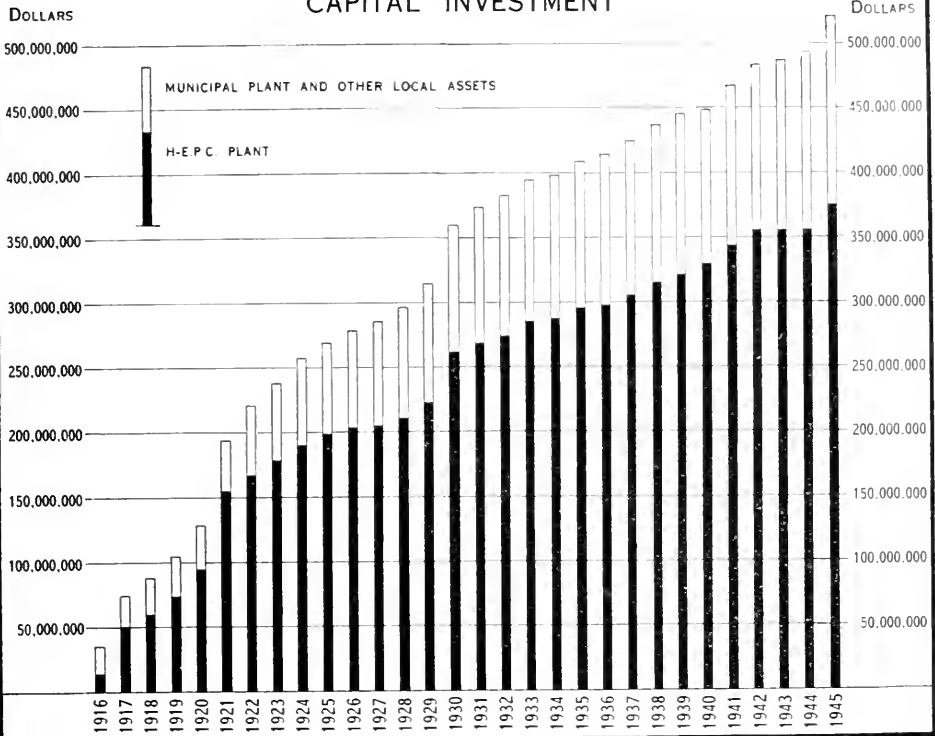

The *Second* phase of operations is the *retail* distribution of electrical energy to consumers, within the limits of the areas served by the various municipal utilities and throughout the rural areas of the Province. In the case of the consolidated rural power districts The Hydro-Electric Power Commission not only provides the power at wholesale, but also—on behalf of the respective individual townships—attends to all physical and financial operations connected with the distribution of energy at retail to the consumers within the rural power districts. Summary financial statements relating to rural service are presented in Section IX of the Report, and a general report on their operation is given in Section IV.

In the case of cities, towns, many villages and certain thickly populated areas of townships, retail distribution of electrical energy provided by the Commission is in general conducted by individual local municipal utility commissions under the general supervision of The Hydro-Electric Power Commission of Ontario. The balance sheets, operating reports and statistical data relating to the individual urban electrical utilities are presented in Section X of the Report.

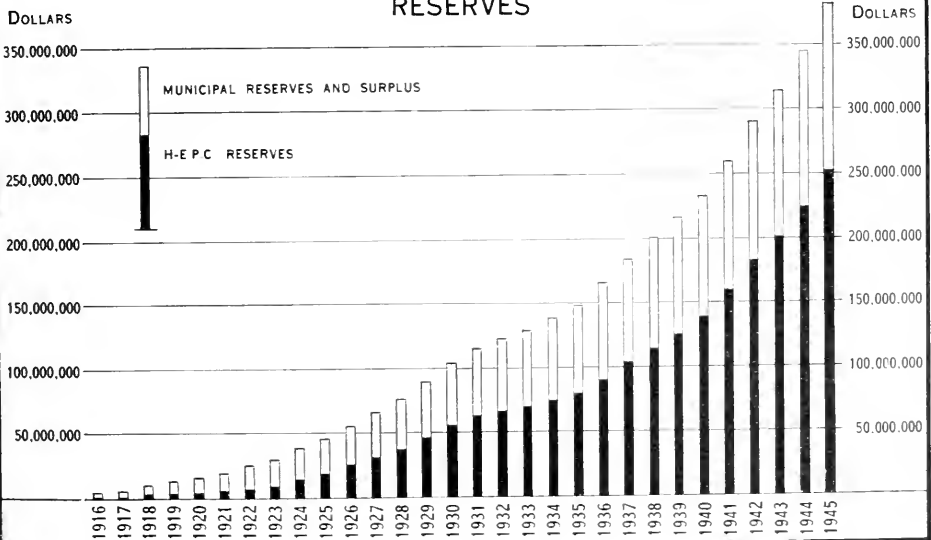

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

THIRTY YEARS RECORD—ALL SYSTEMS

CAPITAL INVESTMENT

RESERVES

For the Northern Ontario Properties held and operated by the Commission in trust for the Province there are also presented in Section IX financial statements including a balance sheet, an operating account, and statements respecting reserves and capital expenditures.

Further details respecting administration and explanations of the financial tables presented in the Report are given in the introductions to sections IX and X on pages 111 and 193.

Co-operative Systems Operating

From time to time in accordance with provisions of *The Power Commission Act* various groups of municipalities have been co-ordinated to form systems for the purpose of obtaining power supplies from convenient sources. In some cases these small systems grew until their transmission lines interlocked with those of adjacent systems and it proved beneficial to consolidate the transmission networks and the financial and administrative features. Early in 1944 the three systems serving southern Ontario, the Niagara, Georgian Bay and Eastern Ontario systems, were amalgamated to form the *Southern Ontario System* and financially the amalgamation was made retroactive to apply to the fiscal year 1942-43. The three former systems are now known as *divisions* of the Southern Ontario system.

The Niagara division embraces municipalities in all the territory between Niagara Falls, Hamilton and Toronto on the east and Windsor, Sarnia and Goderich on the west. It is served with 25-cycle power supplied from plants on the Niagara river, supplemented with power transmitted from generating plants on the Ottawa river and with power purchased from Quebec companies.

The Georgian Bay division comprises municipalities in that part of the Province which surrounds the southern end of Georgian Bay and lies to the north of the territory served by the Niagara division. It includes the districts surrounding lake Simcoe and extends as far north as Huntsville in the Lake of Bays district and south to Port Perry. Its power supplies, 60 cycles, are derived chiefly from local water power developments.

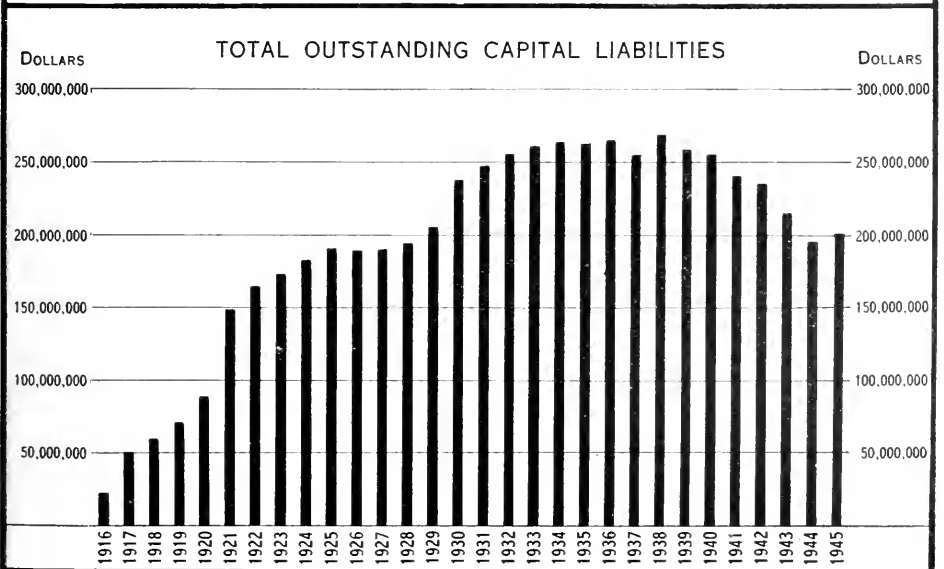

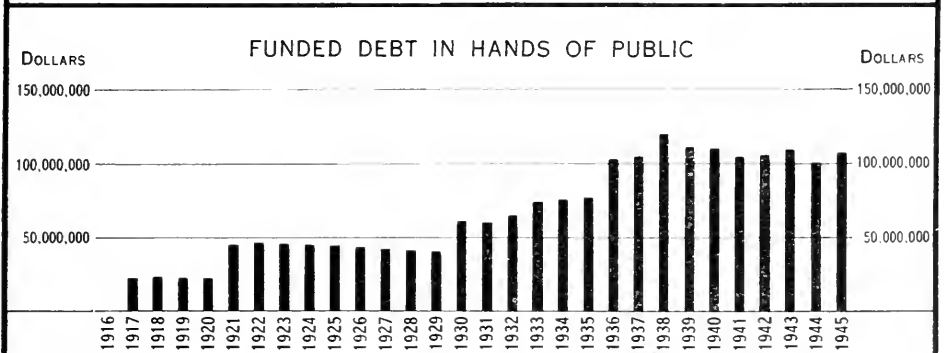

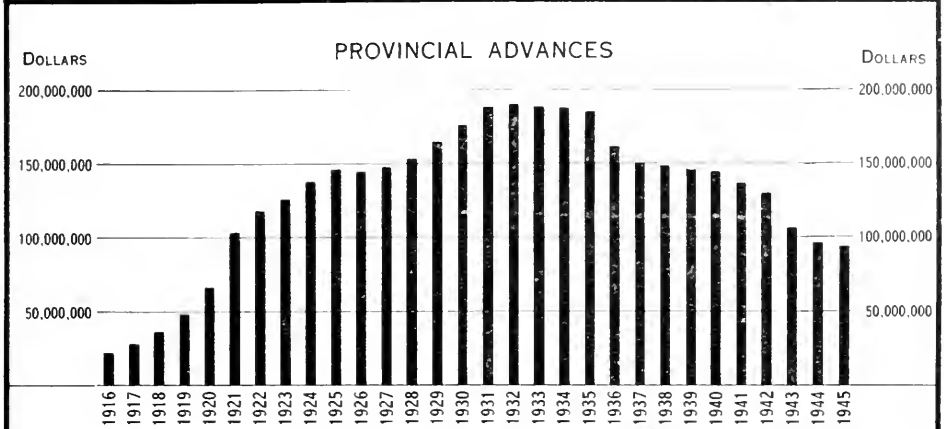

The Eastern Ontario division serves all of Ontario east of the areas comprising the Georgian Bay and the Niagara divisions. It includes the districts of Central Ontario, St. Lawrence, Rideau, Ottawa and Madawaska; formerly separate systems. Its power supplies, 60 cycles, are from local developments supplemented by purchases from other sources.

The Thunder Bay System comprises the cities of Port Arthur and Fort William, adjacent rural sections, the village of Nipigon, and the mining district of Longlac. Two developments on the Nipigon river supply 60-cycle power.

Northern Ontario Properties

In addition to its operations on behalf of the partner municipalities, the Commission, under an agreement with the Province, holds and operates the Northern Ontario Properties in trust for the Province. For the purposes of financial administration these properties are treated as one unit. The principal areas in the vast territory of northern Ontario at present receiving service are the *Abitibi District* comprising the territory served by 25-cycle power from the Abitibi Canyon development, together with a small area in the southern portion of the district of Sudbury in which mining properties are served with 60-cycle power; the *Timiskaming District* comprising the

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO
 PROVINCIAL ADVANCES AND FUNDED DEBT

drainage basins of the Matabitchuan river, the Montreal river and a portion of the Mattagami river with eight generating plants, four 25 cycle and four 60 cycle; the *Sudbury District* comprising the city of Sudbury and the adjoining mining area known as Sudbury Basin; the *Nipissing District* centering around the city of North Bay on the shore of lake Nipissing; the *Patricia District* comprising the territory within transmission distance from the Ear Falls development at the outlet of lac Seul on the English river including the Red Lake mining area, and the territory immediately north of lake St. Joseph in the territorial district of Patricia served with power from a development at Rat Rapids on the Albany river; and the *Rainy River district* which derives its power from the Thunder Bay system. Included in the Northern Ontario Properties are rural districts on Manitoulin island, and others adjacent to the communities served in the various districts of northern Ontario. Power supplies are 60 cycle except from Abitibi canyon development, and four plants in Timiskaming district.

The geographic boundaries of the various systems and districts are shown on the maps of transmission lines and stations at the back of the Report.

The power supplies for the systems and Northern Ontario districts are listed in the first table of Section II of the Report on pages 16 and 17.

The Annual Report

The table of contents, pages xxxiii and xxxiv lists the matters dealt with in the Report. At the end of the Report there is a comprehensive index. To those not conversant with the Commission's Reports, the following notes will be useful.

In Section II, pages 15 to 35, dealing with the operations of the systems, are a number of diagrams showing graphically the monthly loads on the several systems and districts. Tables are also presented showing the amounts of power taken by the various municipalities during the past two years.

The rural distribution work of the Commission has proved of widespread interest and special reference to this is made in Section IV on pages 51 to 72.

In Sections VI and VII will be found information respecting progress of work on new power developments and on transmission system extensions, together with photographic illustrations.

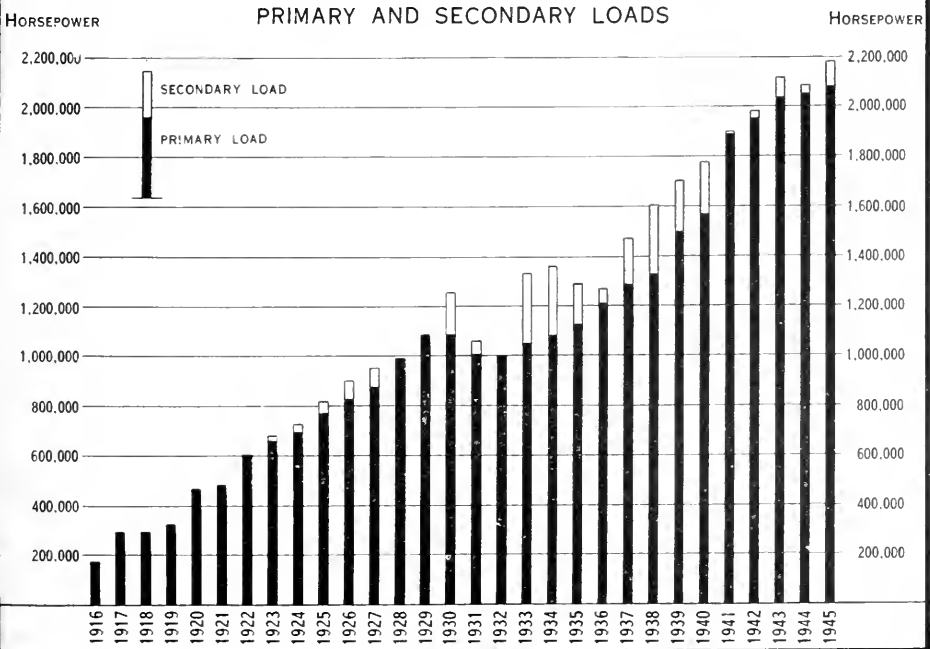

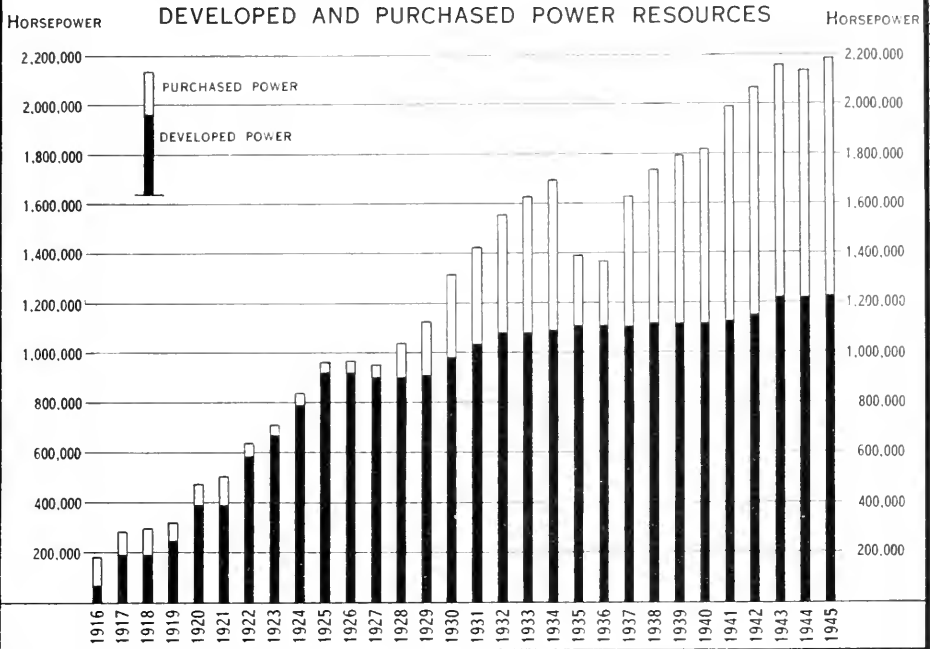

About one-half of the Report is devoted to financial and other statistical data which are presented in two sections IX and X already referred to above.

Frequent enquiries for the rates for service to consumers are received by the Commission. For the urban municipalities served by the Commission these are given in Statement "E" starting on page 330. For the rural power districts they are given in Section IV on page 55. Certain statistical data resulting from the application of the rates in urban utilities are given in Statement "D". This statement is prefaced by a special introduction starting on page 310.

In its Annual Reports the Commission aims to present a comprehensive statement respecting the activities of the whole undertaking under its administration. Explanatory statements are suitably placed throughout the Report. The Commission receives many letters asking for general information respecting its activities, as well as requests for specific information concerning certain phases of its operations. In most cases the enquiries can satisfactorily be answered by simply directing attention to information presented in the Annual Report.

LEGAL

THERE were no amendments to The Power Commission Act and no special Acts relating to the Commission passed by the Legislative Assembly of the Province of Ontario during 1945.

The Agreements between The Hydro-Electric Power Commission of Ontario and municipalities, persons and corporations mentioned in the list hereunder given were approved by Orders-in-Council.

RIGHT-OF-WAY AND PROPERTY

THE gradual relaxation of wartime restrictions has increased substantially the volume of construction, particularly of rural service extensions and this increased construction has resulted in a greater number of poles, anchors, etc. being placed on private property.

SOUTHERN ONTARIO SYSTEM

As in the past few years term easement and tree trimming rights have been renewed in addition to the rights obtained for both rural and high-tension lines.

The policy of providing improved and better centralized rural offices was continued and several leases and purchases for this purpose were completed.

Niagara Division

Progress has continued in obtaining lands required in the enlargement of the DeCew Falls development and several properties required in connection with water storage for this generating station were obtained.

Lands were obtained for a new transformer station at Islington and a proposed transmission line from this station to a junction with the present 220-kv line to Burlington transformer station.

In connection with the transmission line from the proposed frequency changer station in Scarborough township, the acquisition of right-of-way extending northwesterly to the town of Barrie was commenced.

Negotiations were commenced for the purchase of a right-of-way owned by the Canadian National Railways, extending from Bronte to a point near Whitby.

Some land was purchased and easements obtained for the 110-kv line from Kent transformer station to St. Clair transformer station.

A site was purchased for the Caledonia transformer station.

Outstanding purchases were made to complete all necessary ownership of lands required on various rights-of-way in the Niagara division.

Georgian Bay Division

The purchase of additional land required for the South Falls generating station was completed.

Expired rights for lines constructed approximately thirty years ago have been renewed and many rights for new lines constructed were obtained.

Transmission line rights were obtained for the line from Eugenia to Priceville.

Eastern Ontario Division

Sale of lands acquired in the purchase of the Canadian National Railways right-of-way between Colborne and Port Hope was continued and this right-of-way is now practically all disposed of to abutting owners subject to perpetual transmission line rights.

Lands were obtained in Oshawa for the Oshawa transformer station. Lands have been obtained for the new hydro-electric development at Stewartville and purchasing is continuing. Lands and rights were also acquired for the development on the Madawaska river at Bark lake.

Easements and tree cutting rights were obtained for the 110-kv line from Haleys switching station to Chalk River which practically completes the right-of-way required for this line.

Rights were obtained for the new 110-kv line from Merrivale Road junction to Cornwall transformer station, a distance of approximately fifty miles.

Sites were obtained for the Merrivale switching station and for the Riverdale transformer station.

Rights were obtained for the transmission line between Maxville and South Plantagenet.

THUNDER BAY SYSTEM

Rights were obtained for several lines in this system, including distribution lines serving Atikoken.

NORTHERN ONTARIO PROPERTIES

A study of properties acquired in the purchase of the Northern Ontario Power Company was made and rights for several lines acquired with that Company were secured.

SURVEYS

Surveys were made for all properties acquired and sold during the year and for easement and other rights both new and in renewal. Contour and levelling surveys were carried out in connection with some properties.

GENERAL

Assessment notice and tax bills from 361 municipalities were certified and where necessary appeals were entered against assessments not in accordance with The Power Commission Act. During the year 237.75 acres of land were acquired and 223.68 acres of surplus land were sold. Efforts were continued to lease all available lands for agricultural or other purposes and all associated buildings have been well maintained. Several leases associated with the war have been terminated or revised. The revenue from leased property continues to increase materially.

A total of 2,548 documents were recorded during the year.

SECTION II

OPERATION OF THE SYSTEMS

THE Commission's fiscal year ending October 31, 1945, was particularly favourable, both in respect to operation of the properties and service rendered. During the year total power resources rose from 2,545,000 horsepower as of October 31, 1944, to 2,672,000 horsepower on October 31, 1945, details of which are given in the following table of "Total Power Generated and Purchased."

Water conditions on the whole were favourable. Although the year was entered with water storages below satisfactory levels, the 1945 spring run-off, followed by greater than average precipitation during the summer and fall months, restored storages available for the 1945-46 winter season to above normal levels in most areas.

Load Conditions, November 1, 1944, to October 31, 1945.

The total output on the Commission's combined systems reached a maximum of 2,608,000 horsepower in the spring of 1945. This was the highest load ever carried by the Commission. It exceeded the maximum output in the previous year by 163,000 horsepower, or 6.7 per cent. The total energy output from all generated and purchased sources amounted to 12,488,227,179 kilowatt-hours, exceeding all previous records, and that of the previous year by 3.7 per cent.

The output for primary power purposes also reached levels never before attained. The maximum primary peak demands, which usually occur during the fall and winter months, occurred in the spring of 1945, reaching 2,470,000 horsepower. Compared with the maximum demand of the previous year, this was an increase of 5.2 per cent, or 122,000 horsepower. The monthly primary peak loads, without exception, exceeded those of the corresponding months of the previous year and contrary to expectations, no appreciable recession took place following the ending of the wars in Europe and the Pacific. Energy output for primary power purposes rose three per cent from 10,787,348,600 kilowatt-hours in the previous year to 11,110,548,529 kilowatt-hours.

Details regarding the peak loads of the Southern Ontario and Thunder Bay systems and of the several districts of the Northern Ontario Properties, are given in the load curves in this section of the Report.

*Because the peak loads on the various generating plants and purchased power sources usually occur at different times, the sum of the individual peak loads would not represent the sum of the peak loads on the systems. These, in the case of each system, must relate to the maximum load occurring at any one time. Consequently, the column headed "Peak load" is not totalled.

CAUTION: The figures for "Maximum normal plant capacity" reflect the capacity of the various plants under the most favourable operating conditions which can reasonably be considered as normal, taking into consideration turbine capacity as well as generator capacity, and also the net operating head and available water supply.

Owing, among other things, to changes in generating equipment due to wear and tear or the replacement of parts, also to changes in limitations governing water levels and effective net heads, the maximum normal plant capacity is not a fixed quantity but is one which must be revised from time to time.

It is particularly important to bear in mind that the column headed "Maximum normal plant capacity" cannot be taken as an indication of the dependable capacity of the various plants: in some cases it is, but in many cases it is not. Chief among the factors which govern the maximum dependable capacity of an hydraulic power plant and which are not reflected in column headed "Maximum normal plant capacity" are abnormal variations in water supply and operating limitations encountered when plants are so situated on a given stream as to be affected by one another.

SOUTHERN ONTARIO SYSTEM

The power load in the Southern Ontario system reached heights during the past year never before attained. The maximum primary load occurred in the spring and from that point to the end of the year, receded in comparison with the load of the previous year. However, at the end of the year following V-E and V-J Days, it was still greater than the load for the same period last year. Compared with the previous year, the maximum total load rose from 2,114,953 to 2,177,763 horsepower, an increase of three per cent, and the maximum primary load rose from 2,033,103 to 2,104,580 horsepower, an increase of 3.5 per cent.

The total energy output of the Southern Ontario system for primary and secondary power was 1.9 per cent greater than the output of the previous year. The output of energy classed as primary power and representing about 90 per cent of the total, rose from 9,211,310,482 kilowatt-hours in the previous year to 9,391,920,645 kilowatt-hours, an increase of two per cent.

On December 1, 1944, the Commission took over the operation of the properties purchased from the Caledon Electric Company. These properties have been included in the Georgian Bay division of the Southern Ontario system. The generating plant, consisting of two small hydraulic units and two small Diesel driven units, has a total maximum normal output of 800 horsepower.

During certain periods of the year special power purchases were arranged with the Quebec power companies for such power as the companies had available in excess of their standing agreements with the Commission. Under a flexible arrangement with the Department of Transport, a block of 5,000 horsepower was purchased during the non-navigation period on the Welland Ship canal in the winter of 1944-45. As the 60-cycle resources available to the Georgian Bay division were inadequate to carry the high summer loads on this division, arrangements were made in July with Defence Industries Limited at Nobel to obtain the use of their steam-turbo unit, which was then in the process of being closed down. This unit was used regularly over the summer peak period on the Georgian Bay division and has since been retained as standby for emergency use.

Except for shut-downs to perform essential maintenance work, all of the Commission's plants on the Niagara river were operated at practically full output during the year. Early in the spring of 1945, automatic devices for regulating Queenston forebay levels by the regulation of generating output were placed in service. These devices have been a worthwhile addition in raising the efficiency of the Queenston generating station and at the same time relieving operators of the onerous duty of manual operation.

All of the generators at Chats Falls were available for service as required during the whole of the year, routine maintenance being carried out during the lighter load periods. This station was used as frequency control point for the whole of the Southern Ontario system during most of the year, the controlling equipment giving satisfactory service. The early break-up on the Ottawa river in April, one full month ahead of normal, eliminated possible water deficiency due to low storages caused by the dry summer of 1944. Average flow was maintained during the summer of 1945 and storage at the end of the year was above normal.

Water storage and stream flow on the rivers supplying the generating stations on the Georgian Bay and Eastern Ontario divisions, although sub-normal in the fall of 1944, showed decided improvement in 1945, with the result that on the whole the water supply for the year under review was well above normal.

Except at a few of the smaller generating stations, where adverse ice conditions are a normal experience each winter, no special trouble from ice runs was encountered. Notwithstanding the unprecedented demand for power and the necessity of accepting a somewhat lower standard of maintenance owing to the shortages in skilled labor and supplies, generating equipment gave remarkably good service throughout the year.

Outside of an occasional transformer failure, no trouble was experienced in the operation of the Commission's transformer and distributing stations. To provide for rising loads, the capacity of several distributing stations was

increased and a few new stations were erected to relieve loads on near-by existing stations.

Transmission lines, subject to the hazards of wind, sleet and lightning storms, functioned reliably throughout the year. Even the record blizzard of December 12, 1944, caused only minor line outages and Hydro was available for all essential uses. Disrupted transportation facilities throughout the storm area, however, resulted in the direct loss in load of some 175,000 horsepower, which took about four days to recover.

In last year's Report, mention was made of steps taken to improve the economy of operation in the parallel operation of the Niagara, Georgian Bay and Eastern Ontario divisions of the Southern Ontario system. As a further study in this direction, a test was arranged by the Commission and the Central New York Power Corporation to interconnect their respective systems by means of an existing 60-cycle 110,000-volt tie line sixty miles long, extending between Ottawa, Ontario, and Massena, New York. This test was carried out on March 11 and 12, 1945.

The test was successful and yielded results of great operational and research value to the Commission. It is also interesting to note that the geographical areas supplied by the interconnection of these great systems comprised all southern Ontario below Algonquin Park, from Windsor to the Ottawa river, together with a portion of the Province of Quebec, while in

SUMMATION OF PEAK LOADS IN HORSEPOWER AS SUPPLIED TO URBAN MUNICIPAL UTILITIES AND FOR RURAL HYDRO SERVICE, SHOWING TREND OF POWER DEMANDS 1944-1945

System	Total of peak loads in horsepower		Net increase in horsepower	Number of utilities with			Total
	July to Dec. 1944	July to Dec. 1945		Decreases	Increases	No change	
URBAN MUNICIPAL UTILITIES							
Southern Ontario.....	1,266,644	1,378,360	111,716	22	283	2	307
Thunder Bay.....	45,325	47,251	1,926	0	6	0	6

RURAL HYDRO SERVICE							
Southern Ontario.....	121,399	145,992	24,593	8	105	1	114
Thunder Bay.....	862	1,048	186	0	2	0	2
Northern Ontario Properties.....	3,001	3,405	404	1	4	0	5
Total, Rural Service	125,262	150,445	25,183	9	111	1	121

NOTE: The yearly peak demands of the individual municipal Hydro utilities do not all occur during the same month of the year nor, for any given municipality, do they always occur in the same month in successive years; in nearly all cases however the yearly peak occurs during the second half of the calendar year. For this reason a comparison of the peaks occurring during the second half of the year as shown in the tables of this Section shows most satisfactorily the general trend of the local loads. The loads given above for Rural Hydro Service are a summation of the loads in the various operational districts and are similarly obtained.

the United States it included the States of New York, Maryland, New Jersey, Connecticut, Vermont, New Hampshire, Massachusetts, Rhode Island and a portion of Pennsylvania.

The generation connected totalled 11,000,000 kilowatts, about 3½ million being hydraulic generation and the remainder steam. On the Canadian system, approximately 837,000 customers were being supplied while in the United States the customer total reached about 4,000,000.

An interesting feature of this experiment was that over the whole of this interconnected network automatic frequency control was maintained, so that electric clocks at points as far separated as Baltimore, Maryland, and Parry Sound, Ontario, indicated the seconds at precisely the same rate. This synchronous operation applied, of course, to all connected generators and to synchronous motors throughout the entire interconnected area.

			Initial	July to Dec., 1945	Decrease	Increase
Almonte	60	Jan. 21, 1945	457.1	435.7	21.4	

THUNDER BAY SYSTEM

The plants on the Nipigon river, comprising Alexander and Cameron Falls generating stations, which supply the bulk of the power distributed in the Thunder Bay system and Rainy River district, operated at practically full output during the whole year. On September 30, 1945, the newly installed unit at Alexander generating station was placed in service, thereby raising the normal maximum capacity of this station from 50,000 to 70,000 horsepower. The Ogoki diversion, which commenced in 1943, has increased the water available for generation of power on the Nipigon river sufficiently to operate the Nipigon plants, including the Alexander extension, at load factors above those expected to exist for primary loads on the Thunder Bay system.

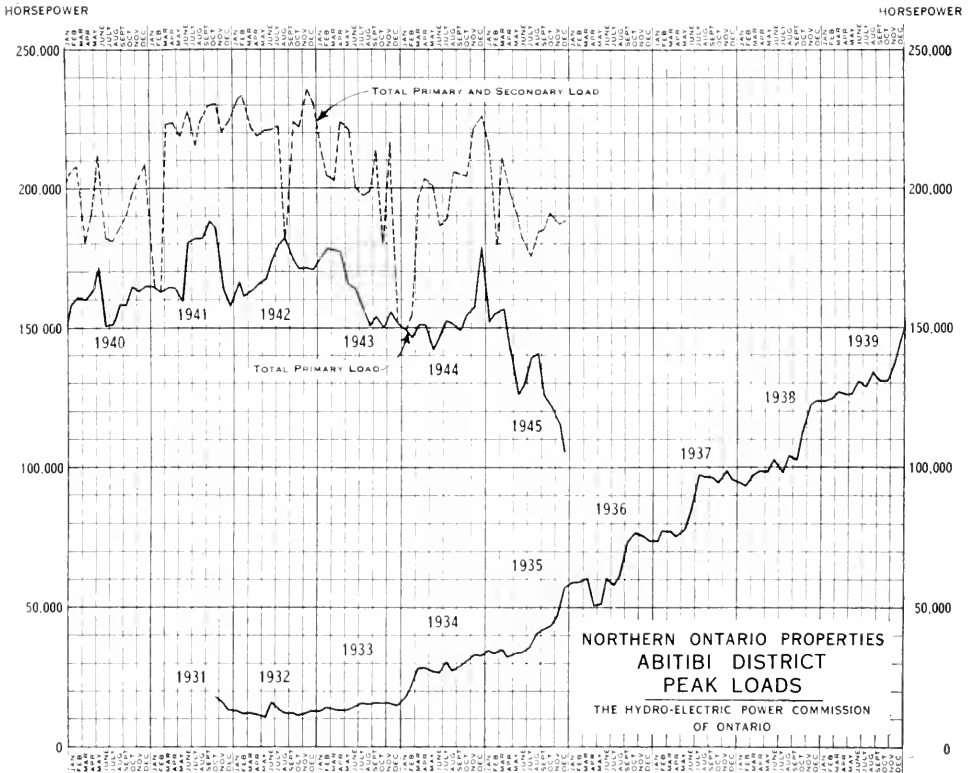

The maximum primary peak demand of the Thunder Bay system was 126,206 horsepower, slightly above the corresponding demand of the previous year. The year's primary energy demands totalled 636,058,180 kilowatt-hours, exceeding that of the previous year by 4.8 per cent. The primary load, as in the previous year, includes power delivered to the Rainy River district of the Northern Ontario Properties.

During most of the year, as in past years, the generating station of the Kaministiquia Power Company, a subsidiary of the Abitibi Power and Paper Company, has been operated in parallel with the Commission's generating stations on the Nipigon river. This has enabled the Abitibi Power and Paper Company, under a standing arrangement, to transfer power for electric steam boiler operation at the paper companies under its control. During the year, 31,788,480 kilowatt-hours were thus transferred which with the surplus energy available from the Commission's plants, produced a total of 112,198,900 kilowatt-hours for electric boiler operation.

THUNDER BAY SYSTEM—LOADS OF MUNICIPALITIES—1944-1945

NORTHERN ONTARIO PROPERTIES

The area served by the Commission on behalf of the Province in northern Ontario was enlarged during the year by the acquisition of the properties of the Northern Ontario Power Company. The new properties are administered by the Commission in trust for the Province under a separate district set up in the Northern Ontario Properties known as the Timiskaming district.

A comparison of the year's end primary loads gives a fair indication of the load trends in these areas. Accordingly, the total primary load (summation of the district primary peaks) of the Northern Ontario Properties rose about 20,000 horsepower from October 1944 to October 1945, an increase of 11 per cent. This increase was the net result of a new load of about 40,000 horsepower resulting from the purchase of the Northern Ontario Power Company's properties and a recession, chiefly at smelting plants, of approximately 20,000 horsepower. The average output for primary power purposes was 11.7 per cent greater. Gold mining activities during 1945 held at about the 1944 level to which it had fallen during the war due to the shortage of labor and supplies.

Abitibi District

The primary peak load of the Abitibi district dropped from 154,557 horsepower in October 1944 to 122,761 horsepower in October 1945, a decrease of 20.6 per cent. About 20,000 horsepower of this decrease resulted from reduced demands of base metal smelting loads, and most of the balance represented the power sold to the Canada Northern Power Corporation for transfer to Quebec, a load transfer which was discontinued shortly after the Commission took over the properties of the Northern Ontario Power Company.

Water storage at the commencement of the year was normal. The spring break-up, coming about one month ahead of time, resulted in a substantial carry-over of the previous winter storage. On the whole, water conditions for the year exceeded normal. Production at the Abitibi canyon plant totalled 999,847,500 kilowatt-hours for the year. This includes 225,780,340 kilowatt-hours of surplus energy generated for delivery to the electric boilers at the paper mills of the Abitibi Power and Paper Company.

The Abitibi district has been operated in parallel with the Timiskaming district under conditions similar to those existing prior to the acquisition of the Northern Ontario Power Company's properties. During the year, interconnections between the districts have been improved, providing a greater flexibility in the transfer of power. Up to October 31, 1945, a net interchange of 8,500,000 kilowatt-hours passed from the Abitibi district to the Timiskaming district.

Timiskaming District

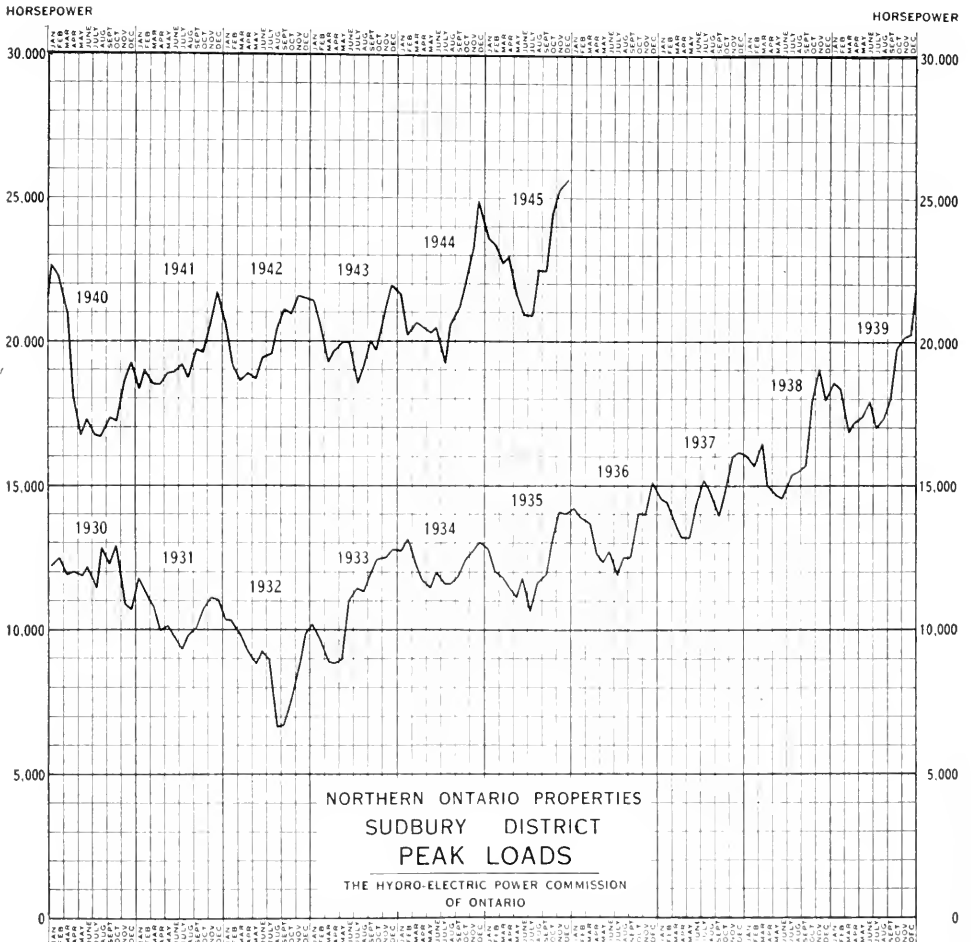

The Timiskaming district is a new district of the Northern Ontario Properties, formed to administer the properties purchased from the Northern Ontario Power Company. The properties were purchased as of December 1, 1944, but the Commission did not take over operation until March 26, 1945, from which date the load of the Timiskaming district is included in the Commission's statistics of operation. The district comprises, besides facilities for the transmission and distribution of power, eight hydro-electric generating stations, four of which operate at 25 cycles with a total normal maximum rating of 36,200 horsepower, and four at 60 cycles with a corresponding rating of 23,700 horsepower.

The maximum peak demand of the Timiskaming district, exclusive of emergency power supplied to Quebec, was 49,129 horsepower. The corresponding energy demand from March 26, 1945, to October 31, 1945, was 139,014,871 kilowatt-hours. All of the above power was for primary distribution.

Sudbury District

The total load of the Sudbury district, all of which was for primary distribution, rose from 21,945 horsepower in October 1944 to 24,598 horsepower in October 1945, an increase of 12.1 per cent. The total energy consumption for the year was 4.1 per cent greater.

Water conditions in the Sudbury district during the fall and winter of 1944-45 were subnormal and it was necessary to purchase, during the above period, a quantity of power and energy from the Sturgeon Falls plant of

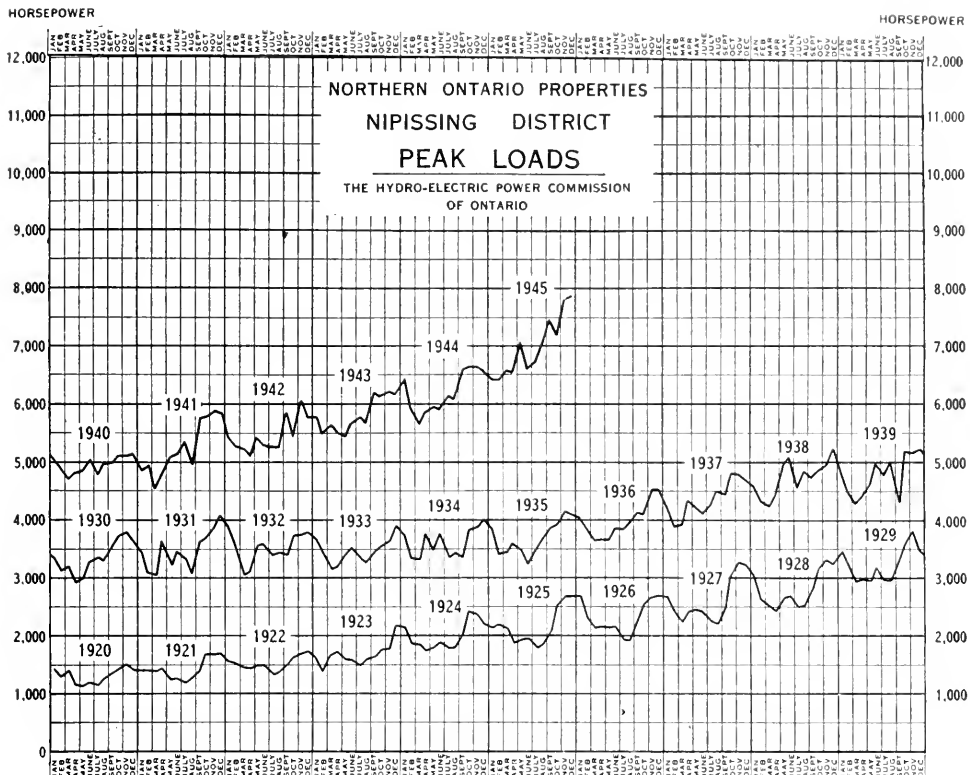

the Abitibi Power and Paper Company to meet the district load demands. An early spring break-up on the Sturgeon and Wanapitei rivers, followed by more than normal precipitation in the early summer, replenished storages and stream flow which enabled the Commission's own plants to produce full district demands from March to September 1945. On September 1, purchase from the Sturgeon Falls plant was resumed, a measure taken to conserve water for the winter season. During the year, 8,500,000 kilowatt-hours were purchased.

Nipissing District

The Nipissing district peak load was 7,205 horsepower in October 1945. Compared with the peak load of the previous October it shows an increase of 7.9 per cent. Energy consumption for the year was 6 per cent greater.

Water conditions in this district have been about normal, but, in recent years insufficient to generate the district load requirements. During 1945, the shortage was approximately 9,420,000 kilowatt-hours, which was supplied from the Sudbury district's resources.

Manitoulin District

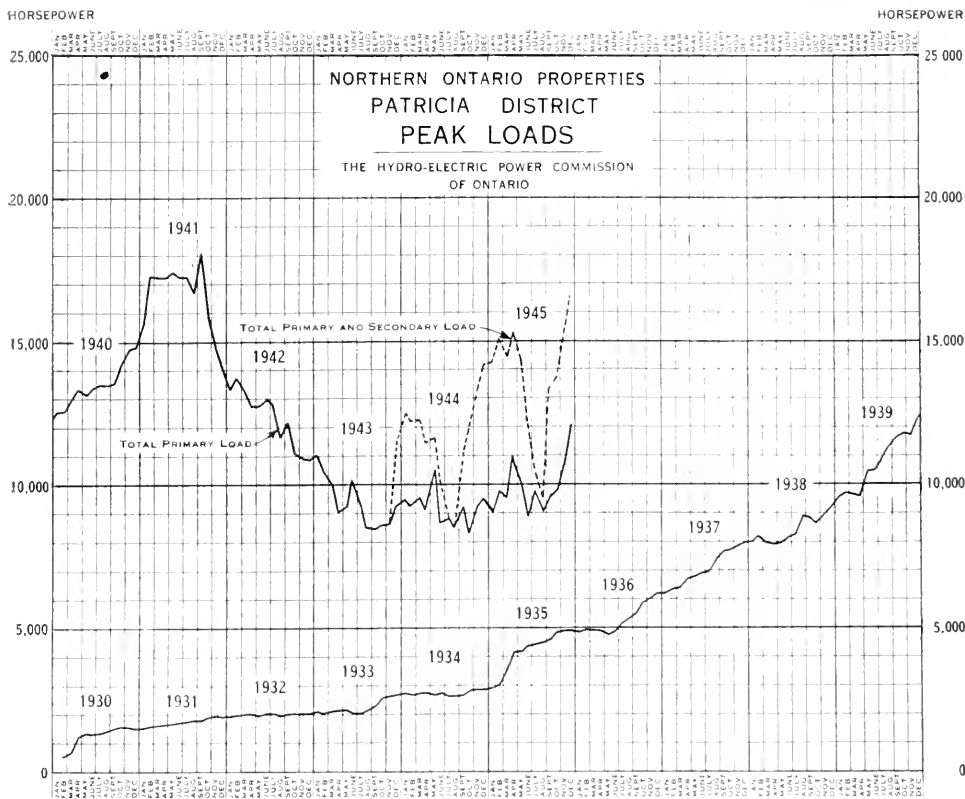

The load of the Manitoulin district, which is supplied by purchase from the Manitoulin Pulp Company, rose from a peak load in October 1944 of 540 horsepower, to 723 horsepower in October 1945, an increase of 33.7 per cent. The year's energy requirements increased 26.3 per cent.

Patricia District

In the Patricia district, the primary peak loads in October 1944 and 1945 were 8,358 horsepower and 9,866 horsepower, respectively, showing an increase of 18 per cent. Most of this increase resulted from power supplied to the Dryden Paper Company, this power being supplied on an at-will basis. Demands of the gold mines in this district have changed little from the previous year. Exclusive of primary power, 21,424,000 kilowatt-hours were supplied to four mining companies for the operation of electric boilers during the year.

Rainy River District

Power for the Rainy River district is purchased from the Thunder Bay system at cost. The district supplies power to the Steep Rock Iron Mines Limited and the Ontario-Minnesota Pulp and Paper Company, to replace the output from the company's Moose Lake generating station, made in-operative by the development of Steep Rock mine. On December 14, 1944, a small distributing station was placed in service to supply power to Atikokan townsite. During the year the average of the monthly peak loads supplied to the district was 18,644 horsepower.

NORTHERN ONTARIO PROPERTIES—LOADS OF MUNICIPALITIES—1944-1945

MAINTENANCE OF THE SYSTEMS

Power demands were greater during the past year than during any year since the outbreak of war and have placed a continued strain upon the physical structures of the Commission, which owing to the restrictions on labor, equipment and supplies, had to carry on during the long war years on the basis of bare maintenance. Nevertheless, all equipment essential to maximum service has been maintained in efficient operating condition. No better evidence of this can be found than the absence of any serious failures during the year.

At the power houses, inspection and routine maintenance was carried out on all turbines, generators and auxiliary equipment. During the year six turbines of 10,000 horsepower or greater and eight turbines under 10,000 horsepower capacity were completely dismantled and thoroughly overhauled. New armature windings were installed in No. 14 generator at the Ontario Power plant and No. 8 generator at the Toronto Power plant and also in three small generators at the Big Chute and Hanover generating stations.

Several transformers of varying sizes were rebuilt and restored to service during the year. Transformers at a number of distributing stations were replaced by ones of larger capacity to meet local load conditions. A certain amount of work was carried out modernizing equipment and layout at a number of stations.

Transmission lines were regularly patrolled. During the year about 3,000 defective wooden poles were replaced. Nearly 25,000 poles were given butt treatment to retard rot. Insulators were systematically checked, involving several thousand units, and defective units were replaced to forestall failure and the resultant interruptions to service. Underbrushing of right-of-ways, which had been deferred during the war years, was extended in 1945 owing to the easing of the labor situation in the latter part of the year.

FORESTRY DIVISION

Forestry division activities continued to suffer early in the year because of loss of personnel to military service. The co-operation of Operating and Rural department linemen has made possible the amount of work performed which was facilitated by the Department of Highways.

Transmission and rural maintenance line clearing operations during the fiscal year involved treatment of 63,139 trees and the removal of 302 spans of brush, spread over 2,746 miles of line.

Municipal line clearing operations have been curtailed until the Forestry field staff is restored to its customary strength.

Reforested areas in the vicinity of Eugenia and Trenton were heavily infested by the pine saw fly. To control the insects approximately 175 acres were sprayed with D.D.T. applied by an autogyro. Definite results cannot be determined until the summer of 1946.

Spraying of trees and shrubs was continued on Commission-owned properties in the Eastern and Niagara divisions for the control of various insects and fungus diseases.

SECTION III

MUNICIPAL WORK

AT the end of 1945 the Commission was serving 922 municipalities in Ontario. Of this number about two-thirds or 577, including 120 villages and 457 townships are served as an amalgamated rural division of Hydro service (dealt with in Section IV of this Report), and about one-third or 300 are supplied with power by the Commission under cost contracts and operate their own Hydro utilities either as a separate service or as part of a public utilities organization. In addition 45 municipalities are operated direct by the Commission or are served under other forms of contract. This section of the Annual Report deals with the Commission's work in connection with these urban municipalities which operate their own Hydro utilities.

The Commission acts in an advisory capacity to the municipalities with which it has contracts, and assists municipal officials to purchase, construct or extend distribution systems. As provided under The Power Commission Act, all rate adjustments are approved by the Commission, therefore, a study of the operating conditions of all utilities is made annually and adjustments recommended.

Municipalities Served

During the year the Commission provided power to a number of municipalities under the following conditions—

NEW MUNICIPALITIES

Cost contract agreements were entered into and service supplied to the Towns of Almonte, Renfrew and Thornbury.

MUNICIPALITY FORMERLY BILLED AT A FIXED RATE

During the year the Commission entered into a new contract with the town of Newmarket, by which the cost of power was changed from a fixed rate per horsepower to a regular cost contract.

HYDRO OWNED SYSTEMS SOLD TO MUNICIPALITIES

The Hydro owned systems in the town of Burlington and the village of Braeside were sold to these municipalities and regular contracts entered into for their supply of power on a cost basis.

NEW TOWNSITES SERVED

The Commission constructed new distribution facilities in Atikokan townsite to provide service to consumers directly by the Commission.

NORTHERN ONTARIO POWER COMPANY

The Northern Ontario Power Company properties were purchased during the year. In all 12 municipal systems came under Hydro operation in the following places:

Towns of Cobalt, Englehart, Haileybury, New Liskeard and Timmins; townsites of Earlton, Elk Lake, Kirkland Lake, Schumacher, South Porcupine and Swastika; organized township of Bucke.

Increased Municipal Loads

The transition from war to post-war conditions affected the municipal Hydro utilities in different ways but on the whole the additional use of electricity following the lifting of restrictions, the return to standard time for the winter months, and the ending of the need for rigid economy in the use of electricity in the home, more than offset the reductions in demand for war industry.

Comparing the period July to December, 1945, the transition stage following victory, with the corresponding period of the previous year when war production was maintained at about its peak output, there were increases in peak load demands by 303 Hydro utilities, no change in 3, and decreases in only 23. The change from Day-light Saving time in October 1945 to Standard time produced in most municipalities an indeterminate increase, which accounts in part for the demands established after October 1945. This record emphasizes the steady character of the municipal load and augurs well for Hydro stability and progress in the future.

Statistical Summary of Growth by Utilities

The annual growths in revenue and kilowatt-hour consumption, also the reduction in the average cost per kilowatt-hour from 1914 to 1944 for all domestic and commercial consumers are shown in the accompanying tables and graphs. The figures include all the municipal utilities listed in Statement "D" of Section X of this Report and also those municipal utilities owned and operated by The Hydro-Electric Power Commission of Ontario.

The tables give complete information for "all municipal utilities combined" for both domestic and commercial services; the graphs show only increased use and decreased cost for domestic and commercial services but give these data for cities, towns and villages as well as for "all municipalities combined."

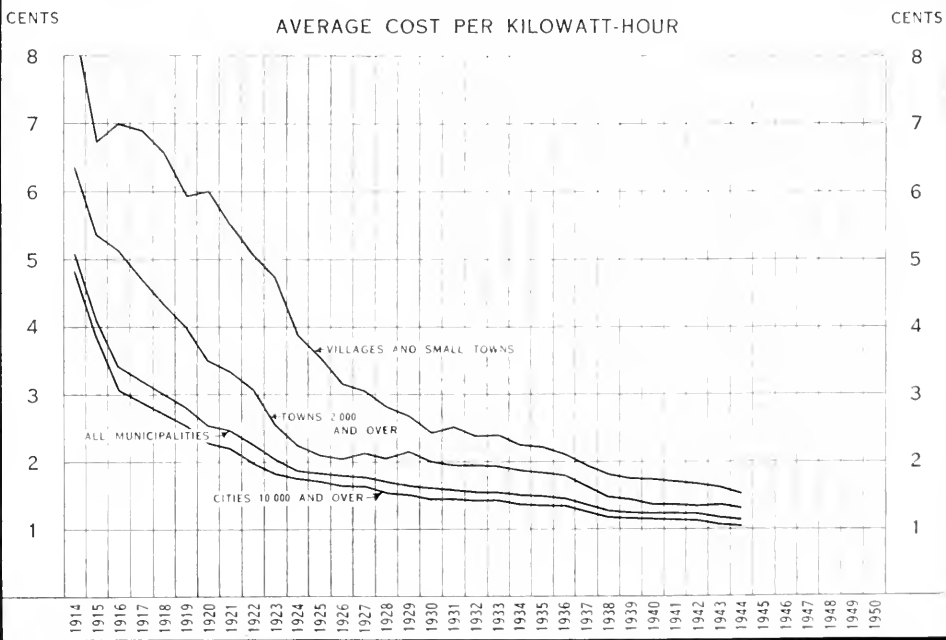

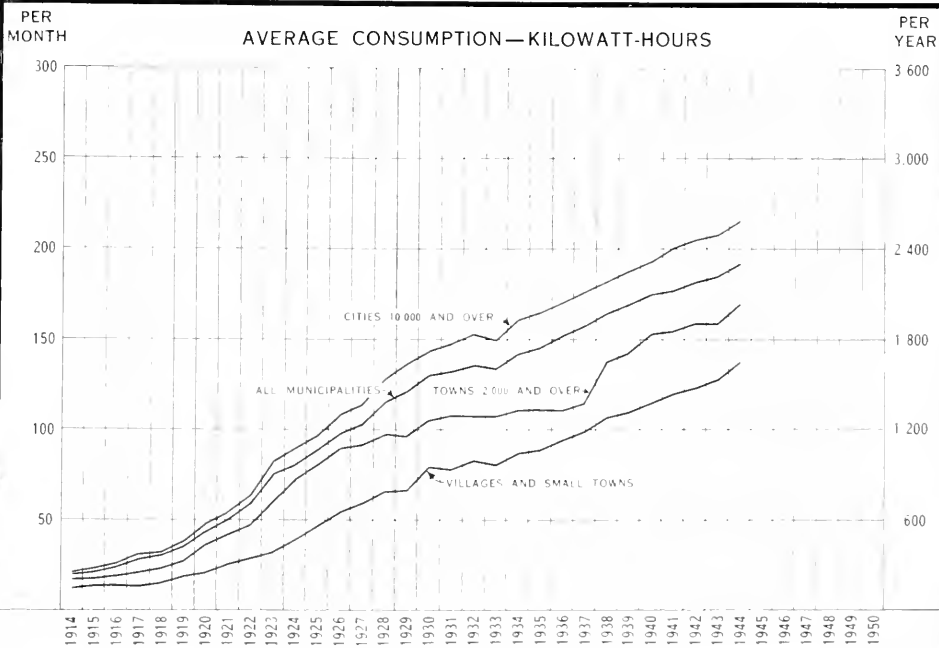

It should be noted that the reduction in average cost per kilowatt-hour shown in accompanying tables is only in part due to reductions in rates or prices to consumers. Credit for the reduction in average cost belongs chiefly to the promotional form of modern rate schedules which are designed to give consumers the benefit of the low overall costs of providing additional energy by means of distribution facilities already established.

Under such promotional rate schedules, providing the initial rates are not too high, there is established a beneficial cycle of increased use, leading to lower average costs, which if passed on to consumers in the form of lower rates or prices starts a repetition of the cycle. Under the Hydro practice of giving service at cost the promotional feature is inherent in the rate schedules, and the annual review of operations made by the Commission leads to appro-

1944	323			579,890	1.15	2.23	194

appropriate rate reductions from time to time, although reduced average cost is chiefly a function and evidence of increased average use.

Reductions in Rates and Refunds to Consumers

During 1945 the Commission recommended and approved an adjustment in rates for domestic, commercial and power consumers in urban municipalities receiving power from the Commission. These reductions involved 255 municipal utilities, the consumers of which will benefit by an aggregate amount exceeding \$3,300,000 per annum.

The Commission also recommended and approved refunds to consumers in urban municipalities where the municipal Hydro surplus in the form of cash or bonds had accumulated during recent years in excess of the amounts estimated as required for plant construction, maintenance, etc., in the next few years. The total refunds to consumers amounted to more than \$485,000.

In addition the Commission adopted a uniform rate for most mining townsites served by the Northern Ontario Properties, the local distribution systems of which are owned and operated by the Commission. This will benefit the consumers by more than \$19,000 per annum.

The mines of Northern Ontario continued to benefit by rate reductions announced last year, which came into operation on January 1, 1945. It is estimated that the total annual saving in power costs to the mines as a result of these rate reductions will exceed \$500,000.

Financial Progress of Municipal Electric Utilities

The consolidated balance sheet, published on page 197 of this Report, shows a total plant value in Hydro utilities of \$106,346,101 against which is a debenture balance debt of \$10,612,595. However, some municipalities are accumulating a sinking fund to pay for debentures at maturity and up to 1945 this fund amounted to \$4,952,718. If this sinking fund is deducted from

the debenture balance debt the actual unpaid debenture debt would be \$5,659,876 or about 5 per cent of the original value of the distribution systems.

Automatic reduction in the debenture debt, due to the annual principal or sinking fund payment being provided for out of revenue, and the remarkable accumulation of assets reflect a satisfactory financial condition of the Hydro utilities generally. Statement "A" of this Report shows the relation of assets to liabilities in 304 municipalities. In 92 per cent of these municipalities the quick assets such as cash, bonds, accounts receivable and inventories exceed in value the total liabilities, including the debenture balance and their Hydro utilities may fairly be considered as being out of debt.

Engineering Assistance to Municipalities

In its advisory capacity the Commission gave general engineering assistance to municipalities especially in preparing estimates for expenditures to be made in the post-war period. The assistance given relates to deferred maintenance and rehabilitation of the local systems, to the design of more modern street lighting facilities, the preparation of estimates for increased substation facilities, the taking on of new industries and the general utilization of Hydro service. The more important matters concerning which advice was given are briefly tabulated below.

SOUTHERN ONTARIO SYSTEM

Niagara Division

Agincourt—The capacity of the distribution system was increased to supply power for a manufacturer of wax products.

Amherstburg—The 4,000 volt lines on Sandwich street were relocated to permit landscaping of the north entrance to the town.

Ancaster Township Voted Area—New housing facilities, provided in this area made it necessary to change the power supply from a point near Dundas to the village. A new station was constructed by the Commission and many main feeder lines were re-routed within the municipality.

Aylmer—Changes were made in the distribution system to provide service to a new industry which will take approximately 500 horsepower.

Aurora—The capacity of the distribution system was increased to supply power to a manufacturer of aluminum products.

Ayr—Service to new power customers involved changes. A bank of transformers was centrally placed and power at motor voltage was supplied to feed mills and a saw mill.

Baden—Increased power facilities were provided to serve additions to a large linseed oil plant. Power is now supplied at 13,200 volts instead of 4,000 volts as formerly.

Blenheim—Distribution transformer capacity was increased to supply new and increased power loads.

Brantford Township Voted Area—Sites were obtained and equipment ordered for two new substations of the unit type each having a capacity of 1,000 kva with two 4,000-volt feeders. They will be supplied at 26,400 volts and serve the northern and eastern sections. The boundaries of the

voted area have been extended to include a portion of the district previously served by the Brant rural operating area.

Brigden—Distribution transformer capacity was increased to supply two new consumers operating chopping mills and feed supplies.

Burford—Work on remodelling the distribution system was carried out in accordance with plans submitted including a new bank of transformers for supplying power customers.

Burlington—The Burlington distribution system was acquired in the purchase of assets of the Dominion Power and Transmission Company by this Commission in 1930. The municipality has now decided to purchase its local distribution system from the Commission and passed the necessary by-laws. Ownership passed to the Corporation on January 1, 1945.

Cayuga—New power customers, including a saw mill and feed grinding mills, were supplied with power.

Chatham—Work was started on the new municipal station on Grand avenue, and plans were completed to lay a 26,000-volt submarine cable to supply this station.

Plans were also initiated to construct a new municipal station in the west section of the city. The 4,000-volt circuit capacity in this section was increased to supply new industrial loads.

East York Township—Plans and specifications were prepared for a new 1,875-kva substation which will go into service early in 1946.

Essex—Suitable property was purchased and plans were made for a new building to accommodate utility office quarters, line supplies and trucks.

Etobicoke Township—Improved street lighting utilizing modern fixtures and equipment throughout was installed on the main thoroughfares within the Township. In addition, facilities were provided to supply six new large power customers who are constructing plants within the area.

Forest—Distribution transformer capacity was increased to supply new power consumers.

Glencoe—Distribution transformer capacity was increased to supply new power consumers.

Guelph—An additional 13,200-volt feeder from the Commission's transformer station to the main substation in the city, has been provided. A new substation will be built to house the 1,500-kva transformer purchased last year.

Hespeler—New street-lighting units of modern design were installed on a portion of the main business intersection.

Kitchener—Adequate storage facilities for transportation equipment and the handling of materials are being provided. A plan to modernize the street lighting system in certain sections of the city was also undertaken.

London—Plans were made for the installation of an additional 13,200-volt feeder from London high-tension station to Ridout street station. It is to be partly overhead and partly underground.

New Hamburg—A suitable property was purchased by the local Commission for the installation of a 1,000 kva, outdoor type station.

Newmarket—In 1915 the corporation of the town of Newmarket entered into a contract for a supply of power, with the Toronto and York Radial Railway Company. In 1920 this Company was acquired by the Commission, which since then has supplied the town with power under the terms of the agreement signed with the Company. This agreement expired during the year, and the matter of entering into a new contract with the Commission on the co-operative plan was submitted to the electorate and voted upon favourably, with the result that the Corporation is now operating its own system as a Hydro cost-contract municipality.

New Toronto—Owing to a very large development in a number of industries in New Toronto, together with an increase in load, it was necessary during the year to make provision whereby five large power consumers would receive their power at 26,400 volts.

North York Township—The substations required for the transformation of power from 26,400 volts to 4,000 volts were installed and have been owned by this Commission since the inception of the North York Hydro-Electric Commission. Rapid development and growth in this area made it possible for the local Commission to own its own four substations, and arrangements were made for their purchase.

Parkhill—Preliminary investigations were undertaken regarding the removal of poles from the business section of the main street and also the installation of a modern street lighting system.

Petrolia—Plans were completed and construction commenced on a new building on Petrolia street to accommodate office quarters, trucks, materials and equipment of the utility.

Port Stanley—Arrangements were made for additional property in connection with the enlarging of this Commission's distributing station. Investigations were also carried out in regard to the incoming and outgoing feeders at this station.

St. Marys—To provide for increased power loads, the 13,200-volt line from the local substation was extended approximately one-half mile and a 600 kva, three-phase, 13,200 550-volt transformer was installed at Water and Jones streets.

St. Thomas—Plans were made for the installation of a second 13,200-volt feeder to take care of a large increase in power load in the north-east of the city. This feeder will be underground for 3,500 feet and overhead for 3,750 ft.

Plans also were made for the installation of two step-down stations with new connecting underground primary 13,200-volt cable for a distance of 2,500 feet.

Sarnia—Plans were completed to place the 4,000-volt primaries underground in the business section. Work was commenced on the installation of ducts and transformer vaults. The 4,000-volt distribution system was extended to supply a large block of new homes.

Smithville—An important development took place in this area, brought about by the construction of a large alfalfa dehydrating plant. Since this customer will require approximately 600 horsepower, arrangements were made with the Company to take this power at 13,200 volts. Improved facilities to smaller power users in the area were also made.

Stamford Township Voted Area—Increased demands for service have necessitated additional station capacity. Investigation of the requirements indicated that a new station to serve the northern portion of the area was necessary. Plans and estimates were submitted and orders placed for a unit-type station of 1,500-kva capacity. New 4,000-volt feeders and tie lines are also planned. It is expected most of this work will be completed in 1946.

Stratford—In order to supply two new power consumers, one of which requires both 550 volts, three-phase and 220 volts, three-phase, two power banks were erected each with a capacity of 150 kva. The second consumer owns the transformers, with a total capacity of 225 kva.

Strathroy—A spare 500 kva transformer was added to the station with pad and structure accommodation for two additional 500 kva transformers to make up a future three-phase bank.

Thorold—Plans for a new 1,875-kva station have been prepared and the material ordered. This station will provide additional capacity for the increased demands and relieve the overload on the present station. When materials are available, a second station will be constructed.

Tillsonburg—Plans have been made for extensive changes to improve the street lighting on Broadway and Simcoe streets.

Wallaceburg—The 4,000-volt distribution system was extended and the capacity increased to supply new industrial loads. Plans for the construction of a new municipal station on the west side of the town to meet increasing load growth were proceeded with.

Welland—A large rubber products plant enlarged its facilities, making it desirable that its present power, as well as that required for the additions, be taken at 26,400 volts, replacing former services at a lower voltage.

West Lorne—Approval has been obtained and the property purchased for the erection of a building for office, material stores and trucks. The building will not be erected until materials become more plentiful.

Wheatley—Plans were completed and work started on the installation of an ornamental street lighting system in the business section.

Woodstock—Approval was obtained and a suitable site purchased for the erection of an office building with accommodation for truck, tools and material stores of the utility. This building will not be constructed until materials and labour become more plentiful.

Plans were prepared to supply 600 horsepower to a wood-working plant in the southeast part of the city.

York Township—Modern street lighting facilities were installed on the main thoroughfares throughout this area. It is expected that traffic conditions will be improved and the liability to accidents greatly reduced.

Georgian Bay Division

Arthur—Plans are being prepared for improving the service to this municipality. These involve rebuilding the feeder line supplying the town, raising the feeder voltage to 12,000 and providing a new transformer station of 300 kva capacity to step down from 12,000 to 4,000 volts at Arthur.

Alliston—Extensive changes were carried out on the distribution system and transformer banks were erected for three new power consumers.

Barrie—The erection of a large industrial plant with other substantial growth in load necessitated the installation of another 3,000-kva substation in the Allandale section of the town. A large portion of the series street lighting was converted to multiple. Service was provided for the artificial ice plant in the Arena.

Collingwood—Arrangements were made by the local Commission to supply 400 to 600 horsepower to a large furniture manufacturing plant being installed in the former Clyde Aircraft building.

Another new industry, manufacturing leather hassocks, is equipping a plant which will utilize approximately 75 horsepower.

Durham—The distribution system was extended and a bank of transformers erected to supply 40 horsepower to a new furniture company.

Work was partially completed in connection with changing the transmission voltage to Durham from 22,000 to 38,000 volts, with a corresponding change in voltage and an increase in the capacity of the transformers in the substation from 450 to 600 kva.

Dundalk—Work was partially completed in connection with changing the transmission voltage from 22,000 to 38,000 volts with an increase in the capacity of the station transformers from 225 kva at 22,000 volts to 600 kva at 38,000 volts.

Elmwood—The distribution system was extended and a bank of three 15 kva transformers erected to supply a new chopping mill.

Negotiations were also carried out in connection with a prospective load of approximately 60 horsepower for a woodworking plant.

Flesherton—In connection with the change of the transmission lines south of Flesherton, from 22,000 to 38,000 volts, the transmission lines through the village were removed from the main thoroughfares by diversions, joining up again with the lines at a point south and west of the village.

Grand Valley—Work was partially completed in connection with changing the transmission voltage from 22,000 to 38,000 volts with a corresponding voltage change in the station transformers.

An investigation was also made re providing additional station capacity by removing from the Grand Valley station the load of the village of Arthur and the rural load and providing a new station for these loads.

Gravenhurst—A new pumping installation was completed, consisting of two 40 horsepower motors with automatic pressure and time control.

Hanover—Studies were made and plans completed to improve the distribution system by constructing two new feeders from the substation to take care of present loads and future growth.

Arrangements were made to provide a bank of three 125 kva transformers at a large flour mill, replacing a bank of 75 kva units. The new bank will provide capacity for load increase at this mill of approximately 150 horsepower plus an increase of load at a nearby furniture company of approximately 50 horsepower.

Negotiations were also conducted re supply of load to a new furniture company expected to have a small initial load of approximately 10 horsepower.

Huntsville—A new 1,000-kva rural substation was erected to relieve the serious overloaded condition on the municipal station.

Kincardine—A new power feeder was constructed from the substation to a knitting company to take care of load increase of approximately 200 horsepower expected in this plant.

Additional substation capacity is also being arranged by the removal of the rural load from the municipal station, leaving the total capacity of the present station available for the municipal load. A new substation is being provided for the rural load.

Lucknow—Arrangements were made during the year to supply approximately 80 horsepower to a new industry, which took over the plant of the Maple Leaf Aircraft.

Meaford—Service was extended to a new furniture company whose load will be approximately 75 horsepower and negotiations have been under way for supplying a former sawmill consumer with a load of approximately 70 horsepower.

Plans were made for the construction of a new station to supply the rural area, thereby releasing additional station capacity for the town of Meaford.

Mount Forest—Work was partially completed in connection with changing the transmission voltage from 22,000 to 38,000 volts, involving a corresponding change in the connection of the station transformers.

Neustadt—Plans and estimates for improvements to the distribution system were made and for the supply of 10 horsepower to a new food processing industry.

Orangeville—Estimates were prepared on the cost of improved street lighting for the main thoroughfares of the municipality.

Work was partially completed in connection with changing the transmission voltage from 22,000 to 38,000 volts, involving a corresponding change in voltage and an increase in the capacity of the station transformers from 750 to 2,000 kva.

Owen Sound—Studies were made to determine the best methods of providing additional substation capacity to take care of rapidly increasing loads.

As a result of these studies, it was recommended that a new substation be constructed on the west side of the town, in the vicinity of Twelfth street and Second avenue west. This station will have an initial capacity of 3,000 kva, with an ultimate capacity of 6,000 kva.

Arrangements are also being made to install, temporarily, 3,000 kva at the main station, making the total installation, at that point, 9,000 kva.

The local Commission is planning to rehabilitate the local distribution system and increase the distribution voltage from 2,300 to 4,000 volts. The temporary installation of 3,000 kva at the main substation will provide 4,000 volts in order that power feeders of the local distribution system may be changed over to 4,000 volts as soon as the temporary installation has been completed.

The new station on the west side, when placed in service, will provide 4,000 volts for the portion of the distribution system to be supplied from this station, and the change to 4,000 volts for the balance of the system will be completed as soon as the work can be carried out, after which the temporary installation of 3,000 kva at the main station will be removed from service.

Paisley—Arrangements were made with the municipality to utilize the services of the Commission's rural staff at Walkerton for maintenance and construction work in Paisley as required from time to time.

Ripley—An extension was made to the distribution system to provide three-phase power to a planing mill, a new consumer using approximately 45 horsepower.

Shelburne—Work was partially completed in connection with changing the transmission voltage from 22,000 to 38,000 volts with a corresponding change in voltage and an increase in the capacity of the station transformers from 300 to 600 kva.

Southampton—Arrangements were made to supply additional power to a plywood manufacturing company for high frequency drying of laminated plywoods.

Stayner—Estimates were in course of preparation for the municipality in connection with changing the street lighting from series to multiple.

Walkerton—Arrangements were made with the municipality whereby the services of the rural staff of the Walkerton rural operating area would be made available for maintenance and construction work on the local distribution system as required from time to time.

Warton—Plans were made for the construction of a new station to supply the rural area, thereby releasing additional station capacity for the town of Warton.

Eastern Ontario Division

Almonte—A 1,000-kva transformer station was installed in Almonte to augment the supply of power from the local generating plant and at the request of the municipality the Commission designed and installed a substation to provide additional distribution feeders.

Bobcaygeon—At the request of the municipality estimates were prepared for a supply of 100 horsepower to supplement the power from the local generating plant.

Braeside—The distribution system in this village was acquired by the Commission in the purchase of the assets of the M. J. O'Brien Company in 1930, since which date the Commission has owned the utility serving the citizens within the municipality. On January 1, 1945, the corporation purchased the distribution system from the Commission and entered into a cost contract, on which basis they have since been a Hydro municipality of the Southern Ontario system. The Commission at the request of the municipality is continuing the operation of the utility on its behalf.

Havelock—At the request of the municipality the Commission's rural staff, which operates the system on behalf of the municipality, rebuilt and improved a considerable portion of the distribution system.

Lindsay—Plans were prepared for improving and extending the underground street lighting system. Consideration was also given to improving the present overhead distribution system.

Oshawa—Estimates are in preparation for the construction of a new substation of 6,000 kva capacity in the north end of the city to increase the substation capacity and replace the old No. 2 station.

Negotiations are proceeding regarding the sale to Oshawa of No. 1 substation at present owned by the Commission.

Pembroke—The municipality of Pembroke requested advice from this Commission in connection with the renewal of the franchise of the Pembroke Electric Light Company, Limited. Engineers made a study of the generating station and distribution system and submitted a report to the town.

Picton—Estimates have been prepared on behalf of the Picton Public Utilities Commission covering the installation of a new 2,000 kva municipal station in the central part of the town.

THUNDER BAY SYSTEM

The Thunder Bay system is operated on a cost-contract basis similar to the Southern Ontario system and the area served by this system is the only area in Northern Ontario receiving power supply under such conditions.

The co-operative municipalities include the cities of Port Arthur and Fort William, a voted area in Nipigon township and the various townships included in the Thunder Bay rural operating area.

Power is also supplied to seven gold mines and two mining townsites in the Longlac and Beardmore mining districts east of lake Nipigon, utilizing approximately 6,070 horsepower; to four pulp and paper companies, utilizing approximately 53,000 horsepower; and to the Rainy River district of the Northern Ontario Properties, utilizing approximately 18,300 horsepower, all of which are served at fixed rates as system customers.

In addition to meeting the requirements of the municipal utilities, the pulp and paper industry and the mines, power supply is also utilized for handling the greater portion of Canada's western grain crop through terminal elevators at Port Arthur and Fort William, at which the various grains are cleaned, graded, stored and transhipped from rail to water transportation systems for delivery to eastern and European markets.

The average load sold by the Thunder Bay system in 1945 was 120,010 horsepower representing an increase of three per cent over the previous year.

The city of Port Arthur utilized during the year an average load of 24,311 horsepower, an increase of seven per cent over the previous year and the city of Fort William established an average load of 16,684 horsepower, also an increase over the previous year of seven per cent. The load increase in Nipigon village was nine per cent and in the rural operating area eighteen per cent over the previous year.

Gold mining operations in the Beardmore and Longlac areas, which were curtailed during the war by lack of labour, and which utilized some 5,600 horsepower less during 1945 than in 1940 are expected to expand and regain prewar demands. A great expansion has already taken place in the pulp and paper industry and negotiations have been carried on with several new companies which intend to establish mills at points within the Thunder Bay system area.

Engineering Assistance to Municipalities

Engineering advice and assistance was given during the year to the local Commissions of Port Arthur and Fort William, also to Nipigon village, covering the operation and maintenance of the local distribution systems.

NORTHERN ONTARIO PROPERTIES

Northern Ontario is sparsely settled and the individual centres of population are scattered and largely dependent upon mining activities. For this reason and partly because of the hazards of mining operations the publicly-owned Hydro properties of northern Ontario are held by the Commission in trust for the Province and operated upon the financial responsibility of the Ontario government.

Hydro's purpose in northern Ontario is to encourage the mining industry and facilitate the development of new properties by the establishment of ample supplies of electric power at a stabilized low cost.

The Northern Ontario Properties comprise eighteen generating stations with extensive transmission and distribution systems, and serve seven districts as follows: The Abitibi district with an average load sold in 1945 of 135,858 horsepower; the Timiskaming district with an average load of 44,174 horsepower; the Sudbury district with an average load of 23,393 horsepower; the Nipissing district with an average load of 6,078 horsepower; the Patricia district with an average load of 9,084 horsepower and the Rainy River district with an average load sold in 1945 of 18,812 horsepower.

In addition there is associated with the Northern Ontario Properties the rural operating area of Manitoulin Island. To service this area the Commission purchases power from a privately-owned local development. The average load sold in 1945 was 604 horsepower.

Service in northern Ontario involves delivery of power to thirty municipalities and townsites, four rural operating areas, forty-two gold mines, three nickel mines, one iron mine and seven silver and cobalt mines. The total average load sold in the seven districts served by the Northern Ontario Properties in 1945 was 238,000 horsepower, an increase of approximately 20 per cent. This increase was due to the inclusion of the new Timiskaming district served by eight generating plants recently purchased by the Commission from the Northern Ontario Power Company.

Rate Reductions

On January 1, 1945, the Commission placed in force rate reductions to all gold mines served by the Northern Ontario Properties reducing the rate for the first 5,000 horsepower from \$32.50 per horsepower per annum to \$27.50 per horsepower per annum. These reductions in power cost greatly benefited properties mining low grade ore and made it possible for the older operating mines to clear up their low grade ore bodies.

About the end of 1945 following the cessation of hostilities, labour began to be available for mining operations and the expansion in gold mining operations made it necessary for the Commission to plan for increased power development.

There has also been a substantial demand for increased service in the rural operating areas of northern Ontario. Shortage of materials has, however, handicapped the work of rural extensions in northern Ontario as elsewhere.

SECTION IV

RURAL ELECTRICAL SERVICE

IN ONTARIO

IN ONTARIO a large part of the population is engaged in mixed farming or lives in villages or hamlets closely associated with rural activities. Intensive efforts have been made by the Commission to spread the benefits of electrical service throughout rural Ontario and to encourage and assist rural dwellers to make the maximum use of electricity. Low-cost Hydro service fully utilized can bring to farm and village homes the conveniences for modern living enjoyed in urban centres.

As announced in the Annual Report for 1944, the Commission on January 1, 1944 put into operation a comprehensive revision of its rural service which is, without doubt, the greatest step forward since the formation of rural power districts (now called rural operating areas) in 1920, and the subsequent grants-in-aid inaugurated by the Province in 1921, and extended in 1924, in connection with its well established policy of assistance to agriculture.

The chief feature of the new set-up for rural service is the establishment for rural operating areas of a uniform rate structure with a common rate applicable to each class of service. Thus, no matter where rural service is given in Ontario by the Hydro the rural consumer* for the same class of service with the same consumption of electricity will pay the same amount on his quarterly bill.

Although, for convenience of administration, the local rural operating areas will be retained as administrative units, the whole rural service is amalgamated into one rural power division of Hydro service, with a pooling of all revenues and expenses. This rural amalgamation and unification of rates is made possible by the financial assistance given by the Province as part of its aid to agriculture. The extent and effect of the Province's financial assistance with respect to the distribution of power in rural operating areas should, therefore, be clearly understood.

Provincial Assistance

The government grant-in-aid of 50 per cent of the capital cost of lines and equipment for the supply of power, relates solely to the initial capital investment for distribution facilities in rural operating areas.

* Rural consumer does not include industrial power consumers served by the facilities of rural operating areas.

Having made this grant-in-aid the government further participates in the operation of the province-wide Hydro rural service in that it guarantees the Commission against loss due to the fixing of a maximum service charge or its reduction or removal.*

The new set-up is a means of apportioning the benefits from provincial assistance where they will do most good: namely, to the farmer in sparsely settled and less fertile farming areas where, because of these conditions, electrical service is necessarily more costly to provide.

Status of Rural Service in 1945

In 1945 rural service in Ontario was given through 121 operating administrative units which, for convenience, will continue to be referred to as rural operating areas. Power was delivered to approximately 159,608 rural consumers, comprising farms and dwellings in various groups. The consumers are situated in 435 organized townships; 27 unorganized townships and 121

* The Rural Power District Service Charge Amendment Act, 1944.

police villages, villages and small towns and are served over a network of rural primary lines which aggregate 22,309 miles. In addition to the 462 townships served by rural operating areas, 10 townships are served jointly by rural operating areas and voted areas.

The restrictions in the use of materials which enter into rural line construction existing during 1944, were cancelled on June 1, 1945. This enabled the Commission to proceed with many extensions to the extent that both material and labour became available.

During the past year the mileage of rural-line extensions, approved for construction in rural operating areas in Ontario, was 1,279. The net increase in the number of consumers after allowance for cancellation was 13,924.

Rural lines serving rural consumers were purchased from the Caledon Electric Co. during the year and are included in the above figures. See tables and footnote on this page.

The average aggregate peak load* supplied to all rural Hydro consumers, including war industries in rural areas in the Province, amounted to 111,255 horsepower, an increase of 12.9 per cent over 1944.

* Average aggregate peak load is the summation of the twelve monthly peak loads for each and all rural operating areas divided by twelve.

**RURAL LINE EXTENSIONS APPROVED BY THE COMMISSION DURING
THE YEAR 1945**

System	Miles of primary line	Net increase in number of consumers			Power supplied in October 1945 h.p.	Capital approved for extensions	
		Farm	Non-farm	Total		Total	Provincial grant-in-aid

Totals.....	22,309.49*	68,349	91,259	159,608*	56,058,483	15	27,913,298	08			

* These totals include 740.01 miles of primary line under construction on October 31, 1945 and service to 3,048 new consumers, not completed until after the end of the fiscal year.

Rural Loans

Under The Rural Power District Loans Act, 1930, authority was given to The Hydro-Electric Power Commission of Ontario to finance the installation of wiring and the purchase of specified electrical equipment by rural farm consumers.

Owing to the necessity to conserve funds for war purposes this financing was discontinued on October 31, 1940. Up to that time 1,776 loans had been granted, amounting to \$360,852. Details are as given in previous Annual Reports.

To October 31, 1945, 1,766 loans had been repaid in full, either through the maturing of the loan or by being paid in advance by the borrower.

NEW UNIFORM RURAL RATE STRUCTURE

A new uniform rural rate structure, for the sale of energy, was placed in effect on January 1, 1944, for all rural Hydro service throughout the Province, and replaces the numerous rural rate schedules previously in effect.

The effect of the rural-rate decrease made in 1944 was so satisfactory that the Commission considered it advisable to reduce the first block rate of 4 cents per kilowatt-hour to 3.5 cents per kilowatt-hour to all rural consumers. This reduction came into effect on May 1, 1945.

The new energy rates consist, essentially, of a three-step energy charge, as follows:

1. A first block or number of kilowatt-hours of energy consumption in the billing period, charged for at 3.5 cents gross per kilowatt-hour;*
2. A second block or number of kilowatt-hours of energy consumption in the billing period, charged for at 1.6 cents gross per kilowatt-hour; and
3. All remaining kilowatt-hours of energy consumption in the billing period, charged for at 0.75 cents gross per kilowatt-hour.

In addition, the service charge in use prior to January 1, 1944, has been eliminated in the case of Farm and Commercial service, reduced by 50 per cent of Hamlet service and changed to an annual fixed charge in the case of Summer service.

Under the new rate schedules, rural service is now available in four main classes. All rural contracts for service carry a symbol consisting of a letter indicating the classification of the contract, followed by a number which indicates the demand rating or permissible demand in kilowatts contracted for. These classes and symbols are: Farm service, F; Hamlet service, H; Commercial service, C, and Summer service, S.

* Reduced from 4 to 3½ cents gross on May 1, 1945

The following is the rate schedule for each main class of service with minimum demand rating:

RATE SCHEDULES FOR RURAL SERVICE—MINIMUM DEMAND

Class and minimum rating	Demand	Service charge per month	Energy consumption per month			Minimum bill (gross) per month
			at 3.5 cents* per kw-hr	at 1.6 cents per kw-hr	at 0.75 cents per kw-hr	
F3 H2 (2 wire) H3 (3 wire) C2	kw	cents	kw-hrs	kw-hrs	kw-hrs	\$ c.
	3	Nil	60	180	Balance	2.25
	2	56	40	80	Balance	1.67
	3	56	40	180	Balance	2.25
	2	Nil	60	120	Balance	1.50
		Annual fixed charge	Energy consumption per year			Minimum bill per year
			at 3.5 cents* per kw-hr	at 1.6 cents per kw-hr	at 0.75 cents per kw-hr	
S2	2	\$ c. 11. 11	kw-hrs 150	kw-hrs 450	kw-hrs Balance	\$ c. Annual fixed charge
Prompt payment discount—10 per cent						

* Reduced from 4 to 3½ cents gross on May 1, 1945.

For higher demands, above the minimum rating, add to the minimum rating set out above, for each additional kilowatt, the following:

RATE SCHEDULES FOR RURAL SERVICE

ADDITIONAL CHARGES AND CONSUMPTIONS FOR EXTRA DEMAND

Class	Additional service charge per month per kw	Energy consumption per month per kw.			Addition to minimum bill (gross) per month per kw
		at 3.5 cents per kw-hr	at 1.6 cents per kw-hr	at 0.75 cents per kw-hr	
F4, F5, etc. H4, H5, etc. C3, C4, etc.	Nil	kw-hrs 20	kw-hrs 60	kw-hrs Balance	\$ c. 0.75
	No increase	20	60	Balance	0.75
	Nil	30	60	Balance	0.75
	Additional annual fixed charge	Energy consumption per year per kw.			Minimum bill per year
		at 3.5 cents per kw-hr	at 1.6 cents per kw-hr	at 0.75 cents per kw-hr	
S3, S4, etc.	\$ c. 3. 33*	kw-hrs 75	kw-hrs 225	kw-hrs Balance	\$ c. Annual fixed charge
Prompt payment discount—10 per cent					

* Yearly minimum fixed charge for all summer classes above S2—\$15.56 (gross), or \$3.33 (gross), per kw of demand, whichever is the greater.

DESCRIPTION OF MAIN CLASSES OF HYDRO RURAL SERVICE

Beginning January 1, 1944 electrical service is supplied in rural operating areas under four main classes described below. When the class of service which will meet the requirements of the individual consumer has been chosen, contracts are executed between the consumer and the corporation of the township concerned.

Farm Service

Farm service shall be considered to be service to property having lands used for the production of food stuff or industrial crops for sale and from which a substantial livelihood is obtained. It shall include electrical service to all farm buildings and equipment situated on the farm and used for farm purposes, including buildings and equipment required for processing the products of the customer's farm.

Service under a single farm contract may be supplied to all dwellings or separate domestic establishments situated on the farm property and occupied by persons who are regularly engaged in the operation of the farm.

Additional dwellings or domestic establishments situated on a farm property and occupied by persons not regularly engaged in the operation of the farm, if served, shall be classed as hamlet contracts and rated accordingly. Small properties of five acres and less will be classed as hamlet services except under special circumstances which would justify a farm classification.

The minimum demand of a farm service for billing purposes shall be taken as three kilowatts.

Hamlet Service

Hamlet service shall be considered to be service to a domestic establishment or residence in a rural or in a small suburban community served as part of a rural operating area. This class shall include isolated rural residences.

The demand rating of a two-wire hamlet service will be taken as two kilowatts and will be limited by a 20-ampere breaker or a 30-ampere fuse. Where the hamlet service exceeds two kilowatts, three-wire service shall be supplied and the minimum demand for a three-wire service shall be three kilowatts.

Commercial Service

Commercial service shall be considered to be service to community or business premises including schools, churches, public halls, hospitals, hotels, public boarding houses, tourist camps, business and professional offices, stores, repair shops, garages, gasoline stations, blacksmith and woodworking shops, small manufacturing and processing plants, chick hatcheries, sign and display lighting and all other premises used for commercial or community purposes.

Single-phase power only will be supplied under a commercial contract. Where three-phase power is required, the service will be classed as an "Industrial power service."

The minimum demand rating of a commercial contract shall be two kilowatts for a two-wire service and three kilowatts for a three-wire service.

Summer Service

Summer service is applicable to properties where service is used normally only during the summer months and which are not established as the consumer's permanent residence. This service is not limited to cottages, but may

include summer hotels, tourist camps, refreshment booths and other commercial premises.

The demand rating of a two-wire summer service will be taken as two kilowatts and will be limited to a maximum of a 20-ampere breaker or a 30-ampere fuse. Where the summer service exceeds two kilowatts, three-wire service shall be supplied and the minimum demand for a three-wire service shall be three kilowatts.

STANDARD NUMBER OF CONSUMERS PER MILE

The number of consumers required per mile of line extension varies according to classification and rating of all applicants. For this purpose a unit rating is allocated to each consumer, according to the classification and rating.

The following table shows the number of units and contracts per mile for each class of service:—

Classification of consumer	Rating in kilowatts	Units per contract	Contracts per mile
Single Services			
Farm.....	3 and over	5	2
Hamlet.....	2	3	3.33
Hamlet.....	3	3	3.33
Hamlet.....	4	3	3.33
Hamlet.....	5 and over	4	2.5
Commercial.....	2	3	3.33
Commercial.....	3	3	3.33
Commercial.....	4	3	3.33
Commercial.....	5 and over	4	2.5
Summer.....	2	3	3.33

Combined Hamlet with Commercial.....	5 and over	4	2.5

RATE SCHEDULES FOR INDUSTRIAL POWER SERVICE SERVED THROUGH FACILITIES OF RURAL OPERATING AREAS

A study was made during the year relating to rates charged consumers for industrial power service. Rates will be reduced on January 1, 1946, in all areas where it is possible to do so. The schedule of rates to be placed in effect on January 1, 1946, is given below.

Industrial Power Service

Power service shall cover three-phase service to power users such as creameries, cheese factories, chopping mills, industries and special loads which cannot be supplied as Commercial single-phase service.

Modern chopper installed in barn on Ontario farm

FARM USES FOR ELECTRICITY

The use made of electrical service by farmers divides itself broadly into applications which provide a higher standard of living in the farm home, and applications which add to the productive capacity of a farm. Some applications, for example, lighting and water pumping, do both.

Farming is a productive industry and the ability of electrical service to provide light, heat and power in a wide range of intensities free from the hazards associated with oil or other fuel and the ease with which electricity may be controlled, permit applications to farm production problems not feasible with any other source of power.

These applications result in savings in labour, increased production, improved quality, prevention of waste, reduced costs and substantial increases in earnings.

To the farm home electricity can bring the same conveniences as are enjoyed by urban residents. It eliminates the drudgery of many household tasks, improves health and comfort and, through the radio, furnishes entertainment, news, discussions of current topics and market reports, all of which bring greater contentment in the rural way of life.

In building up his electrical equipment to receive the maximum benefit from Hydro rural service, the farmer should keep a nice balance between

appliances for use in the home and appliances which will add to the productive capacity of his farm. It is especially desirable that following the installation of lighting service in the home and outbuildings his early concern should be to purchase equipment which will result in cash returns.

Lighting Service

Electric lighting is safe, convenient and reduces the fire hazard to a minimum. It adds comfort and attractiveness to the farm home. In the barn and other buildings it saves time and prevents accidents while doing chores.

In productive operations it is used in the poultry laying house to supplement daylight during the winter months, thus increasing egg production during a period when prices are highest.

In floriculture lighting may be used to promote or retard the flowering of certain flowering plants in order to meet the demand of special occasions.

Special applications of lighting include insect traps, infra-red lamps for brooders and ultra-violet lamps to improve the health of poultry and other stock.

Milk cooling by electric refrigeration now being used by progressive Ontario farmers to their economic advantage

Electric clippers contribute to the comfort and appearance of animals and in the dairy they are one of the many sanitary devices which make easier the production of high quality milk

Heating Service

The safety and ease of control of electricity as a source of heating has found many applications. In the home it makes possible many of the familiar appliances, such as irons, toasters, hot plates, electric ranges and water heaters, all of which add to the comfort and convenience of the home. The ease of automatic control of electric heat has found application in incubators and poultry brooders, where accurate control of temperature is necessary.

Water heaters and dairy sterilizing equipment assist in maintaining a high quality of milk production. Small capacity heaters are used to maintain drinking water at suitable temperature for poultry, with resultant increases in egg production during the winter months. It also finds application in brooders for pigs and lambs, preventing loss of these animals during cold weather and affecting very substantial savings and increased earnings.

In horticulture electric soil heating is used for the early germination and propagation of seeds and plants and their protection against frost.

Power for Electric Motors

Electric motors find many uses in replacing manual effort. A quarter-horsepower motor can operate any machine that can be operated by hand, thus effecting savings in time and effort.

In the home motors make possible washing machines, ironing machines, vacuum cleaners, fans, furnace blowers, water pumps and refrigerators and the new cold storage home locker for the preservation and storage of perishable foods in quantity. Thus, motors contribute towards making the farm home equal in comfort and convenience to the urban home.

In farming operations electric motors are used for grinding grain and the operation of feed mixers, effecting substantial cash savings. They are also used for pumping water for stock and the operation of milking machines, cream separators and milk coolers. These result in very substantial savings in labor, and increases in production, and permit the handling of larger herds, effecting increases in farm earnings.

Portable utility motors of various sizes find many applications, such as wood cutting, hoisting hay, elevating grain, seed cleaning and, in the workshop, motor-driven grinders and other equipment provide facilities for maintaining farm equipment in repair and facilitate the construction of various pieces of useful equipment in connection with farming operations.

An electric pig brooder keeps young pigs warm and protects them from a rolling sow.

Estimates of the major electrical appliances used in rural operating areas are set out in the following table:

**ELECTRICAL APPLIANCES IN USE AMONG FARM CONSUMERS IN
RURAL OPERATING AREAS**

Data for all systems for the year 1942

On the farm			In the farm home		
Item	Number of appliances	Percentage of saturation	Item	Number of appliances	Percentage of saturation

Air-conditioner					10,202	1.8
Miscellaneous	2,532	4.7	2,276	3.6		

Electric brooders have removed many uncertainties from turkey raising, reducing the average mortality

Average Cost to Rural Consumers Decreasing

The remarkable benefits obtained by rural communities in regard to the amount charged to them during the period 1928 to 1944 are indicated in the following tables. The classification of rural consumers, and the rates charged were changed for the year 1944. The result of the application of rates in force, from time to time during the period 1928 to 1943, are not comparable to the application of 1944 classification and rates. The 1944 results are therefore given separately followed by the results in earlier years.

RURAL SERVICE STATISTICS—1944

*It may be observed that the number of consumers reported here does not agree with those shown in other sections of the Annual Report of the Commission. This is due to the fact that the figures given here represent consumers actually billed, but do not include power or special contracts, whereas elsewhere in the Report the tables show the number of contracts executed to the end of the fiscal year. In many cases service is not given until the following year.

† Estimated—due to reclassification during the year.

HAMLET AND HOUSE LIGHTING SERVICE

Classified as 1B, 1C and 2A from 1928 to 1943

* See footnote to table on previous page.

† In the period 1937 to 1940, there was an increase in the statistical average revenue per kilowatt-hour and a decrease in the statistical average monthly consumption per consumer. Actually there was a great increase in the use of electricity by nearly all individual Hydro consumers and a corresponding decrease to each consumer in the average cost per kilowatt-hour. But due to the tremendous growth at this time in new consumers, who for the first few years are not equipped to use large quantities of electricity each month, the smaller monthly consumption of the new consumers when averaged with the increased use of the older consumers produced per consumer averages which obscured the true trends of individual growth in use, and, individual reductions in costs.

SECTION V

PROMOTIONAL AND PUBLICITY SERVICES

WITH the conclusion of the war many of the war services of the Commission ceased entirely and others were curtailed. The problems of reconstruction and reconversion of industry became important and this change in viewpoint was reflected in the publicity services and promotional activities of the Commission.

Advertising and Publicity

An active programme of advertising and publicity of the informative and educational type was produced. Different types of advertisements were designed and published in 232 papers giving a total of about 5,000 messages to the public. Many Hydro utilities were assisted in the preparation of advertising material for use in their local press. A number of pamphlets, school book covers and other folders were provided and given wide distribution by the municipal Hydro Commissions. The publication of "Hydro News" was continued during the year and distributed to all Hydro municipalities.

Motion Pictures

The Commission's motion pictures were widely used and were shown by the Commission's staff to 500 audiences totalling approximately 100,000 people. A new 16 mm sound picture in colour, entitled "More Power to the Farmer" was produced. This picture tells the story of farm electrification and emphasizes the importance of adequate wiring. Arrangements were made with the National Film Board to show Hydro motion pictures on their regular circuits. In this manner approximately 100 additional audiences were reached.

Rural Activities

In the summer of 1945 exhibition material dealing with the use of electricity on the farm was prepared and used later in the year at farm fairs and other rural gatherings with a total audience of approximately 45,000. In preparation for more active work on the Commission's five-year rural plan when labour and materials are sufficiently available, discussions were held with the

TYPICAL HYDRO ADVERTISING

agricultural colleges, the Department of Agriculture and manufacturers of farm equipment. Contact was maintained with the Farm Forums throughout Ontario and information on Hydro services supplied.

Industrial Services

In the early part of the year services to war plants were continued by the provision of technical assistance in the effective use of power. In the latter part of the year similar technical advice was given in connection with reconstruction problems. Complete power surveys were made in 22 industrial plants and engineering assistance was given to 100 other plants.

Co-operating with municipal Hydro utilities, information regarding technical problems was supplied to several firms seeking sites for new industry in the Province.

Lighting Services

During the war the opportunity to make lighting improvements was largely confined to industrial establishments. With the end of the war a shift of interest to commercial and other forms of lighting took place. It was gratifying to note the increased interest in the school lighting field and in improved street lighting. For commercial establishments there is a decided preference being shown to fluorescent lighting.

During the year recommended lighting plans were supplied to 448 schools, 34 public buildings and churches, 17 industries and 8 street lighting installations. It is evident from the work carried out in 1945 that there is a greatly increased interest in better lighting and as material becomes readily available installations will increase rapidly, particularly those involving fluorescent lighting.

Northern Ontario Properties

With the inclusion of the Northern Ontario Power Company's system in the Northern Ontario Properties, the Commission became responsible for merchandising operations in various communities formerly served by the Company. These duties have been carried on as well as possible under a limited supply of appliances and equipment. There is evidence that these activities render a valuable service to citizens in a somewhat isolated section of the Province.

Priority and War Equipment Problems

With the cessation of war many of the priority problems rapidly disappeared. Some war restrictions, however, had to be continued and these presented certain difficulties. There were also problems to be solved in obtaining deliveries of unrestricted material in short supply.

During the war the Commission's machine shops under the National Bits and Pieces programme were active in producing war equipment. It is of interest to note that the actual value of the contribution to the war effort by the Commission's service shops exceeded one million dollars.

SECTION VI

HYDRAULIC ENGINEERING AND CONSTRUCTION

ALTHOUGH the year 1945 brought World War II to a close and with it a curtailment of the power demands of war industries, it soon became apparent that the demands for power during the reconstruction period would exceed the supply. Consequently the expansion of the Commission's power and water storage developments must be continued.

On October 1, 1945, the extension of the Alexander power development, consisting of an additional 19,000 horsepower unit was put in service. Two major projects were approved by the Commission in the late summer; the first, at DeCew Falls near St. Catharines, consisting of the installation of a second unit of 70,000 horsepower; and the second, at Stewartville, on the Madawaska river, consisting of the development of 54,000 horsepower. Construction and maintenance work of lesser magnitude were also carried out at several sites for regulating and augmenting water storage and rehabilitating existing structures and equipment.

The properties of the Northern Ontario Power Company, acquired under a purchase agreement as of December 1, 1944, were placed under the operating control of the Commission on March 27, 1945, the capacity of these plants totals about 60,000 electrical horsepower.

Preparations have also proceeded for a development at the Des Joachims power site, on the Ottawa river about 40 miles upstream from Pembroke.

Surveys and studies for an early development of the Aguasabon river proceeded during the year; the potential resources of the Mississagi river were closely investigated, and a proposed overall scheme of development was prepared. Reconnaissance surveys of several other rivers in Northern Ontario were made for the purpose of determining their power resources and storage possibilities.

SOUTHERN ONTARIO SYSTEM

DeCew Falls Development

The installation of a second unit was authorized by the Commission in August, and by the end of the fiscal year, the construction of camp buildings and the installation of power supply for construction purposes were under

way. Provision for a second unit was made at the time of the construction of unit No. 1, and a large portion of the work will be concerned with enlarging the present facilities. As part of the work, the headwaters known as lake Gibson will be raised four feet to elevation 560.0. Flooding caused by the raised water level will necessitate relocating and raising sections of county and township roads, revising Niagara, St. Catharines and Toronto Railway trackage, raising and rebuilding several bridges, and raising and strengthening dykes and embankments. The reservoir canal will be widened and a new sixteen foot penstock will connect the existing headworks with an extension to the sub-structure of the present power house. By deepening the tailrace and raising the headwaters, the operating head for both units of this plant will be increased from 265 to 280 feet.

The Commission's construction staff will be engaged in the major portion of the work except in the tailrace, where contracts will be let to private contractors for the enlargement of the Twelve Mile creek channel and the Second Welland canal.

The new construction supplements the general scheme of development of unit No. 1, and the many problems of construction, which were fully described in the thirty-fifth and thirty-sixth annual reports of the Commission, will have their counterpart in the installation of unit No. 2. It is estimated that construction will extend over a two-year period.

Niagara River Power Plants

At the Ontario Power plant, a second exploration shaft was sunk to examine No. 1 conduit, and it was found that no appreciable deterioration had taken place since the previous year.

At the Toronto Power plant, new runners and gates for the four 13,000 horsepower turbines were installed, and it is interesting to note that these changes were made on units which went into service when the plant commenced operation in 1906.

NIAGARA RIVER REMEDIAL WEIR
Broken water at the crest of the completed weir

Niagara River Remedial Weir

At the Niagara river remedial weir observations indicated that the behaviour of the weir was satisfactory when ice was running in the river. The weir is considered to be completed but the cableway was not removed in case observations indicated that some additional work is required. To facilitate free and safe movement of traffic on the boulevard, a well-surfaced by-pass road was built around the head tower on the Canadian shore. The road was equipped with a substantial guard rail and well-marked guide and warning signs.

Ogoki Diversion

Improved radio communication facilities were provided between Waboose dam and Summit Control dam. Studies of run-off, stream flow and discharge proceeded, and ratings were made to determine stage-discharge relationship.

Georgian Bay Division

The economics of alternative sources of additional power for the Georgian Bay division were studied, and estimates of costs of several potential sites on the Muskoka river were prepared and analyzed, the site at Mathiasville receiving particular attention.

Eastern Ontario Division

Studies, layouts and comparative estimates were made for hydro-electric developments on the Madawaska river at Claybank, Mountain chute, Hyland chute, Racket rapids and Stewartville. Field survey work was performed at several of the sites and sub-surface explorations and investigations were conducted at Stewartville, Claybank and Colton chute. Form line drawings of that section of the river from Hyland chute to Palmer rapids were made in co-operation with the aerial division of the Department of Lands and Forests.

At Lakefield generating station on the Otonabee river, rehabilitation of the concrete structures and the consolidation of rock foundations were completed by means of the intrusion method of grouting.

Stewartville Development

The second phase of the comprehensive scheme of power development of the Madawaska river was authorized by the Commission in September, 1945, in order to meet the immediate growing demands for power in eastern Ontario. After careful study, the Stewartville site was found to be the most economical in meeting present requirements, and surveys for construction roads and camps were progressing at the end of the fiscal year.

The Stewartville site is approximately eight miles south-west of Arnprior, and derives its name from a once-flourishing hamlet which is now deserted. The new development will produce 54,000 horsepower under a head of 150 feet, and it is expected will be available for use during the fall of 1947.

The general scheme of development provides for a concrete dam with a maximum height of some 200 feet and a length of 850 feet. A concrete side dam about 500 feet long angles off from the south end of the main dam.

STEWARTVILLE POWER DEVELOPMENT—MADAWASKA RIVER

A view of river looking upstream from the Stewartville bridge toward the power site

The headworks will be incorporated towards the north end of the dam and will be connected by two 14-foot diameter penstocks approximately 190 feet long, to the power house at the base of the dam. A sluiceway provided with two steel sluice gates, each forty feet wide, and two sixteen foot stop log sluices will be placed at the south end of the dam, and a concrete training wall will protect the power house from damage by flood waters. A 30-foot diameter tunnel through rock underneath the sluiceway will divert the flow of the river and allow construction of the dam in the dry. This tunnel will later be closed off by steel gates and a concrete plug poured behind them.

Des Joachim's Power Site

Preparatory work was continued looking forward to the construction of a hydro-electric development on the Ottawa river at Des Joachims. The fall in the river between Des Joachims and Mattawa can be concentrated by the construction of a concrete dam to give a head of 135 feet at the power site. The power house as designed will accommodate six generating units of 60,000 horsepower each with provision for the later installation of two additional units.

THUNDER BAY SYSTEM

The power supplies of the Thunder Bay system were increased by the installation of a 19,000 horsepower unit under a head of 58 feet at Alexander development. This plant was originally designed for four units under a head of 60 feet; three 18,000 horsepower units were installed in 1930 and 1931 when the plant was constructed, but provision was made for a fourth. Construction of this unit was commenced in March, 1944, and the unit went on load on October 1, 1945. A log slide was also completed, a scale model being first tested at the hydraulic laboratory of the University of Toronto. The slide has proved very satisfactory in operation.

The additional water supply made available by the Ogoki diversion has materially increased the potentialities of the Nipigon river, and close attention was paid to the possibilities of further extensions at Cameron Falls and Alexander, as well as the development of other sites. Revised regulation studies of lake Nipigon also proceeded throughout the year, and the effects of higher water levels were examined. Reconstruction of the government dock at Macdiarmid and rip-rapping of Canadian National Railways trackage at Orient bay were completed in anticipation of raising the regulated high water to elevation 855.0.

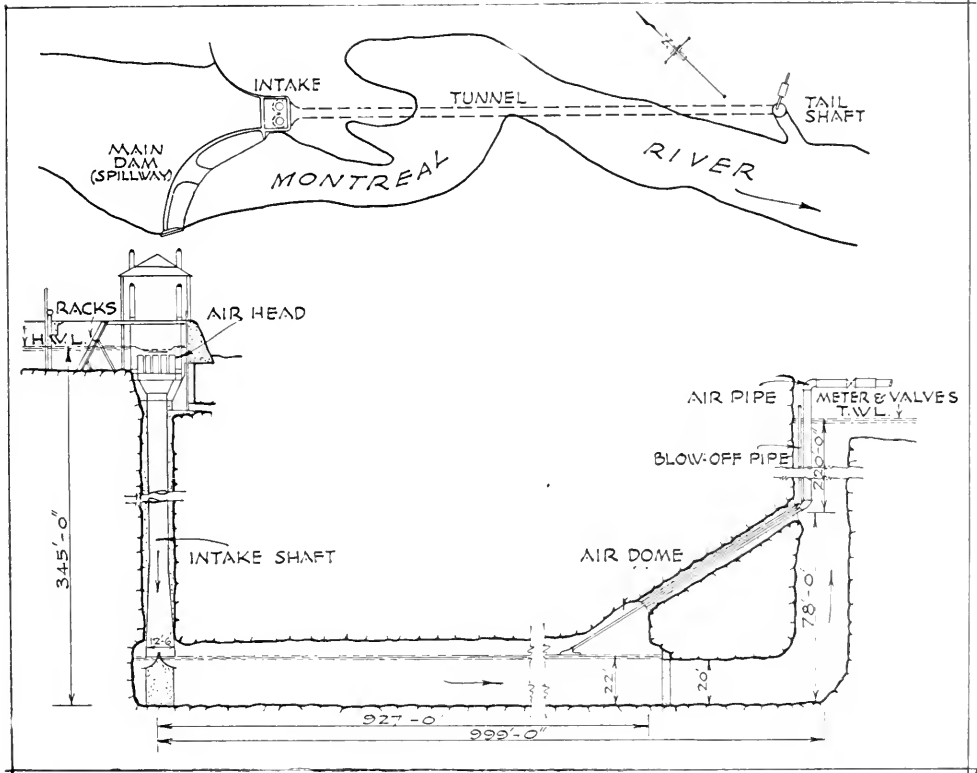

Aguasabon River

The development of the Aguasabon river as a major source of power was under consideration, and detailed studies and layouts were made during the year. The Long Lake diversion has increased greatly the value of this river as a source of power, as the diverted waters pass through it to lake Superior. Near the outfall into the lake, the river drops some 225 feet through a series of rapids, and by means of a dam a head of 300 feet may be developed. Topographic surveys and diamond drilling were actively proceeding to the end of the fiscal year.

MORE POWER FOR THE THUNDER BAY DISTRICT
Falls at the mouth of the Aguasabon river

The proposed scheme of development would place the power house on the shores of lake Superior at Terrace Bay, and connect it to the headworks on the artificial lake created by the dam, by a 15-foot diameter tunnel and penstock some 2,600 feet long. The peak capacity of the plant will be approximately 53,000 horsepower, and construction will extend over a period of about two years.

TAYLOR HYDRAULIC AIR COMPRESSOR

The Taylor hydraulic air compressor plant was constructed in 1910 at Ragged Chute on the Montreal river in the vicinity of Cobalt, Ontario, to provide compressed air for the silver mining activities in the area. The principle of its operation is illustrated in the above sketch. Water enters the plant from the river past the head gates, through the racks and is delivered at the intake heads located at the top of the two intake shafts.

Air is introduced into each shaft through a set of 66 short vertical pipes 14 inches in diameter, fixed to and discharging through the intake head. This device is adjustable vertically and is preferably set to locate the top of the air inlet pipes a few inches below the water level at the intake head.

Passing down the intake shaft the air is compressed as the water pressure increases and at the bottom the mixture is deflected horizontally along the tunnel where under low velocity the air gradually escapes and eventually collects in the air dome at a pressure of approximately 125 pounds per square inch. From this point it is conducted through a 24-inch pipe to the valve and meter house and conveyed through 20-inch mains to the distribution centers. The water passes up the outlet shaft and is discharged to the river at a tailwater level some 47 feet below the intake water level.

When air pressure in the dome rises above normal, the water surface in the tunnel is gradually depressed, and surplus air is vented through the blowoff pipe.

NORTHERN ONTARIO PROPERTIES

A scheme for the overall development of the Mississagi river was studied, and four major sites with an aggregate capacity of approximately 150,000 horsepower, to be developed progressively as required by load conditions, were investigated.

A survey party was engaged during the summer supplementing previous field information in connection with these sites, and diamond drilling was carried out to examine sub-surface conditions at a proposed storage dam site at Rocky Island lake. Field parties were also engaged during the summer on several rivers in northern Ontario, and preliminary data were obtained of sites for storage and power development.

Watabeag Lake Dam

The construction of Watabeag Lake dam, to improve the storage facilities on the Abitibi river, was started by the Commission's construction staff in August 1945, and was nearing completion at the end of the year. The dam is a rock-filled timber crib and earth dam some 200 feet long with a maximum height of fifteen feet; it has two sluiceways, one 14 feet wide and another 8 feet wide used for log-driving purposes.

Frederick House Dam

An access road from Connaught was constructed by contract and a portion of the provincial highway was raised to accommodate the higher water level of Frederick House lake. Negotiations for settlements of claims were conducted with owners of property affected by the higher water levels on Frederick House and Night Hawk lakes. The increase in the elevations of these lakes by one foot will provide an additional 34,000 acre feet of storage, and will allow an additional development of 6,700,000 kw-hrs energy each year at Abitibi Canyon.

Northern Ontario Power Company Plants

In March, 1945, the Commission commenced operation of the generating stations and other properties of the Northern Ontario Power Company previously acquired under a purchase agreement. These properties comprise eight hydro-electric plants, with a total capacity of about 60,000 electrical horsepower, complete with transmission lines and distribution facilities. Of this installation, five plants of a capacity of 35,000 horsepower are situated on the Matabitchuan and Montreal rivers, in the Cobalt area, and the remaining three on the Mattagami river, in the Timmins area. Included also in the purchase was a hydro-pneumatic station, utilized for production of compressed air, for distribution to mining customers in the neighbourhood of Cobalt.

A POWER DEVELOPMENT ACQUIRED BY HYDRO
Sandy Fall generating station, Mattagami river—No. 2 Unit

HYDRAULIC INVESTIGATIONS

Activities in the field were widespread, and foundation investigations and topographic surveys were conducted at numerous sites in preparation for the provision of further sources of power supply and storage facilities. In this connection surveys were carried out on the Madawaska, French, Muskoka, Magnetawan, Mattagami, Groundhog, Abitibi and Kaministiquia rivers.

At Silver falls, on the Kaministiquia river, some thirty miles north-west of Fort William, at a site near the outlet from Dog lake where the river drops in a series of cascades some 350 feet, diamond drilling has been in progress to determine the subsurface rock conditions and enable a plan of development to be prepared.

A study of the French river as a source of power complementary to power supplies from the Abitibi river was completed. This brought up to date the study made in 1939, which covered the years 1922 to 1936.

Preliminary examination of the power possibilities of the Magnetawan river disclosed the possibility of developing some 30,000 horsepower.

Data were being compiled, and layouts and preliminary estimates of several other proposed developments were being carried out at the end of the fiscal year.

Normal maintenance work on structures and hydraulic equipment, and routine collection of hydrometric data continued.

Engineering assistance was given by the Commission upon request to various public bodies in regard to hydraulic problems.

SECTION VII

ELECTRICAL ENGINEERING AND CONSTRUCTION

FOR the first nine months of the fiscal year actual construction work continued to be restricted to projects contributing directly to the war effort or the maintenance of essential civilian services. A great number of undertakings were carried out to accommodate changing load demands or for essential maintenance, but major undertakings were few, and the total volume of construction was much curtailed.

After the month of August, the gradual lifting of construction controls made it possible to proceed with certain pressing work previously held on the deferred list. Continuing shortages of labour and materials, however, limited the volume of actual construction achieved.

Planning Ahead

Studies relating to supplies of power in the post-war era were continued, particular attention being given to the immediate post-war programme. The studies have a broad scope, and include various possibilities of load growth throughout Ontario during the next ten to fifteen years, the best sequence of power developments, and the most suitable over-all arrangement of transmission lines and other facilities. As a result of these, and other more localized studies, various new projects were authorized in the latter part of the year with the assurance that they will fit into a flexible and comprehensive long-term plan. The projects authorized represent only the more urgent. They include new generating capacity in the Southern Ontario system at DeCew Falls and Stewartville; the integration and tying together through a new station at Scarborough of the Niagara, Georgian Bay and Eastern Ontario divisions of the recently consolidated Southern Ontario system; augmented power supply to many areas, involving new transmission lines, new transformer and distributing stations, and extensions to existing lines and stations; and miscellaneous system, line, station, and rural power changes and improvements.

The Commission's network calculator was in constant use in connection with these studies, and is now being enlarged, in order to have sufficient facilities to represent as one combined unit the three recently amalgamated divisions forming the Southern Ontario system.

New Generating Capacity

The fourth unit at Alexander generating station was placed in service on October 1, 1945, increasing the station capacity to 60,000 kva.

Increased Transformer Capacity

At the end of this section is given a tabulation of the transformer and distributing stations where major increases in transformer capacity were placed in service. A number of the stations listed are new. Associated with many of the transformer changes were alterations and additions to station structures, switching, metering and station protection.

Other transformer changes are in progress, and about 25 new stations are either in the design stage or commencing construction.

Acquired Properties

Early in the year, properties of the Northern Ontario Power Company and the Caledon Electric Company were acquired. The effective dates of purchase were November 30, 1944 and December 1, 1944, respectively. The work of amalgamating these purchased lines and stations with the Commission's existing lines and stations in the Abitibi district and the Georgian Bay division respectively is proceeding.

New Transmission Lines

New transmission lines placed in service include 56.4 miles of 110,000-volt wood-pole transmission line to serve the Department of National Defence Atomic Research plant near Chalk River, and approximately 27 miles of 26,400-volt and 44,000-volt transmission lines to serve new customers and

LINE CONSTRUCTION IN THE WINTER

Wishbone portion of the 110,000-volt, wood-pole transmission line supplying power to the Atomic Research Plant near Chalk River, Ontario

distributing stations. Substantial progress was made on a 110,000-volt steel-tower transmission line from a point near Ottawa 51.3 miles to Cornwall. Surveys were begun for the construction of approximately 100 miles of 110,000-volt steel-tower transmission lines for the interconnection of the Georgian Bay, Eastern Ontario, and Niagara divisions. Authorization was given for a 110,000-volt line 42.25 miles long between Chatham and Sarnia. With the purchase of the Northern Ontario Power Company's properties, some 535 miles of transmission lines were acquired operating at voltages from 11,000 to 110,000 volts.

Tie Line Control

The establishment of the tie between the Niagara, Georgian Bay, and Eastern Ontario divisions through the frequency-changer set at Scarborough, added to the existing ties between the Niagara and Georgian Bay divisions at Hanover, and the Niagara and Eastern Ontario divisions at Chats Falls, will necessitate the installation of a new integrated scheme of tie-line control, centred at one point. Extensive study was given to this matter, and estimates were prepared.

Rural Extensions

Measures were initiated to supply the accumulated demand for distribution lines and services in rural power areas resulting from material and labour scarcities during the war. An increased programme of construction was authorized, and carried out to the limit of available supplies. For a large part of the fiscal year it was necessary to restrict new rural power services to essential food producers; however, the removal of non-ferrous metal controls in June, 1945, made it possible in the latter part of the year to include installations to all classes of rural customers. A summary at the end of this section shows the mileage of lines built and the number of additional consumers served. Many changes were made to improve voltage regulation and continuity of service.

Communication Systems

Communication systems are being constantly rehabilitated, unified, and extended, to provide adequate service for the ever-increasing requirements of the developing power systems.

Oil Circuit-Breakers

The continual growth of the systems frequently requires the replacement of oil circuit-breakers by new breakers of higher rupturing capacity. Replaced breakers, where suitable, are used elsewhere.

In order to check the calculated short circuit kva developed on the system under operating conditions, and the ability of the new oil circuit-breakers to interrupt it, staged tests were made in December, 1944, at Burlington transformer station on two 138,000-volt-class oil circuit-breakers. The tests were made while the system was substantially in normal operation, and as far as is known from available records, the current interrupted was greater, with one exception, than any breaker had previously been subjected to on a staged field test. The results of the test have given valuable information with respect to the future purchase and application of oil circuit-breakers on the Commission's systems.

WAR-TIME LINE CONSTRUCTION IN THE WINTER

Engineering Assistance

Engineering assistance was given to a number of municipalities and large power customers in connection with the purchase and installation of new equipment, changes and additions to existing stations, and the construction of new stations. In many cases field construction was carried out. Engineering assistance was also given in connection with the approval of electrical installations over 600 volts.

Equipment Deliveries

In general, electrical engineering and construction work during the year was handicapped by the shortage of trained staff and the time required to obtain delivery of equipment and materials. Trained personnel have now commenced to return from the services, but the time required to obtain deliveries has not shown improvement.

To ensure equipment deliveries that will tie in with the construction and rehabilitation programme authorized during the year, extensive orders were placed, or are in process of being placed, for items of major equipment requiring a lengthy time to manufacture. Typical of such equipment are three generators and one frequency changer; various classes and ratings of power transformers and oil circuit-breakers; standard outdoor station structures; transmission lines towers; insulators and conductors. The promised delivery dates extend over a period of approximately two years.

Salvage of Old Poles

When the shortage of lumber became acute in 1944, the Commission investigated the possibilities of converting discarded poles into usable lumber, and, as a result, a portable saw mill and planer were set up at the Hamilton (Beach road) service building. During the 1945 fiscal year, 785 old poles were collected from nearby districts and sawn into lumber and square timber, chiefly used for crating purposes, and for permanent cribs and booms in the DeCew Falls forebay; 207 saw logs were cut off the Commission's Lambton Park Property, and converted into 17,775 fbm of good pine lumber; and 15 saw logs (mostly oak) were obtained from the transmission line operations between Toronto and Hamilton, and cut up into skids suitable for shipping transformers and heavy construction equipment. The continuing shortage of lumber, and estimates of the number of discarded poles and other timbers expected to become available, indicate an expansion of this undertaking as a salvage operation. The results so far achieved denote a welcome source of readily available lumber at comparatively low cost, for which many uses will be found in the planned construction programme.

Further particulars of the more important work carried out and authorized are given below, under system headings.

SOUTHERN ONTARIO SYSTEM

New Generating Stations

Authorization was given for the installation at DeCew Falls generating station (25-cycle) of the second generating unit, with its associated transformation and switching equipment. The generator will have a capacity of 64,000 kva, and will be installed in an extension to the building. It is scheduled to be in service during the fall of 1947. Contracts were let for the manufacture of the second generating unit and for the power transformers. Similar power transformers for Unit No. 1 were also purchased, to replace the temporary transformers which were originally used at Allanburg transformer station.

The construction of a new generating station at Stewartville on the Madawaska river, was authorized. This station also is scheduled to be in service during the fall of 1947. Two generators, each having a capacity of 24,000 kva, are now being ordered.

Additional Frequency Changer Station

The Scarborough frequency-changer installation will initially include one 25,000-kva, 25 60-cycle, 300 rpm, 13,800-volt horizontal type frequency-changer, with 25-cycle and 60-cycle transformation and switching. The transformer station installation will initially include two 8,000-kva, 25-cycle, 110,000 26,400-volt, 3-phase transformers, with high-and low-voltage switching. These transformers will supplement existing transformation facilities now loaded to the limit in the suburban area east and north of Toronto. Purchase of major station equipment is under way and the contract for the frequency-changer has already been let.

Exchange of power and energy between the 60-cycle Georgian Bay and Eastern Ontario divisions will be effected over new transmission lines con-

necting the new station at Scarborough to the existing transformer station at Oshawa, and to a new transformer station at Fergusonvale. Transfer of power and energy to and from the 25-cycle Niagara division will be effected through the Scarborough frequency-changer and over a new transmission line connecting the new Scarborough station to Toronto-Leaside transformer station. The 60-cycle transmission lines to Oshawa and Fergusonvale are scheduled to be completed and temporarily tied together in the early summer of 1946. The new Scarborough station and the connecting line to Toronto-Leaside are scheduled for completion in the spring of 1947.

In connection with the above, a new 15,000-kva, 110,000-44,000-volt transformer station, with switching and 44,000-volt regulating equipment is being planned for Fergusonvale. On the 110,000-volt side it will initially be connected to Oshawa transformer station, but will eventually be fed from the new Scarborough station 110,000-volt bus. On the 44,000-volt side it will be tied in to the Georgian Bay division through the 44,000-volt bus in the existing Fergusonvale auto-transformer station on the same site.

Authorization was also given for the installation at Oshawa transformer station of 110,000-volt switching equipment to control the new line to Scarborough and the existing line from Sidney; and for the installation at Toronto-Leaside transformer station of two 2,500,000-kva oil circuit-breakers and associated equipment to control the new connection to Scarborough. The work at Oshawa will include the installation of 21,000-kva equipment to regulate the voltage of the 44,000-volt power supply. The work at Toronto-Leaside will include the replacement of eight existing 1,500,000-kva circuit-breakers of 2,500,000-kva rated capacity to provide increased rupturing capacity for higher power concentrations.

New Terminal Station and Service Centre

Studies of the greater Toronto area have demonstrated the need of a 220,000-volt terminal transformer station on the western side to provide facilities similar to those now provided by Leaside transformer station on the eastern side. A suitable undeveloped area of land was purchased in Etobicoke township, near Islington, for such a station and for its associated transmission line rights-of-way, and also, adjoining the station, for the future establishment of a service centre. Because of a re-arrangement of transmission lines west of Toronto, the 110,000-volt switching portion of the proposed future 220,000-volt terminal station will be constructed first; and preliminary design, and the purchase of switch yard equipment is progressing. Construction of this initial portion, and of associated transmission line changes to co-ordinate the 110,000-volt circuits in the westerly portion of the Toronto metropolitan area, is scheduled for completion at the end of 1946.

Preliminary studies are under way regarding the proposed service centre, the purpose of which will be to centralize major repair, maintenance, salvage, storage, shop, garage, and other service facilities. Initially, it is only proposed to install much needed pole-storage facilities, with railway sidings and access roads.

Other Changes

The installation of the 40,000-kva synchronous condenser at Essex transformer station is almost complete, and it will be placed in service early

in 1946. The new control room, and the outdoor equipment which is to replace the indoor portion of the 26,400-volt bus and switching equipment, will be completed later in 1946.

The supply of power to the Atomic Research plant of Defence Industries, Limited, near Chalk river, involved, in addition to the new transmission line, the construction of a 110,000-volt switching station at Haley, and a 3,000-kva, 110,000 2,400-volt step-down transformer station at the Defence Industries, Limited plant. The new stations and line were placed in service at the end of April, 1945.

For the supply of power to an area within the Martintown rural power district, a 44,000-volt, wood-pole transmission line was constructed 16 miles from Maxville to Plantagenet Springs, where a 1,000 kva, 44,000 8,000-volt, step-down distributing station was installed. This area is now supplied from Cornwall, but previous to September 30, 1945, it was supplied through Treadwell.

Lines and stations in the southern portion of the Eugenia district, Georgian Bay division, are being converted from the existing operating voltage of 22,000 volts to a higher voltage in order to improve voltage regulation, increase transmission capacity between Eugenia generating and Hanover frequency-changer stations, and feed the new station at Orangeville. Most of the lines have been re-insulated, and with the completion of changes authorized at Eugenia generating station, Hanover frequency-changer station, and Dundalk, Durham, Grand Valley, Mount Forest, Orangeville, Priceville, and Shelburne distributing stations the circuit voltage will be raised to 44,000 volts.

To provide for increasing loads and new industrial customers in the Cornwall area a 110,000-volt steel-tower direct line from Ottawa to Cornwall was decided upon. This line is scheduled to be in service, with temporary terminal connections, early in 1946. Plans are being prepared for the installation at Cornwall switching station of new 110,000-volt switching equipment; and for the installation at Cornwall transformer station of an outdoor 15,000 kva, 110,000 44,000 4,000-volt, self-cooled transformer bank, including a spare 5,000-kva unit, 15,000-kva, 44,000-volt regulating equipment, and necessary structures, switching and other auxiliary equipment. The new transformers and regulator have been purchased, and changes at the two stations are scheduled for completion in the summer of 1946. It is planned to convert the existing bank of water-cooled transformers to self-cooled units and to re-connect them for 11,000-volt service.

During the war years it became apparent that, for security of service, a 110,000-volt switching station was required in the vicinity of Ottawa. With the addition of the new 110,000-volt circuit to Cornwall the need for such a station became urgent. Land is being purchased south of Ottawa and a new station to be known as Merivale switching station is scheduled to be in service during 1946.

At Hamilton-Gage transformer station a fourth 25,000-kva transformer previously held in reserve equipment was connected into service, with the necessary high and low-voltage structures and switching equipment. This increases the station capacity to 100,000 kva and will make additional power available to the Hamilton Hydro-Electric System for a new load at the Steel Company of Canada. At Toronto-Fairbank transformer station, to supply increasing demands in the north-western Toronto area, the third 25,000-kva,

110,000/26,000-volt, 3-phase transformer, previously available as an unconnected spare, is being permanently connected, and the necessary high and low-voltage structures and switching installed.

A new 8,000 kva, 110,000 26,400-volt transformer station was authorized at Caledonia, to improve voltage conditions and to reduce the load on Dundas transformer station. The new station will serve Caledonia, and municipalities and rural power areas south of that village which are now supplied from Dundas. The station is scheduled for completion in 1946.

Conditions in the St. Catharines-Thorold area are being studied to provide a new transformer station.

Field construction of the 110,000-volt steel-tower transmission line between Kent and St. Clair transformer stations will be commenced in December, 1945, and is expected to be completed in the summer of 1946. In connection therewith, high-voltage switching will be installed at Kent transformer station. The work includes a new 110,000-volt outdoor switch structure, the extension to this structure of the indoor bus, and the modernization of station lightning protection.

Increasing loads at Sidney transformer station were taken care of during the war years by installing forced air cooling on the transformers, but the limit of capacity to be obtained by this method has been reached and a second 15,000-kva, 110,000 44,000 4,000-volt transformer bank, together with a 15,000-kva voltage regulator, will be placed in service early in 1946. In the Kingston area, the installation of a second 15,000-kva 110,000 44,000 4,000-volt transformer bank at Frontenac transformer station, together with a 15,000-kva voltage regulator was authorized, and is scheduled for completion late in 1946.

To meet increased load conditions at West Lorne distributing station and to improve voltage regulation in the district supplied by St. Thomas transformer station, the transmission voltage is being raised from 13,200 to 26,400 volts. The work, scheduled for completion in 1946, includes the installation of two 5,000-kva, 13,200 26,400-volt auto-transformers at St. Thomas, the re-insulating of 48.9 miles of transmission line, and the raising of the operating voltage at West Lorne, Dutton, Shedden, Aylmer, St. Thomas Provincial Hospital, and Port Stanly distributing stations. The station capacities at West Lorne and Port Stanley will be increased.

Rapidly growing summer resort loads on the west shore of lake Simcoe are overloading the existing stations. To assist in carrying these loads authorization was given for a new 1,000-kva, 44,000 8,000-volt distributing station at Alcona Beach for initial operation at 22,000 8,000 volts. The station will be supplied by a new 7.6 mile wood-pole line from the existing Barrie-Bradford line.

With the purchase of the Caledon Electric Company, studies were made of the best method of incorporating its properties into the Georgian Bay division. Authorization was given for the construction of a new 44,000 12,000-volt step-down station, to be known as Orangeville distributing station No. 2; a new 12,000-volt line from Orangeville to Cataract; and the raising of the voltage of the Caledon Electric Company lines from 6,600 to 12,000-volt operation, with necessary rehabilitation.

Engineering and purchasing assistance is being given, and construction work undertaken, in connection with new municipal stations for the Belleville, Chatham, Goderich, and Waterloo Public Utility Commissions, and for the

Brantford Township and East York Hydro-Electric Systems. The construction of Almonte municipal station, referred to in last year's report, was completed. Engineering assistance is being given to the Board of Light and Heat Commissioners of Guelph in the preparation of drawings for its new municipal station No. 5, and engineering assistance to the Peterborough Utilities Commission, mentioned last year, was continued. The construction of new substations for the Thorold and Picton Public Utilities Commissions has been authorized.

In order that the Ottawa Hydro-Electric System could plan for a new substation, which would need to be placed adjacent to a step-down station of the Commission, the Commission was requested to determine by an analysis of the local system's loads the most suitable location for the two stations. As a result of the study a combined site for the two stations was purchased, and the Ottawa Hydro-Electric System will shortly construct its low-voltage substation. The Commission's station will be known as Ottawa-Riverdale transformer station.

THUNDER BAY SYSTEM

The fourth 15,000-kva unit at Alexander generating station was placed in service on October 1, 1945, increasing the station capacity to 60,000 kva.

A new 500-kva, 110,000 2,300-volt distributing station is being installed at Nipigon to supply power to the village and surrounding area. The new power supply will replace the existing supply from step-down transformers owned by the Brompton Pulp and Paper Company.

The site and transformers have been purchased for a new 15,000-kva, 110,000 22,000-volt transformer station No. 2 at Port Arthur.

NORTHERN ONTARIO PROPERTIES

Abitibi District

Ramore 26,000 8,000-volt, 3-phase distributing station No. 1 will in future supply the Matheson area, and its capacity is being increased from 75 kva to 150 kva. To supply the Ramore area, a new 75-kva, 26,400 4,600-volt single-phase distributing station is being installed on the Ramore transformer station site. It will be known as Ramore distributing station No. 2.

Equipment was installed at Kirkland Lake transformer station to supply separate regulated voltage to the new Timiskaming district and to Lake Shore Mines, Ltd. Changes and additions are being made to the telephone equipment to facilitate the interconnection of the Abitibi and Timiskaming district communication systems.

Timiskaming District

This district comprises properties purchased from the Northern Ontario Power Company.

Plans are under way for the amalgamation of the purchased properties with the Abitibi district. This will involve changes to and rehabilitation of purchased stations and transmission lines in the Timmins-Schumacher, Cobalt, and Kirkland Lake areas; alterations to and rehabilitation of purchased generating plants supplying these respective areas; and the installation of load totalizing metering in various customers' stations.

The two 10,500-kva, 26,400 12,000-volt transformer banks and associated equipment at the Hollinger Consolidated Gold Mines which were

originally installed by the Company to receive 26,400-volt power were taken over by the Commission; and switching, metering, and other additions and changes were made to supply power to the Hollinger mines at 12,000 volts, and to provide a tie between the Abitibi and Timiskaming districts through Schumacher transformer station. The station, as changed, is known as Hollinger transformer station, and was put into service during May, 1945.

Sudbury District

In connection with the Sudbury rural power district, a new 1,000-kva, 22,000/12,000-volt distributing station No. 3 was installed at Sudbury; the distribution system is being changed from 4,000-volt to 12,000-volt operation; and necessary extensions are being made. The existing Sudbury distributing stations Nos. 1 and 2 were sold to the Sudbury Hydro-Electric Commission, with the exception of certain minor equipment.

A 10-kva, single-phase, 22,000/220-110-volt outdoor station was installed for the Canadian National Railways at St. Cloud, and placed in service in January, 1945.

Nipissing District

A new 1,000-kva, 22,000/12,000-volt distributing station to operate initially at 22,000/8,000 volts, was constructed at North Bay to replace North Bay rural station, which is being dismantled.

Transformer capacity at Bingham Chute generating station for the Powassan rural power area was increased from 75 kva to 250 kva.

Authorization was given to increase the capacity of the Sturgeon Falls-North Bay 22,000-volt tie line.

Manitoulin Rural Power District

Studies are under way regarding possible additional sources of power supply to Manitoulin rural power district.

Patricia District

A new 600-kva, 44,000/2,300-volt distributing station was installed at Red Lake townsite.

Rainy River District

The new 450-kva, 44,000/8,000-volt Atikokan distributing station was placed in service during February, 1945.

NOTE: Circuit miles of 220,000-volt line in the province of Quebec connected to H-E.P.C. lines=103.45. Total 220,000-volt system interconnected circuit miles=1,173.42.

**TRANSMISSION LINE CHANGES AND ADDITIONS MADE DURING THE YEAR
ENDED OCTOBER 31, 1945**

SOUTHERN ONTARIO SYSTEM

HIGH-VOLTAGE LINES

The 60,000-volt, single-circuit, wood-pole line from Ontario Power transformer station 2.41 miles to Cyanamid transformer station was removed.

The 60,000-volt, single-circuit, wood-pole line from Queenston forebay towers 0.37 mile to Niagara River switching station was removed.

LOW-VOLTAGE LINES

Niagara Division

DUNDAS DISTRICT:—A 26,000-volt line was built from Ancaster junction 2.78 miles to Ancaster distributing station.

LONDON DISTRICT:—A section of the 26,400-volt line from Delaware junction to Mt. Brydges junction 0.06 mile in length was removed by relocation of the line.

ST. THOMAS DISTRICT:—The 13,200-volt line from Aylmer junction to Aylmer distributing station was relocated for 0.25 mile.

A section of the 13,200-volt line from Yarmouth junction to Port Stanley distributing station 0.03 mile in length was removed by relocation of the line.

COOKSVILLE DISTRICT:—A section of the 13,200-volt line from Cooksville Shale junction to The Cooksville Company Limited, 0.10 mile in length, was removed. The sky wire was removed throughout, a distance of 1.22 miles.

KENT DISTRICT:—A section of 26,400-volt line 1.85 miles in length from Prince Albert junction to Como junction was relocated and total mileage reduced by 0.02 mile.

YORK DISTRICT:—A 26,400-volt line was built from Long Branch distributing station 0.36 mile to Neptune Meters Ltd.

HAMILTON DISTRICT:—A 13,200-volt circuit was erected on existing pole lines 2.45 miles and on new poles 0.09 mile from Bartonville distributing station to Stoney Creek distribution station.

FAIRBANK DISTRICT:—A 26,400-volt line was built from Base Line junction 1.34 miles to Island Grove distributing station.

A 26,400-volt line was built from Post Road junction 2.91 miles to Department of Public Works (Sunnybrook Military Hospital) of which 0.95 mile was built for that customer.

THOROLD DISTRICT:—The 12,000-volt line from Thorold transformer station 0.05 mile to Provincial Paper (steam) distributing station was restrung with heavier conductor.

The 12,000-volt line from Provincial Paper (steam) distributing station 9.22 mile to Thorold distributing station was restrung with heavier conductor.

Eastern Ontario Division

A 110,000-volt, single-circuit, wood-pole line was built from Haley switching station 56.42 miles to Defence Industries station (N.R.X.) near Chalk River.

A 33,000-volt wood-pole line was built from Almonte junction 0.51 mile to Almonte station. **CENTRAL DISTRICT:**—A section 0.03 mile in length was added to the 44,000-volt line from Sidney transformer station to Brighton distributing station by relocation of the line.

The 44,000-volt line from Auburn Switching station 2.08 miles to Peterborough was sold to Peterborough Utilities Commission.

ST. LAWRENCE DISTRICT:—A 44,000-volt line was built from Maxville distributing station 16.4 miles to Plantagenet Springs distributing station.

The 44,000-volt line from Sophia junction 12.12 miles to Phillips junction was rebuilt and the sky wire was removed.

The 44,000-volt line from Phillips junction 0.46 mile to Brockville distributing station was rebuilt and the sky wire was removed.

NORTHERN ONTARIO PROPERTIES

PATRICIA DISTRICT:—A 44,000-volt line was built from Madsen Red Lake Gold Mines Limited station 1.51 miles to Hasaga Gold Mines Limited station No. 2.

COMMUNICATIONS—ALL SYSTEMS SOUTHERN ONTARIO SYSTEM

In the Niagara division of the Southern Ontario system, a new four-circuit open-wire telephone pole line was constructed between the DeCew Falls 66²/₃ cycle generating station and Turners junction, a distance of 3.31 miles. Between Allanburg junction and Pelham junction, a distance of 8.02 miles, a new telephone pole line with six circuits was constructed to replace three deteriorated telephone pole lines; and between Pelham junction and Vinmount a telephone pole line with two telephone circuits was reconstructed for a distance of 17.55 miles. One circuit between Ancaster junction and Ancaster distributing station was erected on the newly constructed 26,400-volt pole line; and single telephone circuits were erected between Stoney Creek distributing station and Saltfleet R.P.D. office, a distance of 1.19 miles, and from Base Line junction to Island Grove distributing station for 1.34 miles.

Two permanent private branch exchanges consisting of 15 lines each were installed in the Power Supervisor's office at the Administration building; and at Frontenac transformer station in the Eastern Ontario division two private branch exchange turrets consisting of seven and eight lines respectively were installed in the station control room and the operators' residence at Frontenac.

At the Toronto-Strachan transformer station the telephone equipment was transferred to the new telephone room and new cables were installed. Carrier telephone terminals were placed in operation at the Niagara transformer station and Toronto-Strachan transformer station to provide a direct telephone communication channel between the Power Supervisor's office at the Administration building and the district load supervisors at Niagara Falls. In addition a four-channel telemetering telephone carrier system was installed between Niagara Falls and the Power Supervisor's office in Toronto to provide the necessary channels for remote indication of power system data to be made available to the new Power Supervisor's organization at Toronto.

NORTHERN ONTARIO PROPERTIES

Timiskaming District

In the Timiskaming district of the Northern Ontario properties, a new three-circuit telephone pole line was constructed for a distance of 1.75 miles between Indian Chutes generating station and the trunk telephone line between Schumacher and Elk Lake to provide improved interconnection facilities between the New Liskeard and Schumacher districts.

A private branch telephone exchange together with revised protective equipment was installed at Schumacher transformer station to provide interchange telephone facilities with the Commission's system in the Timmins area. At Indian Chutes generating station a five-line private branch exchange along with suitable protective equipment was installed to provide improved telephone service for system operation.

AN ENEMY OF WOOD POLES

This pine borer, showing head and nippers with which it eats paths through solid wood, was found by a field inspector in a pole submitted for power line construction. Poles which have been attacked by these borers are not acceptable for the Commission's use. In 1945 nearly sixty thousand red pine and jack pine poles were utilized by the Commission after being rigidly inspected and subsequently pressure treated with preservatives. Magnification 10 times

DISTRIBUTION LINES AND SYSTEMS IN RURAL POWER DISTRICTS

The following summary shows the mileage of distribution lines constructed by the Commission in rural power districts and the number of consumers served.

The summary indicates a total net increase in construction during the year of 1,132 miles of new primary line completed and service given to 12,342 additional consumers.

SUMMARY OF CONSTRUCTION IN RURAL POWER DISTRICTS

System and division or district	At October 31, 1944		At October 31, 1945

SECTION VIII

RESEARCH—TESTING—INSPECTION

PRODUCTION AND SERVICE

WITH the cessation of hostilities in Europe and Japan, the activities of the Laboratories toward the war effort ended quickly and about one-third of the staff was transferred from war work to the many pressing research problems of the Commission that had been deferred during the war years. Work was expanded in many fields, including grounding, insulation, electronics, stress analysis, and the treatment of wood poles. A new domestic hot water tank was developed and a new type of heating element designed which simplifies maintenance and gives increased efficiency.

The Commission's post-war programme has also been responsible for much new work. Field surveys for the purpose of locating suitable sources of concrete aggregate have been carried out in several places where major construction projects are planned. Existing structures have been inspected and tested to obtain data on service behavior as a guide to future design and construction. New materials and methods developed during the war are being studied to determine whether they can be usefully applied in the Commission's work.

The Hydro undertaking of Ontario is greatly benefited by the efforts of engineers and scientists everywhere who contribute to the world's scientific knowledge. The scientific staff of the Commission recognizes its obligation to add something to this knowledge and the Commission encourages its staff to participate actively in the work of scientific societies, standardizing organizations and other bodies by the presentation of papers, the contribution of scientific data and the preparation of standard specifications.

Factory inspection and witness testing included a large turbine and generator for extension of one of the power plants, a large synchronous condenser for another location, power transformers over a very wide range of capacity, oil circuit breakers and other equipment for erection in the field. Checking of quality of materials and fitting of parts before assembly is a very important part of this work.

The Approvals Laboratory, acting as agent of the Canadian Standards Association, has continued the testing of domestic appliances and fittings and has co-operated with the Electrical Inspection department for protection against electric shock and fire hazard to reduce accidents to a minimum in the Province.

The machine shop and garage at the service building maintained in good condition the large fleet of trucks used by the Commission throughout Ontario. The volume of work increased during the year.

RESEARCH AND TESTING LABORATORIES

Research

The Laboratories are involved in study of all research problems of the Commission and carry on all testing in connection with investigations. The Main Research Committee, consisting of five department heads, deals with general matters and institutes research studies. The actual research work is conducted, both in the Laboratories and in the field, by subcommittees, each prepared to study certain specific problems for which solutions are desired by the Commission or by a municipality.

Electrical Insulation

Direct current was used in several cases to locate cable faults. This technique is valuable for certain types of installation.

A direct current insulation tester was constructed using rectifier tubes and having a voltage range up to 5,000 volts with a maximum short circuit current of 20 milliamperes. This equipment will supplement the megger for testing insulation.

Power factor tests were made in the Laboratories on various apparatus and plans are being prepared for a field testing program on a substantial scale.

Instruction on the application of the gradient method of testing apparatus bushings was given to members of the Operating staff in the field.

The cause of failure of some suspension insulators in the field was investigated.

The use of impulse testing was advanced and a high voltage, high speed electronic oscillograph was ordered to supplement this work.

The installation of magnetic links at Burlington transformer station was greatly extended and useful records of surges caused by lightning were obtained.

Studies and tests were continued to contribute data on test methods for insulating oils for the Committee of the American Society for Testing Materials.

Vibration of Line Conductors

The study of problems associated with the vibration of line conductors and the development of methods and equipment to eliminate mechanical failure due to fatigue have been the chief activities of a special committee of engineers for many years. During the past year this committee was less active as a result of the success of the investigations and methods adopted in past years.

Fatigue tests were made on three sizes of hard drawn copper and one high-strength copperweld wire conductor. These tests have suggested a modification in the material specification for wire.

A report was prepared entitled: "Fatigue Strength Requirements for Galvanized Steel Ground Wire Strand" which indicates the desirability of a revision in the present ground wire strand specification to include fatigue limit requirements.

HIGH-VOLTAGE TESTING OF INSULATED WIRE AND CABLE
Flexible transformer equipment, smooth hand control, 550 to 46,000 volts

Treatment of Wooden Transmission Structures

In co-operation with the Canadian Forest Products Laboratories, strength tests were made on a number of jack pine poles infected with Red Heart, a disease caused by a fungus, *Trametes pini*, and affecting many strands of timber which otherwise would be suitable for pole line construction. This work was done with a view to promoting the efficient utilization of the timber resources of the Province.

Special laboratory equipment was constructed for the purpose of studying the effects of fungi on various preservatives. The Canadian Forest Products Laboratories supplied standard cultures of two common varieties of fungus. These were propagated in agar jelly to provide sufficient inoculum for the studies.

Several hundred poles were inspected in the field to determine the effect of different preservatives and methods of treatment. This work included the pole test plot at Barrie and the 44-kv power line in the Patricia district from Ear Falls generating station to Hudson.

Domestic Hot Water Tanks and Heaters

Studies were continued with a view to increasing the service life of hot water tanks and heaters and to prepare plans and designs for new flat-rate heater installations.

The sixth annual inspection of the experimental tanks operating under domestic service conditions at York station found very little change in the past year, the rate of deterioration now being very slow.

The investigation by accelerated tests of the quality of galvanizing on iron and steel was continued on specimens submitted by a manufacturer.

DEVELOPMENTS IN DOMESTIC WATER HEATING EQUIPMENT

The new water heater developed by the Laboratories with improved appearance, increased efficiency shown by extensive laboratory tests, and readily replaceable heating elements, is at right, with present standard tanks at left. The new design can be completely assembled and tested in the factory to simplify installation, and elements of various ratings may be used in the double-element flat-rate method of connecting heaters

A series of corrosive tests, under city water pressure and at various elevated temperatures, was conducted on plain iron cut from a used tank, on aluminum, on new galvanized iron and on glass-enamelled iron which showed a decided loss in gloss.

Microscopical studies were made on tank steel samples supplied by the Toronto Hydro Electric System and on an anodized aluminum tank from Arvida, Quebec.

Tank design was studied in regard to heat damage where the bottom is welded to the cylinder.

Substantial progress was made on the development of a flat-rate water heater arrangement designed for quick recovery of water temperature without the use of a booster heater. The new strap-on heater element improves the efficiency of the system at moderate cost and is readily removed to insert a new element or one of higher power without removal of the tank casing and thermal insulation. Specifications for a new type of hot water tank were prepared. A complete water-heater assembly is being designed to be factory-built, shipped and installed as a packaged unit.

Illumination

The characteristics of both hot and cold cathode fluorescent tubes were studied with a view to recommending suitable illumination equipment and satisfactory arrangement of luminaires to municipalities for solution of their consumers' lighting problems.

This new strap-on type of element, as seen through the opening in the cover of the tank, requires only a screwdriver to remove and replace with larger element, without disturbing any of the thermal insulation

Studies of school classroom lighting were continued and reports prepared on semi-direct lighting, indirect lighting, blackboard illumination, fluorescent fixtures and suitable spacing of fixtures.

Masonry Materials

Study of the thermal and structural behavior of Barrett Chute dam was continued to determine the seasonal trends at the point of observation. The information obtained may provide assistance in planning future hydraulic structures.

A search for internal cracks at Barrett Chute dam was made by measuring the velocity and intensity of waves set up in the dam by standardized impulses. An electronic interval timer, capable of measuring in the milli-second and micro-second ranges, was developed at the Laboratories for use on such concrete structures.

The study of deterioration of cement in storage which has progressed through a number of years was completed and a report prepared on the aging of cement.

Measurements were made to determine the effect of certain properties of cements upon the appearance of concrete.

Geophysical methods for the location of aggregate deposits and the investigation of foundation conditions were studied. Equipment was constructed and assembled and measurements were made at fourteen places where the results could be checked by drilling and excavation. Seismic principles also were employed to determine the distance to solid rock, and this method gave promise of being very useful.

Paints and Protective Coatings

A special committee studies the quality of paints required by the Commission and investigates new materials and formulated paints.

This committee revised the Hydro standard color chart and new color cards were prepared and put into use.

A number of tests were conducted on non-slip paints to reduce the hazard of workmen on the running boards of trucks. A suitable paint was recommended and has been used successfully for several months.

Black exterior transformer finishes were tested and a product was found with a longer life than those previously used.

Petroleum Products

A committee studies lubricating oils and greases as well as electrical insulating oils, all of which the Commission uses in very large quantity.

In co-operation with the American Society for Testing Materials, extensive tests were made to determine the relative accuracy of various procedures for measuring the dielectric strength of transformer oil. A second co-operative investigation in which many other large public utilities also are participating is a study of the deterioration of insulating oils in service.

Study of test results on most of the insulating oils in the Niagara division resulted in improved procedure for the valuation of used insulating oil.

A study was started to determine the most suitable additives to use in lubricating oil to obtain the particular properties desired in the finished oil, standard tests for valuating mineral oils not being applicable when additives are used.

Welding

Under the guidance of the committee on welding, satisfactory work was done in repairing by metal spray a discharge ring in the Hanna Chute turbine and guide vanes and a shaft at Eugenia generating station. Bronze welding on bronze runners also was successful.

Electronic Applications

Some important electronic problems were solved in designing special relays and amplifiers for operating oscillographs. The characteristics of coaxial cables were studied and tests were made by newly developed methods which gave a higher degree of accuracy.

Grounding

The resistance of electrical grounds by galvanized and ungalvanized rods has received further attention and methods of improving protection to operators of air-break switches have been studied from test results with grounded galvanized gratings.

An investigation of electrical circuits on farm premises was started with a view to eliminating any hazards found. An extensive program has been planned including line surveys, lightning surveys, grounding and other tests under abnormal loads and fault conditions.

Routine Testing, Materials and Equipment Inspection

The Laboratories do a large amount of routine testing of materials and various types of equipment, and inspect, at the factories, power equipment being built for the Commission and for the municipalities. These services

LOCATING CRACKS IN CONCRETE

Electrical equipment for studying the attenuation of high frequency sound waves. An endeavour is being made to employ the echo-ranging principle for the detection and locating of cracks in mass concrete. This method resembles those used in the recent war for locating submerged submarines

aim to insure highest quality in material and workmanship in the equipment together with suitable operating characteristics, reliability in service and minimum expense for maintenance.

Electrical Equipment

Acceptance tests were supervised and witnessed on one 15,000-kva. generator, unit No. 4, in Alexander generating station. This generator had been inspected during manufacture together with metal clad switching equipment and panels for its control.

Inspection during manufacture and final electrical witness tests were made on 100 power transformers of various ratings up to 20,000 kva., the total capacity tested being 129,815 kva., also 9 oil circuit breakers with total capacity of 447,300 kva, and 42 air-break disconnecting switches, totalling 3,654,500 kva.

Distribution transformers of all sizes have been inspected at the factories: the total quantity was 4,317, almost twice the number tested in the previous year. Nearly 200,000 line and bus insulators were inspected.

Routine tests in the Laboratories were made on 5,205 pairs of linemen's rubber gloves and on 1,880 samples of insulating oil. Special tests were made on 757 samples of oil. A total of 1,413 instrument and distribution transformers were tested, and also 7 motors. Sixty-five thermostats were tested. A total of 1,435 insulators were given flashover tests, 1,604 watt hour meters were repaired, and 161 indicating instruments were calibrated.

Mechanical and Structural Equipment

Important items in mechanical inspection of equipment were for generating and transformer stations.

For Alexander development, a 19,000 horsepower hydraulic turbine and 15,000 kva. generator were inspected together with two head gates and hoists, two stop-log winches and a sump pump.

For DeCew generating station, inspection included an emergency gate, a rack follower, and head works and tail race gantry cranes.

For Essex condenser station, a 40,000 kva. synchronous condenser and a 5 ton crane were inspected.

In addition to these items, turbine shaft forgings for Coniston, eight replacement runners for the Toronto Power Company plant, and 780 torsional vibration dampers were examined.

The tanks for all power transformers and oil circuit breakers were inspected for welding, and also 40 welded tanks for a transformer manufacturer.

Concrete

Three resident concrete inspectors with three other inspectors and assistants supervised the placing of concrete on construction projects at Alexander generating station and Essex transformer station, and also some concrete work done at Burlington transformer station. These inspectors test the aggregates, check the quality of concrete and supervise the placing of concrete.

Field surveys were made at three sites in search of suitable concrete materials for proposed construction.

X-Ray and Microscopical Examinations

The X-ray laboratory has been active and has given assistance to government departments in examination of castings.

Radio-graphic inspection was made on 26,464 light metal castings and 1,740 plastic parts.

Transmission Line Materials

Transmission line materials that pass through Strachan Avenue stores are inspected at the Laboratories. These include cross arms, brackets, insulator pins, clamps, general hardware, wire and cable. Copper wire and cable galvanized steel cable, and steel-reinforced aluminum cable amounted to 1,746 tons through the year.

Steel and Timber

Structural and reinforcing steel for new installations, 532 tons, was inspected. A total of 69,395 pine and cedar poles were examined for use in extension of distribution systems.

Chemical Testing

Chemical tests were made on 123 samples of paints and substitutes used by the Commission on construction projects. These were regular routine

UNIVERSAL TESTING MACHINE

New equipment, with capacity of 120,000 pounds, for determining tensile and compressive strength of materials and mechanical devices and assemblies. As shown, a tensile test is being made on a standard metal specimen with extensometer attached to indicate stress and resultant strain

tests to insure good lasting qualities and suitable colors. Accelerated aging tests are made on the weatherometer at the Laboratories and serve as a guide in determining the life of this paint and its protective value.

Lamps and Lighting Equipment

The number of lamps examined and tested increased nearly fifteen percent over last year, the total being 82,501, and life tests were made on 4,450 lamps.

New Equipment

For the most of the year 1945, the Laboratories were restricted by war limitations and post-war shortages in the purchase of equipment. Some items were obtained however, and parts for other devices designed and built for special use.

A strain indicator was purchased for use with the resistance type strain gauge, a 200 inch-pound impact testing machine for plastics and a Tungar battery charger.

A motor drive was completed for the 20,000 lb. Olsen compression testing machine, also a load maintainer to hold load on a specimen in this machine within very close limits for an indefinite period of time. A strain dynamometer was designed and constructed. A device was built for detecting nails in logs before being run through the sawmills, and equipment completed for testing cracks in concrete. A load unit was designed for conditioning soil samples for shear tests, and alterations were made in the wire testing machines.

Specification and Committee Work

Members of the staff of the Laboratories represented the Commission at meetings and conferences of the following organizations, assisted in preparation of specifications, and were active otherwise in committee work. Canadian Standards Association, National Research Council, Canadian Electrical Association, Engineering Institute of Canada, American Institute of Electrical Engineers, American Concrete Institute, American Society for Testing Materials, Canadian Manufacturers Association, Canadian Radio Technical Planning Board, Canadian Institute of Mining and Metallurgy, Ontario Municipal Electric Association, Association of Municipal Electrical Utilities, Illuminating Engineering Society, Dept. of Munitions and Supply, Wartime Bureau of Technical Personnel, Wartime Labour Relations Board, Wartime Prices and Trade Board, Dominion Board of Fire Underwriters, International Association of Electrical Inspectors.

APPROVALS LABORATORY

Acting as agent of the Canadian Standards Association, this laboratory takes care of the approvals testing and factory re-examination of electrical equipment manufactured for sale in Canada, including products from the United States.

The number of applications for approval of appliances was nearly two and a half times as many as in the previous year. This increase was most pronounced in the radio and sound devices although the other appliance groups were very much larger.

The volume of electrical equipment and material inspected was much greater than in the previous year, the increase in number of labels sold being about 56 per cent., while the amount of wire, cable and conduit inspected increased 31 per cent. These figures indicate a definite return to production for civilian consumption.

In order to take care of this large increase in business, it was necessary to enlarge the testing facilities and to increase the number of the testing personnel.

Meetings of the Approvals Administrative Board, Approvals Council, Canadian Electrical Code Committees, Part I and Part II, CSA Committee on Electric Range Switches and others were attended by the Approvals engineer.

Canadian Electrical Code

The work associated with the Canadian Electrical Code on Electrical Installations includes attendance at meetings of the Central Committee and issuing of interim revisions and interpretations. The work on Approvals

Specifications for Electrical Equipment covers the preparation of draft specifications and interim revisions of published specifications, and also requires attendance at meetings of the committee. The work on Radio Interference includes preparation of drafts of sections of specifications to insure good practice in means of suppressing radio interference and also attendance at meetings of the Committee and at meetings of panels and subpanels of the Main Committee.

As a result of recent additions to the staff more time is being devoted to specification work.

ELECTRICAL INSPECTION

The volume of work relating to the inspection of electrical wiring and equipment installations throughout the Province, showed a decided increase.

Statistical

A total of 108,234 permits was issued, an increase of 24,871, or 29.8 per cent. Inspections numbered 175,935, an increase of 25,975, or 17.3 per cent. The graph following shows the number of permits issued and inspections made since the department was organized in 1916.

Fires attributed to Electricity

Every year, numerous investigations are made of fires purported to have originated through defective wiring or equipment. In only three instances, this year, could it be proved that the fires were of an electrical origin. The causes, in brief, were, two grounds in armoured cables and a flat iron left on and unattended. There were, possibly, other fires due to electrical causes, but direct evidence was destroyed by fire.

Electrocutions and Fatal Accidents

Four persons were accidentally electrocuted through contact with electrical wiring or equipment. One man touched a bare spot in a portable cable, circuit potential 575 volts; another man entered a prohibited area and came into contact with equipment operating at a potential of 8,000 volts; a woman was electrocuted when a defective cord came into contact with the frame of a washing machine and a child touched a live conductor underneath the house in which it lived. In the last two cases the circuit potential was less than 125 volts.

Accidents—Cattle

Eight cows were electrocuted in a stable when a defective armoured cable, the armour of which was alive, fell across a stanchion support. Circuit potential, 120 volts.

Ground Tests

A total of 2,526 tests were made of consumers' artificial ground electrodes in rural areas, an increase of 176 tests over last year.

Infractions of Regulations

Eleven persons or companies were prosecuted for various infractions of the rules and regulations governing the installation of electrical wiring and equipment.

Special Inspection of Equipment

Six hundred and eighty-two applications were received from manufacturers and distributors of electrical equipment for approval of one or more devices not listed as approved by the Canadian Standards Association.

Reports were made on 719 applications for special inspection of equipment.

Canadian Electrical Code

Part I of the Canadian Electrical Code is incorporated in The Hydro-Electrical Power Commission of Ontario, Rules and Regulations Governing Electrical Installations and Equipment. These regulations are law in Ontario and are applicable to electrical equipment and installations. The Code is re-issued at more or less regular intervals in order to keep abreast with the changes and advancements in the industry and engineers and inspectors of the Commission take an active part in revisions and re-issuing of the Code.

Part II of the Code includes specifications covering construction details and tests applied to electrical equipment to determine its acceptability from a minimum fire and accident hazard point of view. New specifications are compiled and existing specifications revised from time to time under the sponsorship of the Canadian Standards Association. Engineers and inspectors of the Commission assist in the compilation of new and revising of existing specifications.

Under the Canadian Broadcasting Act, Regulations for Controlling Radio Interference are enforced by the Federal Government. These regulations are applicable to electrical equipment and apparatus and to wiring installations and are therefore of interest to the Commission.

Quite a voluminous set of draft specifications have been prepared under the direction of the Department of Transport of the Federal Government and meetings of committees formed to draft these specifications were attended by engineers and inspectors of the Commission.

PRODUCTION AND SERVICE

The garage was operated through the year on a satisfactory basis, the volume of work done being approximately equal to that of previous years and including the overhauling of 76 trucks, mounting 29 new truck bodies and reconditioning 35 units of gasoline driven equipment for the Construction and Operating departments. In addition, 1,528 orders were completed covering miscellaneous truck repairs.

The systematic inspection and repairing of the Commission's fleet of 395 trucks was continued. The fleet operated a total of 3,241,551 miles which represents an increase of 14.5 percent over the previous year. This increase in truck mileage was due to the growing demand for electrical power necessitating the construction of additional lines and a heavier maintenance programme.

Thirty-six new trucks were purchased, twenty-one of which were replacements and the remaining fifteen were additions to the fleet.

The volume of work in the machine shop and carpenter shop showed an increase of approximately ten per cent over the previous year.

The Commission's direct contribution to the war effort on the Bits and Pieces programme terminated in August. The value of work done during the year approximated \$500,000.

SECTION IX

FINANCIAL STATEMENTS

Relating to

Properties Operated by The Hydro-Electric Power Commission on behalf of Co-operating Municipalities of the Southern Ontario System (Niagara, Georgian Bay and Eastern Ontario Divisions) and the Thunder Bay System,

and to

Northern Ontario Properties Held and Operated by the Commission in Trust for the Province of Ontario, and

The Hamilton Street Railway Company—A Subsidiary of the Southern Ontario System

IN this section of the Report financial statements relating to the activities of The Hydro-Electric Power Commission, segregated into certain distinct divisions, are presented. The first division relates to those activities on behalf of the co-operative municipalities, which are partners in the main Hydro undertaking comprising the Southern Ontario system (Niagara, Georgian Bay and Eastern Ontario divisions), the Thunder Bay system, and Rural Power districts associated with these two systems. The second relates to the administration of the Northern Ontario Properties which are held and operated by the Commission in trust for the Province of Ontario. The third relates to The Hamilton Street Railway Company, a wholly-owned subsidiary of the Southern Ontario system.

Co-operative Systems

In the Foreword to this Report a brief reference is made to the basic principle governing the operations of the Hydro undertaking in supplying electrical service at cost, and to the wholesale and retail aspects of the work. A description is also given of the systems into which the partner municipalities are co-ordinated for securing common action with respect to power supplies, through the medium of The Hydro-Electric Power Commission which, under The Power Commission Act, functions as their Trustee.

Although for the purpose of financial administration the Southern Ontario and Thunder Bay systems are separate units, there is a similarity of procedure with respect to their operation which enables certain financial statements, as for example the various reserves, to be co-ordinated and presented in summary tables.

The first set of tables in Section IX gives collective results for the co-operative activities related to the two systems. These tables include a **balance sheet; a statement of operations** as detailed in the "cost of power" tables referred to below; schedules respecting **fixed assets, capital expenditures and grants—rural power districts, account with the Provincial Treasurer of the Province of Ontario, funded debt issued or assumed, power accounts receivable, renewals reserves, contingencies and obsolescence reserves, stabilization of rates reserves and sinking fund reserves.**

The tables which follow these general financial statements relate more particularly to the individual municipality's aspects of the wholesale activities of the Commission and for each system show the **cost of power** to the individual municipal utilities, the **credit or debit** adjustment remaining at the end of the fiscal year, and the **sinking fund** equity that has been acquired by the individual municipality. There is also included for each system a **rural operating** statement.

The charges for power supplied by the Commission to the various municipalities vary with the amounts of power used, the distances from the sources of supply and other factors. The entire capital cost of the various power developments and transmission systems is annually allocated to the connected municipalities and other wholesale power consumers, according to the relative use made of the lines and equipment. In general each municipality assumes responsibility for that portion of property employed in providing and transmitting power for its use,* together with such expenses—including the cost of purchased power if any—as are incidental to the provision and delivery of its wholesale power. The annual expenses and the appropriations for reserves are provided out of revenues collected in respect of such power, through the medium of power bills rendered by the Commission. The municipalities are billed at an estimated interim rate each month during the year and credit or debit adjustment is made at the end of the year,† when the Commission's books are closed and the actual cost payable by each municipality for power taken has been determined.

Included in the municipality's remittance to the Commission for the wholesale cost of power—besides such current expenses as those for operation and maintenance of plant, for administration, and for interest on capital—are sums required to build up reserves for sinking fund, for renewals, and for contingencies and obsolescence. The first-mentioned reserve, namely, sinking fund, is being created on a 40-year basis for the purpose of liquidating

*Subject to maximum rate; see footnote on page 138.

†The financial year for the Commission ends on October 31. The financial year for the municipal electric utilities however, ends on December 31, and the municipal accounts are made up to this date, and are so recorded in Section X.

capital liabilities. The other reserves are, respectively, being created to provide funds for the replacing or rebuilding of plant as it wears out; to enable the undertaking to replace existing equipment with improved equipment as it becomes available through advances in science and invention, and to meet unforeseen expenses which from time to time may arise.

The ultimate source of all revenue to meet costs—whether for the larger operations of The Hydro-Electric Power Commission or for the smaller local operations of the municipalities—is, of course, the consumer. Out of the total revenue collected by each municipal utility from its consumers for service supplied, only an amount sufficient to pay the wholesale cost of power supplied by the Commission as outlined above is remitted to the Commission; the balance of municipal electrical revenue is retained to pay for the expense incurred by the local utility in distributing the electrical energy to its consumers.

Tabular Data

The following comments relate to the tabular data presented:

Balance Sheet.—The first tabular statement given in Section IX is a balance sheet showing the assets, and the liabilities and reserves of the co-operative systems.

Statement of Operations.—This statement is a summary of operating expenses and fixed charges as shown in the “cost of power” tables and rural operating statements relating to the individual systems as referred to more particularly below.

Fixed Assets.—Details are given concerning the various fixed assets of each system and of the miscellaneous properties, showing in separate classifications the values of plant under construction and in service, depreciable and non-depreciable and supplemented by a statement showing expenditures, adjustments and retirements occurring during the year.

Capital Expenditures and Grants—Rural Power Districts.—This schedule gives summary information respecting the total capital expenditures on rural power districts and grants-in-aid of construction paid or payable by the Province with respect to such rural districts.

Account with the Provincial Treasurer.—This schedule lists, both for the systems operated on a cost basis, and for the Northern Ontario Properties which are held and operated by the Commission in trust for the Province, the advances from the Province of Ontario and the repayments which have been applied to reduce this liability. It should be noted that Provincial advances to finance Northern Ontario Properties are shown in memorandum form only on the balance sheet of the Commission as the direct liability is carried on the Northern Ontario Properties’ balance sheet.

Funded Debt Issued.—This schedule presents a complete list of the outstanding securities issued by the Commission on account of the systems, and the Northern Ontario Properties. It should be

noted that securities issued to finance Northern Ontario Properties are shown only in memorandum form on the balance sheet of the Commission, whilst the direct liability is shown on the balance sheet of the Northern Ontario Properties.

Power Accounts Receivable.—This schedule sets forth the amounts collectable from all classes of power consumers and includes the annual adjustment figures from the "credit or charge" statements for municipalities. The amounts of debit balances three months or more overdue are stated.

**Renewals Reserves,
Contingencies and Obsolescence Reserves, and
Stabilization of Rates Reserves.**

These schedules show the provisions made to, the expenditures from, and the balance to the credit of, these reserves for each of the systems and other properties included in the power undertakings operated on a cost basis.

Sinking Fund Reserves.—This schedule summarizes the appropriations of principal and interest with respect to these reserves for each of the systems and certain other properties.

Following these statements, which are common to all systems, there are given for each of the co-operative systems four tabular statements as follows:

Cost of Power statement, which shows the apportionment to each municipality of the items of cost summarized in Statement of Operations, as well as the apportionment of fixed assets in service listed in the balance sheet and the amount of power taken by each municipality. It should be noted that the cost of power given in this table is the wholesale cost—that is, the cost which the Commission receives for the power delivered from the main transformer stations serving the local utility. In the case of municipal electrical utilities not directly administered by the Commission, the respective costs of power appear in Statement "B" of Section X as "cost of power supplied by H-E.P.C."

Credit or Charge statement, which shows the adjustments made in order to bring the amounts paid by each municipal electric utility to the actual cost of service.

Sinking Fund statement, which gives the accumulated total of the amounts paid by each municipality as part of the cost of power together with its proportionate share of other sinking funds.

Rural Operating statement, which summarizes for the rural power district of the system the various items of cost, and the revenues received, in connection with the distribution of electrical energy to rural consumers.

Northern Ontario Properties

The statements and schedules respecting these properties which are held and operated by the Commission in trust for the Province of Ontario include the balance sheet, operating account, schedules of fixed assets, renewals reserve, contingencies and obsolescence reserve, and sinking fund reserve. These schedules are similar in form to the corresponding schedules relating to the co-operative systems.

The Hamilton Street Railway Company

This is a wholly-owned subsidiary of the Southern Ontario system of the Commission. A balance sheet and operating statement are presented.

Municipal Utilities

All municipal Hydro utilities have current expenses to meet similar to the expenses of the Commission and have adopted the same financial procedure with respect to their operations. In other words, concurrently with the creation of funds to liquidate their debt to the Commission and to provide the necessary reserves to protect generating, transforming and transmission systems, the municipalities are taking similar action with respect to their local Hydro utility systems.

The balance sheets, operating reports and statistical data appearing in Section X, under the heading of "Municipal Accounts," relate to the operation of local distribution systems by individual municipalities which have contracted with the Commission for their supply of electrical energy. To this section there is an explanatory introduction to which the reader is specially referred.

Auditing of Accounts

The accounts of The Hydro-Electric Power Commission of Ontario are verified by auditors specially appointed by the Provincial Government. The accounts of the "Hydro" utility of each individual municipality are prepared according to approved and standard practice and The Public Utilities Act requires that they shall be audited by the auditors of the municipal corporation.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO**FINANCIAL ACCOUNTS**

For the year ended October 31, 1945

Relating to Properties operated on a "Cost Basis" for the Co-operating Municipalities and Rural Power Districts which are supplied with Electrical Power and Services from the following Properties:

Southern Ontario System

Thunder Bay System

Service and Administrative
Buildings and Equipment

SINKING FUND RESERVE:

Represented by funded debt and provincial advances retired through sinking funds.....	86,484,969.77	
		<u>\$405,552,860.76</u>

Auditors' Report

We have made an examination of the balance sheet of the Southern Ontario and Thunder Bay Systems of The Hydro-Electric Power Commission of Ontario, as at October 31, 1945 and of the attached statement of operations for the year ended on that date. In connection therewith we reviewed the system of internal control and the accounting procedures of the Commission, and, without making a detailed audit of the transactions, have examined or tested accounting records of the Commission and other supporting evidence by methods and to the extent we deemed appropriate.

We report that in our opinion the foregoing balance sheet and related statement of operations (as more fully reported upon by us to the Lieutenant-Governor in Council) have been drawn up so as to exhibit a true and correct view of the state of the affairs of the Southern Ontario and Thunder Bay Systems of the Commission at October 31, 1945 (subject to the trusts which prevail in respect thereto) and the results of their operations for the year ended on that date, according to the best of our information and the explanations given us and as shown by the books.

Toronto, Canada,
June 12, 1946.

CLARKSON, GORDON, & CO.
Chartered Accountants.

		\$ 61,397,649.23

Auditors' Report

We have made an examination of the balance sheet of the Northern Ontario Properties, held and operated by The Hydro-Electric Power Commission of Ontario in trust for the Province of Ontario, as at October 31, 1945 and of the attached statements of operations and surplus for the year ended on that date. In connection therewith we reviewed the system of internal control and the accounting procedures of the Commission, and, without making a detailed audit of the transactions, have examined or tested accounting records of the Commission and other supporting evidence by methods and to the extent we deemed appropriate.

We report that in our opinion the foregoing balance sheet and related statements of operations and surplus as more fully reported upon by us to the Lieutenant-Governor in Council have been drawn up so as to exhibit a true and correct view of the state of the affairs of the Northern Ontario Properties operated by the Commission at October 31, 1945 and the results of their operation for the year ended on that date, according to the best of our information and the explanations given us and as shown by the books.

CLARKSON, GORDON & CO.
Chartered Accountants.

Toronto, Canada,
June 12, 1946.

- (2) Subsequent to October 31, 1945 the share capital of the company was reduced by decreasing the par value of each share from \$50 to \$25 and by paying to the shareholders the sum of \$1,602,500, being \$25 per share on each of the 64,100 issued shares.

Auditors' Report

We have made an examination of the balance sheet of The Hamilton Street Railway Company as at October 31, 1945, and of the attached statements of operations and surplus for the year ended on that date. In connection therewith we reviewed the system of internal control and the accounting procedures of the company and, without making a detailed audit of the transactions, have examined or tested accounting records of the company and other supporting evidence by methods and to the extent we deemed appropriate.

We report that in our opinion, subject to the adequacy of the accumulated reserve for depreciation, the above balance sheet and related statements of operations and surplus have been drawn up so as to exhibit a true and correct view of the state of the affairs of The Hamilton Street Railway Company at October 31, 1945 and the results of its operations for the year ended on that date, according to the best of our information and the explanations given us and as shown by the books.

Toronto, Canada,
May 16, 1946.

SECTION X

MUNICIPAL ACCOUNTS

and

Statistical Data Relating to Hydro-Electric Distribution Systems Operated by Individual Municipalities Served by The Hydro-Electric Power Commission of Ontario

The Municipal Accounts section of this report presents in summary, and individually, the results of the operation of the local electrical utilities in municipalities owning their own distributing systems and operating with energy supplied by or through The Hydro-Electric Power Commission.

Financial statements prepared from the books of these Hydro utilities are submitted herein to show how each has operated during the past year, and its financial status at the present time. Other tables give useful statistical information respecting average costs for the various classes of service and the rates in force.

The books of account of the electrical utilities in all municipalities which have contracted with The Hydro-Electric Power Commission of Ontario for a supply of power are kept in accordance with an accounting system designed by the Commission. During the year 1945 this standard method of accounting was installed in Almonte, Braeside, Burlington, Newmarket, Renfrew and Thornbury.

Periodical inspections are made of the books of all Hydro electrical utilities and local officials are assisted in the improvement of their office routine with a view of standardizing, as far as possible, the methods employed. In the majority of the smaller municipalities much of the book-keeping for the electrical utilities is performed by representatives of the municipal accounting department of the Commission as a measure of economy. This arrangement insures the correct application of the standard accounting system, with resultant uniformity in classification of revenues and expenditures; secures true reflections of the actual operating results for the year, and greatly enhances the comparative values of the reports.

The first financial statement in this section presents consolidated balance sheets for the past eight years. Similar data for earlier years since 1913 were published in the Report for 1943. This consolidated statement combine

the balance sheets of all local municipal Hydro utilities receiving power under cost contracts. It is worth noting that the total plant value has increased from \$10,081,469.16 in 1913 to \$106,346,101.06 in 1945, and the total assets from \$11,907,826.86 to \$221,284,434.19. The liabilities have not increased in the same proportion as the assets, rising from \$10,468,351.79 to a maximum of \$52,685,316.86 in 1932, and receding to \$16,277,777.29 in 1945. The reasons for this are the regular fulfilment of debt retirement schedules under serial debenture provisions or by maturity of sinking funds, and also the fact that much of the cost of the increasing plant value has been financed out of reserves and surplus without increasing the capital liabilities of the respective utilities. By this procedure the funds of the systems are used to best advantage. Examination of the results will also show that there is a steady decline in the percentage of net liabilities to total assets; being from 88.0 per cent in 1913 to 7.0 per cent in 1945. The equities in The Hydro-Electric Power Commission's systems automatically acquired through the inclusion of sinking funds as part of the cost of power are not taken into account in arriving at these percentages.

The second financial statement presents consolidated operating reports for the past eight years and combines the results from all local municipal Hydro utilities receiving power under cost contracts. After providing for every cost of operation and fixed charges, including the standard provision for depreciation, the combined operating reports show a net surplus of \$4,445,-939.08 for 1945. (See also diagrams in Foreword to Report.)

The five statements, "A" to "E", following the two consolidated reports show the financial status of each municipal utility and the results of operations, giving classified information respecting revenue, operating costs, number of consumers and consumption, cost of power to municipalities, power and lighting rates charged to consumers, etc. In statements "A" and "B", the municipalities are arranged alphabetically under each system; in statement "D" the municipalities are arranged in three groups—cities, towns and small municipalities; in statements "C" and "E" all municipalities are arranged alphabetically. (Statement "C" suspended, see below.)

Statement "A" presents the balance sheet of each electrical utility. The plant values are shown under the general subdivisions specified in the standard accounting system and the other items on the positive side of the ledger which are included in total assets are self-explanatory.

In conformity with a policy of service at cost to the customer, refunds by cash or credit are made during the year in many municipalities from surplus funds accrued to the credit of municipal services, such as street lighting, water works, sewage disposal, etc., and to individual customers. The total thus returned to customers during the year 1945 amounted in round figures to \$925,000.00.

The reserves for depreciation, and the acquired equity in The Hydro-Electric Power Commission's systems, are listed individually and totalled; and under the heading "surplus" are included not only the operating surplus but the accumulation of sinking fund applicable to debenture debt and also the amount of debentures already retired out of revenue.

The depreciation reserve now amounts to 36.1 per cent of the total depreciable plant, while the depreciation reserve and surplus combined have already reached the sum of \$123,025,231.05, being equal to 115.6 per cent of the total plant cost.

Statement "B" shows the detailed operating report for each municipal electrical utility. It gives annual revenues from the various classes of consumers; the items of expenditure which make up the total annual expenditure and the sums set aside for depreciation. The population served by each local utility and the number of consumers of each class are also shown.

The item "cost of power supplied by H-E.P.C." in this statement includes the debit or credit balances ascertained by the annual adjustment of the cost of power supplied to the municipalities by the Commission.*

Of the 304 municipal electrical utilities included in this statement, 298 received from consumers revenue sufficient to meet in full all operating expenses, interest, debt retirement instalments, and standard depreciation reserve allocation and to yield an aggregate net surplus of \$4,451,006.96 for the year; 5 were able to defray out of revenue all such charges except a portion of the standard depreciation allocation aggregating \$1,742.80, in the case of 1 utility the revenue was less than the total operating expenses, interest and debt retirement instalments by \$36.68.

Statement "C". Conditions respecting street lighting were not back to normal throughout 1945, the statement is therefore again omitted in this year's Report.

Statement "D" presents statistics relating to the supply of electrical energy to consumers in Ontario municipalities served by the Commission. It shows the revenue, kilowatt-hour consumption, number of consumers, average monthly consumption, average monthly bill and the net average cost per kilowatt-hour both for domestic and for commercial light service in each municipality. For power service this statement shows the revenue, the number of consumers and the average horsepower supplied by the municipal utility.† For further reference to this informative statement, consult the special introduction to it on page 310.

Statement "E" presents the cost per horsepower of the power provided for and delivered to the municipalities by the Commission, and the local rates to consumers in force in the respective municipalities, during the year 1945, for domestic service, for commercial light service and for power service.

*In 1939 and 1940 a number of municipalities asked permission to take power cost adjustments into the following year, to facilitate the earlier closing of their books. On this account, from 1941 on, with few exceptions the Balance Sheet shows the previous year's equity in Hydro Commission properties; and the Cost of Power in the Operating Statement includes the previous year's adjustments.

†The statistics include retail power only. Wholesale industrial power as supplied by the Commission direct, is reported in Section IX.

STATEMENT "C"**Street Lighting Installation in Hydro Municipalities**

Due to restrictions and changes resulting from orders of the Dominion Power Controller and economies effected by municipal co-operative action, which in many municipalities continued until the end of the war to modify the Street Lighting provided, statistics relating to Street Lighting are not presented in this year's Annual Report.

**Cost of Power to Municipalities and Rates to Consumers for
Domestic Service—Commercial Light Service—Power Service
in Ontario Urban Municipalities Served by
The Hydro-Electric Power Commission
for the year 1945**

STATEMENT "D"**Statistics Relating to the Supply of Electrical Energy to Consumers in Urban Municipalities Served by The Hydro-Electric Power Commission**

Regarding the results of Hydro operation from the standpoint of the consumers, the following tabulation gives much useful and interesting information. For each main class of service in each urban municipal utility receiving power at cost from the Commission, Statement "D" lists the revenue, the consumption and the number of consumers, together with unit average costs and consumptions and other pertinent data.

The policy and practice of the Commission has been, and is, to make as widespread and beneficial a distribution of electrical energy as possible, and to extend to every community that can economically be reached by transmission lines, the benefit of electrical service. Even where, in certain localities, by reason of the distance from a source of supply or on account of the small quantity of power required by the municipality, the cost per horsepower to the municipality—and, consequently, the cost of service to the consumer—must unavoidably be higher than in more favourably situated communities, service has not been withheld when the consumers were able and willing to pay the cost.

The accompanying diagram summarizes graphically certain data of Statement "D" respecting the average cost to the consumer. It will be observed that the total amount of energy sold in municipalities where circumstances necessitate rates which result in the higher average costs to the consumer is relatively insignificant. With respect to power service, it should be noted that the statistics of Statement "D", and of the diagram, cover mainly retail power service supplied to the smaller industrial consumers. The average amount of power taken by the industrial consumers served by the municipalities is about 45 horsepower. The Commission serves certain large power consumers direct on behalf of the systems of municipalities.

It should be kept in mind that the revenues reported in Statement "D", and used for purposes of calculating the net unit costs to the consumer, are the total revenues contributed by the consumers, and provide, in addition to the cost of power, sums specifically applicable to the retirement of capital, and also operating surplus which is in part applied to retirement of capital or extension of plant and is in part returned in cash to the consumers.

It should also be noted that average costs per kilowatt-hour or per horsepower if employed indiscriminately as a criterion by means of which to compare the rates or prices for electrical service in various municipalities, will give misleading results. The average cost per kilowatt-hour, as given in Statement "D" for respective classes of service in each municipality, are statistical results obtained by dividing the respective revenues by the aggregate kilowatt-hours sold. As such, the data reflect the combined influence of a number of factors, of which the rates or prices to consumers are but one factor. Owing to the varying influence of factors other than the rates, it is seldom found that in any two municipalities the average cost per kilowatt-hour to the consumers, even of the same classification, is in proportion to the respective rates for service. Instances even occur where for a class of consumers in one municipality, the average costs per kilowatt-hour are substantially lower than for the same class in another municipality, even though the rates are higher.

**COST OF ELECTRICAL SERVICE TO CONSUMERS
IN MUNICIPALITIES SERVED BY
THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO**

DOMESTIC SERVICE

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE TOTAL KILOWATT-HOURS SOLD FOR DOMESTIC SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER KILOWATT-HOUR

1.6 TO 2.9 CENTS

3.4 PER CENT

3.0 CENTS OR MORE

0.1 PER CENT

COMMERCIAL LIGHT SERVICE

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE TOTAL KILOWATT-HOURS SOLD FOR COMMERCIAL LIGHT SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER KILOWATT-HOUR:

2.0 TO 3.9 CENTS

3.3 PER CENT

4.0 CENTS OR MORE

0.1 PER CENT

POWER SERVICE SUPPLIED BY MUNICIPALITIES

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE AGGREGATE HORSEPOWER SOLD FOR POWER SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER HORSEPOWER PER YEAR

\$30 OR MORE

0.1 PER CENT

With respect to domestic service, for example, instances may be observed where two municipalities have identical prices or rates for domestic service, but the average cost per kilowatt-hour to the consumer varies by as much as 50 per cent or more. Such variations are due principally to differences in the extent of utilization of the service for the operation of electric ranges, water heaters and other appliances, an indication of which is afforded by the statistics of average monthly consumption.

In the case of power service, average unit costs are still less reliable as an indication of the relative rates for service in different municipalities. In the case of hydro-electric power supplied to industries at cost, the rate schedules incorporate charges both for demand and for energy consumption, and thus, although the quantity of power taken by a consumer—that is, the demand as measured in horsepower—is the most important factor affecting costs and revenues, it is not the only one. The number of hours the power is used in the month or year—which, in conjunction with the power, determines the energy consumption, as measured in kilowatt-hours—also affects the costs and revenues. Consequently, in two municipalities charging the same rates for power service, the average cost per horsepower to the consumer will vary in accordance with the consumers' average number of hours use of the power per month. A greater average energy consumption per horsepower increases the average cost per horsepower and decreases the average cost per kilowatt-hour to the consumer, and *vice versa*.*

*In view of the fact that the data of Statement "D" have been misinterpreted in the making of certain comparisons as to the cost of electricity in various territories, it is desirable to add a word of caution respecting their significance. Essentially, the average cost or revenue per kilowatt-hour is *not a criterion of rates* even with similar forms of rate schedules and for the same class of service. Particularly is this true when revenues and consumptions of all classes of service and of all kinds of rate schedules, are indiscriminately lumped together in order to deduce a so-called "average cost or rate per kilowatt-hour" for all services.

In one community rates for each class of service, and the cost to every consumer in each class for any given service and consumption, may be substantially higher than in another community, and yet there may be in the former community a lower "average revenue per kilowatt-hour."

EXAMPLE.—Assume sales of electrical energy by two electric utilities, A and B, in each case 10,000,000 kilowatt-hours.

Class of service	CASE A Higher rates and lower revenues per kilowatt-hour			CASE B Lower rates and higher revenues per kilowatt-hour		
	Energy sales	Rate per kw-hr.	Revenue	Energy sales	Rate per kw-hr.	Revenue
Residence	kw-hr. 1,000,000	cents 4	\$ 40,000	kw-hr. 3,000,000	cents 3	\$ 90,000
Power	9,000,000	1	90,000	7,000,000	0.75	52,500
Total	10,000,000	130,000	10,000,000	142,500
Average revenue.	1.3 cents per kw-hr.			1.425 cents per kw-hr.		

It will be observed that in Case A *the rates* both for residence and for power service are 33 per cent *higher* than in Case B, but the *average revenue* per kilowatt-hour is nearly 9 per cent less.

In this instance, the explanation lies in the *relative quantities* of energy sold to each class. Service to large power consumers entails a smaller capital investment in distribution lines and equipment and lower operating costs per kilowatt-hour delivered, than does service to domestic and to commercial light consumers, and even where the rates for all classes of service are low, produces a smaller average revenue per kilowatt-hour. Consequently, if one electrical utility as compared with another sells a larger proportion of its energy for power purposes, its "average revenue per kilowatt-hour" may easily be lower than that of the other utility even though its rates for every class of service are substantially higher.

Although the derived statistics of Statement "D" are valueless as a means of comparing the *rates* in one municipality with those in another, they nevertheless fulfil a function in affording a general measure of the *economy of service* to consumers in the co-operating Ontario municipalities—an economy that has resulted primarily from the low rates themselves, and secondarily from the extensive use of the service that has been made possible by the low rates.

Actual bills rendered to typical consumers for similar service under closely comparable circumstances constitute the best basis for making comparisons. In researches respecting rates to consumers therefore the actual *rates schedules* of Statement "E" should be employed and not statistics of average revenues per kilowatt-hour, as these are valueless for rate comparisons—and particularly so when all classifications of service are combined.

In any consideration of the relative economies of electrical service in the various municipalities—whether based on the actual rates for service as set forth in Statement "E", or on the derived statistics resulting from the rates and other factors as presented in Statement "D"—full account should be taken respectively of the influence upon costs of such factors as the size of the municipality, the distance from the source of power, the features of the power developments, the sizes and concentrations of adjacent markets for electricity, and the sizes and characters of the loads supplied under the various classifications by the local electrical utility to the consumers.

In Statement "D" account has been taken of the sizes of municipalities by grouping them according to whether they are (i) cities—over 10,000 population; (ii) towns of 2,000 to 10,000 population; or (iii) small towns less than 2,000 population, villages, and suburban areas in townships (which are comparable in respect of conditions of supply to the smaller towns and villages). The populations are also given, and the situation of any municipality with respect to transmission lines and power supplies may be ascertained by consulting the maps at the end of the Report.

A feature of the electrical service in Ontario municipalities served by The Hydro-Electric Power Commission is the strikingly large average annual consumption per domestic consumer. Of the 94 cities and towns with populations of 2,000 or more—in which over 85 per cent of the domestic consumers of the undertaking are served—no less than 93 have an average annual consumption per domestic consumer in excess of 1,000 kilowatt-hours; of these, 77 have an average annual consumption per domestic consumer in excess of 1,500 kilowatt-hours, 51 in excess of 2,000 kilowatt-hours, and 12 in excess of 3,000 kilowatt-hours. In addition 128 smaller urban municipalities have an average annual consumption per domestic consumer exceeding 1,000 kilowatt-hours, including 31 in excess of 2,000 kilowatt-hours.

The high average consumption for domestic service results essentially from the policy of the undertaking in providing service "at cost"; the rate schedules designed according to this principle automatically encourage liberal use of the service. Under the standard rate schedules employed by Ontario municipalities, follow-up rates of 0.8 to 1.2 cents (less 10 per cent) are in common use, and as a rule even where the higher initial rates per kilowatt-hour obtain, it is only necessary for the domestic consumer to reach a monthly charge of from \$2.00 to \$3.00 to obtain the benefit of a follow-up rate of 1.8 cents net or less. The cost of electric cooking is thus within reach of most of the domestic consumers in Ontario. Electric water heating is also encouraged by low flat rates for continuous heaters and by installation of equipment without capital cost to the consumer. In 1941, war conditions made necessary the suspension of new installations for water heating.

STATEMENT

Statistics Relating to the Supply of Electrical Energy to Consumers
For Domestic Service, for Commercial Light Service

STATEMENT

Statistics Relating to the Supply of Electrical Energy to Consumers

For Domestic Service, for Commercial Light Service

Group III—SMALL TOWNS (less than 2,000 population).

NOTE—The power used in the smaller places and rural districts is, and possibly must always be, a relatively small proportion of the power distributed by the Commission. Thus, the power used by the small municipalities in the following group, which includes small towns, villages and certain suburban areas in townships, is less than 10 per cent of the power distributed by the Commission to Ontario municipalities. This relatively small proportion of the total power,

and for Power Service during the year 1945

VILLAGES AND SUBURBAN AREAS

however, exerts upon the economic life of the Province a most beneficial influence. It should further be appreciated that about 35 per cent of these municipalities obtain their power, not from Niagara, but from relatively small water-power developments throughout the Province, or from purchased power. The net cost per kilowatt-hour given in the table is the cost inclusive of all charges. Consult also introduction to Statement "D", page 310.

STATEMENT "E"

Cost of Power to Municipalities and Rates to Consumers for
Domestic Service—Commercial Light Service—Power Service
in Ontario Urban Municipalities Served by
The Hydro-Electric Power Commission
for the year 1945

In Statement "E" are presented the rate schedules applicable to consumers for domestic service, for commercial light service and for power service in each of the co-operating municipalities receiving service at cost through The Hydro-Electric Power Commission.* The cost per horsepower of the power supplied at wholesale by the Commission to the municipality, an important factor in determining rates to consumers, is also stated.

Cost of Power to Municipalities

The figures in the first column represent the total cost for the year of the power supplied by the Commission to the municipality, divided by the number of horsepower supplied. Details respecting these costs are given in the "Cost of Power" tables relating to the systems, as presented in Section IX, and an explanation of the items making up the cost of power is given in the introduction to that Section.

Rates to Consumers

The Power Commission Act stipulates that "The rates chargeable by any municipal corporation generating or receiving and distributing electrical power or energy shall at all times be subject to the approval and control of the Commission"†. In accordance with the Act and in pursuance of its fundamental principle of providing service at cost, the Commission requires that accurate cost records be kept in each municipality, and exercises a continuous supervision over the rates charged to consumers.

At the commencement of its operations, the Commission introduced scientifically-designed rate schedules for each of the three main classes into which electrical service is usually divided, namely: residential or domestic service, commercial light service, and power service, and the schedules in use during the past year are presented in the tables of this statement.

*Except townships served as parts of rural power districts, for which consult Section IV.
†R.S.O. 1937, Ch. 62, Sec. 89.

Domestic Service: Domestic rates apply to electrical service in residences, for all household purposes, including lighting, cooking and the operation of all domestic appliances.

During the past few years most of the urban municipal utilities have further simplified the domestic rate structure by abolishing the service charge, and making a suitable adjustment in the first consumption rate. Where the service charge is retained at 33 and 66 cents gross per month the charge of 33 cents per month per service is made when the permanently installed appliance load is under 2,000 watts, and the charge of 66 cents per month when 2,000 watts or more.

Commercial Light Service: Electrical energy used in stores, offices, churches, schools, public halls and institutions, hotels, public boarding-houses, and in all other premises for commercial purposes, including sign and display lighting, is billed at commercial lighting rates.

Water-Heater Service: For all consumers using continuous electric water heaters, low flat rates are available consisting of a fixed charge per month dependent on the capacity of the heating element and the cost of power to the municipal utility. Such heaters are so connected that the electrical energy they consume is not metered. For new installations the necessary equipment, including heater, thermostat, efficient insulation for water-storage tank, and wiring, is installed by a large number of municipal Hydro utilities, without capital cost to the consumer.† The installation of new water-heating services was suspended during the war.

Power Service: The rate schedules given for power service in Statement "E" are those governing the supply of power at retail by each of the local municipal utilities. The Commission serves direct, certain large power consumers under special contracts, on behalf of the systems of municipalities.

The rates for power service, as given in the tables, are the rates for 24-hour unrestricted power at secondary distribution voltage. For service at primary distribution voltage the rates are usually five per cent lower than those stated. In municipalities where load conditions and other circumstances permit, lower rates are available for "restricted power", discounts additional to those listed in the table being applicable.

The service charge relates to the connected load or to the maximum demand, as measured by a 10-minute average peak, where a demand meter is installed. The prompt payment discount of 10 per cent on the total monthly bill is given for settlement within 10 days.

Under the tabulation of rates for power service there is a column headed "Basis of rate 130 hours' monthly use of demand." This column shows approximately the net annual amount payable for a demand of one horsepower, assuming a monthly use of 130 hours, which includes 30 hours' use each month at the third energy rate. Broadly, the figures in this column serve to indicate approximately the relative cost of power service in the different municipalities listed.

†In addition, the municipal Hydro utilities supply booster water-heating equipment to furnish extra requirements beyond the capacity of the continuous heater; current for the booster heater is measured and charged for at the regular rates.

STATEMENT

Cost of Power to Municipalities and Rates to Consumers for
for the Year 1945, in Urban Municipalities

APPENDIX I

GENERATING STATIONS IN NORTHERN ONTARIO

**Operated by The Hydro-Electric Power Commission of Ontario
on Behalf of the Province in the case of the
Northern Ontario Properties**

In the Annual Report for 1944 the list of generating stations published did not include the generating stations in the Timiskaming district, which were acquired by the Commission in December 1944. The following list includes all stations operated by the Commission as parts of the Northern Ontario Properties.

The generating stations are grouped under the districts to which they belong and particulars are given of the hydraulic features of the developments, the turbines, the generators, the exciters and the step-up and step-down transformers. Transmission line mileage is route or structure mileage not circuit mileage.

Abbreviations

hp	horsepower
kw	kilowatts
kva	kilovolt-amperes
..	kilovolts	
ft	foot or feet
rpm	revolutions per minute

The generating stations of the Commission are all water power developments and are listed as encountered ascending the respective rivers and tributaries. The Abitibi district of the Northern Ontario Properties and four generating stations of the Timiskaming district operate at 25 cycles. Other northern plants operate at 60 cycles, including the generating stations of the Thunder Bay system which supply power to the Rainy River district and the Longlac mining area.

NOTE:—A list of generating stations operated by The Commission on behalf of municipalities comprising the Southern Ontario and Thunder Bay Systems was published in the Thirty-seventh Annual Report.

NORTHERN ONTARIO PROPERTIES

GENERAL—Held and operated by The Hydro-Electric Power Commission in trust for the Province of Ontario. Six districts serve mining areas and municipalities in northern Ontario.

The *Abitibi district* comprises the area that can be served from a 132 kv transmission line extending from the Abitibi Canyon power development to Sudbury. Power at 25 cycles is transmitted from developments on the Abitibi river to Northern Ontario mining districts and the International Nickel Company.

The *Timiskaming district* comprises the drainage basins of the Matabitchuan river, the Montreal river (Timiskaming) and that portion of the Mattagami river basin south of Smooth Rock falls. There are eight hydro-electric generating stations in this district and one hydro-pneumatic plant which produces compressed air for commercial use in the Cobalt area. These properties were purchased by the Commission from the Northern Ontario Power Company in 1944.

The *Sudbury district* serves the territory adjacent to the city of Sudbury, including the mining area known as Sudbury Basin. Power is obtained from developments on the Wanapitei and Sturgeon rivers, respectively acquired by The Commission from the Wahnapitae Power Company in April 1930, and from the Abitibi Power and Paper Company Limited in August, 1937.

The *Nipissing district* includes municipalities lying immediately to the east of lake Nipissing. Power is obtained from developments on the South River. Power rights and plant formerly owned by Nipissing Power Company, controlled by Electric Power Company, Limited. Commission assumed control March, 1916, when the latter company and all its subsidiaries were acquired by the Ontario Government.

The *Patricia district* combines the Patricia and St. Joseph districts. The former was established to supply power to the Red Lake mining district. Power is obtained from a development on the English river. The latter was established to supply power to Central Patricia and Pickle Crow Mining Companies. Power is obtained from a development on the Albany River.

The *Rainy River district* serves the Steep Rock iron mines by a transmission line 120 miles long, west of Port Arthur. Power is obtained from developments on the Nipigon river of the Thunder Bay system.

TRANSMISSION LINES—132 and 110 kv = 906.27 miles, 44 kv = 588.55 miles, 26.4—11 kv = 409.50 miles.

TRANSFORMER STATIONS—Total capacity in 58 stations operated by the Commission = 558,592 kva as follows: 14—step-up 283,300 kva; 32—step-down 252,975 kva.

ABITIBI DISTRICT

Abitibi Canyon Generating Station

Situated on the Abitibi river approximately seventy miles north of Cochrane. Formerly property of the Ontario Power Service Corporation. Commission assumed control April, 1933, and completed installation of two generators which were placed in operation in May and December, 1933; one unit installed in 1935; final two units installed in 1936. Unit No. 3 was dismantled and re-installed at DeCew Falls, 25-cycle plant. Water conveyed from head works to turbines through steel-plate penstocks, 18 ft in diameter. Normal operating head, 237 ft.

Turbines—Four 66,000 hp Canadian Allis-Chalmers, Francis type, vertical shaft, 150 rpm. Total capacity, 264,000 hp.

Auxiliary Turbine—One 600 hp Canadian Allis-Chalmers, Francis type, 750 rpm.

Generators—Four 48,500 kva Canadian General Electric Company, 3-phase, 25-cycle, 13,800 volts, direct connected to turbines. Total capacity, 194,000 kva.

Auxiliary Generator—One 500 kva Canadian General Electric Company.

Exciters—Four 180 kw, 250 volt, direct connected to generators.

Pilot Exciters—Four 7 kw, 250 volts, direct connected to exciters.

Transformers—Four banks = twelve 16,000 kva Canadian General Electric Company, single-phase, 13.8 to 76.2 kv to operate at 132 kv star connected. Total capacity, 192,000 kva.

TIMISKAMING DISTRICT

Matabitchuan Generating Station

Situated on the Matabitchuan river about two miles upstream from Lake Timiskaming. The main dam is of concrete gravity type backed by rock fill. A canal conveys the waters to a concrete intake, thence through two steel penstocks to the turbines. Original construction in 1910, the turbines were replaced in 1923. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 312 ft.

Turbines—Four 3,300 hp Dominion Engineering Company, Francis type, single runner, spiral casing, horizontal shaft, 600 rpm. Total capacity, 13,200 hp.

Auxiliary Turbines—Two 180 hp A. Doble Company, impulse wheel type, horizontal shaft, 475 rpm.

Generators—Four 1,875 kva Canadian General Electric, 3-phase, 60-cycle, 2,400 volt. Total capacity, 7,500 kva.

Exciters—Two 100 kw Canadian Allis Chalmers, turbine driven, 125 volt.

Transformers—Four banks = four 1,875 kva Canadian Westinghouse, 3-phase, 2.4 to 44 kv. Total capacity 7,500 kva.

Upper Notch Generating Station

Situated on the Montreal river about 10 miles upstream from lake Timiskaming. Power house and headworks integral with dam. Constructed in 1930. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 48 ft.

Turbines—Two 6,500 hp Allis-Chalmers, Francis type, vertical shaft, 125 rpm. Total capacity 13,000 hp.

Generators—Two 6,500 kva Swedish General Electric, 3-phase, 25-cycle, 11,000 volt. Total capacity 13,000 kva.

Exciters—Two 94 kw Swedish General Electric, direct connected to generators, 125 volt.

Transformers—One bank = three 4,500 kva English Electric, single-phase, 11 to 63.5 kv for operation 110 kv star connected. Total capacity, 13,500 kva.

Fountain Falls Generating Station

Situated on the Montreal river about 16 miles upstream from lake Timiskaming. Power house and headworks integral with dam. Canal excavated in left bank conveys waters to intake. Constructed in 1914. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 30 ft.

Turbines—Two 1,500 hp I.P. Morris, Francis type, vertical shaft, 150 rpm. Total capacity 3,000 hp.

Generators—Two 1,250 kva Swedish General Electric, 3-phase, 60-cycle, 11,000 volt. Total capacity 2,500 kva.

Exciters—Two 52 kw Swedish General Electric, motor driven, 125 volt, 1,150 rpm.

Transformers—Power is transmitted at generator voltage.

Hound Chute Generating Station

Situated on the Montreal river 20 miles upstream from lake Timiskaming. Concrete dam with spillway section. Intake and power house an integral unit some 1,400 feet south of dam. Water is conveyed through canal to intake. Constructed in 1910. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 32 feet.

Turbines—Four 1,335 hp William Kennedy, Francis type, vertical shaft, 150 rpm. Total capacity, 5,340 hp.

Auxiliary Turbines—Two 100 hp, William Kennedy, Francis type, vertical shaft, 500 rpm. Total capacity, 200 hp.

Generators—Four 875 kva Swedish General Electric, 3-phase, 60-cycle, 11,000 volt. Total capacity, 3,500 kva.

Exciters—Two 60 kw Swedish General Electric, turbine driven, 110 volt; one 75 kw Siemens Electric, motor driven, 110 volt, 900 rpm.

Transformers—Power is transmitted at generator voltage.

Indian Chute Generating Station

Situated on the Montreal river 10 miles upstream from the town of Elk Lake. Concrete dam flanked by concrete spillway. Water conveyed to turbines by two wood-stave pipes. Constructed in 1923. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 45 ft.

Turbines—One 2,250 hp Boving Company; one 2,250 hp William Kennedy; both Francis type, double runner, horizontal shaft, 300 rpm. Total capacity 4,500 hp.

Generators—Two 1,800 kva Canadian Westinghouse Company, 3-phase, 60-cycle, 2,300 volt. Total capacity, 3,600 kva.

Exciters—Two 30 kw Canadian Westinghouse, belt driven, 125 volt, 1,100 rpm.

Transformers—One bank = three 1,500 kva Canadian Westinghouse, single-phase, arranged for 2.2 kv "Y" to 44kv delta operation. Total capacity, 4,500 kva.

Lower Sturgeon (Mattagami River) Generating Station

Situated on the Mattagami river 30 miles downstream from Timmins. Headworks and power house integral part of the concrete dam. Constructed in 1923. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 46 feet.

Turbines—Two 4,000 hp Dominion Engineering Company, Francis type, vertical shaft, 136.3 rpm. Total capacity, 8,000 hp.

Generators—Two 4,000 kva Canadian General Electric, 3-phase, 25-cycle, 2,300 volt. Total capacity, 8,000 kva.

Exciters—Two 58 kw Canadian General Electric, 125 volt, direct connected to generators.

Transformers—Two banks = two 4,000 kva, 3-phase, 2.3 to 44 kv Total capacity, 8,000 kva.

Sandy Falls Generating Station

Situated on the Mattagami river seven miles downstream from Timmins. Concrete dam with spillway section. Intake at left bank with entrances to three penstocks controlled by butterfly valves. Water conveyed to unit No. 1 by a steel penstock and to units Nos. 2 and 3 by wood-stave pipes each provided with a surge tank. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 34 ft.

Turbines—Two 1,200 hp S. Morgan Smith, Francis type, double runner, horizontal shaft, 214 rpm installed in 1911. One 2,500 hp I.P. Morris, Francis type, vertical shaft, 136.3 rpm installed in 1916. Total capacity, 4,900 hp.

Generators—Two 950 kva Canadian Westinghouse, horizontal, one 1,875 kva Canadian General Electric, vertical; all 3-phase, 25-cycle, 12,000 volt, direct connected to turbines. Total capacity, 3,775 kva.

Exciters—Two 30 kw Canadian Westinghouse, 125 volt, direct connected to generators; one 100 kw Canadian General Electric, motor driven, 125 volt, 750 rpm.

Transformers—Power is transmitted at generator voltage to Shumacher transformer station about 7 miles distant.

Wawaitin Generating Station

Situated on the Mattagami river about 16 miles upstream from Timmins. Main dam has two concrete sluiceways both flanked by rock fill sections with concrete core. A canal conveys the water to the intake, thence through wood-stave pipes provided with surge tanks, and finally through steel penstocks, to the turbines. All penstocks have butterfly valve controls. Purchased by the Commission from the Northern Ontario Power Company in 1944. Normal operating head 125 feet.

Turbines—Two 3,450 hp S. Morgan Smith, Francis type, double runner, horizontal shaft, 365 rpm, installed in 1912. Two 4,500 hp S. Morgan Smith, Francis type, vertical shaft, 375 rpm, (one installed in 1913 and one in 1918). Total capacity, 14,900 hp.

Auxiliary Turbines—Two 150 hp, S. Morgan Smith, horizontal shaft, 600 rpm.

Generators—Two 3,750 kw vertical and two 2,500 kw horizontal, Canadian Westinghouse, 3-phase, 25-cycle, 12,000 volt, direct connected to turbines. Total capacity 12,500 kw.

Exciters—Two 70 kw turbine driven, 600 rpm and one 150 kw motor driven, Canadian Westinghouse, 125 volt, 730 rpm.

Transformers—Power is transmitted at generator voltage.

Kirkland Lake Frequency-Changer Station

Situated in Kirkland Lake. This frequency-changer station includes three 25 60-cycle sets. These sets are used to exchange power from the 25- and 60-cycle generating stations of the Timiskaming district. Two sets installed in 1920, the third set installed in 1926. Acquired by the Commission November, 1944.

Motors—1st unit—one 1,125 kva; 2nd unit—one 2,200 kva, General Electric, 3-phase, 25-cycle, 12,000 volt; 3rd unit—one 4,250 kva Swedish General Electric, 3-phase, 25-cycle, 11,000 volt; all 300 rpm. Total capacity, 7,575 kva.

Generators—1st unit—one, 1,250 kva; 2nd unit—2,500 kva General Electric, 3rd unit—one 4,250 kva Swedish General Electric, 3-phase, 60-cycle, 2,300 volt, direct connected to motors. Total capacity, 8,000 kva.

Ragged Chute Hydro-Pneumatic Plant

Situated on the Montreal river (Timiskaming) about 8 miles south of Cobalt between Hound Chute and Fountain Falls generating stations. This plant at present produces compressed air by hydraulic means, which is delivered through steel pipe lines to commercial customers in the Cobalt area.

SUDBURY DISTRICT

McVittie Generating Station

Situated on Wanapitei river, approximately 26 miles from Sudbury. Formerly property of Wahnapiatae Power Company. In operation 1912. Commission assumed control April, 1930. Water conveyed through canal to head works, steel penstocks to turbines. Average operating head 38 ft.,

Turbines—Two 1,800 hp William Kennedy, Francis type, horizontal shaft, 257 rpm. Total capacity, 3,600 hp.

Auxiliary Turbine—One 75 hp William Kennedy, Francis type.

Generators—Two 1,250 kva Canadian General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbines. Total capacity, 2,500 kva.

Exciters—Two 75 kw Canadian General Electric Company, one direct connected to auxiliary turbine, one motor driven.

Transformers—One bank = three 625 kva Canadian General Electric Company, single-phase, 2.3 to 23 kv. Total capacity, 1,875 kva.

Coniston Generating Station

Situated on Wanapitei river, approximately ten miles east of Sudbury. Formerly property of Wahnapiatae Power Company. In operation 1905. Commission assumed control April, 1930. Water conveyed through canal to head works, steel penstocks to turbines. Average operating head, 53 ft.

Turbines—One 1,200 hp, one 1,500 hp, each 300 rpm, Jenckes; one 3,500 hp, 257 rpm, Allis-Chalmers, all Francis type, horizontal shaft. Total capacity, 6,300 hp.

Auxiliary Turbines—One 35 hp, one 70 hp Jenckes, Francis type. Total capacity, 105 hp.

Generators—One 800 kva, one 1,250 kva, one 2,500 kva Canadian General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbines. Total capacity, 4,550 kva.

Exciters—One 25 kw, one 55 kw, turbine driven, one 100 kw, motor driven, Canadian General Electric Company.

Transformers—Two banks = six 800 kva Canadian General Electric Company, single-phase, 2.3 to 23 kv; one 8,000 kva, three-phase, 24 to 110 kv, English Electric Company. Total capacity, 12,800 kva.

Stinson Generating Station

Situated on Wanapitei river, approximately eight miles up stream from Coniston generating station. Formerly property of Wahnapiatae Power Company. In operation 1925. Commission assumed control April, 1930. Water conveyed through canal to head works, steel penstocks to turbines. Average operating head, 52.5 ft.

Turbines—Two 3,500 hp Allis-Chalmers, Francis type, horizontal shaft, 240 rpm. Total capacity, 7,000 hp.

Auxiliary Turbine—One 150 hp Allis-Chalmers, Francis type.

Generators—Two 2,500 kva Canadian General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbines. Total capacity, 5,000 kva.

Exciters—One 100 kva turbine driven, one 100 kva, motor driven, Canadian General Electric Company, 125 volts.

Transformers—One bank = three 1,667 kva Canadian General Electric Company, single-phase, 2.3 to 23 kv. Total capacity, 5,000 kva.

Crystal Falls Generating Station

Situated on the Sturgeon river about ten miles up stream and north of the town of Sturgeon Falls. Formerly property of the Abitibi Power and Paper Company. Commission assumed control in August, 1937. Power house integral part of dam. Normal operating head, 33ft.

Turbines—Four 2,600 hp I.P. Morris, Francis type, vertical shaft, 138.5 rpm. Total capacity, 10,400 hp.

Generators—Four 2,125 kva Westinghouse Electric Company generators, 3-phase, 60-cycle, 2,300 volt, direct connected to turbines.

Exciters—One 68 kw, 125 volt, motor driven, Canadian Westinghouse Company.

Transformers—One bank = three 3,000 kva Canadian Westinghouse Company, single-phase, 2.3 to 22 kv; one bank = one 8,000 kva English Electric Company, 3-phase, 24 to 110 kv. Total capacity, 17,000 kva.

NIPISSING DISTRICT

Nipissing Generating Station

Situated on the South river, about 1½ miles from the village of Nipissing. Formerly the property of Nipissing Power Company. Control assumed by Commission March, 1916. Water conveyed to plant through canal, wood-stave pipe line and steel penstock provided with surge tank. Average operating head, 90 ft.

Turbines—Two 1,250 hp Jenckes Machine Company, Francis type, horizontal shaft, 450 rpm. Total capacity, 2,500 hp.

Generators—One 1,400 kva Canadian Westinghouse Company; one 1,250 kva Swedish General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbines. Total capacity, 2,650 kva.

Exciters—One 17.5 kw Swedish General Electric Company, 115 volts; one 21 kw Canadian Westinghouse Company, 125 volts, direct connected to main generators; one 37½ kw motor driven.

Transformers—One bank = three 900 kva Packard Electric Company, single-phase, 2.3 to 22kv. Total capacity, 2,700, kva.

Bingham Chute Generating Station

Situated on South river, about two miles from Powassan. Constructed by Commission. In operation December, 1923. Water conveyed to plant through wood-stave pipe line. Average operating head, 47 ft.

Turbines—Two 650 hp William Kennedy, Francis type, horizontal shaft, 450 rpm. Total capacity, 1,300 hp.

Generators—Two 450 kva Canadian Westinghouse Company, 3-phase, 60-cycles, 2,200 volts, direct connected to turbines. Total capacity, 900 kva.

Exciters—Two 12.5 kw Canadian Westinghouse Company, direct connected to generators.

Transformers—One bank = three 300 kva Canadian Westinghouse Company, single-phase, 2.2 to 22 kv. Total capacity, 900 kva.

Elliott Chute Generating Station

Situated on South river, approximately $1\frac{1}{2}$ miles up stream from Bingham Chute plant Constructed by Commission. In operation October, 1929. Semi-automatic. Remote controlled from Bingham Chute station. Water conveyed to plant through wood-stave pipe line. Average operating head, 39 ft.

Turbine—One 1,800 hp S. Morgan Smith-Ingليس Company, propeller type, vertical shaft, 327 rpm.

Generator—One 1,800 kva Swedish General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbine.

Exciter—One 22 kw Swedish General Electric Company, direct connected, 125 volts.

Transformers—One bank = three 650 kva English Electric Company, single-phase, 2.3 to 23 kv. Total capacity, 1,950 kva.

PATRICIA DISTRICT

Ear Falls Generating Station

Situated at Ear Falls on the English river. Constructed by Commission. In operation December, 1929. Water conveyed from Lac Seul conservation dam to power house through four wood-stave pipes and two concrete conduits. Normal operating head 36. ft.

Turbines—One 5,000 hp, propeller type, 180 rpm. Dominion Engineering Works; one 5,000 hp, propeller type, 180 rpm, and one 7,500 hp, Kaplan type, 150 rpm. Morgan-Smith-Ingليس; all vertical shaft. Total capacity, 17,500 hp.

Generators—One 5,000 kva, one 6,000 kva Canadian Westinghouse Company; one 4,500 kva Ateliers de Construction Oerlikon, 3-phase, 60-cycles, 6,600 volts, all direct connected to turbines. Total capacity, 15,500 kva.

Exciters—One 65 kw, one 75 kw, and one 5 kw pilot, 125 volt, direct connected, Canadian Westinghouse Company; one 48 kw, 125 volt, Ateliers de Construction Oerlikon, direct connected.

Transformers—One bank = three 750 kva, single-phase, English Electric Company; one bank = three 750 kva, single-phase, Commonwealth Electric Corporation; one bank = three 1,500 kva, single-phase, Moloney Electric Company; one bank = three 2,000 kva, single-phase, Packard Electric Company. Total capacity, 15,000 kva.

Rat Rapids Generating Station

Situated at Rat Rapids at the outlet of lake St. Joseph, on the Albany river. Constructed by Commission. In operation March, 1935. Concrete turbine chamber and generating room substructure. Rock filled timber crib dams. Average operating head, 14.5 ft.

Turbine—One 1,750 hp Dominion Engineering Works, propeller type, vertical shaft, 128.5 rpm.

Generator—One 1,500 kva Canadian General Electric Company, 3-phase, 60-cycles, 2,300 volts, direct connected to turbine.

Exciters—One 32 kw and one 2.5 kw pilot exciter direct-connected, Canadian General Electric Company.

Transformers—One bank = three 333 kva Packard Electric Company, single-phase 6.6 to 22 kv; one bank = three 500 kva Packard Electric Company, single-phase 2.3 to 22 kv. Total capacity, 2,500 kva.

REPORT FOR 1945

OF

The Workmen's Compensation Board
ONTARIO

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
Sessional No. 28, 1946

ONTARIO

TORONTO

Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty.

1946

THE HONOURABLE CHARLES DALEY,
MINISTER OF LABOUR,
PARLIAMENT BUILDINGS,
TORONTO, ONTARIO.

DEAR MR. DALEY,

I have the honour to submit herewith the Report of The Workmen's Compensation Board for the year 1945.

Yours very truly,

WM. MORRISON,
Chairman.

THE WORKMEN'S COMPENSATION BOARD

WILLIAM MORRISON, K.C.
Chairman

DR. D. J. GALBRAITH,
Vice-Chairman

JOHN F. CAULEY,
Commissioner

S. R. JOHNSTON,
Secretary

REPORT FOR 1945
OF
The Workmen's Compensation Board
ONTARIO

Offices:

4th Floor, Canada Life Building,
550 University Ave., Toronto.

TO HIS HONOUR THE LIEUTENANT-GOVERNOR:

The Workmen's Compensation Board begs to submit its Report for the year 1945.

GENERAL REVIEW

The year 1945, as was to be expected, showed a decrease in payroll and accidents as compared with 1944. The payroll for Schedule 1, the collective liability part of the Workmen's Compensation Act, declined from \$1,169,052,000 to \$1,167,802,000, a decrease of less than one per cent. There were 118,220 accidents reported during 1945, a decrease of 4.5 per cent. when compared with the 123,820 reported during 1944.

Benefits Awarded

During 1945 the benefits (compensation, medical aid, rehabilitation, etc.) amounted to \$13,135,938.38, as compared with \$12,485,599.95 awarded during 1944.

Schedule 1 Assessments

The average rate of assessment increased from \$1.02 for each \$100 of payroll to \$1.12. At the end of 1945 there were 29,039 employers under Schedule 1, as compared with 25,001 at December 31, 1944.

Assessments paid for 1945 amounted to \$11,627,981.49 and it is estimated that a further \$1,525,500.00 will be received. The total assessment for 1945, on a provisional basis, is therefore \$13,153,481.49. There was \$40,675.60 received as refunds from various sources and from application of sections by way of penalty and other sources of income. The total receipts for the year (actual and estimated) were \$13,194,155.09.

Schedule 1 Benefits and Charges

The compensation and medical aid for Schedule 1 industries, including estimates for what is still to be awarded for accidents happening during the year, and for prior years' accidents, amounted to \$11,615,925.80. There were other outlays of \$1,216,927.39, being \$552,856.82 charged for administration (including \$1,224.00 credit adjustment of prior years' expenses), \$169,261.38

for other expenses of non-administrative character, \$40,872.83 for mine rescue work, \$317,870.20 grants to accident prevention associations organized under the Act, \$125,367.28 for the Board's clinic, \$11,122.00 for the special arrangements with the Toronto General Hospital and \$1,576.88 for outlays under Section 8 of the Act. The total expenditures and charges for the year, including liability for pneumoconiosis of \$2,311,484.43, were \$12,852,851.19.

Schedule 2 and Crown Industries

Schedule 2 industries are those in which the employer is individually liable for accidents to his workmen. Dominion Crown cases under the Act by Dominion legislation, and Provincial Crown cases referred to the Board for adjustment, are included.

The total amount awarded in Schedule 2 industries and Crown cases during 1945 was \$2,555,764.16, as compared with \$2,278,795.00 during 1944. Of this \$2,555,764.16, \$1,445,194.99 was for Dominion Crown cases and \$77,394.80 was for Provincial Crown cases.

Administration Expenses

The gross expenses of the Board were \$851,553.24, of which \$169,261.38 was for non-administrative services, that is those services which, mainly, medical and investigatory, are in the nature of benefits rather than administrative. The gross administration expenses are therefore \$682,271.80, of which \$554,080.82 has been charged to Schedule 1 and constitutes 4.77 per cent. of the benefits awarded in Schedule 1.

The Accident Fund

The Accident Fund is comprised of Schedule 1 funds, and includes Current Funds out of which temporary payments of compensation, medical aid, administration expenses, clinic and special hospital items are paid, the Silicosis Account, Pension Fund, Disaster Reserve, Second Injury Fund, Compensation Deferred, Investment Reserve, Contingent Reserve, and Operating Reserve, as well as funds to complete claims (including pneumoconiosis claims) for which final settlement has not been made.

The total amount held unexpended or due is \$57,246,404.12 and is comprised of investments of \$55,546,821.71, \$51,648.89 cash in banks, and \$1,674,933.52 receivable (including \$1,525,500.00 adjustments on 1945 assessments) less \$1,364,340.23 bank overdraft.

Pension Fund

The purpose of the Pension Fund is to take care of future payments of pensions which have already been awarded. Actuarial tables, embodying the contingencies of death and remarriage, have been compiled to show for each age and kind of pension the average amount (sometimes referred to as capitalized value) necessary to complete pension payments. When a pension is awarded this average amount is transferred from the Current Funds to the Pension Fund. All payments of pensions are made from the Pension Fund. Since the amount transferred in any one instance is the average amount required, no re-transfer is made should a residue be left at the expiry of the pension, nor is any additional transfer made should the amount be exhausted before expiry of the pension.

The balance in the fund at the commencement of 1945 was \$54,822,620.99. During the year \$3,902,566.96 was transferred for pension awards, \$1,781,748.88 interest was added and \$3,211,351.78 was paid for pensions. The balance in the fund at the end of the year was \$57,295,585.05.

Disaster Reserve

The Disaster Reserve is a fund set aside under the provisions of Section 101 (2) of the Act to meet any unforeseen disaster or other circumstance which might unduly burden the employers in any class of industry. The amount held for this purpose at December 31, 1945 was \$549,962.22.

Second Injury Fund

The Second Injury Fund has been established to equalize the burden of added loss from second injuries. The amount held in this fund, December 31, 1945, was \$60,380.30.

Investment Reserve

The Investment Reserve is made up of excess over book values when investments are sold, and of interest received but not allocated to deferred obligations: it is in the nature of a security reserve to protect the accident fund in the case of default on bond or interest payments and to guard against loss by reason of falling interest rates. The Reserve, December 31, 1945, amounted to \$1,084,309.93.

Reserve for Compensation Deferred

The funds under "Compensation Deferred" comprise compensation moneys held for claimants, payment being deferred to a future time by reason of the claimant's being a minor or for other reason. The amount so held as at December 31, 1945 was \$220,869.08.

Silicosis Account

This reserve is to pay claims for silicosis in Clause 5 which have been made but in which payments have not been made in full. The amount held is \$3,657,738.25.

Reserve to Complete Claims

All continuing claims were evaluated at the end of the year and the amount estimated to bring them to finality. Allowance was made for unreported and unadjusted claims. The total amount as at December 31, 1945 was \$4,244,987.65.

Reserve for Pneumoconiosis

The reserve for pneumoconiosis is to pay incurred losses for pneumoconiosis not already paid. The claims have been reported to the Board. The sum in reserve is \$2,311,484.43.

Contingent Reserve

Besides the Reserves and Estimates set up and already described, the Board, at the end of 1945, has allocated to a Contingent Reserve, funds to take care of certain expected contingencies. At various times in the past the amount necessary for these contingencies has been known as "Surplus" or "Operating Reserve" but was never either in the true sense of the words. A Surplus is something over and above what is required to meet contingencies and an

Operating Reserve is a floating amount having to do with the amount of cash required to meet obligations presently due or soon to be due.

The amount of Contingent Reserve as at December 31, 1945, was \$5,141,598.85, made up of the following items:

For Artificial Appliances	\$ 292,790.37
For Medical Aid in Pension Cases	995,487.24
For Medical Aid in Non-Pension Cases	117,116.15
For Additional Disability and Reopened Claims	936,929.17
For Accruing Industrial Diseases	1,048,189.51
For Increase in Death Pensions	146,395.18
For Pensions on Wage Loss	585,580.75
For Rehabilitation	29,279.04
For Investment Reserve	146,395.18
For Disaster Reserve	702,696.88
For Second Injury Fund	140,539.38
Total	\$5,141,598.85

Under the Act artificial appliances are provided for the life of the workman and this means, generally, several appliances for the one workman. Pensioners require medical aid for varying periods subsequent to pensioning, and sometimes for life. Workmen, not pensioned, also require medical aid, especially when their claims are reopened. On reopening claims payment of compensation must be made; and disabilities sometimes become greater with advancing age. There is an accruing burden of cost in industrial diseases, especially for pneumoconiosis and silicosis cases. Some pensions have been granted on wage loss and at some future date will be pensioned on the basis of disability. Future payments will be made for past cases for rehabilitation.

The sums for Investment Reserve, for Disaster Reserve and for Second Injury Fund represent mainly those amounts which will be deducted and transferred to the various Reserve Accounts when the assessment on 1945 payroll has been fully ascertained.

Operating Reserve

The Operating Reserve as explained above is that sum required to make provision for cash expenditures, as assessments are not payable at once at the beginning of the year, and in one sense is the surplus after all contingencies are considered. This Operating Reserve is calculated at 10% of assessments or \$1,315,348.15.

From Commencement of Act

From January 1, 1915 when the Act first went into effect there have been 2,075,626 accidents reported to the Board, and \$199,858,265.60 awarded as benefits.

Dated at Toronto this 11th day of March, 1946.

WILLIAM MORRISON, Chairman.

D. J. GALBRAITH, Vice-Chairman.

J. F. CAULEY, Commissioner.

AUDITOR'S CERTIFICATE

1st March, 1946.

THE WORKMEN'S COMPENSATION BOARD OF ONTARIO,

Toronto, Ontario.

Dear Sirs:

I have completed a continuous audit of the books of the Board for the year ended 31st December 1945, and have obtained all the information and explanations I have required.

In my opinion, the attached statements of Receipts and Payments, Schedules No. 1 and No. 2, truly and fairly set forth the cash transactions of the Board for the year ended 31st December 1945.

Bank balances at the close of the period have been verified by direct communication with the Board's bankers.

The amortized book value of the investments held by the Board at 31st December 1945, was \$59,432,531.56, and I confirmed by a physical examination the securities representing these investments as at that date. Debenture principal due and unpaid at 31st December 1945, amounted to \$70,635.20.

Respectfully submitted,

ALEXANDER G. CALDER,

Chartered Accountant.

PRINTED AND PUBLISHED BY
T. E. BOWMAN, PRINTER TO THE KING'S MOST EXCELLENT MAJESTY

1945

REPORT OF THE
Ontario Veterinary College

TO THE HONOURABLE THOMAS L. KENNEDY,
Minister of Agriculture.

Sir:—

I have the honour to present herewith the following report of the Ontario Veterinary College for the year extending from April 1st, 1944, to March 31st, 1945.

Convocation

At the Convocation of the University of Toronto held on May 12th, 1944, the Chancellor conferred the degree of Bachelor of Veterinary Science (B.V.Sc.) on nineteen graduates.

Commencement

The Annual Commencement and Presentation of Prizes took place on November 17th, 1944, in the Assembly Hall of the College. The Honourable T. L. Kennedy, Minister of Agriculture, presided. In the course of his address he expressed satisfaction that the College was maintaining a high standard of qualification for graduation in keeping with other learned sciences. He also referred to the leadership given in research work and hoped that continued progress would be made in the prevention and control of animal diseases.

Student Enrolment

A total of 113 were enrolled. As in former years, students were in attendance from all the Provinces of Canada, also from other parts of the British Commonwealth and from the United States.

The Teaching and Executive Staff

Admission Requirements and Course of Study

The prescribed course of study qualifies for the degree of Bachelor of Veterinary Science (B.V.Sc.) and extends over a period of five years. The requirements for admission come under the jurisdiction of the University of Toronto. In order to gain entrance, applicants must furnish Junior and Senior Matriculation certificates, or Junior Matriculation certificate and a certificate covering the satisfactory completion of the first year in a degree course at a recognized Agricultural College or University. The final examinations for graduation likewise come under the jurisdiction of the Senate of the University, and the examiners are appointed by the University. Graduate courses leading to the advanced degrees of Master of Veterinary Science (M.V.Sc.), Doctor of Veterinary Science (D.V.Sc.) and Diploma in Veterinary Public Health (D.V.P.H.) are available under the School of Graduate Studies of the University.

A detailed outline of the entrance requirements and the course of studies is contained in the College Calendar, which is available to those interested. In addition to the regular undergraduate courses outlined in the calendar, special short courses were provided as follows:

Public Health Course

A special course of study in Public Health work was given Senior students by the Director and Staff of the School of Hygiene and Connaught Laboratories of the University of Toronto. The course included the following subjects:

Public Health Administration.
Principles of Sanitation.
Communicable Diseases.
Food-Borne Infections.
Interpretation of Laboratory Findings.
Bacteriology of Enteric-Infections.
Human Parasitic Infections.
Inspection of Water Supplies.
Inspection of Sewage Disposal.
Inspection of Restaurants and Bottling Plants.
Industrial Hazards in Meat Packing Industry.
Ventilation and Fumigation.
Dairy Sanitation.

Special Course for Fur Breeders

During the month of June a course was provided for those engaged in the rearing of fur-bearing animals. About two hundred and seventy-five attended. The course was arranged in co-operation with the Ontario Fur Breeders' Association and comprised lectures and demonstrations on the following subjects:

Pearl Platinum Foxes.
Scientific Methods in Fur Animal Industry.
Norwegian Platinum Fox.
Government Fur Grading.
Silver Fox Breeding.

Fantasy in Fur.
Mating Problems and Practices.
Mink Breeding.
Mutation Mink.
Genetic Principles in Breeding Mutation Mink.
Mink Breeding Problems.
Discussion of Principles and Practices in Fur Breeding.

Refresher Course for Veterinarians

During the month of July, a special course for graduate veterinarians was provided in co-operation with the Ontario Veterinary Association. There were approximately 175 in attendance and the programme embraced the following topics:

Sulphonamide Preparations and Their Value in Veterinary Medicine.
The Determination of Sex.
A System of Bookkeeping for the Veterinarian.
Foetal Monstrosities with Reference to their Clinical Aspects.
Treatment and Control of Parasitism in the Horse.
Acidophilus Milk Therapy in Calf Scours.
Acetonemia and its Treatment.
The Use of Vaccines in the Treatment of Acute and Chronic Mastitis.
Routine Blood Testing for Bang's Disease.

Clinical Service

This service is provided for veterinarians and live stock owners where clinical assistance is desired. Animals of all classes were admitted for diagnosis, medical and surgical treatment as follows:

Horses:—The cases submitted were largely surgical in character and included cases of poll-evil, fistulous withers, roaring, hernia, cryptorchidism, dental disease, tumours, hoof disease, lameness, skin diseases, retention of after-birth, dystokia, nymphomania, and leukorrhœa. The diagnosis of pregnancy was also conducted.

Cattle:—Many of the cattle cases were of an unusual character and frequently represented herd conditions. The predominating diseases included sterility, mastitis, calf scours, calf pneumonia, necrotic stomatitis, nutritional diseases, retention of the after-birth, dystokia, hypocalcemia and acetonemia.

Swine:—These comprised surgical cases and diseases prevailing in litters and herds. The surgical cases comprised cryptorchidism, scrotal and umbilical hernia. Among the diseases affecting litters and herds were gastro-enteritis, pneumonia, anemia and other nutritional diseases, parasitic diseases, erysipelas, hemorrhagic septicemia and necrotic enteritis.

Sheep:—Many of the sheep cases were parasitic infestations more especially stomach worm disease. Other conditions comprised nutritional diseases, pregnancy disease, stiff lamb disease, tetanus following docking and castration.

Small Animals:—These comprised dogs and cats submitted for surgical attention such as spaying. A large number of diseased conditions were also treated including digestive disturbances, distemper, renal diseases, respiratory diseases, mange and other skin diseases.

Fur Bearing Animals:—The diseases of fur bearing animals and general problems of the fur breeding industry were given the required attention by the Provincial Zoologist. Food toxemia has been the main cause of loss on fox and mink ranches. Out of every one hundred carcasses submitted for laboratory examination,

evidence of food toxemia was revealed in thirty-two cases. There has been considerable interest manifested during the past year in the rearing of Angora and Chinchilla rabbits.

Extension Work Relating to Bang's Disease

In co-operation with practising veterinarians and live stock owners the work relating to the control of Bang's disease in cattle (Contagious Abortion) has been further expanded under the following plans.

1. *Testing of Individual Herds:*

Under this plan 48,493 cattle were tested of which 34,160 were Negative, 10,805 were Positive, 3,528 Doubtful.

2. *Testing of Dairy Cattle for Export:*

These tests were made to facilitate the exporting of dairy cattle to the United States and comprised 7,736 cattle, of which 7,262 were Negative, 260 Positive, 214 Doubtful.

3. *Supervised CalfhooD Vaccination:*

Under this plan, vaccination was undertaken in 4,226 herds. A total of 52,603 calves between four and eight months of age were vaccinated and check tested 30 days after being vaccinated.

4. *Testing of Herds in Prescribed Areas:*

Under this plan 12 areas have been established as follows:

1. *Schomberg Area:*—Includes 287 herds comprising 3,769 cattle.
2. *Northumberland Area:*—Includes 189 herds comprising 2,888 cattle.
3. *Stormont Area:*—Includes 62 herds comprising 1,184 cattle.
4. *Maxville Area:*—Includes 52 herds comprising 1,502 cattle.
5. *Vars Area:*—Includes 41 herds comprising 1,316 cattle.
6. *Durham Area:*—Includes 39 herds comprising 480 cattle.
7. *Carp Area:*—Includes 77 herds comprising 1,798 cattle.
8. *Orono Area:*—Includes 18 herds comprising 171 cattle.
9. *Almonte Area:*—Includes 15 herds comprising 185 cattle.
10. *Brockville Area:*—Includes 10 herds comprising 309 cattle.
11. *Vaughan Area:*—Includes 73 herds comprising 1,327 cattle.
12. *Appleton Area:*—Includes 166 herds comprising 2,787 cattle.

Research and Investigation

During the year quite a little time was devoted to research and investigational work. Some of the problems dealt with are briefly summarized herewith.

Mastitis in Cattle:—This disease has formed the major project of the year. Hundreds of samples of milk have been cultured and the organisms responsible for the infection identified. Herd bacterins have been prepared in many cases. Recently penicillin has been employed in the treatment of this serious disease with encouraging results.

Haemorrhagic Septicemia in Swine:—This important disease of swine has received further attention both from the standpoint of diagnosis and treatment. A simple and reliable laboratory method of diagnosis has been developed which has proved to be valuable in the recognition of this disease.

Salmonellosis in Pigs:—An investigation was made into this disease. It is apparently widespread in the Province and the cause of considerable loss. Bacterins have proved to be of definite value in treatment.

Poisoning in Swine:—A mysterious disease among some forty pigs all of which died was found to be due to the presence of Ceresan in the feed. This substance having been used to disinfect the grain prior to sowing in the spring.

Poultry Diseases Laboratory Service

This consists chiefly in the routine examinations of diseased poultry sent or brought to the laboratory. Only one serious outbreak of disease was encountered during the past year. This was a flock of 225 Barred Rock hens. In less than three days fifty-four birds died suddenly without any previous symptoms of sickness being observed. From the livers, hearts and intestines of the birds examined a hemolytic

streptococci was isolated. No deaths occurred in the flock after the administration of sulphanimide. Omphalitis (navel ill) was encountered quite frequently, and in many cases was found to be associated with *S. pullorum* infection. Advice is always given regarding the handling of a flock to prevent the spread of infectious disease.

The number of specimens received during the past year totalled 3,269 and the diseases and conditions found are shown in the following list.

Routine Examinations of Poultry Specimens

DISEASE OR CONDITION	April 1944	May 1944	June 1944	July 1944	Aug. 1944	Sept. 1944	Oct. 1944	Nov. 1944	Dec. 1944	Jan. 1945	Feb. 1945	Mar. 1945	TOTALS

Biological Laboratory Service

Preparation and Distribution of Antigen: 5,316 test doses of *Brucella abortus* antigen were distributed to veterinarians for the agglutination test for Bang's disease.

Preparation and Distribution of Fowl Pox Vaccine: 252,350 doses of vaccine were prepared and distribution for the vaccination of poultry by the *Johnson Stick Method* for the prevention of Fowl Pox.

Agglutination Tests: During the year 31,694 blood samples were received to be submitted to the agglutination test for Bang's disease. Included in this number are samples from cattle intended for export or exhibition purposes, from calves in

herds under our calfhood vaccination plan, and from cattle in herds in prescribed areas. The results of these tests are shown in the following table:—

	NEGATIVE	POSITIVE	DOUBTFUL	TOTAL
<i>Routine Samples</i>	31,160	10,805	3,233	48,198
<i>Export or Exhibition Samples</i>	7,262	260	211	7,736
<i>Calfhood Vaccination Samples</i>	1,419	16,844	695	18,938
<i>Prescribed Area Samples</i>	8,847	132	193	9,772
Totals	51,718	28,341	4,635	84,694

Routine Examination of Milk and Cream Samples:—Routine and investigational tests were made on approximately 600 samples of milk and cream submitted to the laboratory from time to time. These tests included fat and total solids determinations, standard plate counts, coliform, reductase, phosphatase and various mastitis tests.

* * * * *

During the year a large volume of correspondence has received attention, together with personal interviews with those seeking advice regarding their animals. The demand for veterinary extension, investigation and research work has noticeably increased. This is particularly evident in connection with the adoption of calf vaccination as an aid in the control of Bang's disease in cattle. With the increased demand for these services the entire staff has been exceedingly busy and have performed their duties faithfully. Efforts have been directed towards maintaining a high standard of efficiency and all expenditures have been carefully checked and kept at a minimum cost.

All of which is respectfully submitted.

C. D. MCGILVRAY,
Principal.

Guelph, Ontario,
March 31st, 1945.

PROGRESS REPORT ON PLANS FOR THE CONTROL OF BANG'S DISEASE

C. D. McGilvray and J. S. Glover

The following plans were inaugurated during the year 1938 to assist in the detection and control of Bang's Disease in co-operation with live stock breeders and practising veterinarians.

- Plan A. — Routine testing of individual herds.
- Plan B. — Supervised testing of herds in prescribed areas.
- Plan C. — Supervised calfhood vaccination.

Plan A. — Routine Testing of Individual Herds

This plan is available for the blood testing of individual herds by practising veterinarians. The blood samples are submitted by the veterinarian to be tested by the College laboratory staff. Provision is also made for the official testing of cattle for export to the United States. The tests made under this plan are as follows:

	Negative	Positive	Doubtful	Total
Routine Tests	184,547 (77%)	40,817 (17%)	13,052 (6%)	= 238,416
Export Tests	33,702 (93%)	1,530 (4%)	1,090 (3%)	= 36,322
Totals	218,249 (80%)	42,347 (15%)	14,142 (5%)	= 274,738

Plan B. — Supervised Testing of Herds in Prescribed Areas.

This plan is available where a group of ten or more owners occupying contiguous premises in a prescribed area submit a petition to have their herds tested under the supervision of a registered veterinarian. The Department pays the veterinarian for taking and submitting blood samples at the rate of twenty cents for each animal tested and in addition provides the test charts and sterilized vials and makes the required agglutination tests free of charge.

All cattle over twelve months of age are required to be tested at intervals of from sixty to ninety days. Reactors must be earmarked and segregated or removed to an abattoir for slaughter, and the premises cleaned and disinfected. When a herd passes three negative tests within a year the owner is then expected to take the necessary steps to have the herd tested for listing under the regulations of the Health of Animals Branch.

Under the foregoing arrangement ten prescribed areas have been established as follows:

1. *Schomberg Area*: Includes 287 herds comprising 3,769 cattle.
2. *Northumberland Area*: Includes 189 herds comprising 2,888 cattle.
3. *Stormont Area*: Includes 62 herds comprising 1,184 cattle.
4. *Maxville Area*: Includes 52 herds comprising 1,502 cattle.
5. *Vars Area*: Includes 41 herds comprising 1,316 cattle.
6. *Durham Area*: Includes 39 herds comprising 480 cattle.
7. *Carp Area*: Includes 77 herds comprising 1,798 cattle.
8. *Orono Area*: Includes 18 herds comprising 171 cattle.
9. *Almonte Area*: Includes 15 herds comprising 185 cattle.
10. *Brockville Area*: Includes 10 herds comprising 309 cattle.
11. *Vaughan Area*: Includes 73 herds comprising 1,327 cattle.
12. *Appleton Area*: Includes 166 herds comprising 2,787 cattle.

Plan C. — Supervised Calhhood Vaccination

Under this plan calf vaccination is being practised in 4,226 herds under College supervision. A total of 52,603 calves have been treated with a live vaccine prepared from Cotton's No. 19 strain *Brucella Abortus*. The vaccine is supplied only to registered veterinarians for the treatment of calves between four and eight months of age. The vaccinated calves have to be recorded and identified on a form supplied for that purpose. The vaccinated calves are required to be check tested in thirty days following vaccination to determine if the vaccine has produced positive results. Slightly over 95% of the vaccinated calves show a positive reaction to the thirty days check test and less than 5% remain negative or doubtful to this test. The calves remaining negative or doubtful to the thirty day test are revaccinated.

REPORT OF COMPARATIVE STUDIES OF VARIOUS BRUCELLA ABORTUS ANTIGENS

By J. S. Glover and W. B. Durrell

The amount of bovine Brucellosis testing being conducted all over the North American continent is continually increasing, and for this work the agglutination test is the one most commonly employed. It has proved a valuable aid in the development of a Bang's disease free herd, and in selecting cattle for export from one country to another and for interstate trade.

Antigens for the test are prepared from selected strains of *Brucella abortus*, but up until a comparatively few years ago the antigens used in the various laboratories differed very much from each other in many respects. At the present time, thanks to the efforts of many ardent and sincere workers in the United States and Canada, these antigens are more or less standardized.

During the past year we decided to make comparative studies of several *Brucella abortus* antigens, mainly to satisfy ourselves as to the efficacy of our routine work, and perhaps to facilitate the remedying of contradictory points in regard to cattle blood testing.

Letters were sent to all State veterinarians or State laboratories and Canadian Provincial laboratories asking for samples of antigen, subcultures of *Brucella abortus* used for the preparation of antigen, and information regarding dilutions employed and interpretation of results.

Replies were received from almost all with whom we communicated, and the information furnished is valuable and informative. We found that most State laboratories used antigen prepared by the Bureau of Animal Industry, whilst others prepared their antigen from cultures furnished by the Bureau. This resulted in only seven antigens being received from the United States. These, together with six received from Canadian laboratories, and the one we prepare here from cultures supplied by the Animal Diseases Research Institute, Hull, Quebec, were used in our studies. Antigens numbered 6, 7, 8, 9, 12, 13 and 11 were received from United States laboratories, and those numbered 1, 2, 3, 4, 5, 10 and 11 were Canadian antigens. Number 2 is the one prepared and used in this laboratory.

The fourteen antigens were submitted to tests for density, pH value and nitrogen content. Densities were compared using three methods — Gates, Coleman spectrometer and McFarland's nephelometer. The pH values of the colorimetric method and by the Coleman electrometer. Nitrogen determinations were made by means of the Coleman Junior Clinical Spectrophotometer, Model 6. This test was instituted to determine the variation of the different antigens as to the extraneous material other than *Brucella* cells. The result of these findings are shown in Table 1.

The second phase of the study consisted of comparing the antigens for agglutinability. Each antigen was set up in duplicate with ten sera using dilutions of 1:25, 1:50, 1:100, 1:250, 1:500 and 1:1000. The serum antigen mixtures were incubated at 37° C. for twenty-four hours and at room temperature for a further twenty-four hours, after which readings were made. The results of the agglutination tests are shown in Table 2.

(+ = complete agglutination, ± = partial agglutination, - = no agglutination.)

Interpretations of the tests are not recorded here as from replies to our questionnaire we found that all laboratories listed are not in accord as to the interpretation of a partial agglutination in the 1:100 dilution.

Comments. (1) The various antigens differed in density and Hydrogen-ion concentration. This raises the question of standards for these factors.

(2) The antigens varied in their agglutinability, suggesting the possibility of some being too sensitive while others may not be sensitive enough.

(3) From the results presented here it would appear that all the antigens are reasonably satisfactory for Brucellosis testing, although if, as is the usual custom, complete agglutination up to only the 1:50 dilution is considered a doubtful or suspicious reaction and complete agglutination up to only the 1:25 dilution is classed as a negative reaction, there would be some discrepancies in interpretations.

OMPHALITIS (Navel Ill)

J. S. Glover

Many more cases of omphalitis were received in the Poultry Diseases Diagnostic Laboratory during March and April 1944 than formerly. The condition was rarely seen here for several years until the Spring of 1943, when about twenty cases were received.

The condition was seen in chicks up to three weeks of age and in turkey poults. It occurs in two forms, and is easily diagnosed. The 'wet' form, known as 'mushy chick disease', is characterized by a water-logged condition of the abdominal skin and by dark reddish hemorrhagic changes in the region of the navel posterior to the keel bone. The unabsorbed egg yolk is often broken and mushy. In the 'dry' form the navel region may be only slightly blood-tinged or scabby, but the unabsorbed yolk, which is sometimes quite large, is found to be glued to the inside of the abdominal wall opposite the navel by dry fibrinous material. Similar dry exudate is sometimes found between the intestines and on the liver and heart sac. In some cases the gall bladder is enlarged. Quite often, when the skin is removed from the region of the navel, the intestines will protrude through the opening.

Omphalitis strictly belongs to the non-specific bacterial infections, but the clinical course and lesions are fairly definite and characteristic.

Infections of the navel occur in most domesticated animals kept under unsanitary conditions, because at the time of severance of the embryonic and maternal connections (at birth) the navel stump represents an open wound and, of course, a particularly favourable medium for bacterial invasion. In chicks, the yolk sac which nourishes the embryo during the period of incubation is taken into the body cavity

through the navel opening shortly before hatching, and it is at this time that the navel region constitutes a fertile field for the multiplication of ordinary bacteria which happen to be in the environment.

A great variety of bacterial species may be implicated in omphalitis in chicks and poults. Members of the bacterial genus *Clostridium* are usually found in the 'wet' form. The spores of these organisms are highly resistant, can live for a long time, and can withstand ordinary disinfection procedures. This fact has to be borne in mind when instituting preventive measures. The dry form is caused by several different non-spore formers. *Staphylococcus aureus* and organisms of the genus *Escherichia* have frequently been isolated from cases of omphalitis, and occasionally *Proteus* and *Pseudomonas* organisms have been associated with the disease. Our findings here indicate that *Salmonella pullorum* is a common cause. This organism was isolated from one hundred and thirty-eight out of one hundred and seventy chicks found to be affected with omphalitis received in March and April 1944. Omphalitis is essentially an incubator and hatching disease, and the only effective preventive measure is adequate and frequent cleaning and disinfection of incubators and hatching compartments. Formaldehyde gas fumigation is the most popular method of disinfecting this equipment. Its application is easy and efficient when properly applied. One gram of potassium permanganate crystals and one and a half cubic centimetres of commercial formalin are used for each cubic foot of incubator space. Machines should be disinfected after each hatch. Although twenty minutes exposure to the gas is sufficient to destroy non-spore formers, a much longer period is required when such organisms as *Clostridia* are the offenders.

As so many cases of the disease were encountered during the period mentioned we suggested that more attention be paid to the cleaning and fumigation of equipment in hatcheries. In many instances these suggestions were acted upon, with the result that a much lower percentage of chicks this year were affected with omphalitis as the following table shows:

March and April 1944	March and April 1945
Number of consignments of chicks and poults 334	Number of consignments of chicks and poults 221
Number of chicks and poults..... 974	Number of chicks and poults..... 790
Number of consignments in which navel ill was found 47	Number of consignments in which navel ill was found..... 14
Number of chicks and poults 170 (17.4% approx.)	Number of chicks and poults 52 (6.5% approx.)

Our findings suggest that if the cleaning and disinfection of incubators is carried out in a proper manner the incidence of both pullorum disease and omphalitis will be considerably lowered.

AN OUTBREAK OF AVITAMINOSIS C IN GUINEA PIGS

Frank W. Schofield

It is a well known fact that the guinea pig is highly susceptible to a deficiency of vitamin C in the feed. Losses among laboratory stock may be quite serious if this fact is overlooked.

History:—Due to the appointment of a new man, the usual rations of the guinea pigs were changed and green feed of all kinds was omitted. The pigs were given hay.

oats and water only. After a period of about six weeks deaths began to occur in many of the pens. Within a few days this became serious and a large number of the guinea pigs were dying. The nature of the lesions suggested scurvy, and upon enquiry the cause of the disease was readily understood.

Post-Mortem:—A very common lesion was that of haemorrhage in the subcutaneous tissues, especially in the tissues around the thigh. Haemorrhage in the tissues on the anterior surface of the stifle joint was present in almost every case. On opening the abdomen the cecum and colon were greatly distended, as if atonic, and contained a large quantity of a chocolate brown soft fecal mass. This was very characteristic. In the majority of cases there was a severe necrotic gastritis. Large areas of the mucous membrane of the stomach were necrotic and discoloured. Apparently members of the normal bacterial flora of the stomach were able to attack and destroy the mucous membrane in the absence of vitamin C. The disease speedily came to an end with the addition of green feed to the ration.

SALMONELLOSIS IN SWINE

Frank W. Schofield

During the year many outbreaks of this infection were investigated by the department. It is difficult to say whether the disease is on the increase or whether due to the increased value of swine, more concern is being shown by the owner for diseased conditions.

Diagnosis:—In the majority of outbreaks diagnosis is not difficult as the organism *Sal. cholerae* can be readily isolated either from the intestine or spleen. This with the post-mortem findings and clinical history make the diagnosis comparatively easy. Most outbreaks occur in young feeder pigs. The disease is characterized by high temperature, 104° F - 108° F, scouring, which may be bloody, but is usually watery and for a few days quite severe. In many outbreaks the disease was undoubtedly imported with the purchase of pigs from a community sale.

Post-Mortem:—The findings here will depend upon the stage of the disease and the severity of the infection. In the *septicemic form* the skin may be purplish, especially on the ventral surface of the body. All lymph nodes are congested and slightly edematous. The mesenteric nodes, especially the last few in the chain, may be greatly enlarged and sometimes necrotic. The lungs are congested, in some cases consolidated. The stomach is frequently acutely inflamed—haemorrhagic gastritis. The spleen is usually enlarged and the pulp soft and dark. There is always an acute inflammation of the cecum and colon, which frequently involves the ileum. The mucous membrane may be necrotic or a diphtheretic exudate may be present. In the *chronic form* of the disease the animals become greatly emaciated and at post-mortem numerous ulcers may be found in the cecum and colon.

Treatment:—As well as the usual treatment of changing the feed to a light diet of buttermilk and yeast for a few days, we inoculated all young pigs which had been exposed with a *Salmonella* bacterin. When necessary sanitation was improved or the pigs put out on grass. The results proved to be remarkably good, few losses occurring after the treatment.

Prevention:—We advise those who are constantly purchasing young pigs at sales to inoculate all young feeder pigs, both those on the premises and any which are added to the group.

NOTE ON THE ISOLATION OF PASTEURELLA FROM CONTAMINATED MATERIAL BY ANIMAL INOCULATION

Frank W. Schofield

Further tests have been made during the year in the isolation of *Pasteurella* organisms by means of animal inoculation as described in the report of last year. Especially in cases of enteritis when infection with *Pasteurella* is suspected is the guinea pig inoculation test of value. Cultures are frequently negative due to the presence of spreaders (*Proteus*) or the paucity of the bi-polar bacilli in the feces or inflamed mucous membrane. On many occasions we have been able to make an isolation from badly contaminated material which was negative in plate culture, by inoculating a small quantity of the same into the thoracic cavity of a guinea pig. When *Pasteurella* are present the guinea pig dies in from twenty-four to forty-eight hours with a serofibrinous pleurisy. The exudate is teeming with *Pasteurella*.

HERD BACTERINS IN THE CONTROL OF BOVINE MASTITIS

Frank W. Schofield

During the year well over one thousand samples of milk were received from cases of mastitis, or from animals suspected of having mastitis. Mastitis is rapidly becoming, if it has not already become, the most serious disease affecting dairy cattle. While effective measures for the control and eradication of the disease have been known for some years, yet the satisfactory application of such measures is not possible in the majority of dairy herds at the present time. The acute labour shortage on the farm makes difficult the thorough application of sanitary measures which is so important an item in the prevention of mastitis. Also there are a great many farms where the disease has spread in the herd to such a degree that the usual methods of prophylaxis are quite inadequate.

In carrying out these experiments with bacterins we were not looking for a substitute for the accepted principles of control, but rather a supplementary treatment which might have specific value in conjunction with other recognized methods for the control of this disease. The use of bacterins in the prevention of mastitis is not new. The literature contains many reports favourable and unfavourable—chiefly the latter—on the use of bacterins in the prevention of mastitis. It seemed to us that the lack of uniformity in the results reported might be due to the fact that mastitis is not due to one particular etiological agent, and that the success or failure of the treatment might readily be accounted for on the basis of differences in etiology. Up to the present we have found this assumption to be generally correct. It might be added that most investigators had reported more favourable results following the use of 'herd bacterins', rather than commercial stock bacterins. In most of the published reports dealing with the use of bacterins in the cure and prevention of mastitis the data dealing with the nature of the infection in the herd has been inadequate. In all cases we first cultured a number of samples of milk from the infected herd, and having determined the nature of the infection, decided upon the treatment.

PREPARATION OF THE BACTERIN

Heavy growth was obtained by the use of 'infusion free' broth. This was killed by the addition of .4% formalin, and roughly standardized by use of the nephelometer. The density varied from 7 to 10, a heavy suspension. Three doses were advised commencing with 2.5 cc. and increasing by 2.5 cc; repeating or increasing

the dose according to the local reaction. The inoculations were given about one week apart. Alum was usually added in preparing the bacterin.

RESULT OF BACTERIN TREATMENT IN TWENTY-FIVE HERDS

Name	Type of Mastitis	Organisms Isolated	Result of Treatment
Hunter	Chronic	Str. agalactiae	No value
Kcaley	Chronic	Str. agalactiae	Harmful
Beer	Acute and Chronic	Str. agalactiae	Harmful
Cramer	Acute	Str. agalactiae	No value
Shipsides	Acute and Chronic	Str. agalactiae	No value
Oliver	Chronic	Str. agalactiae	Doubtful
Fair	Acute and Chronic	Str. agalactiae	No value
Marshall	Chronic	Str. agalactiae	Doubtful
Learn	Chronic	S. aureus	Beneficial
Carter	Chronic	S. aureus	Beneficial
March (R)	Acute and Chronic	S. aureus	Beneficial
Young	Gangrenous	S. aureus	Beneficial
Meyer	Gangrenous	S. aureus	Beneficial
Dan	Chronic	S. aureus	Beneficial
Stager	Acute	Str. uberis	Beneficial
Domelee	Chronic	Str. uberis type	Beneficial
Radford	Chronic	Str. uberis type	Beneficial
Gruber	Chronic	Str. uberis type	Beneficial
De Vries	Acute and Chronic	Str. uberis type	Beneficial
Tichty	Chronic	Str. uberis type	Beneficial
Wilson	Chronic	Str. uberis type	Beneficial
Dorch.	Chronic	Not Typed	Beneficial

COMMENT ON THE RESULTS

First—We must make it clear that the results of the treatment have not been measured in any exact manner. The report, whether good or evil, was based upon the observation of the owner. We have not been able to determine the effect of the inoculation upon the infection in the udder. The bacterin was not administered with the idea of 'curing' the diseased, but of providing 'resistance' for the animals exposed in the herd.

Second—The term 'Beneficial' indicated that the incidence of the disease decreased, accompanied by improvement in the quality of the milk, and in some instances a marked reduction in the bacterial count, all very desirable results in the eyes of the dairy farmer. By 'Harmful' we mean that following the use of the bacterin latent infection suddenly flared up, and active cases were aggravated. This, it will be observed, only occurred in herds which were infected with *Str. agalactiae*. In other cases slight clotting of the milk occurred for one or two milkings and then passed away.

Third—Special mention should be made of the two instances where gangrenous mastitis had occurred due to *S. aureus*. In one case two cows had died, and in the other three animals had succumbed. The herds were examined clinically and bacteriologically and in both instances animals suffering from *S. aureus* infection were detected. Both herds were treated in the same manner, a bacterin was prepared and this, with toxoid, was administered to the whole herd. No further cases were reported.

Fourth—We have come to the conclusion that bacterin is of doubtful value in herds affected with *Str. agalactiae*, and unless given in carefully graded doses may be definitely detrimental.

Fifth—That in herds infected with *Str. uberis* (we have included with *uberis* all strains showing alpha hemolysis and fermenting esculin and trehalose, as well as one or more of the following carbohydrates mannitol, sorbitol and inulin), a

bacterin may be very beneficial in checking the spread of the infection and in some cases facilitating recovery in infected animals. We find a high percentage of all mastitis to be due to streptococci, other than *Str. agalactiae*. From one herd only *Str. dysgalactia* been isolated.

Conclusion—That a bacterin may prove to be of definite value in the prevention of the spread of mastitis in a herd in properly selected cases where the infection had been determined.

CLINICAL DEPARTMENT

R. A. McIntosh

This department has for its purpose the instruction of students in the art of clinical diagnosis and the application of animal surgery and veterinary medicine. During the course of the year and particularly in the academic portion of it, many cases in all species of farm animals and pet stock are submitted to the clinic. Apart from this a considerable number of post mortem examinations are made and some field work in the form of investigational visits and extension projects are done. Owing to the military training of the students, the time allotted to clinical training has of necessity been somewhat curtailed since that requirement was put in force.

CATTLE DISEASES

In cattle many of the cases submitted are of an unusual character and in some instances difficult to handle successfully. The predominate ones are those in which some condition interferes with reproduction in both females and males. These cases of sterility are invariably highly bred animals of exceptional value and as a rule are submitted by some of the foremost breeders of livestock in the province.

Other clinical demonstrations of diseases which are responsible for serious losses in the bovine species such as mastitis, calf scours, calf pneumonia, necrotic stomatitis and nutritional deficiencies are made from cases available through the clinic. Sporadic diseases such as hypocalcemia, acetonemia, retention of the after-birth dystokia and many other conditions are also submitted from time to time or made available through the Agricultural College herds. As a result of the breeding of dairy type cows for extreme milk production and the capacity of many of such cows to produce exceptional amounts of milk, metabolic diseases and udder troubles and becoming more prevalent. Calf scours, infectious in character, is another disease from which serious losses occur annually.

SWINE DISEASES

There has been an increase in the number of swine submitted to the clinic in the year. As in the past, many young swine are brought in for the correction of congenital aberrations such as serotal and umbilical hernias and also cryptorchidism. Not infrequently several pigs from the same litter will be affected in this manner which reveals that a genetic factor is probably responsible for these inherent weaknesses. Apart from the foregoing many others submitted are suffering from a disease in which usually a number of the herd or perhaps a whole litter may be affected. Quite often a diagnosis is made and the condition corrected by advice as to the manner in which the remainder of the pigs at home should be treated, cared for and fed. By tabulation of the numbers of pigs in the litters or lots from which twenty (20) cases of this nature were examined it was learned that there were seven hundred and sixty (760) pigs either affected with or exposed to the diseases of the ones examined and the losses had amounted to two hundred and seventy-nine (279)

which indicates a high mortality rate. These facts reveal the importance and value of this service and upon a number of occasions letters of appreciation have been received for the advice given. The diseases most frequently encountered in such instances are gastrointestinal disturbances, pneumonic affections and nutritional deficiencies or perhaps combinations of them.

SHEEP DISEASES

In this species there has also been an increase in the numbers submitted for examination and in most instances the cases represent flock diseases. Tabulation of the numbers of sheep and lambs in twenty-three (23) flocks from which cases were examined amounted to one thousand, four hundred and six (1406) and the losses in these same flocks totalled one hundred and ninety (190). The specimen cases were either brought in or shipped and came from many parts of the province.

Cases of stomach worm disease and many other forms of parasitism were most numerous. Other diseases such as scouring in the newborn, stiff lamb disease, nutritional deficiencies and pregnancy disease were presented for examination. There has also been a considerable number of inquiries regarding the loss of lambs and ewes at lambing time this past year. It was observed that during the grazing season of 1944 parasitism was exceptionally prevalent due no doubt to the continued moisture throughout the season which favours the metamorphosis of the immature forms of many of these parasites.

HORSE DISEASES

The cases of this species submitted are largely surgical in character. Poll-evil, fistulous withers and laryngeal hemiplegia are the most numerous. Other conditions frequently brought in for operation for hernias, cryptorchidism, dental disease and tumours. Lameness, hoof disease and skin affections are also frequently submitted. Other conditions such as retention of the after-birth, dystokia, nymphomania, and leucorrhoea are dealt with upon occasions. The diagnosis of pregnancy using the chemical test on urine samples was demonstrated at several different times.

DOG AND CAT CLINIC

One afternoon a week is devoted to the examination, diagnosis and treatment of pet animals. Considerable numbers of female dogs and cats are presented for the spaying operation. These make useful operations for the demonstration of the different forms of anaesthesia which may be used and also for correct surgical procedure. X-ray demonstrations are held in cases of fracture and for other purposes whenever it is felt such examinations will aid in diagnosis and treatment. Other conditions such as digestive disturbances, distemper, parasitic diseases both internal and external, and skin affections are examples of clinical material submitted.

In addition to the clinical material brought in from outside sources, the responsibility of caring for and attending to the veterinary requirements of the livestock of the Ontario Agricultural College is placed upon the clinical department. The following tabulation of the cases handled and the work done from August 1943 to August 1944 indicates the volume and nature of the services required.

DATE	ANIMAL	DISEASE
August 3, 1943	Clyde stallion	Periodic ophthalmia
August 3, 1943	Suffolk sheep	Infected foot
August 20, 1943	Ayrshire cow	Hypocalcemia
August 20, 1943	Ayrshire cow	Retained afterbirth
August 16th - 23rd	Holstein cow	Pseudo-leukemia
August 25, 1943	Yorkshire sow	Abortion sickness

STERILITY IN THE BOVINE FEMALE

Sterility in the female of the bovine species is a problem of considerable magnitude to those concerned about it in Veterinary Science and a source of serious loss to the livestockman.

It occurs in two forms, namely those due to pathological changes in the reproductive organs as the result of disease and infection and those due to interruptions or interferences with the physiology of reproduction in which no lesions of disease can be determined and there is no evidence of infection. Either one of these two forms may occur as a herd problem or as individual cases in a herd. The more serious occurrences of the condition are of course when many or all of the breeding females of a herd fail to conceive.

Sterility may also be classified as permanent or temporary and in this regard pathological cases are much more likely to be permanent than those which are due to interferences with the physiology of reproduction.

Except on those occasions when pathological lesions or infection can be definitely determined, the specific diagnosis of sterility is difficult. However by taking the breeding history and making an examination usually a satisfactory determination of the causes of the condition can be made.

During the course of a year, many cases of this nature are presented for consideration. As a herd problem the following is cited. It occurred in a valuable herd of high milk producing Ayrshire cows. During the winter of 1943-44 some difficulty was experienced in getting a number of the cows to conceive but after they were turned out to pasture less trouble in this regard occurred until later when they were stabled in the fall. It was in the early months of the 1944-45 winter that the condition became alarming for there were sixteen cows and heifers which would not conceive despite repeated services and the fact that several different sires were used.

During the Christmas holidays the farm was visited and the herd examined. The herd was free from abortion disease and there was no evidence of any other genital infection. Six of the cows and heifers were clinically examined and there was not any evidence of pathological changes in any of them except one who had a uterine tumor. The oestral cycle in all of these cows was rhythmic and the manifestation of oestrus normal. The spermatozoa of the two sires being used were apparently normal by microscopic examination. All of the evidence in this herd pointed to a condition in which there was some interference with the physiology of reproduction.

In this instance it was felt that there might be a lack of Vitamin A and also a lack of the element Iodine. Accordingly an aqueous solution of potassium iodide was prepared and each sterile cow received a course of the drug over a period of ten (10) days. Furthermore the owner was advised to procure a Vitamin A potent feed oil and give each cow a half a fluid ounce of it once a day but to continue its use over a longer period of time. Both the iodine solution and the vitamin oil were mixed with the grain ration.

The treatment was commenced early in January and by the middle of April all of the sixteen animals except one had conceived. The exception was a virgin heifer which was sold for beef. Eight of them conceived with the first service after treatment, three of them with the second service. The remainder required three or four services.

It is difficult to explain why such a favorable result should be obtained by the supplementation of the diet with iodine and vitamin A. However it is known that a low thyroid secretion has a definite relationship to sterility and also that a lack of vitamin A in the diet of farm animals lowers the rate of reproduction and results in abnormalities of the new born and lowers their resistance infection.

The incidence of this form of sterility is of more frequent occurrence than what is realized and anyone concerned with such problems should keep in mind the possibility of certain nutritional or element deficiencies being responsible for the condition.

COBALT DEFICIENCY

In the 1913 report a short item referable to deficiencies of this element occurring in cattle showing symptoms of unthriftiness, a loss of appetite for normal food and depraved appetite was made.

In October of 1944 the item was printed in one of Ontario's farm publications. Shortly afterwards, a number of farmers throughout the province wrote asking for information regarding the use of cobalt in young cattle chewing at wood and becoming unthrifty. In December, another Farm magazine quoted the same item and again more inquiries regarding cobalt were received. Later the item was broadcast on the C.B.L. Farm Programme and another flood of inquiries directed to the Veterinary College were received.

Accordingly, it was felt that by supplying cobalt to those asking for advice about it and requesting a reply regarding the results obtained from its use, something might be learned as to the extent of the deficiency of this element in the province. This was done and it was remarkable the number of favorable replies and comments there were following the administration of the Cobalt. Furthermore, the inquiries were received from many different counties in what is known as Old Ontario extending from the western extremity of the province to the Ottawa valley country in the east and on into Quebec. A preponderance of the requests came from the counties of Bruce and Grey.

In the available literature on the subject of cobalt deficiency, the condition was first recognized in Australia and New Zealand a little over ten (10) years ago. In those countries, the disease appeared in grazing ruminants (sheep and cattle) and such terms as Bush-Sickness, Morton Mains Disease, Mairoa Dopiness, Enzootic Marasmus and Nutritional Anemia, were applied to the condition. Later in Kenya, Africa, Nakurutis of cattle was determined to be due to a lack of cobalt. Following this, a disease known as Pining in Great Britain was corrected by the application of cobalt to grazing land upon which sheep and cattle were prone to develop the disease. On the North American continent, the so-called "Salt Sick" of Florida, a wasting disease appearing in cattle and sheep has been corrected by the use of cobalt. More recently Grand Traverse Disease in certain areas of the state of Michigan is corrected and prevented by supplementing the diet with cobalt preparations.

In the foregoing countries mentioned, the decline in the affected animals occurred while they were grazing but in Ontario the manifestations of the conditions appears during the stable feeding periods of the year i.e. October to May. Upon a number of occasions, cases have been observed in the well kept herds of first rate stockmen in which the animal or animals were born in the fall and the following summer instead of being allowed to run on grass, were stable fed until fall. Then at different times during this second winter they go off feed and commence chewing at wood or other foreign material. They lose their appetite for normal food, become unthrifty and in the course of a few weeks are quite emaciated. They also become anemic and ultimately so weak as to be unable to rise without assistance.

It is a rather common practice among farmers to keep calves born during the winter around the stables all summer. They may have a yard to allow them a run during the evenings and mornings but quite often they do not get any grass and it is among young stock kept in that manner depravity of appetite most often appears along in the winter after stable feeding has commenced. Upon occasions older animals become affected somewhat similarly and they too respond to treatment. However in the writer's experience the young cattle ranging from five (5) months to a year old are most frequently affected. Another occasion in which the condition is observed is in young bulls which have reached the age of sexual maturity and are kept in stabling quarters because they cannot be allowed to range with the herd. In such animals unthriftiness and depravity of appetite will occur despite the fact that feed being provided for them is apparently adequate in every respect.

The foregoing findings reveal that cobalt deficiency (if it may be termed such) is a stable feeding deficiency in Ontario rather than a pasture deficiency. However,

following periods of drought, it would be possible to have such symptoms manifest while cattle are on pasture.

In the replies received from both veterinarians and farmers who have used the cobalt preparation in cases of that kind, the results have been remarkable and almost spectacular. Upwards of thirty-five (35) farmers who had young cattle and of over one hundred (100) in number were supplied with cobalt and it was sent to many different counties in the province.

In the majority of instances the replies indicated that affected cattle would commence eating in three or four days and from that time on improvement was so rapid that in two weeks they were eating everything put before them and had ceased chewing wood. A number of the farmers stated that their calves were so weak they had to be assisted to their feet every time they laid down. Yet even these extreme cases commenced eating and recovered in a remarkably short time.

As examples of replies received regarding the results obtained from the use of cobalt, the following excerpts from letters are quoted: "We are pleased to tell you that all six cattle to which we gave the cobalt began to show signs of improvement very quickly after getting a few doses. Now every one of the six animals seem to be really hungry and eat their food quickly. At least three of them have been in that run down condition for many months and have already improved so much that one could scarcely believe the change without having seen them." Another farmer writes: "Since receiving the cobalt for my calves, they are now eating everything put ahead of them. Their hides were tight to their ribs and are now loose and pliable. I never before saw thin cattle improve in their appetite, gain in flesh and become sleek in their hide in such a short time. Before treating, they were dying of starvation with a manger full of hay and grain in front of them but they had no appetite to even try eating it. In three days after giving the cobalt, they commenced eating the grain and the best out of the hay and now they clean out their mangers and look for more. Three head of these cattle were so weak, they had to be lifted each time they lay down but now get up themselves and if turned loose will play."

The veterinarians to whom cobalt was forwarded also reported favourably of its use. It is equally of value in sheep whose appetites are poor. In one flock, in which it was tried on a group of last year lambs, improvement occurred within a few days after the commencement of its use. Following this experience, the shepherd separated all of the thinner sheep from those that were apparently normal and gave the unthrifty ones cobalt and again improvement occurred.

Formerly it was believed that depravity of appetite was chiefly due to a lack of phosphorous in the diet of animals so affected and undoubtedly upon occasions it is and more particularly in older animals but from the results obtained through this extension experiment, it is quite evident that the wood chewing propensities of young cattle is due to the need of the element cobalt.

The purpose of cobalt in the animal's body is not clearly understood. It is believed to have some relationship to hemapoieses. Regardless of this, it is quite evident that it has a definite relationship to rumen digestion for affected animals lose their appetite for normal food and do not ruminate as frequently as they should.

Summary:—The lack of cobalt in cured roughages is a common cause for depravity of appetite in young cattle ranging from the time they commence to ruminate until they are a year old or more. Also that bulls which are kept closely confined and continually fed cured roughages will lose their appetite and become weak and unthrifty.

The provision of cobalt to animals affected in this manner very quickly corrects the condition.

That the deficiency is widespread throughout what is known as Old Ontario and the depravity of appetite occurs most frequently during the time of the year cattle and sheep are stabled and being fed cured roughages.

DEPARTMENT OF ZOOLOGY

Lionel Stevenson

The work of the Department of Zoology can be considered best, under the divisions, Teaching and Routine.

Teaching:—The course in Invertebrate Zoology is so planned, that a large part of the teaching time is devoted to the study of the protozoa, the menathelminthes, platyhelminthes and arthropoda. A knowledge of these four phyla is considered very necessary as a foundation for the study of Veterinary Parasitology. Three fourths of the teaching time was spent on or devoted to laboratory work, which consisted of dissecting and drawing the representative animals of each phyla. Ample numbers of animals for dissection were secured from various sources.

The course in Vertebrate Zoology was given to the third year students during the autumn term. This course is confined to the study of the phylum chordata. Visual aids are used in the zoological studies wherever possible.

The course "Diseases of Fur Bearing Animals", given during the year, covered all the known diseases of the carnivora and the herbivora that are used in fur production on Canadian ranches. Visual aids and multigraphed lecture notes are used in teaching this subject.

The course in "Plant Toxicology" was given during the spring term and embraced a study of all the known poison plants and toxic vegetable conditions, likely to be encountered in practice by a Veterinarian.

Routine:—Numerous animal carcasses were received for autopsy. These were given immediate attention and a report of findings, made to those sending in the specimens. Autopsy records were kept. Numerous specimens of food, usually meats, were received along with the request for an examination and report on wholesomeness.

AUTOPSY SUMMARY — FUR-BEARING ANIMALS

	SILVER FOX	MINK	NUTRIA	RABBIT	CHINCHILLA
<i>Parasitism</i>	8	2	0	0	1
<i>Pneumonia</i>	4	11	0	7	0

	26	58	1	15	2

As a rule but one carcass is submitted for autopsy, so the above figures do not represent the death loss on the ranches.

The largest death loss in fur-bearing animal carcasses submitted, indicate that Food Toxemia is the greatest cause of loss. Parasitism has been greatly reduced during the past five years. The distemper losses have been greatly reduced by better control of dogs. In a chinchilla carcass submitted, four specimens of a worm Physaloptera were found in its stomach. This chinchilla carcass was sent in from Eastern Ontario. Hemorrhagic Septicemia (*Pastuerella cuniculicida*), and pneumonia of various types caused the greatest rabbit loss. A great deal of enquiry relating to Mink and Rabbits was received during the year. Fecal samples from fur-bearing animals were received from numerous ranches during the summer and autumn seasons. These were examined and egg counts made. Advice on parasite control was given where needed.

FUR BREEDERS' CONFERENCE

Assistance was given to the Directors of the Ontario Fur Breeders Association, in organization and carrying out the program of their Summer meeting. Full use of the Veterinary College and all its facilities was extended to the Fur Breeders of Ontario, not only for their annual conference but throughout the year. The Summer Conference was attended by 275 fur animal breeders, most of whom were specialists in Silver Fox and Mink breeding. The programme contained the names of five prominent U.S.A. fur breeders, all of whom assisted greatly in making the conference a success.

POISONED WILD RABBITS

Owing to the heavy rabbit damage to orchard trees during December, January and February, poisoned hay and grain was distributed by some orchard owners, in an effort to kill the rabbits and thereby lessen the damage to orchard trees. Complaints of dog poisoning, resulting through hungry dogs eating the poisoned rabbit carcasses, were received.

In order to determine the likelihood of dogs being so poisoned, a test was undertaken, whereby rabbits were poisoned by the use of feeds that had been treated with strychnine, arsenic and also phosphorus. These poisoned rabbit carcasses were purposely fed to dogs. There was no ill-effect or discomfort shown by the dogs that ate the carcasses of rabbits that had been poisoned by either strychnine, arsenic or phosphorus. This test proved that any dogs that died in the orchard districts after having eaten carcasses of rabbit, did so for some other reason than arsenic, phosphorus, or strychnine poisoning.

EXTENSION

Assistance was given to other branches of the Department of Agriculture when and where asked for. Investigations of animal losses on farms were carried out to the extent that time and transportation facilities would permit.

THE QUEEN ELIZABETH WAY AT JORDAN HARBOUR.

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:—

The undersigned has the honour to transmit the Annual Report of the Department of Highways, Ontario, for the fiscal year ending March 31st, 1945.

Respectfully submitted,

GEO. H. DOUCETT,
Minister.

Department of Highways, Ontario,
Toronto, March 30th, 1945.

TO THE HONOURABLE GEO. H. DOUCETT,
Minister of Highways, Ontario.

Sir:—

I have the honour to present herewith Report on the activities of the Department of Highways for the Fiscal Year ended 31st March, 1945.

The Report covers operations and functions performed by the various branches, including King's Highways, Municipal Roads, Bridge Construction, Accounting, Gasoline Tax and Motor Vehicles.

I have the honour to be, Sir,

Your obedient Servant,

J. D. MILLAR,
Deputy Minister.

Department of Highways, Ontario,
Toronto, March 30th, 1945.

THE RAINBOW BRIDGE AND NIAGARA RIVER FROM THE AIR.

A. A. SMITH, CHIEF ENGINEER

HIGHWAYS OF ONTARIO

By J. D. Millar, Deputy Minister

During the period covered by this Report for the fiscal year ending March 31, 1945, the Department, in common with all other organizations throughout Canada and the United Nations, bent every effort to keep essential services operating with the use of the minimum of manpower, machines and materials. As with all other activities pledged to seeing the war to a victorious conclusion, the work resolved itself to a task of keeping the driving surfaces in shape for traffic and other considerations were secondary. Two factors aided in the accomplishment of this purpose: first, the substantial patching of road surfaces which was carried out in the summer of 1941, and second, the development in the war years of the technique of maintaining gravel roads by the use of bituminous primer. To the late John Sears the Department is indebted for his valuable work while Division Engineer at Port Hope in introducing this wartime expedient.

As will be noted in the report of the Chief Engineer, it was found essential to lay some 225 miles of low-cost pavement to prevent undue deterioration of existing roadbeds and to conserve existing gravel supplies. Engineering studies were continued for a comprehensive post-war highway construction programme. In this connection the soil conditions in many parts of the Province were given increased attention. The work of the Surveys Branch, particularly that dealing with aerial mapping for location study purposes, was considerably expanded. Under this Branch a school for draughtsmen was established which will provide for returning service men interested in this particular field.

The winter of 1944-45 will long be remembered throughout central and south-western Ontario. A blizzard of record proportions struck Toronto and the Niagara Peninsula on December 12, 1944, and succeeding storms up to the middle of March, 1945, disrupted winter travel in these sections of the Province which normally are free from excessive snowfall. Much credit is due the snow-plow operators and the mechanics on the Department staff who kept old equipment in service under very trying conditions in the area where the bulk of the industrial potential of the Province is concentrated.

The expenditure of the Department remained much the same as in the previous year in keeping with wartime necessity. The following comparative figures indicate the excess of revenue over expenditure in the period since the outbreak of war:

YEAR	APPROXIMATE REVENUE	APPROXIMATE EXPENDITURE
1939-40	\$ 34,000,000	\$ 32,000,000
1940-41	36,000,000	26,300,000
1941-42	38,000,000	35,500,000
1942-43	32,500,000	19,800,000
1943-44	36,800,000	19,200,000
1944-45	36,500,000	18,600,000
SIX-YEAR TOTALS	\$ 213,800,000	\$ 151,400,000

Refunds of gasoline tax and tax exemptions under the permit system introduced in 1943 show a substantial increase of 20.6% over the previous year. Approximately \$4,260,000 was returned to the consumer out of a total of \$21,400,000 tax collected or 19.9% of the total revenue. In the 1939-40 fiscal year only \$2,320,000 was returned out of a total of \$27,400,000 or only 8.5% of the total revenue.

The financial contribution made by the Department toward County, County-Suburban and Township roads totalled approximately \$5,950,000 as compared to \$4,900,000 in the previous year. Several changes in legislation were made to give increased financial assistance to certain phases of the Municipalities' road work which have proved a strain on their resources. Other amendments to The Highway Improvement Act, The Municipal Act and The Statute Labour Act were made to provide more efficient handling of municipal road problems. These changes are outlined in the report of the Municipal Roads Branch.

The report of the Motor Vehicles Branch indicates only a slight reduction (2.39%) in motor vehicle registration from the previous year. Commercial vehicle registration increased slightly, reaching an all-time high of 97,869. A total of 11,004 accidents were reported during the year, 450 of these being fatal accidents bringing death to 498 persons. While there were 51 fewer persons fatally injured than in the previous year, the death rate is still alarmingly high, particularly in the urban areas, and is a matter of great concern to the people of the Province. The Department greatly appreciates the valuable co-operation given by the police, the Courts and safety organizations throughout the Province for their continued assistance in endeavouring to solve this vital problem.

REPORT OF THE HIGHWAYS ACCOUNTANT

By **John Smith, Accountant**

To J. D. MILLAR, Esq.,
Deputy Minister of Highways.

The following is a summary of the Disbursements and Receipts of the Department of Highways for the fiscal year, April 1st, 1944, to March 31st, 1945:

DISBURSEMENTS

King's Highways and Development Roads, etc.	\$ 11,322,719.41
Unincorporated Township Roads.	224,548.32
	<hr/>
	\$ 11,547,267.73
Subsidies in Aid of County Roads.	2,365,507.20
Subsidies in Aid of Township Roads and Indian Reserves	3,396,904.32
Administration, etc	1,279,884.89
	<hr/>
	\$ 18,589,564.14

RECEIPTS

Gasoline Tax	\$ *26,858,693.81
Motor Vehicles	9,445,499.18
Permits: Garage, Gasoline, Pumps, etc.	109,550.99
Miscellaneous and Sundries.	84,358.45
	<hr/>
	\$ 36,498,102.43

* The total gasoline tax receipt of \$26,858,693.81 is made up as follows —

Balance of Dominion Government Subvention due on 1943-44 tax collections	940,329.71
Tax collections made by Department 1944-45	18,918,364.10
Dominion Government Subvention paid on 1944-45 tax collections	7,000,000.00
	<hr/>
	\$ 26,858,693.81

REPORT OF GASOLINE TAX REVENUE

By **J. H. Robinson, Chief Inspector Gasoline Tax**

To J. D. MILLAR, Esq.,
Deputy Minister of Highways.

The following data relating to the Gasoline Tax Branch for the fiscal year 1944-45 is respectfully submitted:

GROSS REVENUE

Receipts from Vendors Under Agreement.	\$ 21,283,091.95
Receipts re Importations.	35,838.18
Receipts re Fuel Oil Consumption.	68,169.16
Receipts re Miscellaneous Items	16,134.43
Tax Recovered re Bad Debt Deductions.	1,614.21
	<hr/>
	\$ 21,404,847.93

REFUNDS

Airplanes	61 Claims	\$	232,033.50	
American	222	"	22,531.48	
Cities and Towns	286	"	12,743.09	
Cleaning	896	"	91,555.64	
Contracting	595	"	153,683.80	
Farming	22,851	"	447,626.00	
Federal Government	76	"	31,067.72	
Lumbering	519	"	106,412.27	
Manufacturing	2,245	"	980,866.51	
Miscellaneous	13	"	368.18	
Motor Boats	2,181	"	72,184.91	
Municipal Trucks	229	"	73,812.90	
Railways	84	"	87,519.19	
Stationary Engines	5,374	"	176,036.91	\$ 2,491,442.43
Net Revenue from Gasoline Tax				\$ 18,913,405.50

HANDLING LICENSES

Agents	\$	50.00		
Importers		52.03		
Mixers		153.00		
Refiners		9.00		
Transporters		1,514.52		
Wholesalers		3,180.02	\$ 4,958.60	
Total Net Revenue				\$ 18,918,364.10
Dominion Subsidy covering final payment for 1943-44 and partial payment for 1944-45				\$ 7,940,329.71
Total Net Revenue				\$ 26,858,693.81

With gasoline rationing still in effect, the net revenue was \$7,694,885.09 less than for the year 1940-41 on which Dominion subsidy was based. This amount has been received from the Federal Government.

The gross revenue of \$21,404,847.93, which excludes Dominion subsidy, shows a decrease of 3.1% over the previous fiscal year.

In July, 1943, a tax exemption system came into effect whereby farmers, fishermen, licensed guides and tourist outfitters were permitted to purchase gasoline, less the Provincial Gasoline Tax. It was still necessary to maintain the Refund system for those in the above group not applying for a tax-free purchase permit; also for those persons not eligible to receive a tax-free purchase permit.

There were 35,632 refund claims paid, totalling \$2,491,442.43, while gallonage sold, less the gasoline tax, through the exemption permit system, represented a tax value of \$1,771,867.56. The total value amounting to \$4,263,309.99 on which tax was not received represents an increase of 20.6% over the previous fiscal year. Refunds and tax exemptions for farming only show an increase of 30% over last fiscal year.

The auditing of refund claims before payment was made resulted in \$63,-148.88 being disallowed, or 2.5% of the value of the claims paid.

The following is a stock summary of the gasoline (including solvents) as reported in the Province of Ontario:

	Gals.	Gals.
Inventory, March 1, 1944.....	73,354,317	
Quantity Manufactured.....	373,970,017	
Quantity Imported.....	72,312,873.5	
Purchased by Ontario Vendors.....	538,082,837.6	
Other Items.....	74,561.1	
Returned Goods.....	49,651.9	
	1,057,844,258.1	
Quantity Exported.....		70,563,164.3
Sales to Vendors.....		540,568,090.8
Sales to Federal Government.....		37,717,764.9
Miscellaneous Deductions.....		146,965.3
Deductions, Bad Debts.....		3,801.5
Deductions, Minor Losses.....		6,185.5
Deductions, Returned Goods.....		49,651.9
Sales, Marked Gasoline.....		22,148,344.4
Sales, Taxable.....		270,718,547.9
Shrinkage.....		11,180,401.1
Inventory, February 28, 1945.....		104,741,340.5
		1,057,844,258.1

Not included in the above are 852,114.5 gallons of fuel oil consumed on which the tax was collected.

REPORT OF MISCELLANEOUS PERMITS BRANCH By C. G. Fairs, Supervisor

To J. D. MILLAR, Esq.,
Deputy Minister of Highways.

I have the pleasure to submit for your perusal the following 1944-45 Fiscal Year Report:

Building Permits

Number of Permits Issued.....	804
Approximate Value of Buildings.....	\$ 2,003,200.00

Public Garage Licenses

Number of Licenses Issued — Class "A".....	4,038
Number of Licenses Issued — Class "B".....	3,130
Total Receipts.....	\$ 57,257.69

Gasoline Pumps — King's Highway Outlets Only

Permits \$25.00 (Curb).....	488
Permits 5.00 (8 ft. to 25 ft. from Highway Boundary).....	2,117
Total Receipts.....	\$ 36,952.55

Signs

Permits \$ 1.00.....	592
Permits 5.00.....	1,977
Permits 10.00.....	460
Total Receipts.....	\$ 15,310.75

Permit fees received, as indicated above, will coincide with the Treasury Department receipts for the Fiscal Year.

Garage, Gasoline Pump and Sign Permits are issued as of the Calendar Year, January 1st to December 31st, 1944.

The year 1944 showed an increase over 1943 in practically all activities of this Branch. The number of garage licenses issued increased from 6,852 to 7,168 but the number of sign permits issued decreased from 3,137 to 3,029.

The data on building permits is particularly indicative of this increased activity and would illustrate that the relaxation of some of the restrictions imposed by the Dominion Government for the control of building materials, etc., has brought about a decided increase in the number of buildings erected, the number of permits issued increasing over 75% above the previous year with an approximate value of slightly over double that for the preceding period.

T. JOHNSTON, SUPERINTENDENT OF EQUIPMENT, AT HIS DESK, LEASIDE SHOP.

OVERHAULING SNOW AND ICE FIGHTING EQUIPMENT IN THE LEASIDE SHOP.

ANNUAL REPORT FOR 1944 KING'S HIGHWAYS OPERATIONS

A. A. Smith, Chief Engineer

Operations on the King's Highways and secondary roads during the past year showed the first reversal in trend from the curtailed programs of the war years. This increase in activity was confined to the surfacing of existing gravel highways and was undertaken at this time to prevent undue deterioration of these roadbeds that would otherwise occur as a result of the rapid depletion of gravel deposits in the province. This exhaustion has become so serious in recent years that, to ensure adequate supplies for roads of low traffic densities, it became imperative that the heavier travelled gravel roads be provided with a more permanent surface. As a result, 225 miles of mulch surface were laid on King's Highways and secondary roads. A further considerable mileage of gravel highways were treated with prime.

The abnormally severe winter, the worst on record since the Department undertook winter maintenance of the highways, taxed our resources to the limit to keep the highways open with the equipment at our disposal. This was particularly so in the most southerly sections of the province, where snow usually causes little trouble but where, last year, the snowfall was as heavy as in other parts of southern Ontario. As a result, it was necessary to transfer heavy snowplowing equipment from other sections to supplement the light units located in these districts and which proved insufficient to handle the job. Late in the winter the first new snowplowing equipment that the Department has been able to obtain for the past two years was delivered, easing somewhat the strain on the badly battered equipment then in use.

Detailed soil surveying was carried out on Highway No. 12 between Orillia and Port McNicoll, detailed borings being made in all spring breakups and areas of doubtful subgrade stability in order to correct subgrade deficiencies prior to the placing of a mulch surface. Subgrade treatment was confined largely to raising the grade although limited amounts of subgrade excavation and tile installation were done. Soil data of a reconnaissance nature was obtained on new highway locations between Oshawa and Bowmanville, Port Hope and Trenton, Toronto and Barrie and Cayuga and Cainsville.

Preliminary details were completed for an extensive research project in the London and Stratford divisions to correlate concrete pavement behaviour with soil types, subgrade moisture and compaction and the durability of the sands and gravels used in the construction of these pavements.

During March, arrangements were completed to set up a field soils laboratory in the Lands and Forests Experimental Station at Maple.

A traffic signal was installed at the intersection of Highways Nos. 2 and 27 and flashing signals were installed at nine locations in the south. Considerable experimental work was done on mechanical traffic counters.

The Department made every effort to maintain the highways to their normal high standard but, as in recent years, shortages of man-power and materials forced the curtailment of certain services. Zone painting was carried out only

Surface-treated road, Highway No. 15, between Carleton Place and Ashton

Mulch surface, Highway No. 17, five miles west of Sturgeon Falls

where traffic was heavy and where traffic lines had been washed out. Altogether only 335 miles of highway were zone painted, and of this mileage close to half was on Highway No. 2.

Summary of Highway Projects

Mulch surfaces were laid in all but five divisions and in all sections of the province. A list of locations of five miles, or greater length, where such surfaces were laid, is included herewith.

A 3-inch hot mix pavement was laid on Highway No. 37 from the end of pavement north of Corbyville to one-half mile south of Roslin, a distance of 7.6 miles. The Ancaster diversion on Highway No. 2 was completed with the placing of approximately one-half mile of penetration and hot mix pavement. Considerable amount of patching of old concrete pavements in the southwestern part of the province was carried out.

Under agreements with the International Nickel Company a new road was constructed between Sudbury and Frood with waste rock from the mine, and a cut-off was built between Creighton Mine and Highway No. 17, 4.9 miles of the existing Copper Cliff-Creighton Mine road being abandoned.

Regrading was carried out on Highway No. 11 between Moonbeam and the Kapuskasing Airport. The grade through the swamp between Goodwood and Uxbridge on Highway No. 47 was raised two feet and a mulch surface laid thereon. Work was started to provide access to the railway bridge between Little Current and Manitoulin Island to permit the use of this bridge to motor traffic. A start was made on the reconstruction of the Little Longlac Bridge and approaches.

List of Mulch Surfaces Laid

Highway No.			Miles
7	Brooke Westerly	10 0	"
11	Mileage 31-39 North of North Bay	6 0	"
12	Port McNicholl Southerly	7 5	"
17	Pembroke-Petawawa	9 5	"
17	Sturgeon Falls-Verner	6 1	"
17	Markstay-Coniston	7 1	"
21	Forest-Grand Bend	21 2	"
21	Goderich-Bayfield	11 4	"
29	Pakenham-Aruprior	8 3	"
30	Brighton-Warkworth Sideroad	13 0	"
31	Vernon North and South	7 7	"
32	Gananoque-Sceley's Bay	11 1	"
44	Carp-Almonte	5 1	"
47	Goodwood-Stouffville	5 7	"
60	Golden Lake-Eganville	6 0	"
66	Kirkland Lake-Larder Lake	16 7	"
70	Reed Narrows Northerly	12 4	"
99	Dundas-Copetown	5 0	"
	Sudbury-Levaek Road	7 5	"

At the end of the 1944 fiscal year ending March 31, 1945, the total mileage of the different types of surfaces comprising the King's Highway System was as follows:

Concrete	1779 79	Miles
Bituminous Pavement	1608 91	"
Low Cost Bituminous Surface	854 77	"
Gravel and Crushed Stone	3397 98	"
Total	7641 45	"

Mulch surface, Highway No. 21, south of Grand Bend

The Queen Elizabeth Way at St. Catharines

A list of the roads added to the system, together with the mileage and date of designation, also a list of roads and mileages reverted from the system, is shown in Appendix No. 3.

The details of the various grading and paving work and of bridges under construction follow later in this report. Details of bridges completed during the year are listed in the Chief Bridge Engineer's report.

Roadside Maintenance

At the Midhurst Nursery there are now over 180,000 trees and shrubs, one half of which have reached the stage in growth where they must be removed and replanted. Some 50,000 additional trees and shrubs are contained in the Christina Nursery in the London district.

Approximately seven miles of snow hedge were planted along selected sections of highways, making a total of 23 miles planted in the last three years. These hedges become fully effective as wind-breaks three years after planting, and the resultant saving in cost of erection of non-permanent forms of snow fence will absorb the cost of the living hedge within a period of six years. In addition, they enhance greatly the appearance of the right-of-way.

SURVEYS BRANCH

Land Surveys

During the year a total of 215 miles of highway were surveyed and monumented, and plans filed in the Land Titles and Registry Offices. Land acquired by these plans amounted to 5,431 acres affecting 477 owners besides Crown Lands which had not been patented. Of this total, 1,290 acres were acquired for park sites and storage yards, 241 acres of gravel pits, 1,540 acres diversions and widening of highway acquired from private owners, and 2,360 acres of land, which had not been patented, acquired from the Crown.

During the latter part of the year, plans were made to increase the number of draughtsmen, calculators, etc., and have them trained so that a large volume of work could be handled efficiently, if, and when, a large post-war highway program is initiated.

Location and Engineering Surveys

Post-war surveys and planning were continued throughout the year and 741.8 miles of field work was completed. Of this some 578 miles consisted of re-surveys of existing highways in preparation for easier grades and curves. New location amounting to 163.8 miles was run and plans showing topography, contours, and profiles completed. Aerial study plans were made covering 5,195 square miles, mainly in northern areas, on which proposed highway routes were selected, and marked on the plans and photographs for the use of field parties. A further 182 square miles of 400' = 1" study plans were completed in southern Ontario, from aerial photographs and ground control. During the winter, surveys were commenced on the proposed Toronto by-pass and Toronto-Barrie controlled access highway. In addition, three highway intersections for proposed clover-leaves, and four special surveys for accidents and investigation for the Provincial Police were made.

DIVISION No. 1 — CHATHAM

A mulch surface was laid on the unpaved 20-mile section of Highway No. 21 between Forest and Grand Bend. Similar pavement was laid on Highway No. 18B between Ruthven and Union, a distance of one mile; and on Highway No. 79 between Bothwell and Alvinston, a distance of 1.8 miles. Shouldering and drainage operations were completed on Highway No. 40 between Sombra and Corunna. The approaches to the Canard River Bridge were rebuilt and resurfaced.

DIVISION No. 2 — LONDON

Sections of broken concrete pavement on Highway No. 2 west of Brantford and east of London, and aggregating 25,900 sq. yds., were resurfaced with 3 inches of bituminous concrete. Considerable skin-patching was carried out on old concrete pavements, this work being particularly heavy between Paris and Princeton and between Lambeth and Melbourne on Highway No. 2, a total distance of 24 miles. Between Pt. Burwell and Ingersoll, on Highway No. 19, 17,335 sq. yds. of broken pavement were repaired by removing undrainable soil to a depth of 20 inches, filling with stabilized gravel, and surfacing with 4 inches plant mix. Sections of Highway No. 24, between Brantford and Galt, and Highway No. 53, west of Brantford, were also resurfaced with plant mix. Prime was applied on Highway No. 59 south of Woodstock for a distance of 22.6 miles, on Highway No. 80 between Glencoe and Alvinston, on Highway No. 81 between Mt. Brydges and Strathroy, and on Highway No. 99 from the junction of Highway No. 24 east for 4.1 miles. The broken concrete floor of the Sydenham River bridge near Poplar Hill was replaced.

DIVISION No. 3 — STRATFORD

Mulch was laid on Highway No. 21 between Bayfield and Goderich, a distance of 12 miles, on Highway No. 86 between Bluevale and Wingham, through the villages of Bluevale, Wroxeter and Gorrie, south of Wingham for one-half mile and west of Roseville for one mile. Prime was applied on Highway No. 4 between Wingham and Highway No. 9, on Highways Nos. 83 and 84 between Highways Nos. 4 and 21, from Amberley north on Highway No. 21 to Kincardine and east on Highway No. 86 to Wingham, also between Listowel and Molesworth on Highway No. 86, on Highway No. 87 for five miles east of Bluevale and on Highway No. 100, a total of 92 miles. One mile of Highway No. 7 east of Little Lakes was resurfaced, and two culverts, one east of Elmira on Highway No. 86, the other between Clinton and Goderich on Highway No. 8, were replaced.

DIVISION No. 4 — HAMILTON

A plant-mix mulch was laid on Highway No. 99 between Dundas and Cope-town. The Ancaster Diversion on Highway No. 2 was completed with the placing of close to one-half mile of penetration and macadam pavement. One mile of sheet asphalt was laid through the Town of Thorold and 1.7 miles through the Town of Dunnville. Prime was applied to Highway No. 20 along Burlington Beach, to Highway No. 25 between Milton and Acton, to Highway No. 97, and to Highway No. 99 between Copetown and Highway No. 24. Repairs were carried out to structures and 11 miles of R. O. W. fence erected on The Queen Elizabeth Way between Lundy's Lane and Ft. Erie. Concrete culverts were constructed on Highway No. 2 east of Cainsville, and on Highway No. 8 east of Grimsby.

SPRING FLOODS PRESENT ANNUAL MAINTENANCE

PROBLEMS AND DRIVING HAZARDS.

DIVISION No. 5 — OWEN SOUND

With the exception of laying 1.5 miles of mulch pavement between Highway No. 9 and Grand Valley, only general maintenance, surface treatment and sundry construction were undertaken.

DIVISION No. 6 — TORONTO

Extensive asphalt patching of the concrete pavement on Highway No. 2 between Pt. Credit and Clarkson was carried out and the section between Clarkson and Oakville was resurfaced with asphaltic concrete. A short grade revision was made on Highway No. 5 west of Summerville and the revised grade surfaced with 3 inches black base. Mulch was laid on Highway No. 12 between Waubaushene and Pt. McNicoll, on Highway No. 47 between Stouffville and Goodwood and also through the swamp between Goodwood and Uxbridge, the grade on this latter section being first raised two feet, and on Engligton Avenue. Prime was applied to Highway No. 12 between Beaverton and Brechin and between Orillia and Waubaushene, on Highway No. 27 between Malton Sideroad and Kleinburg and between Schomberg and Barrie, and on Highways Nos. 69 and 89.

DIVISION No. 7 — PORT HOPE

A plant-mix mulch surface was laid on Highway No. 30 from Brighton to the Warkworth Sideroad, a distance of 13 miles. Road-mix mulch was laid through the villages of Norland, Kirkfield, Burnt River, Coboconk and Kinmount, in the latter two cases following grade revisions. Prime surfaces were placed on Highway No. 7 from the end of pavement east of Peterborough to Madoc, on Highway No. 28 from Lakefield to Burleigh Falls, on Highway No. 30 from Trent River to Havelock, on Highway No. 35 from Fenelon Falls to the Haliburton County Line, and on Highway No. 46 from Kirkfield to the junction of Highway No. 35. Patching was carried out on Highway No. 33 between Bloomfield and Wellington where the pavement broke up during early spring. The footings of the Mississauga River Bridge near Buckhorn on Highway No. 36 were deepened and reinforced. Culverts in Foxboro, Coboconk and Orono were enlarged.

DIVISION No. 8 — KINGSTON

A 3-inch hot-mix pavement was laid on Highway No. 37 from the end of pavement north of Corbyville to one-half mile south of Roslin, a distance of 7.6 miles. Ten miles of road-mix mulch were laid on Highway No. 7 between Brooke and Silver Lake and 11.5 miles on Highway No. 32 between Gananoque and the junction of Highway No. 15. A laminated plank floor was placed on Brandon's Bridge on Highway No. 41 north of Napanee. Sand bins were erected at Carleton Place, Crosby and Smith's Falls.

DIVISION No. 9 — OTTAWA

Road-mix mulch was laid on Highway No. 29 from Arnprior to Pakenham, on Highway No. 44 from Carp west for 5 miles, on Highway No. 31 both north and south of Vernon, totalling 8 miles, and on the connecting link through the Town of Almonte. Twenty miles of gravel surfaces were primed. Considerable widening and fencing was carried out on Highway No. 44.

DIVISION No. 10 — BANCROFT

Six miles of road-mix mulch were laid on Highway No. 60 between Golden Lake and Eganville. Mulch was also laid through the villages of Apsley and

TRAFFIC DIFFICULTIES CAUSED BY SPRING FLOODS

WHITE LINES ON PAVEMENT

Zone-striping equipment in operation.

On single marking, crossing of dotted line is prohibited unless road is clear of other traffic.

SAFELY CHANNELIZE TRAFFIC

Double solid lines indicate crossing from either side is prohibited.

On double markings, when solid line is on your side, crossing of same is prohibited; if you are on the dotted side you may cross if the way is clear.

Maynooth and on a three-mile section of Highway No. 62 east of Maynooth. Prime was applied on Highway No. 28 from Burleigh Falls to Apsley and on Highway No. 41 for three miles north of Kaladar. The Combermere-Quadville Road was regraded and gravelled and culverts on same repaired.

DIVISION No. 11 — HUNTSVILLE

Resurfacing with hot mix was carried out on Highway No. 11 between Bracebridge and Huntsville and between Novar and Burks Falls and on the secondary roads between Bracebridge and Pt. Carling and Bracebridge and Baysville. Mulch was laid on Highway No. 69 from Bala to Glen Orchard, a distance of 4.6 miles.

DIVISION No. 13 — NORTH BAY

Mulch was laid on Highway No. 11 from mileage 31 to 39 north of North Bay and on Highway No. 17 from Pembroke west for 9.5 miles, between Cache Bay and Verner, 6.4 miles, Warren west for 3.4 miles, and through the Town of Sturgeon Falls. Prime was applied from mileage 10 to 31 north of North Bay on Highway No. 11 and on short stretches of Highway No. 17 totalling 7.1 miles.

A short diversion was constructed near Field on Highway No. 64. A large culvert was installed in the Village of Verner and Highway No. 17 widened at this point. Some regrading was carried out on the Hagar-Wolseley Bay and Field-Afton Mine secondary roads and a number of bridges and culverts constructed, or repaired, on these, and other, secondary roads.

A new brick garage was built at North Bay and a central storage yard of 4 acres and including therein a sand bin was established at the junction of Highway No. 11 and the Airport Road.

DIVISION No. 14 — NEW LISKEARD

Seventeen miles of plant-mix mulch were laid on Highway No. 66 between Kirkland Lake and Larder Lake. Four miles of road-mix mulch were placed between Swastika and Kenogami on Highway No. 11 and short sections, totalling 1.7 miles, at New Liskeard and the Buffalo-Ankerite and Delnute Mines.

Extensive patching of the old retread surface between Latchford and New Liskeard on Highway No. 11 was undertaken. Between Larder Lake and the Quebec border on Highway No. 66 grade raising with selected material was carried out, but not completed, on a 10-mile section. Major repairs were made to several bridges on secondary roads.

DIVISION No. 16 — COCHRANE

Regrading was carried out on Highway No. 11 between Moonbeam and the Kapuskasing Airport. Major repairs were made to the Buskegan River Bridge.

DIVISION No. 17 — SUDBURY

A total of 16.2 miles of mulch surface was laid in the vicinity of Sudbury, 3.4 miles between Coniston and Wanapitac and 4 miles between Stinson and Markstay on Highway No. 17, 1.1 miles immediately north of Sudbury on the Sudbury-Milnet road and 7.5 miles to complete the paving between Sudbury and Chelmsford on the Sudbury-Benny road. Two miles of mulch west of Copper Cliff on Highway No. 17 and short sections on the Sudbury-Falconbridge and Sudbury-Benny roads were resurfaced.

Snow blower in action

Highway No. 56, near Hamilton, illustrating snow conditions early in January.

V-plow widening highway in Niagara Peninsula.

A grade revision was made at Espanola on Highway No. 68. Grading, to afford access to both ends of the C. P. R. bridge between Little Current and Manitoulin Island and permit the use of same to motor traffic, was started, but not completed.

A new road between Sudbury and Frood was constructed under agreement with the International Nickel Company whereby waste rock from the mine was used to build the road surface. Under another agreement with this company a new road was built from Highway No. 17 to the Creighton Mine and 4.9 miles of the existing Copper Cliff-Creighton Mine road abandoned.

Regrading and widening operations were carried out on the Sudbury-Benny road and similar work, and including brushing, was carried out on the Chapleau road, on which no work had been done for the past ten years.

DIVISION NO. 18 — BLIND RIVER

Hot-mix asphalt pavement was laid on the connecting link in Sault Ste. Marie for a distance of 2 miles to replace worn-out existing pavement. To remedy unstable subgrade conditions, pit-run gravel was applied to a depth of one foot on a 2-mile stretch of Highway No. 17 east of Webbwood. Two concrete culverts were installed north of Sault Ste. Marie. A brick storage building was erected at Blind River.

DIVISION No. 19 — FORT WILLIAM

The regrading of Highway No. 11 between Geraldton and Bankfield was completed and work was started on the reconstruction of the Little Longlac Bridge and approaches. Several thousand yards of rip-rap were placed along the shore of Lake Helen to prevent erosion of the highway. Some resurfacing with hot mix was carried out east of Port Arthur. Work was started on the foundation of a concrete bridge over the Little Firesteel River. A sealcoat was applied to 10 miles of Highway No. 61.

DIVISION No. 20 — KENORA

Seventeen miles of mulch surface was laid between Blindfold Lake and Mac Lake on Highway No. 70 and from Mac Lake to Sioux Narrows this highway was primed. Ten concrete culverts on Highway No. 17, and two additional ones on Highway No. 72, were constructed to replace native timber structures.

DIVISION No. 21 — FORT FRANCES

The four miles of mulch surface west of Sleeman on Highway No. 71 were resurfaced and prime was applied between Devlin and Emo. Four miles west of Strattan a half-mile revision to eliminate two bad curves was constructed. The Sleeman road was extended for 3.5 miles to Sabaskong Bay.

BRIDGES COMPLETED DURING THE YEAR 1944**Arthur Sedgwick, Chief Engineer of Bridges**

Bridge construction was largely curtailed during the year on account of war-time conditions, only works of emergency being commenced and uncompleted contracts being finished. A total of 1,723 lineal feet of bridges was completed.

Aidie Creek Bridge

A 56-foot rigid frame concrete bridge was constructed on the Englehart-Charlton road to replace an old timber truss bridge.

Beaver Creek Bridge

A 30-foot rigid frame concrete bridge replaced an old timber structure on Highway No. 17 between Fort William and English River.

Departure Creek Bridge

A multiple span rigid frame concrete bridge was completed, replacing a long timber structure on Highway No. 11, west of Cochrane. It consists of four 50-foot spans on 30-foot piers and abutments supported on timber piles, the abutments having cantilevered wing walls retaining gravel fill approaches.

Kabinakagami River Bridge

The concrete floor was completed on this bridge on Highway No. 11, west of Hearst. This structure is made up of five continuous steel spans totalling 352 feet on concrete filled steel pile caisson pier bents.

Slate River Bridge

A 30-foot rigid frame bridge replaced an old concrete structure on Highway No. 61 between Fort William and Pigeon River.

The balance of the work consisted of timber structures built on Northern Ontario township roads.

A summary of the bridge work carried out directly by the Department is given in Appendix No. 4.

A considerable amount of small bridge and culvert construction was carried out by the counties and townships in the older part of the Province, the Department contributing 75 per cent of the cost thereof. Plans for these structures were in some instances provided by the Department.

REPORT ON THE WORK OF THE MUNICIPAL ROADS BRANCH FOR THE YEAR 1944

J. A. P. Marshall, Chief Municipal Engineer

REORGANIZATION — NEW FEATURES

Important changes in the staff and in the scope of the Municipal Roads Branch were made for the year 1944 in order to increase the assistance given by the Department to counties and townships of the Province. Necessary amendments to the Highway Improvement Act were drafted and passed by the Legislature early in 1944. The major change will be dealt with later in this report in the section concerning work and organization in the northern unincorporated areas of Ontario. The organized counties and townships in the south also benefited by the changes made — particularly through the granting of an increased subsidy of 75 per cent on expenditures made for the construction and maintenance of bridges and culverts. This special rate is now paid where the expenditure on such a structure is \$500.00 and over in the case of townships and \$1,000.00 and over in the case of counties. The building and repairing of bridges and culverts is frequently an urgent task, and one which has placed too great a burden on the resources of our municipalities. This burden has now been greatly eased.

Another difficulty experienced by many municipalities, the financing of the year's road programme was also eased through the granting of interim subsidy payments during 1944. Instead of waiting until all road expenditures for the year are completed, the municipalities may now make application for interim subsidy cheques on the basis of expenditures made up to August 31st, and without reporting their work and expenditure in detail. All the counties and nearly all the organized townships took advantage of this plan. The total of subsidies thus paid out before the end of the year was \$2,707,714.81.

A change in the method of subsidizing road machinery was made for 1944. The rental scheme which was in operation during the previous four years was abolished in favour of the earlier direct-subsidy scheme, and financial adjustments were made by special cheques to the municipalities involved.

COUNTY ROADS

Since the passing of The Highway Improvement Act in 1901 and to the end of 1944 a total of \$165,442,190.67 has been expended on construction and maintenance of county roads, of which the province has contributed \$78,987,908.52. This includes the county expenditure during 1944 on which the provincial subsidy was paid in 1945.

At the end of 1944 the province was paying subsidies to the counties on 8,520 miles of county roads — approximately 15 per cent. of the total road mileage in the area covered by the County Road System.

Expenditure on county roads in 1944 was as follows:

	Approved Expenditure	Provincial Subsidy
Construction:		
County Roads.....	\$ 1,018,882.30	\$ 533,743.80
Maintenance:		
County Roads.....	\$ 3,656,146.59	\$ 1,831,763.40
TOTAL EXPENDITURE.....	\$ 4,675,028.89	\$ 2,365,507.20

Construction Work

The work on which the above expenditure was made included the following:

Gravel or Stone.....	26.00 Miles
Low-Cost Bituminous Surfaces.....	55.83 "
Mixed Macadam and Asphaltic Concrete.....	8.40 "
Cement Concrete.....	1.87 "
TOTAL.....	92.10 "
Bridges Over 10-Foot Span.....	17
Pipe and Tile Culverts.....	155
Other Culverts.....	103

Maintenance Work

Bituminous Surface-Treatment.....	861. Miles
Dust-Prevention Treatment (Oil).....	645. "
Dust-Prevention Treatment (Calcium).....	1268. "
Clay-Gravel Stabilization (Calcium and Salt).....	144. "
GRAVEL AND CRUSHED STONE RESURFACING:	
(a) Pitrun Gravel Applied.....	86,232 Cu. Yds.
(b) Crushed Gravel Applied.....	638,767 " "
(c) Crushed Stone Applied.....	83,111 " "
SNOW REMOVAL:	
(a) Mileage of Road Kept Open with Mechanical Equipment.....	7,731 Miles
(b) Snow Fence Erected.....	930 "

COUNTY SUBURBAN ROADS

The mileage of suburban roads is 847 miles. The expenditure at the end of 1944 amounted to \$31,315,069.59, of which the cities and separated towns have contributed \$8,176,665.29, or five per cent of the total expenditure made on the County Road Systems.

In 1944 the expenditure on county suburban roads was \$759,970.42, of which the province contributed \$384,001.24 and the cities \$187,984.59.

EXPENDITURES ON COUNTY SUBURBAN ROADS 1944

Name of County	Mileage	Approved Expenditure	Government Grant
Brant	26.4	\$ 24,853.36	\$ 12,426.68
Carleton	90.0	96,726.87	50,552.76
Elgin	18.3	18,428.43	9,214.22
Essex	41.0	14,414.01	7,207.00
Frontenac	38.2	28,412.90	14,206.45
Grey	32.5	13,841.22	6,920.61
Hastings	5.0	4,365.60	2,182.80
Kent	9.7	1,856.38	928.19
Lambton	14.5	5,796.76	2,898.38
Lanark	6.0	8,717.20	4,358.60
Leeds and Grenville:			
Smith's Falls	5.1	827.23	413.62
Brockville	7.6	2,712.11	1,356.05
Lincoln	12.3	28,681.10	14,340.55
Middlesex	54.1	22,390.81	11,195.40
Ontario	16.2	11,840.39	7,420.19
Oxford	3.9	3,510.54	1,755.27
Perth	7.5	4,908.76	2,454.38
Peterborough	76.4	41,090.77	20,545.39
Waterloo:			
Galt	14.2	10,778.49	5,389.25
Kitchener	11.0	2,858.18	1,429.09
Welland:			
Niagara Falls	9.9	5,362.52	2,681.26
Welland	7.0	3,738.11	1,869.07
Wellington	23.5	8,735.18	4,367.59
Wentworth	53.0	58,929.01	29,464.50
York	264.2	333,191.16	168,423.94
TOTALS	847.5	759,970.12	384,001.24

ORGANIZED TOWNSHIP ROADS

For the year 1944 the government subsidized road expenditures in 564 townships, 2 provincial parks and 19 Indian reserves.

Expenditure on these roads in 1944 was as follows:

	Construction	Maintenance	Total
Roads	\$ 1,055,002.01	\$ 4,306,090.72	\$ 5,361,092.76
Bridges (ordinary rates)	\$ 12,515.84	75,361.82	87,877.66
Bridges (special rates)	219,310.81	32,807.07	252,117.88
Winter Control		562,711.60	562,711.60
Total Approved Expenditure	\$ 1,286,828.69	\$ 4,976,971.21	\$ 6,263,799.90
Provincial Subsidy	\$ 730,183.54	\$ 2,670,520.75	\$* 3,400,704.29

*Note—This total is slightly different from that reported by the Accountant because Municipal Roads Branch figures must be related to calendar year expenditures. The Accountant's figures are for the fiscal year.

Construction Work

The work on which the above expenditure was made included the following:

Gravel or Stone	76.95 Miles
Low-Cost Bituminous Surfaces	5.67 "
Mixed Macadam and Asphaltic Concrete	1.90 "
TOTAL	84.52 "
Bridges Over 10-Foot Span	93
Pipe and Tile Culverts	394
Other Culverts	326

Maintenance Work

Bituminous Surface-Treatment	113 Miles
Dust-Prevention Treatment (Oil)	139 "
Dust-Prevention Treatment (Calcium)	853 "
Clay-Gravel Stabilization (Calcium and Salt)	26 "
GRAVEL AND CRUSHED STONE RESURFACING:	
(a) Pitrun Gravel Applied	835,857 Cu. Yds.
(b) Crushed Gravel Applied	1,351,036 " "
(c) Crushed Stone Applied	103,073 " "
SNOW REMOVAL:	
(a) Mileage of Road Kept Open with Mechanical Equipment	20,963 Miles
(b) Snow Fence Erected	1,092 "
Weed Spraying	744 "

INDIAN RESERVES

Of the 20 Reserves eligible, 19 reported expenditures totalling \$36,670.99 on which the subsidy paid was \$19,077.62.

Indian Reserve	Expenditure
Alnwick	No Aid Taken
Cape Croker	\$ 1,740.30
Caradoc	905.15
Christian Island	356.30
Gibson	1,330.52
Kettle Point	781.79
Moravian	339.25
Mud Lake	444.95
New Credit	2,492.79
Parry Island	499.70
Rama	244.90
Rice Lake	198.20
Sarnia	927.02
Saugeen	718.89
Shawanaga	294.80
Sheguiandah	177.90
Six Nations	20,977.74
Tyendinaga	2,859.56
Walpole Island	793.05
West Bay	548.18
Total	\$ 36,670.99

TERRITORY WITHOUT MUNICIPAL ORGANIZATION

North of the organized counties lies the greater land area of our province. Much of our wealth has come from this stretch of summer playgrounds, forests and mines, but it is still only thinly settled, and the distances between the scattered, populated spots, plus the often difficult terrain, present serious problems to our road-builders. In addition to the trunk highways, feeder roads must be built and, here and there, little road networks of purely local importance. In the past, all northern roads not directly controlled by the relatively few organized townships have been under the jurisdiction of the King's Highway system, and they will continue this administration of the primary, secondary and mining roads, but, commencing 1944, all other roads become the responsibility of this Branch. This change was made so as to encourage the many small and varied groups of people in the north to take greater interest in road building and to plan community work, through Statute Labour boards and other suitable types of local association. Full township organization, as in the south, is the ultimate goal, but many townships lack the population and wealth for such organization, even though they combine with adjoining townships.

Amendments to the Municipal Act were therefore passed so as to allow the formation of Improvement Districts in areas with a population of 50 or more, upon application by the Department of Municipal Affairs or by not less than 30 male inhabitants of a locality. An Improvement District may take aid in road building in the same way as an organized township. None of these districts were set up in time to take aid under the Highway Improvement Act for the whole of 1944 but much work was done by the Branch in planning for the future.

Encouragement was also given to existing and potential Statute Labour groups. Legislation was drafted to make the work of Statute Labour commissioners easier and, in general, to bring The Statute Labour Act in line with present needs.

The staff of the Branch was slightly enlarged and a reallocation of personnel was made. Much of the work in the north this year was of an educational nature, but the building of roads and bridges by and for the residents showed such improvement as to warrant increased efforts in the future by all concerned.

All expenditures in the unincorporated areas during the fiscal year from April 1st, 1944, to March 31st, 1945, while controlled by the Municipal Roads Branch, were made through The King's Highway Division Offices as usual, and the detail of these expenditures will be found in Appendix No. 1 of this annual report. A total of \$224,548.32 was spent out of government funds during the fiscal year: \$4,189.05 for construction and \$220,359.27 for maintenance. Work valued at a similar total was contributed by local residents under a 50-50 scheme. This sharing of the tasks, work by the residents and expenditures by the government, has the prime advantage of encouraging self-reliance and community enterprise among the settlers.

APPENDICES

Nos. 1 to 9

York	King Township	Aug. 13, 1944	0.12

APPENDIX
BRIDGES COMPLETED ON THE

Name	Type	Span	Road
Aidie Creek	Concrete Rigid Frame	1 at 56'	Englehart-Charlton North
Beaulnes Bridge	Timber Pile	2 at 15', 2 at 12'	Warren-River Valley
Beaver Creek (A)	Concrete Rigid Frame	1 at 30'	Hwy. No. 17, Fort William-English River
Beaver Creek (B)	Creosoted Timber	15', 20', 15'	Kakabeka-Hwy. No. 61
Beaver Creek (C)	Creosoted Timber	15', 20', 15'	Kakabeka-Hwy. No. 61
Brower Twp.	Timber Pile	2 at 15'	Cochrane-Norembega
Cascaden Twp.	Timber	1 at 20'	Levack-Cartier
Departure Creek	Concrete Rigid Frame	4 at 50'	Hwy. No. 11, Cochrane-Kapuskas-ing
Gold Hill Bridge	Local Timber Truss	1 at 50'	Boston Creek East, Hwy. No. 11
Kabinakagami River	Steel Beam	59', 78', 78', 78', 59'	Hwy. No. 11, Hearst-Longlac
Kendrey Twp.	Timber	2 at 15'	
Kennedy Twp. (A)	Timber Pile	2 at 15'	
Kennedy Twp. (B)	Timber Pile	2 at 15', 2 at 12'	
Leitch Twp.	Timber Pile	2 at 15'	
Levack Bridge	Timber Truss	1 at 31'	Sudbury-Levack
McCart Twp. (A)	Timber Pile	2 at 15'	
McCart Twp. (B)	Timber Pile	2 at 15'	
McIntyre River	Native Timber	10', 16', 10'	
Mimentanko Bridge (Slate River)	Creosoted Timber	16', 20', 20', 16'	
Moose Creek	Timber Pile	2 at 15'	Hagar-St. Charles
Newmarket Twp. (A)	Timber Pile	2 at 15'	Hwy. No. 11, Porquis Junction-Cochrane
Newmarket Twp. (B)	Timber Pile	3 at 15'	
Oliver Creek (A)	Creosoted Timber	1 at 30'	
Oliver Creek (B)	Creosoted Timber (B)	1 at 30'	
Ryder Creek	Timber Trestle	3 at 15'	Hwy. No. 11, Kapuskasing-Hearst
Slate River (Millers Bridge)	Concrete Rigid Frame	1 at 30'	Hwy. No. 61, Fort William-Pigeon River
Tamarac Creek	Timber Trestle	5 at 15', 2 at 6'	Charlton-Elk Lake
Trout Creek	Creosoted Timber	14', 16'	Red Rock-Hwy. 17
Wilson Lake Bridge	Local Timber Truss	1 at 45'	Old Ferguson Hwy. South of Timagami

Report of the Motor Vehicles Branch, 1944

TO THE HONOURABLE GEORGE H. DOUCETT,
Minister of Highways.

SIR:

I have the honour to submit herewith a report of the activities of the Motor Vehicles Branch for the year 1944.

This report includes:

- (a) Figures relating to motor vehicle permits and drivers' licenses issued during the license year ending March 31st, 1945;
- (b) A statement, certified by the Provincial Auditor, showing the amount of revenue derived from all sources during the fiscal year ending March 31st, 1945; and
- (c) Reports pertaining to the work of the Accident and Statistical Division, the Financial Responsibility Division and the Public and Public Commercial Vehicle Division, for the year 1944.

The following summarized information covered in this preamble is dealt with in more detail in the pages of the report:

Motor Vehicle Registrations

Despite continued restrictions on the use of motor vehicles, the registration total (675,057) showed a percentage reduction of only 2.39 from the corresponding total (691,615) for 1943.

Drivers' Licenses

Chauffeurs' and operators' licenses issued during the year totalled 905,650, representing a decrease of 1.51 per cent. from the total (919,547) for 1943. There were 69,974 Instruction Permits issued as compared with 70,112 for the previous year.

Revenue

The net revenue collected during the fiscal year ending March 31, 1945, amounted to \$9,445,499.18 as compared with \$9,266,737.08 for the previous year, representing an increase in revenue of \$78,762.10.

Motor Vehicle Accidents

During 1944 reports of 11,004 motor vehicle traffic accidents were received as compared with 11,025 in 1943 and a peak total of 18,167 in 1941. The 11,004 accidents comprised: 450 fatal accidents, 6,200 personal injury accidents and 4,354 accidents involving property damage only. In these accidents, 498 persons suffered fatal injuries, and 8,373 were non-fatally injured. Corresponding figures for 1943 were: 519 killed and 8,628 injured.

Financial Responsibility Division

During 1944 there were 4,498 suspensions applied, of which total 4,110 required the filing of proof of financial responsibility, and 388 were revocations or suspensions not calling for the filing of such proof. As compared with the corresponding total for 1944, there was a reduction of 11.6 per cent. in total suspensions applied; a reduction of 9.5 per cent. in the number of financial responsibility suspensions; and a decrease of 28.5 per cent. in 'other' suspensions.

There were 23,827 convictions (involving the operation of motor vehicles) reported during 1944 as compared with 25,977 for the previous year — representing a reduction of 8.3 per cent from the 1943 total.

Public, and Public Commercial Vehicle Division

There were 8,197 Public Commercial Vehicles licensed during the year — a decrease of 355 or 4.1 per cent. from the corresponding total for 1943.

There were 3,673 Public Commercial Vehicle operators licensed during 1944, an increase of 76 from the previous year's total.

With 1,610 vehicles licensed, there was an increase of 120 in the number of Public Vehicles from the total for the previous year.

General

Included in the scope of activities of the Motor Vehicles Branch are: the recording of approximately two million permits and licenses for the purpose of identifying drivers and vehicles; the collection of information relating to motor vehicle accidents, court convictions and suspensions in fulfillment of the requirements of the Highway Traffic Act; the examination of applicants for driving licenses; the collection and distribution of information and facts relating to accident prevention for educational purposes and for the use of individuals and organizations directly concerned with this problem; the collection of revenue from license and permit fees. Close attention is given to state and provincial legislation for the purpose of establishing greater uniformity and improved driving conditions, and traffic legislation in the municipalities throughout the Province is also given supervision with the same purpose in mind.

In outlining the more noteworthy functions of the Branch, the opportunity is taken here to express sincere appreciation to the police and the courts and to the employees and representatives of this Branch throughout the Province for their valuable co-operation during the past year.

Respectfully submitted,

J. P. BICKELL,

Registrar of Motor Vehicles.

NUMBER OF PERMITS AND LICENSES ISSUED

The number of driving licenses and motor vehicle permits issued during each of the five years, 1940 to 1944, and the percentage change between the 1944 and 1943 totals are shown in the following tables:

REPORT OF THE FINANCIAL RESPONSIBILITY DIVISION, 1944

In September, 1930, the Financial Responsibility Law was enacted to provide a form of protection for those exposed to the hazards of the highway. In principal this was a 'safety' law since — without applying actual compulsion to provide proof of financial responsibility as a prerequisite to the issuance of a license or permit — it provided a forceful incentive to safe driving by penalizing the dangerous and irresponsible driver. This law provides that a motorist who violates its terms must furnish proof of financial responsibility for the future or forfeit his right to own or operate a motor vehicle for a period of at least two years. This law undoubtedly has appealed to self-interest to avoid the results of dangerous driving, but to what extent this has contributed to the improved accident record over the years it is, of course, not possible to estimate.

Since 1930, there have been 64,921 suspensions applied under the provisions of the Financial Responsibility Law. Of this total, 39,769 suspensions have been rescinded or have expired, leaving a total of 25,152 in effect at the end of 1944. In addition to the total mentioned (64,921), 12,968 suspensions or revocations, not requiring proof of financial responsibility, have been applied since September, 1930, of which total 1,673 had been rescinded or had expired at the end of December 1944.

During 1944 there were 4,498 suspension orders issued — 4,110 under the provisions of the Financial Responsibility Law, and 388 non-financial responsibility suspensions.

Of the 4,110 financial responsibility suspensions, 1,674 (or 40.7%) were the result of convictions for Careless Driving following accidents; 644 (15.7%) were the result of failure to maintain proof of financial responsibility in effect; and 608 (14.8%) were the outcome of convictions for drunk driving.

The suspensions and revocations, apart from those requiring proof of financial responsibility, totalled 388, of which number 363 or 93.6 per cent. were applied under the Minister's authority to revoke or suspend a license as given by Section 23 of the Highway Traffic Act. The majority of these suspensions were applied following receipt of information that the subject of the suspension was unfit, because of some physical or mental condition, to operate motor vehicles. Such suspensions remain in effect until satisfactory evidence of the applicant's competence to drive has been provided.

REPORT OF ACCIDENT RECORDING DIVISION, 1944

This Division of the Motor Vehicles Branch came into existence at the same time as the Financial Responsibility Division, and the range of its activities includes: the recording and analysis of reports of accidents; the preparation of statistics and publicity material for accident prevention purposes; the supervision of driving records as a means of isolating the dangerous and irresponsible operator; and other allied duties.

Since the Division came into operation in September, 1930, reports of 174,991 accidents — in which 8,499 persons were killed and 146,644 persons were injured — have been received. There was a total of 250,907 drivers involved in these accidents. Each of these reports has been reviewed, an index showing the locations at which the mishaps occurred has been maintained, and a record kept of the drivers involved. The summarized data have been made available to provide factual information relating to accidents, and recommendations made to develop a clearer and more accurate understanding of the problem and to provide an adequate basis for treatment.

Ontario was the leader in the use of paid publicity as a means of directing public attention to the hazards of the highway and to the requirements of good driving and safe walking. During the war years this form of accident prevention activity has been somewhat curtailed in the interests of economy. With the removal of the restrictions on motor vehicle use, we may expect an increase in accidents unless previous preventive efforts are intensified and expanded. In anticipation of a rapid growth in motor vehicle use when the present war is terminated, it is necessary that plans be developed to make highway transportation less hazardous through engineering safeguards, by greater attention to public education, and through improved methods of law enforcement.

In 1944 there were 11,004 motor vehicle traffic accidents reported to this Division, involving the loss of 498 lives, injury to 8,373 persons, and a direct property damage loss, to vehicles and other property, amounting to \$1,769,663.

In the following pages reference is made to some of the more noteworthy accident facts disclosed by the statistical summary inserted with this report.

Nature of Accidents (See Summary, Section 1):

During the calendar year, 1944, there were 11,004 accidents reported to the Motor Vehicles Branch. This total included 450 *fatal* accidents (in which one or more persons were fatally injured); 6,200 *personal injury* accidents (in which one or more persons were non-fatally injured); and 4,354 accidents involving property damage, in excess of \$50.00, only. The 11,004 accidents reported during the year may be compared with 11,025 for 1943, and an average of 12,190 for each of the fourteen years, 1931 to 1944.

As compared with the 1943 totals, *all* accidents decreased by 0.2 per cent.; *fatal* accidents showed a drop of 57 or 11.2 per cent.; and *personal injury* accidents decreased by 3.2 per cent. The number of *property damage only* accidents (4,354) was 239 or 5.8 per cent. above the corresponding total for 1943.

Types of Accident (See Summary, Section 1):

Of the eleven types of accident classified, seven showed increases from the corresponding totals for 1943.

Collision with pedestrian accidents (2,726), which made up 24.8 per cent. of the total reported showed a decrease of 8.1 per cent. from the total for last year, and a decrease of 15.0 per cent from the average annual total for the 14-year period, 1931 to 1944.

Collision with other motor vehicle accidents totalled 4,792 (43.5% of the total accidents reported) — representing an increase of 2.2 per cent. from the previous year's total, and a decrease of 7.1 per cent. from the average annual figure (5,156) for the 14-year period.

Collision with street car accidents were fewer in number than in 1943, but the total reported, 352, was considerably above the 14-year average of 144.

Number of Persons Fatally Injured, Detailed by Type of Collision (See Summary, Section 1):

During 1944 there were 498 persons fatally injured as the result of motor vehicle traffic accidents in Ontario. This total represented a decrease of 9.3 per cent. from the corresponding total for the previous year; and a decrease of 15.8 per cent. from the average annual fatality total (592) for the 14-year period, 1931 to 1944.

As compared with the 9.3 per cent. decline in the number of fatalities, the number of deaths in the *collision with pedestrian* type of accident decreased by 22.5 per cent.; while deaths from *collision with other motor vehicle* accidents increased by 29.2 per cent.

Death Rate

The death rates for the years 1940 to 1944 on the bases of Mileage (gasoline consumption), Vehicle Registration, and Population, are shown in the following table:

<i>Death Rate</i>	1940	1941	1942	1943	1944
Per 100,000,000 miles travelled*	13.9	14.7	12.8	15.1	13.1
Per 10,000 vehicles registered	10.2	10.8	7.9	7.9	7.4
Per 100,000 population†	19.0	21.2	14.8	14.2	12.6

The above figures indicate a reduction in all death rates from the same rates for 1943.

Classification of Persons Fatally Injured (See Summary, Section 13):

There were 217 pedestrians fatally injured during 1944 as contrasted with 282 for 1943 and an annual average of 254 for the 14-year period. The number of passengers in motor vehicles who suffered fatal injuries totalled 137 as against 126 for the previous year and a 14-year average of 168.

Ninety-two (92) motor vehicle drivers were killed in 1944, while the total for 1943 was 88 and the 14-year average was 113.

* Based on an estimated mileage of 15.6 miles per Imperial gallon, or 13 miles per U. S. gallon.

† Ontario population (estimated), 3,965,000 for 1944.

Classification of Persons Fatally Injured in Urban Accidents, Detailed by Age Group:

Class of Victim	Age Group					
	0-4	5-14	15-35	36-54	55-64	65 & Over
Drivers.....	—	—	10	12	1	1
Passengers.....	1	2	7	6	3	1
Pedestrians.....	19	30	9	22	17	42
Others.....	—	—	—	—	—	—
Bicyclists.....	—	4	8	2	1	1
Motorcycle Drivers.....	—	—	3	—	—	—
Motorcycle Passengers.....	—	—	—	1	—	—
Total.....	20	36	37	44	22	45

The above table shows the distribution of 204 deaths which resulted from *urban* (city, town and village) accidents during 1944, by age group. Of the total, 152 were males, 52 were females.

Of the 139 pedestrians fatally injured in *urban* accidents, 49 (35.2%) were *under 15 years of age*, and 42 (30.2%) were in the age class *65 years and over*.

There were 36 children between 5 and 14 years of age fatally injured in *urban* accidents, of which total 30 were pedestrians.

Classification of Persons Fatally Injured in Rural Accidents, Detailed by Age Group:

Class of Victim	Age Group					
	0-4	5-14	15-35	36-54	55-64	65 & Over
Drivers.....	—	—	33	19	10	6
Passengers.....	2	7	52	23	15	18
Pedestrians.....	15	18	8	14	6	17
Others.....	—	—	1	—	1	1
Bicyclists.....	—	5	5	2	—	—
Motorcycle Drivers.....	—	—	10	4	—	—
Motorcycle Passengers.....	—	—	2	—	—	—
Total.....	17	30	111	62	32	42

Of the 294 persons killed in *rural* (King's Highways, county and township road) accidents, 117 were *passengers*, 78 were *pedestrians*, and 68 were *drivers* (of the 68 drivers, 67 were males; while of the 117 passenger fatalities, 65 were males and 52 were females).

Eighteen of the 78 *pedestrians* fatally injured in *rural* accidents were in the age group 5-14 years; 17 were in age group, 65 years and over; and 15 were of pre-school age, 0-4 years.

The following table shows the death rate from all (*urban* and *rural*) accidents according to the various age classes:

Age Group	No. of Deaths	Population	Death Rate per 100,000 Population
0-4 years	37	345,000	10.7
5-14 "	66	621,000	10.6
15-35 "	148	1,313,000	11.3
36-54 "	106	1,005,000	10.5
55-64 "	54	357,000	15.1
65 & Over	87	324,000	26.8
Total.....	498	3,965,000	12.6

It will be seen that the death rates, on the basis of population, were higher in the age groups, 65 years and over, and 55-64 years than in the other groups.

In comparison with the prewar year, 1937, the drop in the provincial death rate amounted to 38.8 per cent. The greatest decreases were found in the higher age groups and less noteworthy decreases were experienced in the younger ages. Thus, as compared with the decrease in the rate for all ages amounting to 38.8 per cent., the death rate from motor vehicle accidents in the age group 0-4 years declined 8.5 per cent., and the decrease in the rate for age group 5-14 years amounted to 13.8 per cent.

These figures suggest the need for greater attention to safety training in the younger age groups.

Classification of Persons Non-fatally Injured in Urban Accidents, Detailed by Age Groups:

Class of Victim	Age Group						65 and Over	Not Stated
	0-4	5-14	15-35	36-54	55-64			
Drivers	—	4	339	227	49	18	20	
Passengers	50	87	635	310	99	52	91	
Pedestrians	294	708	354	331	229	233	103	
Others	—	3	10	17	3	4	3	
Bicyclists	—	199	246	101	32	14	31	
Motorcycle Drivers	—	—	73	10	—	2	3	
Motorcycle Passengers	—	2	19	1	—	—	3	
Total	344	1003	1676	997	412	323	254	

The foregoing table shows the classification of 5,009 persons injured in motor vehicle accidents on urban streets during 1944. Of this total, 2,252 (or 45.0%) were pedestrians, and 1,324 (26.4%) were passengers.

School-age children (5-14 years) in pedestrian accidents numbered 708 or almost one third (31.4%) of all pedestrians injured in urban accidents during the year.

Of the total of 657 drivers injured, 581 (or 88.4%) were males.

Classification of Persons Non-fatally Injured in Rural Accidents, Detailed by Age Group:

Class of Victim	Age Group						65 and Over	Not Stated
	0-4	5-14	15-35	36-54	55-64			
Drivers	—	2	516	289	80	33	9	
Passengers	50	143	875	395	109	75	108	
Pedestrians	43	170	107	66	32	28	27	
Others	—	6	10	3	3	1	1	
Bicyclists	—	58	35	4	13	2	1	
Motorcycle Drivers	—	1	43	3	—	—	—	
Motorcycle Passengers	—	—	20	2	—	—	1	
Total	93	380	1606	762	237	139	147	

More than half (1,755 or 52.2%) of the 3,364 persons injured in rural accidents were passengers. This may be compared with a corresponding percentage of 26.4 for urban injuries.

Of the 473 pedestrians injured in rural accidents, 170 were in age group 5-14 years and 43 were under 5 years of age.

Fifty-eight (58) of the 113 bicyclists injured in rural accidents were between 5 and 14 years of age.

The following table shows the injury rate, per 100,000 population, of the various age groups:

Age Group	No. of Persons Injured	Population	Injury Rate
0-4	437	345,000	127
5-14	1,383	621,000	223
15-35	3,282	1,313,000	250
36-54	1,759	1,005,000	175
55-64	649	357,000	182
65 and Over	462	324,000	143
Not Stated	401*	—	—
Total	8,373	3,965,000	211

From the table above it can be seen that the highest injury rate was in the age group 15-35 years, with 250 injured of every 100,000 persons in that age class. This may be compared with the average rate of 211 reported non-fatal injuries per 100,000 population. The 15-35-year group is most exposed to traffic dangers either as pedestrians, drivers or passengers.

* Not included in computation of injury rates.

Classification of Persons Killed and Injured in Urban and Rural Accidents:

	<i>Urban</i>		<i>Rural</i>		<i>All</i>		<i>Fatal Rate*</i>	
	<i>Killed</i>	<i>Injured</i>	<i>Killed</i>	<i>Injured</i>	<i>Killed</i>	<i>Injured</i>	<i>Urban</i>	<i>Rural</i>
Drivers.....	24	657	68	931	92	1588	3.5	6.8
Passengers.....	20	1324	117	1755	137	3079	1.5	6.2
Pedestrians.....	139	2252	78	470	217	2722	5.8	14.2
Others.....	1	40	3	25	4	65	2.4	10.7
Bicyclists.....	16	623	12	113	28	736	2.5	9.6
Motorcycle Drivers....	3	88	14	47	17	135	3.3	22.9
Motorcycle Passengers..	1	25	2	23	3	48	3.8	8.0
Total.....	204	5009	294	3364	498	8373	3.9	8.0

While to some extent the accuracy of the 'fatal rates' of *rural* accidents is affected by the failure to report accidents of less serious consequence, such rates may be taken as an indication of the greater severity of *rural* accidents. Thus, of every 100 pedestrians (fatally or non-fatally) injured in *urban* accidents, 5.8 died, while the corresponding rate for *rural* accidents was 14.2.

The 'fatal rate' for all *rural* accidents was more than twice as high as the rate for *urban* accidents — 8 deaths per 100 injuries as against 3.9 for *urban* accidents.

The higher speeds prevailing on rural roads and the greater hazards to pedestrian travel on such roads are among the factors contributing to this situation.

Month of Occurrence:

Accident frequency in the first three months of 1944 was higher than average (24.3% of the accidents reported occurred in the first quarter of the year, as contrasted with 21.0% for 1943, and 19.5% for the 14-year period), whereas the number of mishaps reported for the last half of the year was 6.5 per cent. below the corresponding total for 1943. As in previous years, however, more accidents happened in the last three months of the year than during any other quarter. November was the peak month with 1072 accidents reported as compared with a monthly average of 917.

Accidents in all *cities* reached their peak in December with a total of 580 reported. This may be compared with a monthly average in the cities of 503, during 1944, and a December average of 826 for the five-year period, 1939 to 1943.

On the King's Highways during 1944, more accidents occurred during September than in any other month (277, compared with a monthly average of 227, and a five-year average of 423 for that month).

October was the peak month for *pedestrian* accidents with a total of 269 reported. This total may be compared with an October average of 366 for the five-year period, 1939 to 1943.

Collision with other motor vehicle accidents were most frequent in December, with a total of 606 reported as contrasted with 745 — the five-year average for that month.

While more *fatal* accidents occurred in the last three months of 1944 than in any other quarter of the year, the number of such accidents in the first quarter (103) was considerably above the corresponding total (69) for 1943, and also in excess of the average (83) for this quarter over the 14-year period. The larger-than-average total for March was largely responsible for this situation.

Fatal accidents reached their highest point in October with 51 reported. This may be compared with an October average of 72 for the five-year period, 1939 to 1943. With 45 fatal accidents, March was the only month in 1944 with a total of fatal accidents in excess of the five-year average. (The five-year mean for March was 33.)

* Number of persons fatally injured per 100 fatally or non-fatally injured

Urban and Rural Accidents, Detailed by Quarters and by Eight-hour Periods:

8-Hour Period*	URBAN											
	Jan-Mar		Apr-Jun		Jul-Sep		Oct-Dec		All			
	No.	%	No.	%	No.	%	No.	%	No.	%	No.	%
12 a.m. to 7.59 a.m.	257	15.2	168	10.9	154	10.0	273	14.7	852	12.9		
8 a.m. to 3.59 p.m.	574	34.0	539	35.1	558	36.4	624	33.7	2295	34.7		
4 p.m. to 11.59 p.m.	857	50.8	831	54.0	822	53.6	957	51.6	3467	52.4		
Total	1688	100.0	1538	100.0	1534	100.0	1854	100.0	6614	100.0		

8-Hour Period*	RURAL											
	Jan-Mar		Apr-Jun		Jul-Sep		Oct-Dec		All			
	No.	%	No.	%	No.	%	No.	%	No.	%	No.	%
12 a.m. to 7.59 a.m.	153	15.9	151	16.6	196	15.9	192	16.2	692	16.1		
8 a.m. to 3.59 p.m.	307	32.0	265	29.1	361	29.3	336	28.4	1269	29.6		
4 p.m. to 11.59 p.m.	501	52.1	494	54.3	676	54.8	656	55.4	2327	54.3		
Total	961	100.0	910	100.0	1233	100.0	1184	100.0	4288	100.0		

The above tables have been prepared to indicate the relative frequency of motor vehicle traffic accidents during three eight-hour periods of the day in each of the four quarters of the year, 1944.

It will be seen that about half (52.4%) of the *urban* accidents occurred during the eight hours, 4 p.m. to midnight, about one third (34.7%) happened between 8 a.m. and 4 p.m.; and about one of every eight (12.9%) of the accidents occurred between midnight and 8 a.m. The variation in these percentages throughout the year was very small.

Corresponding data for *rural* accidents show a relatively larger share of accidents during the hours of darkness.

As regards *urban fatal* accidents, of a total of 194 reported, 113 or 58.2 per cent. occurred in the 4 p.m. to midnight period; 29.4 per cent. happened between 8 a.m. and 4 p.m.; and the remainder (12.4%) occurred between midnight and 8 a.m. Some noteworthy variations from these percentages were found in the quarterly figures. Thus, in the first quarter of 1944, more than 25 per cent. of the *urban fatal* mishaps occurred between midnight and 8 a.m. In the last quarter, 70.7 per cent. happened during the 4 p.m. to midnight period.

Of the 256 *rural fatal* accidents, 144 or 56.5 per cent. happened between 4 p.m. and midnight; 28.6 per cent. occurred between 8 a.m. and 4 p.m.; and 14.9 per cent. occurred during the eight-hour period, midnight to 8 a.m.

Of the 72 *rural fatal* accidents in the third quarter of the year, a higher-than-average share (36.6%) occurred in the daylight hours, 8 a.m. to 4 p.m.; whereas in the last quarter (71 *rural fatal* accidents) the hours, 4 p.m. to midnight, showed 57.7 per cent. of the *rural fatal* accidents as compared with the annual average of 56.5 per cent. The second quarter also showed a higher than-average incidence during this (4 p.m. to midnight) period. The 'after party' accidents probably accounted for the relatively large share of *fatal* accidents in the midnight to 8 a.m. period in the first quarter (19.6% as compared with a mean of 14.9%).

As in previous years, more accidents occurred between 5 and 6 p.m. than at any other hour. The peak hour for *fatal* accidents was between 6 and 7 p.m.

More accidents — both fatal and otherwise — happened on Saturday than on any other day. Sunday accidents accounted for a smaller percentage of the total than in 1943 or during the fourteen-year period. It is likely that the restrictions on non-essential driving contributed to this situation.

All Accidents and Fatal Accidents, by Light Conditions Prevailing (See Summary, Section 11):

	ALL ACCIDENTS					
	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Daylight	94,346	55.3	6,400	48.6	6,647	60.4
Dusk	8,104	4.8	426	5.0	460	4.2
Dark	68,107	39.9	4,191	46.4	3,892	35.4
Not Stated	108	...	8	...	5	...
Total	170,665	100.0	11,025	100.0	11,004	100.0

* 'Not stated' cases have not been included in computation.

FATAL ACCIDENTS

	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Daylight	3,662	48.6	274	54.1	242	53.8
Dusk	374	5.0	17	3.4	23	5.1
Dark	3,491	46.4	215	42.5	185	41.1
Not Stated	5	...	1
Total	7,532	100.0	507	100.0	450	100.0

Again, emphasis on essential driving would appear to have influenced the accident rate during 1944. The share of night accidents was 11.3 per cent. below the average for the 1931-1944 period, and approximately the same reduction (11.4%) was noted in the number of *fatal* accidents occurring after dark.

It will be observed that 60.4 per cent. of *all* accidents, and 53.8 per cent. of the *fatal* accidents happened during daylight.

Considering the 170,665 accidents which occurred during the fourteen-year period, we find that of every 100 accidents in daylight, 3.9 resulted fatally; of every 100 accidents during dusk, 4.6 resulted fatally; and of every 100 accidents after dark, 5.1 resulted fatally. The fatal rate for all accidents was 4.4. The increased hazards of night driving can be more clearly appreciated when it is realized that traffic counts on the King's Highways have shown that less than twenty-five per cent.* of all traffic is on the road after dark.

All Accidents and Fatal Accidents by Weather and Road Surface Conditions (See (See Summary, Sections 10 and 15):

The fact that the days of clear weather and dry road surfaces far outnumber days of less favourable conditions, in addition to the fact that more traffic is on the road in good weather, may be taken as important factors accounting for the preponderance of accidents during clear weather and when the road surface is dry.

In 1944, out of a total of 11,004 accidents reported, 7,902 or 71.8 per cent. occurred in clear weather and 6,954 (63.2%) happened on dry road surface. The 'fatal rate' (number of fatal accidents per 100 of all types) was, however, slightly higher under conditions of fog and rain than during clear weather. Possibly due to higher rates of travel on dry roadways, the 'fatal rate' was higher under such conditions than when the road was wet or snow-covered.

These figures suggest that drivers make allowance for obvious hazards but fail to leave a sufficient margin of safety when these weather and road hazards are absent.

Location of Accidents:

	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
City	91,507	53.6	6,011	54.5	6,036	54.9
Town	7,450	4.4	484	4.4	534	4.8
Village	2,042	1.2	157	1.4	134	1.2
Urban	100,999	59.2	6,652	60.3	6,704	60.9
King's Highway	47,602	27.9	2,870	26.0	2,722	24.7
County Road	13,709	8.0	859	7.8	889	8.1
Township Road	8,355	4.9	644	5.9	689	6.3
Rural	69,666	40.8	4,373	39.7	4,300	39.1
Total	170,665	100.0	11,025	100.0	11,004	100.0

Very little change was noted in the average number of *city* accidents reported over the 14-year period and in 1943 and 1944. The daily averages for these periods were, respectively: 17.89, 16.46, and 16.49. The corresponding daily average number of reported accidents on the *King's Highways* were: 9.31, 7.86, and 7.44.

The *city* total of 6,036 for 1944, and 6,011 for 1943, may be compared with an annual average total, over the 14-year period, of 6,536.

The *King's Highway* totals of 2,722 and 2,870 in 1944 and 1943, may be compared with an annual average of 3,400 for the 1931 to 1944 period. The 1944 *King's Highway* total thus represented a decrease of about 20 per cent. from the 14-year mean. The corresponding reduction in the number of *city* accidents amounted to 7.6 per cent.

The greater reduction in *King's Highway* accidents was no doubt due to the restrictions placed on non-essential driving which effected a greater lessening of rural travel than has been found in urban areas.

* Traffic counts taken on September 2 and 4, 1944 (Nos. 2, 5, 11 and the Queen Elizabeth Way), showed that the percentage of night traffic varied between 14 and 23.

Location of Fatal Accidents:

	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
City.....	2,184	29.0	176	31.7	153	31.0
Town.....	547	7.3	35	6.9	33	7.3
Village.....	184	2.4	10	2.0	8	1.8
Urban.....	2,915	38.7	221	43.6	194	43.1
King's Highway.....	2,865	38.0	180	35.5	156	34.7
County Road.....	1,159	15.4	61	12.0	62	13.8
Township Road.....	593	7.9	45	8.9	38	8.4
Rural.....	4,617	61.3	286	56.4	256	56.9
Total.....	7,532	100.0	507	100.0	450	100.0

Despite the restrictions on motor vehicle transportation which has reduced the volume of traffic on the *King's Highways*, it will be seen that *fatal* accidents on such roads continued, in 1944, to exceed the *city* total (156 *fatal* accidents on the *King's Highways* as against 153 in all *cities*). It will be noticed, however, that the *city* total made up 34.0 per cent. of the *fatal* accidents during 1944, as compared with 29.0 per cent. for the 14-year period, 1931 to 1944. This situation was reversed on the *King's Highways* where 34.7 per cent. of the *fatal* accidents occurred in 1944 as against 38.0 per cent. for the 14-year period.

While most (54.9% in 1944) of the accidents happen in the cities because of the greater congestion of traffic — both vehicular and pedestrian — such accidents are less likely to result in fatal injuries than accidents on the *King's Highways* where prevailing speeds are higher. Thus, in 1944, of every one hundred accidents in *cities*, 2.5 resulted fatally; while the corresponding rate on the *King's Highways* was 5.7. Considering the same set of data for the 1931 to 1944 period, it was found that of every 100 accidents on city streets, 2.1 resulted in the death of one or more persons; while on the *King's Highways* the rate was 6.0.

Road Location of Accidents (See Summary, Section 15):

Road Location	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Street Intersection.....	54,993	32.22	3,647	33.08	3,803	34.56
Between Street Intersections.....	40,875	23.95	2,687	24.37	2,639	23.98
Rural Intersection.....	9,453	5.54	615	5.58	594	5.40
Straight Road.....	39,692	23.26	2,726	24.73	2,694	24.48
Private Driveway.....	4,888	2.87	122	1.11	82	7.5
Curve.....	10,254	6.01	589	5.34	537	4.88
Hill.....	6,466	3.79	355	3.22	325	2.95
Railway Crossing —						
(a) Man on Duty or Gates.....	162	.09	14	.13	18	.16
(b) Automatic Signal.....	389	.23	27	.24	33	.30
(c) Unguarded.....	1,572	.92	106	.96	134	1.22
Bridge.....	1,907	1.12	137	1.24	145	1.32
On Ferry or Dock.....	14
Total.....	170,665	100.00	11,025	100.00	11,004	100.00

The figures in the table above show that more accidents occur at urban *street intersections* than at any other location. Intersection accidents made up 34.56 per cent. of the 1944 total as compared with 24.48 on rural *straight road* and 23.98 per cent. *between street intersections* on urban streets.

Each of these items was relatively higher than the 14-year average.

Types of Vehicles in Accidents (See Summary, Section 9):

Type of Vehicle	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Passenger Car.....	202,864	79.1	11,897	72.6	11,837	72.0
Commercial Vehicle.....	42,768	16.7	3,550	21.7	3,631	22.1
Taxicab.....	3,765	1.4	296	1.8	348	2.1
Bus.....	2,332	.9	341	2.1	378	2.3
Motorcycle.....	3,632	1.4	180	1.1	184	1.1
Trailer.....	756	.3	17	.1	9	.1
All Others.....	435	.2	96	.6	59	.3
Not Stated.....	393	21	28
Total.....	256,945	100.0	16,398	100.0	16,474	100.0

In the absence of figures relating to the mileage driven by various types of vehicles, the statistics above will be found of limited value. It will be observed, however, that *passenger cars*—which comprised 84.2 per cent. of the motor vehicles registered in 1944—made up 72 per cent. of the vehicles in accidents; while *commercial vehicles* (14.5% of vehicles registered) accounted for 22.1 per cent. of the vehicles in accidents. There were 3,631 *commercial vehicles* in accidents during 1944 as compared with an average of 3,055 for the 14-year period, 1931 to 1944. This increase in accidents involving trucks has been to some extent due to the increase in registrations* and in the use of commercial vehicles since commencement of the war.

* As compared with 1939 figures, the number of commercial vehicles registered in 1944 showed an increase of 15.2 per cent. During the same period, passenger car registration decreased by 6.9 per cent.

Number of Accidents, Deaths and Injuries, by Counties and Districts:

Of the 54 counties and districts, 30 showed an increase in accidents from the corresponding total for 1943, and 22 counties and districts reported an increase in the number of persons fatally injured.

Approximately three of every five (58.7%) of the accidents reported in 1944 occurred in six counties; (York 29.5%; Essex 8.9%; Wentworth 7.0%; Middlesex 5.9%; Carleton 4.1%; and Welland 3.3%). Of the 498 motor vehicle fatalities 235 or 47.2 per cent. occurred in these counties.

* Indicates counties and districts which experienced an increase in the number of deaths.

† Indicates increase in the number of accidents reported.

‡ In 1944 the estimated population in these counties made up 46.4 per cent. of the Ontario total of 3,965,000.

Accident statistics, in themselves, do not justify conclusions with respect to the relative driving ability of male and female drivers since information pertaining to the amount of driving of either sex and the conditions under which such driving is done is not available.

In 1944 — as compared with 1943 — there was a slight (0.2%) decrease in the number of male drivers involved in accidents, but an increase of 7.9 per cent. in the number of female drivers involved. A similar trend was noted in the case of drivers in *fatal* accidents. (According to a test check made of 1943 driver applications, 82.7% of the drivers were male, 17.3% female.)

* Indicates increase in number of persons killed as compared with 1943 totals

† Indicates increase in number of accidents reported

(1) No reports for 1944 had been received from St. Thomas at the time this report was prepared.

Classification of Drivers in Accidents, by Age Groups See Summary, Section 4

Age Group	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Under 18 Years	6,524	2.8	725	1.7	847	5.5
18-24	54,216	23.2	2,863	18.4	2,796	17.4
25-40	103,809	44.3	6,902	44.5	6,616	42.7
41-54	49,624	21.2	3,474	22.4	3,667	23.6

Classification of Drivers in Fatal Accidents, by Age Groups

Age Group	1931-1944		1943		1944	
	No.	%	No.	%	No.	%
Under 18 Years	231	2.7	32	5.6	35	6.5
18-24	2,104	24.3	104	18.2	87	16.2
25-40	3,804	43.9	260	45.5	249	46.4
41-54	1,672	19.3	120	21.0	110	20.5
55-64	583	6.7	37	6.5	36	6.7
65 and Over	275	3.1	18	3.2	20	3.7
Not Stated	284	-	2	-	1	-
Total	8,953	100.0	573	100.0	538	100.0

Due to the change in the Regulations which became effective in June, 1943, and which permitted the issuance of a driving license to an applicant of fifteen years of age, the number of drivers in the *under 18 years* group showed the greatest increase during 1944. During the 14-year period there was an average of 466 drivers in this age class in accidents while in 1944 this total was 847 or 81.8 per cent. above the average figure. On the other hand — probably due to the many thousands of drivers who are in the armed services — the drivers in the 18-24 year group contributed to accidents to a much lesser extent than usual. Thus, in 1944, there were 2,706 drivers in the 18 to 24 year group in accidents which was 30.1 per cent. below the average figure (3,873) for the 14-year period.

The percentage of drivers in the higher age groups (41-54; 55-64; and 65 and over) was also higher than average.

Experience of Drivers (See Summary, Section 4):

Four of every five (80.1%) of the drivers in accidents during 1944 had had *five or more years' experience* in driving, and an additional 17.3 per cent. claimed to have had from 1 to 4 years' experience.

Condition of Drivers in Accidents (See Summary, Section 4):

	1931-1944		1943		1944	
	No.	%	No.	%	No.	%

Total	8,953	100.0	573	100.0	538	100.0

In 1944, the summary of accident information provided by the police of the Province showed that 97.7 per cent. of the drivers in *all* accidents and the same percentage of drivers in *fatal* accidents were in 'normal' condition. Of the 15,702 drivers in *all* accidents, 191 or 1.2 per cent. were said to have been 'intoxicated'; 94 were suffering from 'extreme fatigue'; and 75 were said to have been suffering from a 'physical defect.'

Actions of Pedestrians in Fatal and Non-fatal Pedestrian Accidents (See Summary, Section 12):

	1931-1944		1943		1944

On Sidewalk.....	79	1,048	9	76	5	54
Total.....	3,460	41,431	272	2,695	210	2,516

The table above provides information relating to the mistakes and violations which cause pedestrians to be the greatest sufferers in motor vehicle accidents. The dangers of crossing streets between blocks rather than at intersections are indicated by the fact that during 1944 almost 30 per cent. of the non-fatal pedestrian accidents and 27.6 per cent. of the fatal pedestrian accidents involved this action, whereas only 19.3 per cent. of the non-fatal pedestrian accidents occurred at intersections, not protected with a signal light, where the vast majority of pedestrian crossings are made.

The action 'children playing in street' accounted for about 10 per cent. of the actions classified in non-fatal pedestrian accidents, and emphasizes the need for greater attention to safety training and proper supervision and for the provision of more play-ground facilities. The figures also point to the necessity for more caution and alertness on the part of motorists.

REPORT OF PUBLIC VEHICLE DIVISION, 1943-44

During the year ending March 31st, 1944, there were 8,197 Public Commercial Vehicles licensed, a decrease of 355 from the preceding year. There were 3,673 Public Commercial Vehicle operators licensed during the same period, an increase of 76.

In 1944, 1,610 Public Vehicles were licensed, an increase of 120 from the 1943 total. The number of Public Vehicle operators was 146.

The number of school buses licensed in 1944 was 424, an increase of 63 over the previous year and the number of school bus operators increased by 61 to 407.

The number of single or one-way trips by freight-in-bond operators licensed to transport freight in bond from a point in the United States of America to another point therein through the Province of Ontario increased by 3,724 to 12,808 trips. There were 11 firms holding Public Commercial Vehicle licenses to transport freight in bond through Ontario.

In Memoriam

Provincial Constable R. W. Duncan, Bowmanville Detachment, No. 8 District, Belleville. Appointed December 9th, 1941. Died from injuries received in falling from a moving train, February 21st, 1945.

Provincial Constable T. Barrett, Ridgeway Detachment, No. 4 District, Niagara Falls. Appointed August 27th, 1939. Died May 1st, 1945, from heart trouble.

Report of the Commissioner of Police for Ontario

From January 1st, 1945, to December 31st, 1945

ONTARIO PROVINCIAL POLICE,
Headquarters, Toronto.

THE HONOURABLE THE ATTORNEY-GENERAL,
Parliament Buildings, Toronto, Ontario.

SIR:

I have the honour to submit herewith my Annual Report covering the work of the Ontario Provincial Police, together with statistical data for the period January 1st, 1945, to December 31st, 1945.

A Resume of the Wartime Efforts of the Police

My Annual Reports for the years 1940 to 1944 inclusive, contain detailed information and statistics concerning the various wartime activities of the Force in each and every war year. However, now that the war is over, with victory to our arms and the cause they espoused, it is perhaps appropriate for me to briefly record the part played by this Force during those trying years.

Certain it is that while the Force was numerically small, it demonstrated that it was nevertheless efficient, for it coped with the immediate expansion necessitated by the emergency which the threat, and the subsequent eventuality of war produced, by expeditiously absorbing and training: thus accepting responsibility for the adequate and proper use of the thousands of volunteers who literally sprang up to render service in the general cause throughout the Province.

In some instances hundreds of these volunteers were directly taken on our pay-roll as in the case of the "Veteran Guards" which body of men under the direct supervision of the members of the Provincial Police Force, protected, and I might add, without incident, the vulnerable Hydro-Electric plants of this Province against sabotage or destruction. These were thus an integral part of the Force. Others were "Volunteers without pay", organized on a municipal basis, grouped regionally for control, and directed by the Provincial Director of Police Services, as was the case with the Police section of the Air Raid Precautions service set up under the Civilian Defence Committee (Ontario), of which the Chairman was the Honourable the Attorney-General, and the Vice-Chairman and Director of Police Services being the Deputy Commissioner of Ontario Provincial Police. There were also other "Volunteers without pay" who were instructed by the Force, and helped it greatly. I refer to the "Ontario Volunteer Constabulary" which, in addition to being an auxiliary of our Force, also perfected a Mobile Column for services under the Civilian Defence Committee, Air Raid Precautions Scheme, and stood prepared to assist municipal authorities in an emergency under the scheme.

Thus did a Force of well under 500 of all ranks, weld into an efficient whole, some thousands of public spirited persons and direct their activities. For me to single out those to whom special mention is due would be to make invidious

comparisons because the fact is that each and every one according to his station, responsibility and duty, simply gave of his best, and the result is to be seen in the fact that no act of sabotage, or destruction attributable to enemy agents or action occurred in our midst.

However, this is an opportune moment for me to pay tribute in a general sense to all those who contributed to this happy state of affairs, and to express my gratitude for, and deep appreciation of their splendid co-operation and patriotic service. I desire to couple with this expression of gratitude and appreciation the various Regional Officers, and local Director of Police Services under the Civilian Defence (A.R.P.) scheme; the Veterans of 1914-1918 and their Central and Local Committees; the Officers Commanding and all members of the Civil Guard; and many men who volunteered to serve as Special Constables in various capacities, including our own Auxiliary the Ontario Volunteer Constabulary; and all ranks of the Force itself.

All, without distinction, or precedence, did everything in their power consistent with authority, position and ability, to help us achieve the task assigned to us by our Government, in our Nation's peril, under the provisions of, and by virtue of The Defence of Canada Regulations.

With regard to this phase of our duty, I should like to mention that the Force undertook on behalf of the Government of Canada many additional duties, such as registering revolvers and pistols, rifles and shotguns; enforcing the regulations of the Oil Controller; issuing permits to buy gasoline after hours and on Sundays in certain emergencies; tracing and arresting deserters and absentees from the Armed Forces; locating persons amenable to the National War Services Regulations; checking upon the character and loyalty of persons seeking employment in war industries; inspection of explosive magazines and the issuance of permits in relation to possession of explosives. In addition, many members of the Force, located in strategic areas, were appointed to act as "Observers" and to form a unit of the "Air Raid Detection Corps" for the purpose of "Spotting" and instantly reporting to the designated authority the passage of suspicious or enemy balloons or aircraft. Also, numerous enquiries were made regarding members of the several Services who applied for leave of absence on compassionate grounds.

Assistance was also given to the Canadian Active Service Forces, especially with regard to supplying escorts in connection with the movement of troops, transport and equipment, during training manoeuvres and on emergent occurrences.

In addition we were able to materially assist units of the United States Army during the period they were operating in this Province, particularly in the Districts of Algoma and Cochrane. In this connection a number of barrage balloons, which had escaped from their anchorages at Sault Ste. Marie, were recovered and returned to their base.

I would add that some sixty members of the peacetime staff of the Force joined His Majesty's Armed Services: many of whom have already come back to us and taken up their duties, their experience having added to the prestige of the Force, and which will prove beneficial to them in their chosen profession as time goes on.

The Royal Norwegian Air Force

From August, 1940, to March, 1945, the Royal Norwegian Air Force was in training at Gravenhurst, where they occupied a camp known as Little Norway.

During their stay in that area their conduct was exemplary. On many occasions the Air Force personnel assisted members of this Force in locating persons lost in the bush, recovering bodies of persons drowned, and in searching lakes and bush for personnel of Royal Canadian Aircraft that had crashed.

We were always grateful for such assistance, and in return have been able to render assistance to the Norwegian Unit in a number of instances.

That the co-operation between the Forces was appreciated, and helped to cement a bond of friendship between the peoples of Norway and this Province, is evidenced by the following memorandum addressed to your Government by the Officer Commanding the Royal Norwegian Air Force upon the closing of the Camp in March, 1945.

“To the Government and People of
the Province of Ontario.

In appreciation of the courtesy, understanding and co-operation extended to The Royal Norwegian Air Force during training operations in Canada from August, 1940, to March, 1945.

The Government through its various Departments and Branches, especially *The Department of Highways and the Provincial Police*, have rendered every possible assistance to ensure the success of the Training Program in Canada.

The People of Ontario opened their hearts and their homes to Norwegian Airmen and through many organizations and personal kindness have contributed greatly to their welfare and recreation in a manner of friendliness that will be remembered always.

As they leave Canada, all personnel of the R.N.A.F. are imbued with gratitude for assistance and hospitality they have received and a feeling of sadness mingles with their happiness at the prospect of returning home to Norway.

OLE REISTAD,
Air Officer Commanding,
Royal Norwegian Air Force in Canada.

Little Norway, Ontario, March 28th, 1945.”

CRIMINAL OCCURRENCES REPORTED AND INVESTIGATED

	1945	1944
Murder.....	23	9
Manslaughter.....	22	35
Rape.....	27	31
Burglary.....	119	98
Shopbreaking.....	727	682
Housebreaking.....	1,123	1,093
Robbery with Violence.....	69	35
Robbery.....	62	68
Automobile Thefts.....	552	435
Other Thefts.....	3,174	3,309
	<u>5,898</u>	<u>5,795</u>

Major crimes reported show an increase over the comparative figures for 1944, with a corresponding increase in prosecutions and convictions, showing that the members of the Force have been active in the detection and apprehension of those committing the offences.

The increase in Criminal Offences presents a serious problem in that such increase can be traced almost exclusively to young men and youths who have grown up during the war years and who have evidently decided, for a time at least, to make crime pay.

In this respect I would like to correct an impression that seems to be somewhat common amongst a section of the public, that is, that returned servicemen are, or were, responsible for the reported Crime Wave. This is altogether wrong. Our records show that the number of ex-servicemen who are in any way connected with crimes of violence is practically nil.

Murder

During the past year, investigations have been conducted into the murder of twenty-three persons, an increase of fourteen over the year 1944. Fifteen of these occurrences were in territory over which this Force exercises jurisdiction, and in the eight additional cases, the members of this Force were assisting municipal police.

A summary of the result of these investigations are as follows:

Hanged.....	3
Reduced to Manslaughter (and convicted).....	4
Committed Suicide.....	2
Committed to Mental Hospital.....	2
Acquitted.....	3
Awaiting Trial.....	3
Still under Investigation.....	6

Bank Robberies:

Commencing in April, 1945, with the robbery of the Canadian Bank of Commerce, Port Perry, the most extensive series of bank robberies in the history of the Force was reported, as follows:

	Amount Stolen
Apr. 25, 1945—Canadian Bank of Commerce, Port Perry, Ont.....	\$ 2,000.00
May 4, 1945—Bank of Toronto, Preston, Ont. (bandits escaped with only bank revolver).....
May 9, 1945—Bank of Commerce, Ayr, Ont. Bonds and Currency.....	75,000.00
Aug. 6, 1945—Bank of Commerce, Port Perry, Ont.....	2,900.00
Aug. 20, 1945—Royal Bank of Canada, Bath, Ont. Bonds and Currency.....	348,000.00
Aug. 23, 1945—Bank of Montreal, Blenheim, Ont.....	4,300.00
Sept. 12, 1945—Imperial Bank, Langton, Ont.....	35,000.00
Sept. 26, 1945—Royal Bank of Canada, Leaside.....	12,000.00
Nov. 3, 1945—Bank of Toronto, Dorchester, Ont. Bonds and Currency.....	14,000.00
Dec. 4, 1945—Royal Bank of Canada, Hillsboro (only bank revolver and petty cash).....

Five of these robberies were traced to the Peltier Lauzon Gang, who came up for trial at Kingston, where all charges were heard. They were convicted and given exemplary sentences:

Peltier.....	44 years—Kingston Penitentiary
Lauzon.....	35 years " "
Koresky.....	15 years " "

With the exception of the Royal Bank at Hillsboro, all bank robberies reported were satisfactorily cleaned up, with convictions registered or the robbers awaiting trial in each case.

Of the total amount of cash and securities reported stolen, only \$37,000.00 has not been recovered.

Prosecutions

There was a total overall of 16,205 prosecutions entered for all offences during the year, an increase of 1,479 over 1944.

Under the Criminal Code and relating Statutes, there were 6,218 prosecutions, an increase of 1,143 over 1944.

Under the Highway Traffic Act, there were 5,789 prosecutions, an increase of 1,143 over 1944. This increase can be accounted for largely by the removal of the gasoline purchase restrictions and the re-introduction of the fifty mile an hour speed limit.

Under the Liquor Control Act, there were 3,546 prosecutions, an increase of 538 over 1944.

Wartime Regulations. Under this heading there were 652 prosecutions, a decrease of 414 over the year 1944.

Mobile Patrols

Mobile night patrols have been continued in an endeavour to locate and apprehend night-riding gangs of auto bandits who, in stolen automobiles, swoop down on small unprotected centres during the night and clear out a store or steal a safe and get away without being discovered.

Our records show that stolen automobiles figure in almost 100% of all crimes committed in the rural areas. This is attributable first to the ease with which an automobile can be stolen, and second, the still greater ease in which automobile license plates can be stolen and changed from one car to another.

Investigation shows that the license plates on a stolen automobile have been changed three times during one night's escapade.

We have met with some measure of success in apprehending the members of these gangs.

As an illustration of the extent to which this criminal type may operate (by continuously stealing and abandoning automobiles when they have served their purpose), I give hereunder the recent record of one lone bandit whose activities caused the members of the Force many sleepless nights before he was apprehended.

Re: Stolen Automobile from Clarkson, Ontario, recovered in the possession of Elias HENRY, no address, Township of Tuscarora, County of Brant.

In this connection, information was received from the Chief Constable of Hagersville to the effect that he had been notified by Mr. Thomas Laidlaw, Hagersville, Ontario, that his automobile had been stolen. There was a strong

suspicion that Elias HENRY was involved in this theft. On June 8th, 1945, he was arrested at Cayuga. At the time of his arrest he was found to be in possession of a 1938 Plymouth Sedan, and when questioned, admitted having stolen it from Clarkson, Ontario. HENRY was also wanted by other Districts which were all notified of his arrest. All charges were tried at Cayuga Court.

On July 10th, 1945, Elias HENRY, no address, appeared for sentence in Magistrate's Court at Cayuga, Ontario, charged as follows, and with results as stated:

- (a) Theft of automobile, Hagersville, Ontario. Sentenced to one year in Kingston Penitentiary (concurrent).
- (b) Theft of automobile, Wallacetown, Ontario. Sentenced to one year in Kingston Penitentiary (concurrent).
- (c) Breaking, Entering and Theft by night. Sentenced to seven years in Kingston Penitentiary. Charge laid by St. Thomas Detachment.
- (d) Breaking, Entering and Theft at High School. Sentenced to five years in Kingston Penitentiary (concurrent). Charge laid by St. Thomas Detachment.
- (e) Theft of Automobile. Sentenced to one year in Kingston Penitentiary (concurrent). Charge laid by Petrolia Detachment.
- (f) Theft of Automobile. Sentenced to one year in Kingston Penitentiary (concurrent). Charge laid in Peel County.
- (g) Breaking, Entering and Theft of Public School. Sentenced to five years in Kingston Penitentiary (concurrent). Charge laid in Peel County.
- (h) Breaking and Entering with Intent. Sentenced to three years in Kingston Penitentiary (concurrent). Charge laid by Grimsby Detachment.
- (i) Breaking and Entering with Intent. Sentenced to three years in Kingston Penitentiary (concurrent). Charge laid by Grimsby Detachment.
- (j) Breaking, Entering and Theft. Sentenced to five years in Kingston Penitentiary (concurrent). Charge laid by St. Catharines Detachment.
- (k) Breaking, Entering and Theft. Sentenced to five years in Kingston Penitentiary (concurrent). Charge laid by St. Catharines Detachment.
- (l) Breaking, Entering and Theft by night. Sentenced to seven years in Kingston Penitentiary (concurrent). Charge laid by Pembroke Detachment.
- (m) Breaking, Entering and Theft of School. Sentenced to five years in Kingston Penitentiary (concurrent). Charges laid by Pembroke Detachment.
- (n) Breaking, Entering and Theft of School. Sentenced to five years in Kingston Penitentiary (concurrent). Charge laid by London Detachment.
- (o) Theft of Automobile. Sentenced to one year in Kingston Penitentiary (concurrent). Charge laid by Strathroy Detachment.
- (p) Theft of Motorcycle. Sentenced to one year in Kingston Penitentiary (concurrent). Charge laid by London Detachment.

Juvenile Offenders

During the year a total of 3,376 prosecutions were entered for all offences (criminal, traffic and liquor violations) against minors between the ages of ten and twenty years, compared with 3,249 prosecutions in 1944—an increase of 127.

With few and quite recent exceptions, it may be stated that this Force polices the rural areas, and, therefore, does not have the same experience in dealing with this problem (which for the most part is one that affects urban areas) as do Municipal Police Forces.

In many municipalities the police have been instrumental in establishing Boys' Clubs, which are doing a most excellent and praiseworthy work.

In these clubs, healthy recreation, gymnastics, a spirit of sportsmanship and the elementary principles of citizenship are taught; which must and will reduce delinquency and eventually produce better citizens with a more healthy outlook on life and a more friendly attitude toward the police. Boys eventually come to realize that policemen are not only law enforcement officers, but are also men with very human feelings, who are always ready to help those in real need.

I am informed that much good work has already been done by a number of municipal police departments in forming clubs of this nature, and that others are following their example.

The problem of juvenile delinquency is not a modern one, as would appear from the recent and continuous publicity given this subject. The great Greek philosopher, Socrates, said over two thousand years ago, when commenting on the youth of his day:

“The children now love luxury; they have bad manners, contempt for authority, and show disrespect for their elders.”

It would seem, therefore, there is little difference in the basic cause for such conditions, whether they arose two thousand years ago, or yesterday. It is to be hoped that now the war is over, and the absence of both parents from home is no longer necessary, conditions will again become normal.

Gambling and Slot Machines

Reports received from the District Inspectors covering the province indicate there is considerable improvement in the Gambling and Slot Machine situation.

Proof that the work of the Anti-Gambling Branch has been effective is apparent in the comparative records of gambling equipment seized.

During the period May 1st, 1942, to December 31st, 1944, 804 slot machines were seized and confiscated (177 in the year 1944). During 1945, the year now under review, only 42 were seized. This would indicate that the campaign to abolish this type of gambling has been successful. Fines totalling \$7,235.00 were imposed, and the sum of \$1,798.00 was seized in gaming houses, etc., confiscated to, and for the use of, the Receiver General of Canada.

As far as we have been able to ascertain, none of the big time gambling houses in the Toronto suburban area has resumed operation.

Highgrading

Members of the Force detailed for special duty under this heading have been active in all mining areas in Ontario, and, in addition, by request, have been able to materially assist the Province of Quebec and Manitoba in their endeavour to suppress the illegal trafficking in gold.

In dealing with the subject, the following is worthy of special mention. In April, 1945, one, Phillippe E. Authier, a resident of Val D'Or, Quebec, was arrested near Timmins by a member of this Force and found to be in possession of more than \$10,000 in gold bullion and thirty-three \$100 bills. The bills were traced to Montreal and eventually to a Ferry Command Pilot who was transporting the stolen gold to North Africa.

As a result of some excellent co-operation by the officials of the United States Treasury Department, the Foreign Exchange Control Board, the Royal Canadian Mounted Police and members of this Force, all connected with this transaction were charged and convicted, and Authier was sentenced to three years in Kingston Penitentiary.

Strikes—Industrial Unrest

Ford Motor Company, Windsor

Only one strike was reported during the year in which it became necessary for members of this Force to be sent to assist the municipal police.

In this instance, at the request of the Windsor Police Commission, a combined force of 210 members (all ranks) of this Force and the Royal Canadian Mounted Police were ordered to Windsor on November 5th, 1945, and remained on duty in that city until December 20th, 1945, when they were recalled to their respective posts and detachments.

Prisoners of War

At the end of the year, there are still large numbers of German Prisoners of War in the various internment camps in the province.

There are also approximately 5,000 Germans employed in lumbering and pulpwood camps.

In addition, there are approximately 500 Japanese engaged in pulpwood operations in various camps.

During the year, a number of German Prisoners of War escaped from the camps, but with one exception all were recaptured and returned to camp.

On May 24th, 1945, the bodies of two men, later identified as Wolfgang Bergter and Erwin Stockel, German Prisoners of War, who had been missing from a pulpwood camp since November, 1944, were found in the bush. An inquest was held and a verdict returned to the effect that death was due to misadventure and exposure whilst attempting to escape from Camp 43 at Yellow-girl Bay, Lake of the Woods.

Public Health—Assistance re Venereal Disease

Every possible assistance has been rendered by all ranks of the Force to the

Ontario Department of Public Health in its fight against the spread of venereal disease in the province.

Many cases of infected men and women have been investigated and wherever possible the infection traced to its source and appropriate action taken.

Special attention has been paid to the Service Forces and mining and lumber camp followers.

New Police District—Kenora

As the result of a survey made in January, 1945, regarding the lack of supervision of detachments in the Kenora area, it was decided to divide No. 12 District and create an additional district, to be known as No. 13 District.

On March 20th, 1945, the following Order-in-Council was passed creating District No. 13, with Headquarters at Kenora.

“Upon the recommendation of the Honourable the Attorney-General, the Committee of Council advise that pursuant to Section 33 of The Constables Act, R.S.O. 1937, Chapter 140, subsection 2 of section 3 of the Regulations respecting the Ontario Provincial Police Force made the 16th day of December, 1941, and amended on the 23rd day of February, 1943, and the 18th day of November, 1943, and being O. Reg. 36/44, be amended by striking out the figures and words, —

“No. 12 District Headquarters—Port Arthur, comprising the Districts of Kenora, Patricia, Rainy River and Thunder Bay.”

and substituting therefor the following:

“No. 12 District—Headquarters, Port Arthur, comprising the District of Thunder Bay.”

“No. 13 District—Headquarters, Kenora, comprising the Districts of Kenora, Rainy River and Patricia.”

and that the said amendment have effect on and after the 15th day of March, 1945.”

Offensive Weapon Registration

The registration of rifles and shotguns, and the issuance of permits to transfer or sell same under the Defence of Canada Regulations was revoked in September, 1945. A re-registration of revolvers and pistols was ordered during the period March 1st to July 1st, 1945. Many firearms registered in 1940 were not re-registered and a check is being made on those which have not yet been re-registered.

New permits to carry revolvers totalling 1,646 were issued during the year. Most of these were to staffs of banks, employees of large corporations for protection of payrolls, etc., and to members of regularly established revolver clubs.

Due to the return of members of the Active Service Forces from Overseas, a considerable number of revolvers and pistols are coming into the province, and efforts are being made to have these weapons registered so that they can be more readily traced and identified.

Policing Municipalities

Under an Amendment to The Municipal Act, R.S.O. 1937, Chap. 266, as enacted by 8 George VI, Chapter 39, Section 35, 1944, empowering municipalities to enter into an agreement with the Commissioner of Police for Ontario for the policing of their municipalities, we have already concluded agreements with eight municipalities, as follows:

Municipalities	Date Effective	No. of Officers
Port Stanley.....	June 1st, 1945	1
Township of McKim.....	June 1st, 1945	2
Espanola.....	June 1st, 1945	1
Rockcliffe Park Village.....	June 1st, 1945	2
Alexandria.....	Sept. 15th, 1945	2
Eganville.....	Oct. 1st, 1945	1
Township of Brant.....	Oct. 12th, 1945	1
Arnprior.....	Oct. 15th, 1945	3
Total.....		13

Agreements with four additional municipal Councils are awaiting ratification and a number of other municipalities are seeking information preparatory to availing themselves of this service.

The municipalities reimburse the province for the services of the Provincial Police at a flat rate of \$1,750.00 per man, per annum, irrespective of rank or seniority, and also provide office and cell accommodation.

Matters Pertaining to Other ForcesDistrict of Sudbury

In March, 1945, an Inspector of the Criminal Investigation Branch was assigned to investigate, enquire into, and report upon the conduct and administration of the Police Department in the City of Sudbury.

Motor Patrol Escorts

Escorts were provided for distinguished persons visiting the Province during the year, among them being the following:

April 13th, 1945—Admiral Sir James Townes Somerville, Chief of the British Admiralty Division, Washington. (Opening of Victory Loan.)

July 1st, 1945—The Honourable G. N. Zaboutin, Soviet Ambassador to Canada, and Party, on visit to Niagara Falls and Power Plants.

July 2nd, 1945—His Excellency the Regent of Iraq, and Party, from Government House, Ottawa, to Point Fortune, Province of Quebec.

September 19th, 1945—His Excellency the Ambassador of France and Party, during their official visit to the province.

Deaths from Accidents, Misadventure, etc.

	1945	1944
Automobile fatalities.....	326	236
Drownings.....	208	236
Other causes, including air crashes, railway collisions, fires, etc....	466	433
	1,000	905

I refer, herewith, briefly to some of the more serious fatalities investigated:

	Persons Killed
Automobile and train collision, C.P.R. Crossing, Chesterville.....	6
Automobile and train collision, C.P.R. Crossing, Petawawa.....	4
Red Lake Hotel Fire.....	10
Paymaster Gold Mine Disaster.....	16
Explosion—Grain Elevator—Port Arthur.....	22
Dead in automobile from carbon gas poisoning, Highway No. 28.....	4
Auto collision, Highway No. 27.....	3
Collision—C.N.R.—near Armstrong.....	2

Departmental Motor Transport

On December 31st, 1945, the Force was in possession of the following motor transport:

Patrol Cars.....	124
Passenger Cars.....	81
Station Wagon.....	1

This shows an increase of ten patrol cars and five passenger automobiles over the number of motor vehicles in operation December 31st, 1944.

Personnel (Strength)

At midnight, December 31st, 1945, the total strength of all ranks of the Force, including temporary and civilian personnel, was five hundred and nineteen (519), less twenty-four (24) members on Active Service with the C.A.S.F., making a total duty strength of four hundred and ninety-five (495).

Increase in Personnel

To provide the extra men necessary to police the several municipalities, and to cope with the increase in traffic accidents and crime, additional men have been appointed to the Force.

In selecting these recruits, only returned servicemen with a record of service in an actual theatre of war are given consideration.

District Inspection

I visited all Districts and a number of separate Detachments during the year, where I reviewed personnel and inspected uniform and office equipment.

I also conferred with judicial officials and leading citizens regarding the work of the Force.

I found the members of the Force to be held in high esteem, and law enforcement to be generally satisfactory.

I also held investigations into complaints of misconduct by members of the Force, and, where necessary, recommended certain disciplinary action for your approval.

Reports

The work of the personnel under their District Inspectors and Officers in charge of Branches has been cheerfully and efficiently carried out and will be found in greater detail in District and Branch reports submitted and filed at this office.

For purposes of administration the Province is divided into Headquarters and thirteen "Districts", each District being responsible for Law Enforcement within a certain geographical area.

Each District is divided into detachments with the detachment personnel responsible for Police Activities within a designated area.

Detachments and the number of personnel are indicated in the following table:

- No. 1 District, Headquarters Windsor—
comprising the Counties of Essex and Kent.
- No. 2 District, Headquarters London—
comprising the Counties of Lambton, Middlesex, Elgin and Oxford.
- No. 3 District, Headquarters Hamilton—
comprising the Counties of Wentworth, Halton, Brant and Norfolk.
- No. 4 District, Headquarters Niagara Falls—
comprising the Counties of Haldimand, Lincoln and Welland.
- No. 5 District, Headquarters Toronto—
comprising the Counties of York, Peel and Ontario.
- No. 6 District, Headquarters Kitchener—
comprising the Counties of Bruce, Perth, Grey, Wellington, Waterloo and Huron.
- No. 7 District, Headquarters Barrie—
comprising the Counties of Simcoe and Dufferin, and the Districts of Muskoka and Parry Sound.
- No. 8 District, Headquarters Belleville—
comprising the Counties of Victoria, Haliburton, Peterborough, Northumberland and Durham, Hastings, Lennox and Addington, Prince Edward and Frontenac.
- No. 9 District, Headquarters Perth—
comprising the Counties of Renfrew, Lanark, Dundas, Carleton, Grenville, Russell, Prescott, Stormont, Glengarry and Leeds.
- No. 10 District, Headquarters Haileybury—
comprising the Districts of Temiskaming, Cochrane, Nipissing and a portion of Algoma.
- No. 11 District, Headquarters Sudbury—
comprising the Districts of Sudbury, Manitoulin Island and a portion of Algoma.
- No. 12 District, Headquarters Port Arthur—
comprising the District of Thunder Bay.
- No. 13 District, Headquarters Kenora—
comprising the Districts of Kenora, Rainy River and Patricia.

CHANGE IN PERSONNEL

During the period January 1st to December 31st, 1945, the following appointments to and retirements from the Force became effective:

APPOINTMENTS

Provincial Constables..... 43

PROMOTIONS

- January 1st, 1945—Provincial Constable D. H. Huffman, Niagara Falls, promoted to Patrol Sergeant.
- March 1st, 1945—Inspector of Automobiles W. H. Boyd, General Headquarters Garage, promoted to Inspector, Weapon Permits Branch.
- April 15th, 1945—Sergeant H. E. Thompson, No. 3 District Headquarters, Hamilton, promoted to District Inspector, No. 8 District Headquarters, Belleville.
- April 15th, 1945—Acting District Inspector W. A. Scott, No. 1 District Headquarters, Windsor, promoted to District Inspector.
- April 15th, 1945—Corporal M. W. Ericksen, Kenora Detachment, promoted to Sergeant.
- May 1st, 1945—Corporal C. W. Wood, St. Catharines Detachment, promoted to Acting Inspector, C.I.B., Toronto.
- May 1st, 1945—Corporal C. W. Farrow, Brantford Detachment, promoted to Sergeant, No. 3 District Headquarters, Hamilton.
- May 1st, 1945—Provincial Constable G. V. Clubbe, No. 2 District Headquarters, London, promoted to Corporal, Brantford Detachment.
- July 1st, 1945—Provincial Constable H. Butler, Collingwood Detachment, promoted to Corporal, St. Catharines Detachment.
- October 15th, 1945—Provincial Constable J. W. Reavley, No. 5 District Headquarters, Toronto, promoted to Corporal, Arnprior Detachment.
- November 15th, 1945—Senior Staff Inspector W. C. Killing, promoted to Deputy Commissioner, General Headquarters, Toronto.

DEATHS

- February 21st, 1945—Provincial Constable R. W. Duncan, Bowmanville.
- May 1st, 1945—Provincial Constable T. Barrett, Ridgeway.

SUPERANNUATED

- January 1st, 1945—Provincial Constable A. DeHaitre, L'Orignal.
- June 1st, 1945—Inspector A. H. Palmer, C.I.B., Toronto.
- August 1st, 1945—District Inspector W. G. Ingram, Port Arthur.
- October 1st, 1945—W. G. Dobson, Principal Clerk, C.I.B., Toronto.
- December 15th, 1945—Inspector E. D. L. Hammond, C.I.B., Toronto.

RESIGNATIONS

- January 15th, 1945—Provincial Constable R. S. Adie, Alexandria.
- January 21st, 1945—Provincial Constable D. M. Carruthers, Perth.
- February 28th, 1945—Provincial Constable W. H. McBrien, Bowmanville.
- April 30th, 1945—Provincial Constable R. F. Gibson, Tilbury.
- April 30th, 1945—Provincial Constable J. S. Lawrence, Sudbury.
- May 31st, 1945—Provincial Constable J. Young, Hamilton.
- May 31st, 1945—Provincial Constable E. S. Monkman, Port Arthur.
- May 31st, 1945—Provincial Constable D. Jordan, Red Lake.
- June 11th, 1945—Provincial Constable A. M. Stauffer, Walkerton.
- June 30th, 1945—Provincial Constable S. K. Ball, Manotick.
- July 10th, 1945—Provincial Constable C. Wildfang, Windsor.
- July 31st, 1945—Provincial Constable W. G. Hendren, Belleville.
- July 31st, 1945—Provincial Constable P. J. Grant, Lambeth.
- August 20th, 1945—Provincial Constable A. McDonald, Mimico.
- August 31st, 1945—Provincial Constable T. J. Chesson, Kenora.
- August 31st, 1945—Provincial Constable R. A. Peterson, Armstrong.
- August 31st, 1945—Provincial Constable O. McClevis, Walkerton.
- September 30th, 1945—Provincial Constable T. J. Kelly, Toronto.
- September 30th, 1945—Provincial Constable H. Jackman, Richmond Hill.
- September 30th, 1945—Provincial Constable J. W. Carpenter, Blenheim.
- November 1st, 1945—Corporal H. Butler, St. Catharines.
- November 9th, 1945—Provincial Constable J. F. MacLean, On Active Service.
- November 15th, 1945—Provincial Constable J. A. Francis, Hornepayne.
- November 20th, 1945—Provincial Constable R. Labrosse, Alexandria.
- November 30th, 1945—Provincial Constable M. F. Pettibone, Armstrong.
- December 31st, 1945—Deputy Commissioner H. S. McCready, G.H.Q., Toronto.

DISMISSALS

- December 31st, 1944—Provincial Constable T. L. Huffman, Barrie.
- January 5th, 1945—Provincial Constable W. Glennie, Little Current.
- January 18th, 1945—Provincial Constable T. E. Pearson, Blind River.
- May 30th, 1945—Provincial Constable J. A. Rowe, Toronto.
- July 3rd, 1945—Provincial Constable T. H. Warren, Fort William.
- September 30th, 1945—Provincial Constable W. J. Osborne-Dempster, Toronto.
- December 24th, 1945—Provincial Constable J. B. Robertson, Brantford.

RETURNED FROM ACTIVE SERVICE

Provincial Constable G. E. Broughton, February 1st, 1945.
 Provincial Constable A. M. Mason, February 5th, 1945.
 Provincial Constable P. J. Grant, February 14th, 1945.
 Inspector of Automobiles W. H. Boyd, February 19th, 1945.
 Provincial Constable L. C. Carr, April 1st, 1945.
 Provincial Constable A. A. Stark, May 30th, 1945.
 Provincial Constable R. E. Johnson, July 16th, 1945.
 Corporal H. O. Finger, August 1st, 1945.
 Provincial Constable D. G. Campbell, September 4th, 1945.
 Provincial Constable A. Campbell, September 10th, 1945.
 Senior Clerk W. Rhodes, September 17th, 1945.
 Provincial Constable W. Gilling, September 24th, 1945.
 Sergeant J. A. Stringer, September 27th, 1945.
 Provincial Constable W. Marsland, October 8th, 1945.
 Clerk H. C. O'Neill, October 9th, 1945.
 Clerk G. F. Long, October 11th, 1945.
 Provincial Constable J. Hanson, October 12th, 1945.
 District Inspector F. B. Creasy, October 17th, 1945.
 Clerk C. P. McCarthy, November 1st, 1945.
 Provincial Constable J. F. MacLean, November 9th, 1945.
 Clerk A. Swan, November 12th, 1945.
 Provincial Constable R. J. Taggart, November 29th, 1945.

Provincial Constable F. B. Lymburner, Dunnville Detachment.
Provincial Constable J. W. Harris, Brockville Detachment.
Provincial Constable R. Labrosse, Rockland Detachment.
Provincial Constable J. E. Keays, No. 8 District Headquarters, Belleville.
Provincial Constable E. Bowen, No. 8 District Headquarters, Belleville.
Provincial Constable C. Siple, No. 8 District Headquarters, Belleville.
Provincial Constable A. E. Jackson, Oakville Detachment.
Provincial Constable G. E. Broughton, No. 8 District Headquarters, Belleville.
Provincial Constable L. A. Maguire, No. 4 District Headquarters, Niagara Falls.
Inspector F. Kelly, C.I.B., Toronto.
Provincial Constable K. Kersy, No. 3 District Headquarters, Hamilton.
Provincial Constable L. Chambers, No. 3 District Headquarters, Hamilton.
Provincial Constable L. R. Taylor, No. 3 District Headquarters, Hamilton.
Provincial Constable J. M. R. Young, No. 3 District Headquarters, Hamilton.
Provincial Constable W. G. Milton, Lindsay Detachment.
Provincial Constable L. A. McClure, Peterborough Detachment.
Provincial Constable R. H. Wannell, Morrisburg Detachment.
Provincial Constable L. T. Keeler, Brockville Detachment.

Resignation

Herbert S. McCready, who was appointed Deputy Commissioner in May, 1940, tendered his resignation effective as from December 31st, 1945.

During the period he served with the Force, Mr. McCready was in charge of the Criminal Investigation Branch, and in addition gave splendid service in the many special projects undertaken by the Force during the five and a half strenuous war years.

Superannuations

Inspector A. H. Palmer was retired on superannuation in June, 1945. He was appointed a Provincial Constable in 1920, and made steady progress. His work earned him promotions as Sergeant, District Inspector and finally, Inspector of the Criminal Investigation Branch.

For some time the Inspector suffered from a heart condition which eventually resulted in his superannuation.

District Inspector W. G. Ingram was retired on superannuation July 31st, 1945.

He was appointed a Provincial Constable in February, 1922, and gave excellent service. His promotion was rapid, having been promoted Sergeant in August, 1925, and District Inspector in May, 1927.

District Inspector Ingram suffered a slight stroke in November, 1944, from which he did not completely recover, and as a consequence was retired on superannuation through ill-health in July, 1945.

Mr. William G. Dobson, Head Clerk in the Criminal Investigation Branch, was retired on superannuation in October, 1945. He had been associated with the Department for almost thirty years, but unfortunately early in the year 1945 suffered a paralytic stroke, which completely incapacitated him from duty.

Mr. Dobson gave most excellent service during the whole period he was connected with the Force, and was looked upon as an authority on matters connected with Criminal Investigation.

Inspector E. D. L. Hammond of the Criminal Investigation Branch, was retired on superannuation on December 15th, 1945.

Inspector Hammond was appointed an Inspector under the Ontario Temperance Act, in 1920, and transferred to the Criminal Investigation Branch in 1922.

During his service he was active in a number of major investigations, but unfortunately during the last few years his health had not been good, and upon completion of twenty-five years' service he retired on superannuation.

Conduct and Discipline

The conduct and discipline of all ranks has, with minor exceptions, been excellent, and a high standard of efficiency has been maintained.

The members of the Force have shown a commendable spirit of loyalty and service in the manner in which they have performed their duty. Many letters of commendation have been received speaking in the highest terms of courtesy shown and services rendered by members of the Force.

Revolver Competition

Members of the Ontario Provincial Police, shooting as a team in matches sponsored by the Guelph Police Association, The Police Association of Ontario and the St. Catharines Revolver Club had a successful year and did remarkably well considering a long lay off.

Although the team won only one major event, the aggregate shooting was particularly good considering that several members of the team were new to competition shooting.

Now that restrictions have been lifted on ammunition for practice purposes, it is expected that the team will regain its former position as the leading Police Revolver Team in the Province.

Industrial Unrest—Strike at Ford Motor Company of Canada, Windsor, Essex County.

On September 12th, 1945, Local 200 of the C.I.O. called a strike at the Ford Motor Company of Canada, affecting approximately 11,000 employees. This strike was called at a time when the Company was converting the plant from war to civilian production.

Pickets in large numbers were placed around the plant and admission denied to all employees, officials and office staff. The company was forced to engage rooms at a local hotel to continue the administrative business of the firm.

In an attempt to bring pressure to bear upon the Company, the power house employees were called out, leaving the tremendous plant at the mercy of the elements and an easy prey to fire.

The next move was to deny entrance to Security Guards who had, until then, been permitted to continue their duties. This final move brought about a complete tie-up.

On November 2nd, 1945, on instructions of the Police Commission of Windsor (Mayor A. Reaume dissenting) the Chief Constable of Windsor was ordered to clear an entrance to the plant and enforce the law with regard to picketing, but was unable to do so.

Application was then made by the Board of Police Commissioners (Mayor Reaume dissenting) to the Attorney-General of the Province for assistance, and a combined Force consisting of 210, all ranks, of this Force and members of the Royal Canadian Mounted Police, under the command of a Staff Inspector of this Force, was sent to Windsor to assist in maintaining law and order.

As a mark of protest, the strikers, on November 5th, 1945, forcibly commandeered all civilian automobiles, truck and buses in the neighbourhood of the plant, and completely barricaded all streets leading to the main office. This blockade lasted two days.

In a further endeavour to force the Company to come to terms, a sympathy strike was called at other automobile and relating plants throughout the city.

Eventually some progress was made toward settlement, and the power house employees and security guards returned to work.

After a vote had been taken which was almost 50-50, the sympathy strike ended. A further vote showed that 72% were in favour of returning to work, and the strike was declared ended, the police who were on special duty returning to their stations on December 20th, 1945.

HIGHGRADING

Investigations have covered all the Mining Areas in the Province of Ontario, and in addition to that we have been able to materially assist the Province of Quebec and Manitoba in the suppression of illegal traffic of gold. In return we have received valuable assistance from the Foreign Exchange Control Board, the Royal Canadian Mounted Police, the United States Treasury Department and the various Police Departments in Ontario.

CASES PROSECUTED

	Prosecutions	Convictions	Dismissals	Withdrawn
Under Section 424-1-C of the Criminal Code—Illegal Possession of Gold Ore.....	16	10	4	2
Under Section 378 of the Criminal Code—Theft of Gold Ore from the Mines.....	3	3
Under Section 157 of the Criminal Code—Bribery.....	1	..	1	..
Under Section 24-1 of the Foreign Exchange Control Board Regulations—Exporting Illegally.....	2	2

MISCELLANEOUS

Search Warrants executed re Highgrade.....	61
Total Investigations carried out.....	200
Approximate value of Gold recovered by the Ontario Provincial Police.....	\$24,803.56
Value of Gold in the Silverman's case, Winnipeg, Man., alleged to have been stolen in the Red Lake Mining Area, recovered.....	5,300.00

Outstanding Investigations*Rex vs. Abraham Silverman—Winnipeg, Man.*

On February 10th, 1945, the Attorney-General of the Province of Manitoba requested the assistance of the Ontario Attorney General's Department in prosecuting the marginally-named person, and an officer from the Highgrade Branch of the Ontario Provincial Police Force was sent to assist the Manitoba authorities.

The gold in this case was alleged to have been stolen from the Red Lake Mining Area in an amalgam form, to the value of \$5,300.00.

At the trial, the accused was found guilty, and sentenced to one year imprisonment.

Oscar Roy and Paul Demers—Illegal Possession of Gold—County Renfrew

On September 4th, 1945, our Timmins Detachment was notified that an automobile bearing Quebec license markers was in the Timmins Mining Area, and its occupants were supposedly purchasing highgrade gold. On the morning of September 5th, 1945, the automobile referred to was concerned in an accident on Highway No. 17, near Pembroke, and the marginally-named two occupants were arrested. Investigation showed that they were in possession of a quantity of metallic buttons believed to be gold. These buttons were sent to Ottawa for examination and assay, and their value determined as \$8,400.

Roy and Demers were charged with being in illegal possession of gold. Roy was convicted and sentenced to three years in Kingston Penitentiary. Demers was convicted only of dangerous driving.

Francis Guillemette—Charged with Illegal Possession of Gold Bullion—District of Cochrane

On December 14th, 1945, the marginally-named person was arrested at a Timmins Hotel, and had in his possession two gold buttons weighing 13 pounds and valued at approximately \$6,149. Guillemette was charged with being in the illegal possession of gold and committed for trial.

General Summary

As recorded in my last report, highgrading seems to be on the increase, and as younger mining camps come into production, such as the Geraldton and Red Lake Mining Districts, these areas become good grounds for highgraders.

In this connection every effort is being made to instruct officers of this Force and local police departments regarding highgrading offences.

REGISTRATION OF FIREARMS

The registration of rifles and shotguns and the issuing of permits for the transfer of same (under the provisions of the Defence of Canada Regulations) continued until September 14th, 1945, when this particular regulation was revoked and as a result of such revocation it is not now necessary to register such weapons nor is a permit necessary for the transfer of same.

The Criminal Code of Canada states that aliens may not possess firearms in Canada without a permit so to do, and in Ontario before the recently concluded war, visiting sportsmen from the U.S.A. were not checked very closely on this phase of the law as they cleared their rifles and shotguns through the Customs at the border, and purchased Game Licenses in whatever Province they hunted.

In July, 1940, a Defence of Canada Regulation was made to the effect that notwithstanding anything contained in the Criminal Code, no person who was an alien could possess firearms, ammunition or explosives, and requiring that any such alien in Canada was to deliver up any such firearms. Provision was made for the Commissioner of the Royal Canadian Mounted Police to make regulations for the exemption of residents from the provision of this regulation and to make provisions for licenses or permits as appeared to be expedient. Provision was also made for the Commissioner of the R.C.M.P. to exempt bona fide tourists and visitors from allied or neutral countries, and to make provision for temporary licenses or permits as appeared to be expedient.

Under the provisions of this regulation, all permits for aliens (friendly or otherwise) were from then on issued by the Commissioner, R.C.M.P. from Ottawa, and his Office supplied our Department with a copy of all such permits issued to Ontario residents or visitors to this Province.

Visiting sportsmen from the U.S.A. were required to apply to Ottawa for their permits, which were sent to the proposed port of entry into Canada where they were picked up by the visitor on entering Canada and turned in when they left our country.

In February, 1945, the Commissioner, R.C.M.P., exempted bona fide sportsmen from the U.S.A. who were citizens of that country from the provisions of this regulation, and they then became subject to the provisions of the Criminal Code above referred to. In September, 1945, this regulation was amended so that it only applied to persons of the Japanese race.

As citizens of the U.S.A. had been subject to this regulation since 1940, they now applied for permits as a matter of course, and under the Criminal Code such permits in Ontario were all issued from this Headquarters.

Applications made to Ottawa were referred to this office, and with the conclusion of the war an increasing number of sportsmen from the U.S.A. wanted to relax and come here to hunt.

To give some idea of the work this entailed, there were 7,150 permits issued from this office in 1945.

In 1944 there were 4,263 letters sent out on this subject, which in 1945 had increased to 14,889, almost four times as many.

An effort is now being made to have an amendment made to the law to exempt bona fide U.S.A. sportsmen from the provisions of this law, subject to

their possessing proper game license. This will not lessen the effectiveness of law enforcement but will save the visiting tourist sportsmen a lot of inconvenience.

There was a re-registration of revolvers and pistols during the period March 1st to July 1st, 1945. The period of re-registration has now passed but the registration is continuing and a check is being made on those revolvers and pistols not yet registered.

During the year, 1,646 new permits to carry revolvers were issued. Most of these were to members of revolver clubs and to staffs of banks and employees of large corporations for the protection of payrolls, securities, etc. Permits for the transfer of revolvers and pistols issued during the year were 1,349, many of them to members of the Armed Services and to members of shooting clubs.

Due to the return of members of the Armed Services from overseas there are a considerable number of revolvers and pistols being brought back and we are endeavouring to get these registered so that we can more effectively trace and identify them.

In July, 1945, a regulation was passed at Ottawa known as the Automatic Firearms Regulation, 1945, which prohibits the importation into Canada of fully automatic firearms such as machine guns, sub-machine guns, etc., and prohibiting the possession of such weapons in Canada except under permit. In this province up to the end of 1945 no permits were issued.

MISSING PERSONS

Many requests have been received at the several District Headquarters for our assistance in locating missing persons, especially in the hunting season. In the majority of cases, we were successful, but in the following instances our efforts proved negative.

Thomas Rawn—Atikokan, District of Rainy River

On July 31st, 1945, Thomas Rawn, age 82, an old-time prospector, was reported missing near Sapawe. Rawn left on a prospecting trip and did not return. Search parties were organized, and although a thorough search was made of the area for many miles, so far no trace of him has been found.

Edward Rogiani—Ignace, District of Kenora

On July 25th, 1945, the disappearance of Edward Rogiani, age 63, was reported to our Ignace Detachment. Rogiani, a section hand on the C.P.R., disappeared from his work apparently without cause. Organized search parties were conducted by the police, friends and fellow workers, but no trace of him has been found so far.

Game and Fisheries Act

There were fifty-nine prosecutions entered for violations of The Game and Fisheries Act during the year.

Members of the Force co-operated with the Game Wardens and rendered assistance in investigating complaints where necessary.

Special patrols were made on complaint of illicit fur buying and having furs out of season.

On November 30th, 1945, information was received of the theft of forty-three minks from a fur farm in North York. As a result of some good work by our Owen Sound Detachment, the pelts were recovered in the possession of one, Leslie Carr, at a fur buyer's, at Owen Sound. These pelts were valued at \$10,000.00, all being from prize-breeding mink.

During the open season for pheasants, special patrols were on duty in designated areas.

Monies collected and forwarded to the Game and Fisheries Headquarters, Toronto, through District Headquarters, London, Ontario, totalled \$2,081.95 made up as follows:

291 Gun Licenses.....	\$ 247.35
209 Ground Hog Licenses.....	209.00
35 Trappers' Licenses.....	157.50
85 Deer Licenses.....	297.50
2 Camp Deer Licenses.....	7.00
2 Dog Licenses.....	3.70
8 Non-Resident Small Game Licences.....	120.00
5 Non-Resident Deer Licenses.....	125.00
4 Non-Resident Angling Licenses.....	20.00
2 Non-Resident Angling Licenses (3 days).....	3.70
Royalties collected on furs.....	891.20
	<hr/>
	\$2,081.95

Forest Fires Prevention Act

During the year, investigations made by members of the Force into the cause of Forest Fires resulted in fourteen persons being prosecuted, and eleven convictions recorded.

Damage caused was comparatively light, the worst fire reported being in the Nipigon area, where 4,000 acres were burnt over, and 50,000 ties and 24,000 cords of wood destroyed. The responsibility could not be traced in this case, but it is believed the fire was caused through a careless smoker.

Cruelty to Animals

Forty (40) prosecutions were entered and thirty-three (33) convictions recorded against persons for cruelty to animals during the year.

Many requests have been received from the Society for the Prevention of Cruelty to Animals asking our assistance in investigating complaints received by the Society concerning cruelty to cattle, horses, dogs, etc., in leaving them without shelter or sufficient food and water during inclement weather.

We have also investigated a number of complaints in connection with working horses in an unfit condition, riding schools and lumber camps.

In all cases where evidence of wanton cruelty or neglect was found, the persons responsible were prosecuted.

ACCIDENTAL DEATHS OR DEATHS FROM MISADVENTURE

Explosion at Grain Elevator—Port Arthur, District of Thunder Bay

On August 7th, 1945, an explosion occurred at Saskatchewan Pool Elevator No. 4 at the Port Arthur Terminal, whereby twenty-two persons were either killed outright, or died from injuries received.

A combined investigation was conducted by members of this Force, the Ontario Fire Marshal and the Dominion Department of Labour. Evidence as to the cause of the explosion was adduced and presented to a Coroners Jury on September 12th, 1945, when a verdict was returned that the explosion was caused by an accumulation of dust in the elevator.

S.S. Hamonic destroyed by Fire—St. Clair River, Point Edward, County of Lambton

On July 17th, 1945, the steamship Hamonic of The Canada Steamship Lines was destroyed by fire whilst at her dock at Point Edward.

The steamer carried over two hundred passengers at the time of the fire (which broke out on the dock and spread to the ship) none of whom lost their lives. One dock-hand was drowned in attempting to escape the fire. Eighty-nine persons were injured (twenty-nine seriously) in their endeavour to escape from the burning ship.

Fatal Automobile Accident—Highway No. 11, District of Cochrane

On June 5th, 1945, a serious motor vehicle collision occurred on the Trans-Canada Highway between Hearst and Long Lac, resulting in the deaths of five and serious injuries to two other persons.

From particulars obtained, it appears that a Buick coupe containing five persons, all en route from Ottawa to Manitoba, via the Trans-Canada Highway, collided head-on with a truck loaded with pulpwood.

According to eight witnesses, the Buick coupe proceeding west ran head-on into the Fargo truck proceeding east with a load of pulpwood. The coupe was said to be travelling at a speed estimated between 70 and 80 miles an hour, and the impact was so great the load of pulpwood came over the top of the cab, flattening both the cab and the coupe.

Both vehicles caught fire and it was impossible to rescue those imprisoned therein, five of whom were either killed outright or burned to death. The dead included the drivers of both vehicles.

Auto and Train Collision—C.P.R. Level Crossing, Chesterville, County Grenville

On December 6th, 1945, an automobile containing six persons returning from a visit to Ottawa was struck by a train on the Canadian Pacific Railway at a level crossing at Chesterville. All six persons were instantly killed.

Auto and Train Collision—C.P.R. Level Crossing, Petawawa, County of Renfrew

On October 8th, 1945, when an automobile containing four persons was crossing the Canadian Pacific Railway at a level crossing, on Highway 17, near

Petawawa, it was struck by a train that was backing into a spur line. All four persons were killed.

In practically all cases similar to the above, it appears that familiarity with level crossings makes the driver careless.

Mine Disaster—Paymaster Gold Mines, District of Cochrane

On February 2nd, 1945, a report was received by our Timmins Detachment of a serious accident at the Paymaster Gold Mines Limited, Township of Tisdale, and all available police were dispatched to the mine to aid in the rescue and assist in recovering the bodies of those killed.

From enquiry it was found that a number of miners were being lowered down No. 5 Shaft in a double-deck cage. When the cage reached the 900-foot level, a cable broke, the safety appliances failed to work, and the cage fell approximately 1,500 feet to the bottom of the shaft, killing sixteen of the occupants and severely injuring others. The fall damaged the cage so badly that it was many hours before the steel could be cut away sufficiently to release those entrapped in the debris.

An inquest was held on July 25th, 1945, at Timmins, when thirty-three witnesses were heard, and the following verdict returned:

Russell Dillon came to his death at 8 a.m. on February 2nd, 1945, in Number 5 Shaft at the Paymaster Mine, in the Township of Tisdale, through first, by breaking of the rope, and secondly, through the failure of safety dogs to function properly and stop the cage. From evidence submitted, the rope broke because of internal corrosion of which there was no indication from external examination. We consider the dogs faulty in design and operation and recommend that all safety dogs and attachments be approved by a competent authority appointed by the Department of Mines, before permitting the use of same. Also that a study be made on the prevention of internal deterioration of hoisting ropes by a commission appointed by the Provincial Government and every effort be made to prevent it. We strongly recommend that there be no delay by said commission in making investigation of all cables, safety devices and hoisting equipment to prevent a recurrence of this serious and deplorable accident.

We find that no blame can be attached to anyone through carelessness or neglect.

Four Persons Found Dead in Automobile—County of Peterborough

On July 25th, 1945, an automobile with engine still running was found on Highway No. 28, south-east of Peterboro, in which were the bodies of four persons, identified as Lewis Stevens, Olive Merton, Lloyd Stevens and Mrs. Anita Walton, all of Toronto. The party had evidently stopped for some reason, with the engine still running, and had become asphyxiated. At an inquest held to determine the cause of death a verdict of accidental death from carbon monoxide gas poisoning was returned.

Collision—Canadian National Railway, Thunder Bay District

On December 9th, 1945, a collision occurred between two east-bound passenger trains on the Canadian National Railways at Jacob, Ontario, in the

Thunder Bay District, in which two railway employees lost their lives and thirty-six were injured. The two persons killed were the conductor and porter of the sleeping car, which was telescoped by the moving train.

Deaths from Fire

Many reports have been received giving particulars of investigations regarding fires in which lives have been lost. These tragedies have been more prevalent during the past year than for any previous year recorded.

It is hoped that the proposed recommendations to the Dominion Government to amend the Criminal Code, making it an offence for parents to leave young children at home without adult protection, will receive favourable consideration. In this connection, the following is worthy of note:

On December 25th, 1945, three children of a farmer in Tilbury Township, aged 2, 4 and 9 years, died as a result of fire which destroyed their home. The farmer, wife and oldest child had gone to midnight mass, locking the three younger children in the house. On their return the house was burned and the children dead.

Death of Five Children—District of Nipissing

On October 27th, 1945, a fire occurred at the home of Arthur Hacquard in the District of Nipissing, which took the lives of five children, as follows:

Rosaire Hacquard.....	6 years
Gastin Hacquard.....	4 years
Florient Hacquard.....	3 years
Real Hacquard.....	2 years
Rejian Hacquard.....	1 year

The circumstances surrounding this fire were sad. The mother, who was expecting to give birth to another child, was near the time of her delivery. The father was about to make arrangements for a doctor, and before leaving had replenished the fire. As it did not burn well, he put coal oil on to encourage it. The stove exploded, setting fire to the father's clothing, who rushed outside. The mother picked up a blanket and followed her husband outside to smother the fire. On trying to re-enter the house she was unable to do so, owing to the fire having spread too rapidly. The five children were trapped, and died from burns.

The mother then walked more than a mile to a neighbour's cabin where she gave birth to her child with only a sixteen-year-old boy to attend her.

CRIMINAL INVESTIGATION BRANCH

During the year this Branch of the Force has investigated many important cases requiring exceptional ability and application on the part of the officers concerned.

For record purposes, it is desired to mention in some detail a number of the more serious crimes given attention.

Murders

Murder investigations carried over from the year 1944, which have already been referred to in the report for that year, were disposed of as follows:

Mrs. Ethel Smith, Ipperwash Beach, Lambton County

Mrs. Ethel Smith, Ipperwash Beach, Lambton County, was murdered at her summer home on September 11th, 1944. In this case, a young soldier, Irwin William Stata, was brought to trial in 1945, found guilty of manslaughter and sentenced to eighteen years in the Penitentiary.

Frank Scibor, Malden Township, Essex County

In this case, one John Shemko was found guilty of the murder of Frank Scibor, the trial taking place in September, 1944. Shemko was allowed an appeal, which gave him a new trial. This second trial took place in May, 1945, and the accused was acquitted.

Mrs. Viola Jamieson, Flanders, District of Rainy River

Another unusual outcome of a murder trial was the last minute appeal to the Supreme Court of Canada, made by William Schmidt, who had been sentenced to hang, together with George and Anthony Skrypyk for the murder of Mrs. Viola Jamieson at Flanders, on June 10th, 1944.

The unusual situation that developed was that the three accused had been originally sentenced to hang on December 6th, 1944. Schmidt had lost an appeal to the Supreme Court of Ontario, the Skrypyk brothers having made no appeal. Counsel for Schmidt made a further appeal to the Supreme Court of Canada, and the arrangements for the hanging of the two Skrypyk brothers were proceeded with. A few hours prior to the time set for their execution, representations were made to the Honourable the Attorney-General, by citizens of Fort Frances, which had the effect of postponing the hanging until the Schmidt appeal had been heard.

The appeal was duly heard, and the death sentence of the trial judge was sustained. The three accused were duly hanged at Fort Frances on March 1st, 1945.

Norman Lamb, Cavan Township, Durham County

Francis D. Davy was charged with the murder of infant Norman Lamb, in the Township of Cavan, Durham County, in July, 1944. Due to some irregularity at the trial, a new trial was ordered, which resulted in a verdict of manslaughter, and the accused was sentenced to two years, less one day, in the Ontario Reformatory.

George McFadden, Cardinal (reported in 1944), County of Grenville

George McFadden, a resident of Cardinal, was reported missing in May, 1944, and it was said that he had not been seen by his friends since August, 1943. Investigation was commenced and while there was no proof at that time, there was every indication that McFadden had met with foul play.

A nephew of the missing man, Clarence Hutt, was found to have articles in his possession belonging to the missing man, including an automobile. In connection with this, a charge of uttering a forged document was laid, and, as a result, Hutt was sentenced to a year's imprisonment.

During this imprisonment, Hutt made certain admissions which resulted in the discovery of the remains of George McFadden, which had been buried in an isolated place, following an attack on him by the accused man.

A charge of murder was laid against Hutt. The accused came to trial in October, 1945, the jury returning a verdict of manslaughter, and the accused was sentenced to twenty years in the Penitentiary.

Louis Wernick, County of York

On January 15th, 1945, the body of Louis Wernick was found in a snow bank in the Township of Etobicoke, York County, where it had apparently been lying for several days. An autopsy showed that Wernick had been riddled with shots, and an investigation was commenced by provincial, city and township police. The deceased was a resident of Toronto, and was said to have carried large sums of money on his person.

To date, no clue had been found leading to this man's assailants. Investigation continuing.

Arthur Seelinger, Pembroke, County of Renfrew

On January 24th, 1945, the body of Arthur Seelinger, a taxi driver at Pembroke, was found in a ditch on the outskirts of Pembroke. An investigation showed that he had been brutally beaten about the head. Despite every effort of provincial and local police, extending over several months, there has not been sufficient evidence to enable an arrest to be made. Investigation continuing.

Freeman Walker, Orillia, County of Simcoe

Freeman Walker was a night watchman in a factory in the town of Orillia. On March 17th, 1945, he was brutally attacked while carrying out his duties at the factory. Following an investigation, an Indian youth, Lloyd Wellington Simcoe, age 18, was charged with the murder. Simcoe came to trial on October 15th, 1945, was found guilty, and sentenced to hang on December 20th, 1945, which sentence was duly carried out.

Mrs. Alice Campbell, Port Credit, County of Peel

On May 17th, 1945, the body of Mrs. Alice Campbell was found in a store owned by her, near Port Credit. The deceased woman was 78 years of age, and had supported herself as a storekeeper in the vicinity for a number of years.

Mrs. Campbell had been in the habit of keeping considerable sums of money on the premises, and this appeared to be a motive for murder. Our officers, associating with township police, were successful in establishing sufficient evidence to connect one, Walter Zabolotny, with this murder. A strong case was established and the accused was brought to trial at Brampton in November, 1945, was found guilty of murder and sentenced to hang on February 12th, 1946. An appeal has been made to the Supreme Court of Ontario.

Frank Szuch and Gabor Baksa, Crowland Township, Welland County

On May 30th, 1945, police in the township of Crowland, Welland County, were called to a shack occupied by Frank Szuch and Gabor Baksa. The alarm

had been given by Peter Szuch, a son of Frank Szuch, who reported that he woke at five o'clock in the morning, and heard someone groaning in the room occupied by the two deceased men. He stated that he entered the home and found Baksa lying dead, with his head smashed in, and his father, Frank Szuch, in a dying condition, with similar injuries.

Investigation of this double murder is still continuing. It would appear that the motive was robbery, as considerable money was kept around the shack.

Rose Marie White, Newboro, County of Leeds

On May 31st, 1945, the death was recorded of Rose Marie White, age 68, Newboro, Ontario. Before her burial took place it was rumoured that she had died from violent means. As a result, the burial was postponed and an investigation was ordered by the Crown Attorney. An autopsy was held which resulted in a charge of murder being preferred against her husband, James White. He was arrested, and whilst held in custody in the County Gaol, Brockville, he committed suicide by hanging himself.

Caroline Fay Usitalo, Bronte, County of Halton

On June 4th, 1945, a report was received by our Hamilton District Headquarters to the effect that three-year-old Caroline Fay Usitalo had been found dead in her home at Bronte. Investigation revealed that the child's body was a mass of bruises, and an autopsy showed that her liver had been split by some external force.

It was learned that the mother of the child, Jean Usitalo, had been living with one Wilfred Girouard, and that this man had been in the habit of abusing the child. There was every indication that the child's injuries were caused by a severe beating, administered by Girouard, who was charged with murder.

The trial took place at Milton in November, 1945, when the jury found the accused guilty of manslaughter and he was sentenced to twelve years in the Penitentiary.

Eric Oscar Swanson and Violet Swanson, District of Kenora

On June 22nd, 1945, the bodies of Eric Oscar Swanson, farmer, age 57, and his daughter, Violet Swanson, age 10, of the Township of Pellatt, District of Kenora, were found in their home; they apparently having been murdered.

Investigation revealed that Violet Swanson had been shot through the head whilst asleep in bed. The father, Eric Swanson, had been stabbed in the back with a knife, a part of which was still in the body.

Suspicion centred on Arvo Brax, a son-in-law, whose body was later found in a nearby lake, together with a rifle. Apparently, after murdering Swanson and daughter, he shot himself through the head and fell backward into the lake.

At an inquest held in Kenora, June 29th, 1945, the jury returned a verdict of murder by some person or persons unknown. The investigation revealed, however, there could be practically no doubt that Brax committed the murders and then committed suicide.

Gladys McAuley, Red Lake, District of Patricia

On the night of July 1st, 1945, the hotel at Red Lake in the District of Patricia was burned to the ground. Nine people lost their lives as a result of this fire. Some thirty other guests at the hotel were more or less severely burned. The hotel was a frame building, and as is usual in these outlying districts, fire fighting services were sadly lacking. An investigation made by our officers at the scene indicated that one, Patrick Leonard Kiely, had been around the hotel during the evening in question, and had complained to the night clerk that the hotel was cold, and attempted to start a fire in the stove in the lobby. The night clerk dissuaded him from doing so, and soon afterwards went on his rounds in the upper part of the building for the purpose of punching the time clock, leaving Kiely in the lobby of the hotel.

As the night clerk was descending from the fourth floor of the hotel, he smelled smoke, and rushing down to the lobby, found flames in the portion of the hotel used as an office, and Kiely standing by, with his hand on the cash register. The night clerk aroused the guests and made his own escape from the hotel, which, in a matter of minutes was a mass of flames.

Acting on this information, our local police placed Kiely under arrest, and he was charged with murder. The matter was thoroughly investigated by a member of the Criminal Investigation Branch, together with local officers. The trial of Kiely took place at Kenora in October, 1945, and the accused was found not guilty.

Kalle Saari, Beaver Lake, District of Sudbury

On July 26th, 1945, Kalle Saari of Beaver Lake in the Township of Lorne, was shot and killed by one Toivo Nurmi, also of Beaver Lake.

This murder was found to be the outcome of ill feeling between the two families that had existed for some time. Nurmi was arrested, charged with murder, and came up for trial at Sudbury, October 13th, 1945, and was found not guilty.

Mrs. Matilda Graham, Norwood, County of Peterborough

On August 1st, 1945, a report was received by our Havelock Detachment that one James Graham had gone berserk as the result of a drinking bout. The constable, on responding, found Graham on the highway in a deshevelled condition, covered with blood. Proceeding to the house, Graham's aged mother was found lying in the yard very badly beaten. She died within a few moments. Her head and body were a mass of bruises and cuts. Graham was arrested and charged with murder. He appeared before the magistrate on August 30th and was committed for trial. At his trial on September 17th, 1945, he was found guilty of manslaughter and sentenced to ten years in the penitentiary.

Alex Nahwegezhik, Indian, Manitoulin Island

On the 11th August, 1945, a report was received by our Gore Bay Detachment that Alex Nahwegezhik, an Indian residing at Shaguiandah Village, had been murdered. Investigation showed that the elderly Indian had been shot by his son, James, who was arrested and charged with murder. His trial took place at Gore Bay, where he was found guilty and sentenced to be hanged, January 9th, 1946.

Frank Scigalski, Windsor, County of Essex

In the month of August, 1945, an unusual situation arose in the City of Windsor, namely, three murders occurred in the space of ten days.

On August 8th, the body of Frank Scigalski was found lying in a field near the C.P.R. cut south of Sandwich Street, Windsor. Windsor City Police officers responded to a call, and investigation revealed several stab wounds on the body of the deceased. The trousers were cut from the body, apparently by some sharp instrument, and there were also slits in the suit coat. No money was found on the body. Identification was made from an envelope found in the shirt pocket of the deceased. There were several indications that deceased had been stabbed when he was standing upright, and apparently he fell forward on his face and never moved afterwards.

Sergeant Hugh Blackwood Price, Windsor, County of Essex

Although out of sequence, because of the similarity of *modus operandi* I now deal with the murder of Sergeant Hugh Blackwood Price, Windsor, whose body was found in the early hours of August 18th, 1945, near the same locality and in similar condition to the body of Frank Scigalski. In this instance, there were nine stab wounds in the front part of the body, mostly around the chest, two in the back and one on top of the right shoulder. The throat had also been cut. There was every indication in this case that the body had been dragged some distance.

William Davies, Windsor, County of Essex

Between the occurrence of the two stabbings mentioned above, on August 8th and 18th, William Davies, a night watchman at a garage in Windsor, was found by another employee of the garage lying dead on the second floor of the garage in question, on the morning of August 16th. Deceased was badly battered around the head, the injuries apparently being inflicted with a machinist's hammer, a large screwdriver and possibly the watchman's own night stick, which was found broken and smeared with blood. An autopsy showed death due to a fracture of the skull.

Windsor City Police worked on these cases continuously and on August 18th the Chief Constable requested the assistance of our Criminal Investigation Branch.

In the stabbing cases, there was every reason to believe that a homosexualist was involved, but despite very exhaustive enquiries, no solution of these three murders has been found to date.

Ronald P. McDonnell, Charlton, District of Temiskaming

On August 22nd, 1945, our Detachment at Englehart received report of the murder of Ronald P. McDonnell, storekeeper of Charlton, District of Temiskaming. Upon investigation it was found that Hilton McDonnell had quarreled with his brother Ronald and had struck him with an axe, killing him.

A charge of murder was preferred against Hilton McDonnell, who came up for trial on October 1st, 1945, when the jury found the accused unfit to stand trial by reason of mental illness.

Neo Autote, Pullen (Alleged Murder), District of Cochrane

On August 31st, 1945, about 8.30 a.m., the body of Neo Autote was found on the C.N.R. tracks, about twenty-five miles west of Cochrane. Our Cochrane Detachment commenced investigation and were later joined by an Inspector of the Criminal Investigation Branch.

An autopsy revealed injuries to the head which, in the opinion of the coroner and the local pathologist were caused by the man being struck by some sharp instrument rather than by a train. The officers found no signs of any struggle, and strangely enough no footprints other than those of the deceased were found in the vicinity of the body.

A lengthy investigation has failed to reveal any reason for the attack, as he was usually a well-spoken man and not inclined to be drawn into any quarrel. Apart from the opinion of the medical men, there is nothing to indicate that this man's injuries could not have been caused by a train. Our local officers, however, are still continuing the investigation.

Theresa DeCourcy, Sault Ste. Marie, District of Algoma

On October 19th, 1945, Theresa DeCourcy, age 17, was strangled to death in a secluded spot in the city of Sault Ste. Marie. Medical examination indicated that the girl had also been criminally assaulted. The municipal police, with the assistance of our local officers at Sault Ste. Marie, carried on an investigation for three weeks, at which time the assistance of the Criminal Investigation Branch was requested. So far, no definite evidence has been obtained that would connect any person with this crime.

Mrs. Audry Lyons, Ajax, County of Ontario

Mrs. Audrey Lyons, a married woman with two children, whose husband was in the Royal Canadian Air Force stationed at Gander, Newfoundland, was found dead in the bedroom of her home at Ajax by one of her neighbours on Saturday afternoon, November 10th, 1945. At about 2 o'clock on the afternoon in question, a neighbour heard the children of the deceased crying, and called at the home to ascertain the cause. A doctor living nearby was called, and as a result of his findings, police were notified. Medical examination indicated that the deceased had been strangled and also criminally assaulted. Lorne C. Harris has been arrested, charged with the murder of Mrs. Lyons, and committed for trial.

John Dubinsky, South Porcupine, District of Cochrane

At 10.30 a.m. on November 23rd, 1945, the staff of the South Porcupine Branch of the Bank of Toronto was held up by a lone armed badit, and some five thousand dollars in currency stolen. The bandit made his escape, and while doing so, a customer of the bank, John Dubinsky, is alleged to have been shot by the robber. A good description of this man was obtained from the bank staff, and as a result one, Marcel Desseres, has been apprehended and is now awaiting trial.

BANK ROBBERIES

Canadian Bank of Commerce, Port Perry, County of Ontario

At about 9.30 p.m., April 25th, 1945, whilst Mr. E. Hayes, Manager of the Bank of Commerce, Port Perry, was walking home from the bank, he was kidnapped by four armed and masked men who drove him around the country in a car until the streets were deserted, then took him to the bank, forced him to open the vault, seized the strong box and escaped after locking him in the vault from which he was able to escape. The strong box contained around \$2,000 in silver. From enquiries made it was found that Ulysse Lauzon, Joseph B. Peltier, John Owad and Edward Cobryn, all of Windsor, were concerned in this robbery, and were eventually arrested and charged. The charges against Owad and Cobryn were withdrawn owing to lack of identification. Lauzon and Peltier were concerned in other bank robberies and were brought to trial before Magistrate J. B. Gervin at Kingston on November 1st, 1945, and sentenced to six years and eight years consecutively on the above charge.

Bank of Toronto, Preston, County of Waterloo

On May 4th, 1945, two shots were fired at the caretaker of the Bank of Toronto, Preston, as he entered the bank, by one of two men who had broken into the bank and were concealed behind a desk. The bandits escaped with only the bank revolver. From the description given, the bandits were identical with Lauzon and Peltier. To confirm this, the bank revolver was found in the possession of Peltier when arrested at Winnipeg.

Bank of Toronto, Dorchester, County of Middlesex

On November 3rd, 1945, the Bank of Toronto, Ilderton Branch, was held up by four men armed with revolvers and rifles, who escaped with approximately \$14,000 in cash and bonds. In this case we were successful in apprehending the following men and recovering all the stolen money and securities with the exception of \$617.00:

James Orville Ross, 22, Chatham, Ont.
Lorne Murray, 24, Oshawa, Ont.
Patrick Kelly, 20, Ingersoll, Ont.

On November 13th, 1945, they appeared before the Magistrate at London and were sentenced to eight years each in the Penitentiary.

Royal Bank of Canada, Hillsburgh, County of Wellington

On December 4th, 1945, three armed men entered the apartment of Mr. Hilton, Manager of the branch of the Royal Bank at Hillsburgh. There they bound the hands of Mrs. Hilton with adhesive tape, then while one bandit stood guard over her, the other two forced Mr. Hilton to the bank vault which he was made to open. He was then told to open the safe but was unable to do so owing to the fact that it was operated by a time lock. Mr. Hilton was returned to the living room where both he and his wife were bound and gagged. The bandits took what cash they had, in addition to the bank revolver, and made their escape in a stolen auto which was recovered on the outskirts of Toronto.

Royal Bank of Canada, Leaside, County of York

On September 26th, 1945, the branch of the Royal Bank at Leaside was held up by four armed men who escaped with approximately \$12,000 in currency. During the early morning of September 30th, 1945, whilst a Provincial Police Constable and the Chief Constable of Bowmanville were patrolling Highway No. 2, they attempted to investigate a suspicious automobile containing three men. When the auto was stopped, one of the occupants attempted to use a sub-machine gun on the officers. The three men were arrested and found to have in their possession currency stolen from the bank at Leaside. This case has not yet come up for trial.

Imperial Bank of Canada, Langton, County of Norfolk

On September 12th, 1945, the branch of the Imperial Bank at Langton was held up by three armed men who escaped with approximately \$35,000 in currency. All three men were masked, wore gloves, and were armed with pistols or revolvers. This robbery was eventually traced to the following four men: William Vance, Gerald Blackburn, Gail Hastings, all of Windsor, Ontario, and Dominic Minille, who were arrested and charged with robbery while armed. All four prisoners appeared before County Judge Brickenden in County Court, Simcoe, where they entered pleas of guilty and were sentenced as follows:

- Gail Hastings, 12 years and 20 lashes in Kingston Penitentiary.
- Gerald Blackburn, 10 years and 20 lashes in Kingston Penitentiary.
- Dominic Minille, 10 years and 20 lashes in Kingston Penitentiary.
- William Vance, 2 years less a day in Ontario Reformatory.

Bank of Montreal, Blenheim, County of Kent

On August 23rd, 1945, the Blenheim Branch of the Bank of Montreal was held up by two masked bandits who escaped with approximately \$4,300.00. The bandits made their escape in a car in which a third man was waiting. After considerable investigation in this matter, three men were arrested and are now awaiting trial.

Canadian Bank of Commerce, Ayr, County of Waterloo

On May 9th, 1945, the branch of the Canadian Bank of Commerce at Ayr was held up by two armed men who locked all the bank officials in the vault and escaped with about \$75,000 in cash and bonds. This robbery was traced to Lauzon and Peltier, as were similar robberies at Port Perry. In this case both prisoners were sentenced to twelve years in Kingston Penitentiary.

The Canadian Bank of Commerce, Port Perry, County of Ontario

On August 6th, 1945, two armed men entered the Port Perry branch of the Canadian Bank of Commerce and escaped with approximately \$2,900 from the teller's cage, at the same time taking two Iver Johnson revolvers. This robbery was also traced to Lauzon and Peltier, who at their trial in Kingston in November received sentences of 35 and 40 years respectively, for numerous offences.

Royal Bank of Canada, Bath, County of Frontenac

On August 20th, 1945, armed men entered the branch of the Royal Bank of Canada at Bath, Ontario, forcing the manager to open the vault upon penalty of death if he disobeyed. After securing the staff by means of copper wire around their wrists to the chairs, the bandits escaped with approximately \$11,000.00 in cash and \$500,000.00 in bonds and securities.

Investigation revealed that Joseph Peltier, Ulysses Lauzon and Walter Koresky, all of Windsor, were again the robbers, and their trail was picked up and followed into the Province of Quebec. Peltier was arrested after being shot by a bank official whilst attempting to dispose of some stolen bonds in a Montreal bank, Lauzon, his wife, and Koresky were arrested by the R.C.M.P. after a fight, at a race track in Prince Edward Island. The bonds were located buried in ground near a cottage the bandits had purchased in the Province of Quebec.

All were tried before the Magistrate at Kingston, November 1st, 1945, and sentenced as follows:

Koresky—12 years in Penitentiary.

Lauzon—12 years in Penitentiary.

Peltier—12 years in Penitentiary.

The arrest and sentence of the above three bandits brought to an end the worst epidemic of bank robberies ever to occur in this Province.

Robbery Whilst Armed, County of Brant

On March 14th, 1945, three armed men entered the home of George Lefler in Brant Township, where Mrs. Lefler was asleep in bed. After beating her and binding her to her bed, they ransacked the house, escaping with over \$12,000 in cash, Victory Bonds and fur coats. During this investigation, Toronto police detectives learned that three suspects had suddenly acquired wealth and were spending it. This resulted in their arrests and the recovery of the bonds, fur coats, and practically all the money. At their trial, all were found guilty and sentenced to 15 years, 7 years, and 7 years respectively in Kingston Penitentiary.

On April 14th, 1945, an armed man entered the home of James E. Penny, Pittsburg Township, Frontenac County, and ordered "hands up" of the occupants and at the same time fired a shot from a revolver. The house was then systematically ransacked. The wife of Penny was able to get outside without attracting attention. She obtained the assistance of two soldiers who, upon arrival, were met by the bandit, who posed as Mrs. Penny's husband, stating that she was mentally ill, and no notice should be taken of her. Believing this story, the soldiers left, and the bandit later escaped in the Penny automobile. A revolver identified as that used by the bandit was later found on the highway, it evidently having been dropped by the bandit in his flight.

On May 5th, 1945, Harvey Valiquette, alias Desgagne, was arrested in Montreal and identified as the man wanted in this case. On May 18th, 1945, he was found guilty of armed robbery and sentenced to eight years in the Penitentiary with thirty strokes of the strap.

Office of Excursion Company, Bob-Lo Island, County of Essex

On August 20th, 1945, four armed men entered the office of the Bob-Lo

Excursion Company on the Bob-Lo Island in the Detroit River, where they held up the staff and escaped with \$12,000 in cash.

A well-known Windsor crook named Burns was arrested some time later at Tilbury on another charge, and was found to have a considerable sum of money in his possession, thought to be part of that stolen from Bob-Lo.

A search was made of his home, also the home of grandparents, where additional evidence was found, some of the money still bearing the original Bob-Lo wrappers.

At his trial he was found guilty and sentenced to 12 years' imprisonment with 20 lashes. Other members of the gang are still awaiting trial.

On August 28th, 1945, John Kirkwood was held up and robbed of his auto by four young men when on the highway, near Lindsay. As a consequence, Norman Waters, Thomas Gilliard, Thomas Marston and Donald Fairlie were arrested at Peterboro. They were charged jointly with robbery with violence, and sentenced as follows:

Waters—2 years, 10 strokes of the strap.
Gilliard—18 months, 6 strokes of the strap.
Marston—12 months, 6 strokes of the strap.
Fairlie—12 months, 6 strokes of the strap.

All sentences on other charges to run concurrently.

On November 14th, 1945, a taxi driver for Dafoc's Taxi Service, Belleville, was held up by an armed man and robbed of his money and taxi. On November 31st, 1945, Roy Pilon, taxi driver, was also held up and robbed.

James Carneric was later identified as the bandit. He was arrested and pleaded guilty to two charges of armed robbery, and was sentenced to two years on each count to run consecutively.

On September 29th, 1945, report was received at the St. Catharines Detachment that Roy Smith, taxi driver of St. Catharines, had been held up by three armed men who had hired his taxi in St. Catharines to take them to Jordan. Enroute, these men severely beat and robbed Smith, made him drive them to Sunderland (about 35 miles northeast of Toronto) where they threw him out and continued their way in the stolen automobile. A description of the taxi and men was broadcast, resulting in the arrest at Peterboro of Robert Dunlop, John Monteith, and Albert Bowden. They were returned to St. Catharines and sentenced on a charge of Armed Robbery to five years each in Kingston Penitentiary.

On November 6th, 1945, an unknown man, dressed in naval uniform, hired a taxi in Hamilton to drive him to Clappisons Corners. When a short distance out of Hamilton, the fare held up the taxi driver with a revolver and robbed him of his money, watch and automobile. Later, a sailor driving the taxi appeared in Milton, and whilst being questioned by the Chief Constable, drew a revolver and fired at the Chief, and an exchange of shots took place. He made his escape by forcing a bread truck driver to drive him to the outskirts of Toronto. The police were later notified of a man who had applied for medical treatment at St. Joseph's Hospital, suffering from a bullet wound. He was identified as the

wanted man and had been wounded in the exchange of shots at Milton. He was arrested and several charges of housebreaking, robbery, etc., preferred against him. At his trial he was given two terms of ten years imprisonment with lashes.

On November 19th, 1945, a report was received by our Hearst Detachment that Alphonse Nadeau, age 79, residing at Mattice, had been severely beaten and robbed by a young man who had entered his home for the purpose of robbery. Upon investigation it was found that a young French Canadian, Laurie La Branche, age 21, had severely beaten and kicked Nadeau into unconsciousness, then robbed him of all the money he could find. La Branche was later arrested, identified, charged and sentenced to a term in Kingston Penitentiary.

On December 11th, 1945, whilst Miss Rose Smith, employed as a collector for a wholesale firm of tobacconists, Welland, Ontario, was making collections in the Crowland district, she was crowded into a ditch by an automobile which came up behind her. Two men jumped from the auto and snatched her satchel containing approximately \$1,000.00. At the same time, one of the two fired a shot at Miss Smith from a revolver, wounding her in the leg. They then escaped in the auto. So far, sufficient evidence has not been obtained to bring any person to trial for this robbery and wounding.

Robbery and Safe Breaking—Sudbury and Nipissing Districts

On November 27th, 1945, reports were received at Sudbury and North Bay Detachments of a series of criminal occurrences in the Warren, Noelville and Sturgeon Falls areas, where it was reported that stores, Post Offices and private residences had been entered and looted, the stolen property being taken away in automobiles. The thefts were traced to a gang of young French Canadians operating by night with stolen automobiles in small centres with little or no police protection.

Some particularly good work resulted in the arrest of the following brothers:

Henri La Fortune
 Roland La Fortune
 Joseph Lanthier
 Jean Lanthier

who were all found guilty and sentenced to terms ranging from seven to two years imprisonment.

THEFT

Thefts from Summer Cottages—Blue Water Highway, Grey County

In May, 1945, reports were received that a number of summer cottages in the Kincardine area had been entered and ransacked.

Our Detachment at Kincardine was successful in apprehending two men, Mathew Drennan and Joseph Gouthro and recovering property to the value of over \$1,000.00.

Both men were convicted and sentenced to two years in Kingston Penitentiary.

Breaking, Entering and Theft—Summer Homes—Huron County

Our Detachment at Goderich were advised of the breaking and ransacking of a number of summer residences in Huron County and the theft of a large quantity of valuable furnishings therefrom.

From enquiries made, these thefts were traced to Drennan and Gouthro as above. They were returned to Goderich in November, 1945, on a Judge's Order and sentenced to two additional years on four charges to run consecutively with sentences already imposed.

Theft of Aeroplane

On December 21st, 1945, Robert E. Steiner, an American citizen, was convicted at the Magistrate's Court at Kenora, and sentenced to two and one-half years in Stoney Mountain Penitentiary on numerous charges of theft, carrying firearms, etc. The investigation revealed that Steiner had crossed into Canada at Fort Frances with a stolen auto, in November, 1945, posing as a tourist. He was in reality a deserter from the United States Air Force, and was wanted on a charge of stealing an aeroplane from Hudson, Wisconsin. Whilst flying the stolen plane, he crashed at Duluth. The crash was investigated by the U.S. sheriffs, and Steiner was permitted to proceed. At the time of the investigation, Steiner stole a revolver and holster from one of the sheriff's automobiles, also a Buick automobile from Duluth, and proceeded into Canada. He will be taken to the United States for trial, upon the completion of his sentence in this country.

ESCAPES FROM GAOL

Lincoln County Gaol—St. Catharines

On 26th April, 1945, a report was received to the effect that one John W. Piro had escaped from the Lincoln County Gaol, St. Catharines, and that he was hiding in a jungle along the old canal in the City of St. Catharines. Piro was located, placed under arrest and taken back to the Gaol.

John Piro appeared before the Magistrate in the City and County Court at St. Catharines on 1st May, 1945, on the five charges stated below, and elected trial by a Higher Court. On 5th May, 1945, he appeared before His Honour, Judge H. E. Fuller in the Lincoln County Judge's Court, elected speedy trial and pleaded guilty to five charges with results as shown:

- (a) Breaking and Entering and Theft (money and jewellery). Grantham Township. December 9th, 1944. Convicted and sentenced to five years in the Kingston Penitentiary.
- (b) Breaking and Entering with Intent (office safe). Canada Steamship Lines Office, Grantham Township. December 10th, 1944. Sentenced to three years in Kingston Penitentiary.
- (c) Escape from Custody (Lincoln County Gaol). 25th April, 1945. Sentenced to two years in Kingston Penitentiary.
- (d) Theft of Automobile. January 22nd, 1945. Sentenced to one year in Kingston Penitentiary.
- (e) Receiving Stolen Goods (clothing). Sentenced to one year in Kingston Penitentiary. All sentences to run concurrently.

District Gaol, Parry Sound

On October 20th, 1945, five prisoners, all under sentence, escaped from the Parry Sound District Gaol. All were young, dangerous criminals and had been convicted for crimes including robbery with violence.

An intensive man hunt was inaugurated and after three days liberty all five were recaptured and returned to be sentenced to further terms of imprisonment, to be served consecutively to the sentence they were serving at the time of their escape.

Dufferin County Gaol, Orangeville

On June 11th, 1945, Wilfred Halliday and Irwin McCartney, under sentence in the Dufferin County Gaol, made their escape by cutting the bars of their cell with a saw, smuggled in by a confederate.

After a search of a day, they gave themselves up to the police with the remark that "every way they turned they saw a cop". Both were given additional terms to run consecutively to the sentence they were then serving.

Essex County Gaol, Windsor

On November 20th, 1945, six men under sentence (all with the exception of one awaiting transfer to Kingston Penitentiary) made their escape from the Essex County Gaol, Windsor, by cutting their way out of their cells with hack saws, overpowering their guards and obtaining their keys, enabling them to make their escape.

On November 23rd, 1945, a raid was made by a combined body of Provincial and City Police on the home of one John Harris (coloured), near Harrow, and four of the escaped prisoners were captured. The following day the fifth prisoner voluntarily surrendered, and on December 15th, the sixth and last prisoner in a stolen auto was arrested by Provincial and Tilbury Police in the Town of Tilbury.

All were charged with breaking prison, and given varying sentences to run consecutive to any sentences then serving.

ANTI-GAMBLING BRANCH

This Branch was actively engaged in the suppression of betting and gaming houses throughout the Province, and prosecutions under the gaming sections of the Criminal Code and Lord's Day Act were instituted in the undermentioned Counties and Districts:

County or District	Number of Prosecutions
Essex.....	48
Kent.....	2
Middlesex.....	17
Elgin.....	3
Oxford.....	1
Wentworth.....	4
Brant.....	23
Norfolk.....	3
Lincoln.....	7
Welland.....	7

County or District	Number of Prosecutions
York	3
Peel	1
Ontario	2
Perth	6
Grey	7
Waterloo	4
Simcoe	1
Peterborough	3
Hastings	2
Algoma	6
Total	150

Members of the Branch were on duty at the following Race Tracks during the months of June, July, August, September and October, for the purpose of suppressing illegal betting:

Ontario Jockey Club, Toronto	May 19th to May 26th, 1945
Ontario Jockey Club, Toronto	Sept. 8th to Sept. 15th, 1945
Thorncliffe Park Racing Association, Toronto	May 28th to June 4th, 1945
Thorncliffe Park Racing Association, Toronto	Sept. 22nd to Sept. 29th, 1945
Long Branch Jockey Club, Toronto	June 6th to June 13th, 1945
Long Branch Jockey Club, Toronto	Oct. 3rd to Oct. 10th, 1945
Metropolitan Racing Association, Toronto	June 16th to June 23rd, 1945
Metropolitan Racing Association, Toronto	Oct. 13th to Oct. 20th, 1945
Hamilton Jockey Club, Hamilton	June 25th to July 2nd, 1945
Hamilton Jockey Club, Hamilton	Aug. 4th to Aug. 11th, 1945
Niagara Falls Association, Fort Erie	July 4th to July 19th, 1945
Stamford Park, Niagara Falls	Aug. 18th to Sept. 3rd, 1945

Many persons, under suspicion of bookmaking, were requested to leave the various race courses. Two of them were arrested and convicted for keeping Common Betting Houses. One undesirable, a race horse owner, was suspended by the Racing Association for his improper actions. The President of the I.C.R.A. repeatedly, during the racing season, expressed his appreciation of the good work carried out by members of the Branch.

A recent survey made through all District Inspectors shows there is very little illegal gaming and betting going on in the territory where we are responsible for law enforcement. Few complaints have been received at this office during the year.

The outstanding case of the year was that of Harry J. Brown of Niagara Falls, Ontario, convicted and sentenced to the Ontario Reformatory for two years less a day on three counts—concurrent sentence, for selling fake lottery tickets, etc. This was a very lengthy case requiring investigation at Windsor, Welland, Niagara Falls, St. Catharines, Hamilton, Brantford, Ingersoll, Brockville, North Bay, Port Arthur and Fort William.

I am pleased to report that the forty-six telephones used for the purpose of receiving and transmitting racing information at 16 Royal York Road South, in the Township of Etobicoke, were given up and the service discontinued by the Bell Telephone Company of Canada. To our knowledge there are no large betting and gaming houses operating in suburban Toronto.

Three slot machines were seized under The Slot Machine Act, 1944. These were confiscated by a Magistrate's order and destroyed. Thirty-nine slot machines, found to have been used as instruments of gaming, were seized. Thirty-four were confiscated and destroyed. Three are awaiting disposition, and two were returned to the places from where they were seized.

Evidence resulting in six persons being convicted and fined for keeping Common Gaming Houses was obtained by checking carnivals at Simcoe, Stratford and Aylmer. One person convicted at Stratford was fined and imprisonment for cheating at play.

Five hundred and sixty-nine investigations were conducted throughout the year. Seventy-five search orders were executed. Ten summonses were served and twenty-four arrests made. Five persons were sentenced to gaol for a total of thirty months. Fines totalling \$7,235.00 were imposed and collected. The sum of \$1,798.16 seized in gaming devices, gaming and betting houses, was confiscated and sent by the convicting magistrates to the Receiver-General of Canada.

A classification of prosecutions, convictions, dismissals, withdrawals, etc., covering the period from January 1st, 1945, to December 31st, 1945, is as follows:

OFFENCE	Pro-secu-tions	Con-vic-tions	Dis-mis-sals	With-draw-als	Fines Im-posed and Collected
Keeping Common Gaming House, Section 229, C.C....	51	43	6	2

Found-In, Section 228, C.C.....	76	61	...	15	
Liquor Control Act.....	8	5	3	...	
Dispose of Sweepstake Tickets, 236-1-B, C.C.....	2	2	
Dispose of Sweepstake Tickets, 236-1-B.B., C.C.....	1	1	
Cheating at Play, Section 442 (a).....	1	1	
Totals.....	150	122	9	19	\$7,235.00

THE LIQUOR CONTROL ACT

There were 3,546 prosecutions by Officers of the Force under the provisions of The Liquor Control Act of Ontario for the period January 1st to December 31st, 1945. Disposed of as follows: Prosecutions, 3,546; Convictions, 3,255; Dismissals, 152, and Withdrawals, 139. This is an increase of 542 over the comparative period for 1944.

The following statistical table gives the disposition of prosecutions and the amount of fines collected for infractions during the year.

Offences	Pro-se-cu-tions	Con-vic-tions	Dis-mis-sals	With-draw-als	Fines Imposed
Having in Illegal Place.....	703	673	15	15	\$10,407.00
Selling or Keeping for Sale.....	84	52	20	12	1,010.00

Having or Consuming in Hotels.....	11	10	1	...	150.00
Permitting Drunkenness in Private Residence.....	17	15	1	1	780.00
Violations of Regulations 13, 15, 62a, 62b, 64b, 125, 126, 132 and 173.....	434	413	10	11	6,579.50
Found-Ins, Section 108a.....	124	109	1	14	1,380.00
Miscellaneous.....	174	151	14	9	7,170.00
Totals.....	3,546	3,255	152	139	\$88,306.50

CONFISCATED LIQUOR

The following amounts of spirits, wine and beer were seized and confiscated by the presiding Magistrates, and turned over to the Liquor Control Board:

	1945	1944
Spirits.....	850 gals.	690 gals.
Wine.....	2,790 "	852 "
Beer.....	4,431 "	5,345 "
Approximate Value.....	\$28,000.00	\$25,000.00

AUTOMOBILES CONFISCATED

Under the provisions contained in The Liquor Control Act, the following automobiles were seized and confiscated by the presiding Magistrates and were brought to Headquarters, Toronto, where they were sold by auction to the highest bidder. These cars were being used illegally by bootleggers for transporting of liquor:

	Approximate Value
No. 491—Dodge Sedan.....	\$ 225.00
No. 492—Packard Sedan.....	1,012.00
No. 493—Ford Coach.....	388.35
No. 494—Oldsmobile Sedan.....	Returned to Owner
No. 495—Ford Coupe.....	423.36
No. 496—Essex Coach.....	30.00
No. 497—Oldsmobile Coupe.....	Returned to Owner
No. 498—Ford Coupe.....	350.00
No. 499—Hupmobile Coupe.....	45.00
No. 500—Ford Coupe.....	100.00
No. 501—Pontiac Coupe.....	425.00
Totals.....	\$3,028.71

REVENUE DERIVED FROM ENFORCEMENT OF LIQUOR CONTROL ACT

	1945	1944
Fines Collected.....	\$ 88,306.50	\$ 71,780.00
Approximate Value of Liquor Seized.....	28,000.00	25,000.00
Approximate Value of Confiscated Automobiles.....	3,028.71	8,849.46
Totals.....	\$119,335.21	\$105,619.46

Liquor Permits and Prohibitory Orders

During the past year, there were 3,000 Permits for Liquor, Prohibitory Board's Orders and reports on same received at this Branch from Officers of the various Districts, and in each case where there were sufficient grounds to support a recommendation for the cancellation or a Prohibitory Board's Order being issued, the necessary action was taken and reports forwarded to the Liquor Control Board with a covering letter recommending cancellation. In practically every case the liquor privileges were cancelled or a Board's Order issued as the case may be.

Samples of Liquor for Analysis

During the year there were approximately 787 samples of liquor for analysis received at this Branch from Provincial Police Officers and Municipal Police Officers at different points throughout the Province of Ontario.

HIGHWAY TRAFFIC ACT

Statistical information as supplied by the Registrar of Motor Vehicles, with comparative statements of the number of Motor Vehicle Permits and Operators' Licenses issued for the years 1945 and 1944 respectively:

	1945	1944
Passenger Cars.....	555,460	568,222
Commercial Vehicles.....	98,339	97,868
Buses.....	1,895	1,743
Two-Purpose Vehicles.....	1,279	1,321
Trailers.....	53,004	48,900
Motorcycles.....	5,745	5,901
Dealers' Plates.....	708	
Motorcycle Dealers' Plates.....	4	
Operators' Licenses.....	637,020	615,293
Instruction Permits.....	81,928	69,974
Chauffeurs' Licenses.....	334,832	290,357
In-Transit Markers.....	2,998	
Transfers.....	102,410	

The following statistical return shows a considerable increase in the number of accidents, deaths, and persons injured during the year by reason of the operation of motor vehicles:

Month	Total	Fatal	Number Killed	Number Injured
January.....	258	10	10	198
February.....	236	7	7	134
March.....	233	20	20	162
April.....	261	16	19	193
May.....	309	12	12	237

This increase cannot be ascribed to any one particular cause, but the removal of the restrictions on the sale of gasoline, and the resumption of the fifty mile an hour speed limit would be contributing factors.

Very soon our highways will again be thronged with motor traffic, in greater numbers than ever before, and the patrol officers will be hard pressed to cope with an ever-increasing volume of accidents and the rational enforcement of the law.

The fact that motor vehicles now figure so prominently in our everyday lives and are responsible for more deaths and injuries in a week than are caused by assaults and murders in a year, is a good reason why traffic duties must be regarded as of vital importance.

Traffic Safety

From April 15th to June 1st, 1945, the Force participated in what was known as a "Brake Emphasis Programme" sponsored by the International Association of Chiefs of Police and the Chief Constables Association of Canada.

as a part of a great movement by combined Police Forces for traffic safety on our highways.

The reason behind the selection of brakes as a point of emphasis in the Safety programmes were:

- (1) Brakes are a factor in most traffic accidents and many moving violations.
- (2) The public generally understands and accepts the importance of brakes.
- (3) The consequences of dangerous brakes, or brakes used dangerously extend to the persons and property of all who ride and walk, and are not confined to the owner or driver.
- (4) Repairs and adjustments can be made expeditiously, with little or no loss of the use of the vehicle.
- (5) The brake check procedure can be combined easily with regular enforcement work and takes but 60 seconds to accomplish.
- (6) Special training for officers is not required.

The programme was carried out simultaneously by all law enforcement bodies in Canada and the United States, and from reports received was an unqualified success.

The members of this Force checked 10,111 automobiles during the period specified, of which number 1,665 failed to pass the required test.

Hit-and-Run Occurrences

During the year there were 76 cases of hit-and-run occurrences reported and investigated by members of the Force. The majority of these cases were satisfactorily cleared up, and the remainder are still under investigation.

It may be said that the hit-and-run driver of a motor vehicle involved in an accident does not consider himself a criminal in the same class as a murderer, robber or thief, but his offence can often be classed with that of the murderer, as it frequently results in needless loss of life. It may be that in some instance fear or panic will cause the driver involved to leave the scene without attempting to aid the injured or reporting the accident. On the other hand, such driver may be engaged in some unlawful operations in which he is anxious to avoid detection.

The investigation of hit-and-run occurrences is one of the most difficult of all police duties as quite frequently there is nothing found at the scene of the fatality or injury to identify either the vehicle or driver concerned, and the automobile involved may not be sufficiently damaged to cause it to be taken to a garage for repair.

Motor Manslaughter

On July 17th, 1945, whilst William Ward, age 35, of Orillia, was walking on Highway No. 12, near Atherley, he was struck and killed by a hit-and-run motorist.

All garages and service stations were warned to be on the alert for a damaged auto, and as a result an employee of Sanders Garage, Gravenhurst, gave certain information which resulted in the arrest and conviction of one, Austin Lacasse, Orillia.

The Honourable the Attorney-General was pleased to present an award to the informant for his assistance to the Police in this case.

On August 27th, 1945, whilst Frederick Willcock, age 61, was walking on the Walker Road, near Windsor, he was struck and killed by an automobile driven by Stanley H. Turner.

A charge of manslaughter was preferred against Turner, which was later withdrawn, and he was convicted on a charge of reckless driving.

On November 5th, 1945, whilst William Parrott, age 75, was walking on Highway No. 12, near Myrtle Station, he was struck and killed by a motor vehicle, the driver of which did not stop, or report the occurrence to the police. Parrott's body lay in the ditch all night and was not found until six o'clock the next morning. Although every possible enquiry has been made and every clue followed up that has presented itself, we have thus far been unable to locate the driver responsible for this death.

On November 16th, 1945, whilst Frank McDonald, age 50, was walking on No. 2 Highway near Whitby, he was struck and killed by an automobile, the driver of which did not stop. Some headlight glass was found near the body, and garages were notified to be on the alert for any automobile requiring repair to headlights. Through the alertness of an employee of Donald Motors, Whitby, Lloyd Thompson of Ajax was arrested and convicted, and sentenced to four months in gaol. The Honourable the Attorney-General was pleased to present an award to the informant in this case for his assistance to the Police in bringing about the arrest of the driver.

On Friday, December 21st, 1945, an automobile in which Mrs. Vera Bignall was a passenger was parked on the Highway near Brampton while the driver repaired a flat tire. This car was struck by an automobile driven by Kenneth Putnam of Norval, and Mrs. Bignall received injuries from which she died. Putnam was arrested, and at the direction of the Crown Attorney a charge of manslaughter was laid against him. He has been committed for trial. Case not yet concluded.

PROSECUTIONS FOR TRAFFIC OFFENCES UNDER H.T.A. AND CRIMINAL CODE

LOST OR STOLEN PROPERTY RECOVERED

Property which had been reported lost or stolen to the value of \$535,938.47 was recovered by members of the Force and restored to its various owners.

CONCLUSION

In conclusion I desire to express my sincere appreciation for the counsel and advice at all times from the Deputy Attorney General and Solicitors of your Department.

I also wish to thank the Press and Radio Officials, Municipal, Railway and Royal Canadian Mounted Police Forces for their ever-ready assistance and co-operation throughout the year.

I further desire to assure you on behalf of the Force of which I have the honour to be the head that the same constant vigilance and devotion to duty will be maintained in the future as it has been in the past.

Respectfully submitted,

WILLIAM H. STRINGER,

Commissioner of Police for Ontario.

RETURN FROM THE RECORDS

OF THE

GENERAL ELECTION

TO THE

LEGISLATIVE ASSEMBLY IN 1945

HELD ON

28th MAY AND 4th JUNE

SHOWING

- (1) The number of Votes Polled for each Candidate in each Electoral District in which there was a contest;
- (2) The majority whereby each successful Candidate was returned;
- (3) The total number of Votes Polled;
- (4) The number of Votes remaining Unpolled;
- (5) The number of Names on the Polling Lists;
- (6) The number of Ballot Papers sent out to each Polling place;
- (7) The Used Ballot Papers;
- (8) The Unused Ballot Papers;
- (9) The Rejected Ballot Papers;
- (10) The Cancelled Ballot Papers;
- (11) The Declined Ballot Papers;
- (12) The Ballot Papers taken from Polling Places;
- (13) The number of printed Ballots not distributed to D.R.O's.
- (14) The number of ballot papers printed.

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 40, 1946

ONTARIO

TORONTO:

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1946

THE HONOURABLE LESLIE E. BLACKWELL,
Attorney-General.

Sir:

ONTARIO

FIRST ANNUAL REPORT

THE LIQUOR AUTHORITY CONTROL BOARD OF ONTARIO

From October 24th, 1944
To March 31st, 1945

Sessional No. 43

Printed and Published by T. E. Bowman
Printer to the King's Most Excellent Majesty

Form 102, March 25, 1946

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to transmit to Your Honour the First Annual Report of the Liquor Authority Control Board of Ontario for the period October 24, 1944, to March 31, 1945.

Respectfully submitted,

LESLIE E. BLACKWELL,

Attorney-General

THE LIQUOR AUTHORITY CONTROL BOARD OF ONTARIO

454 University Avenue,
Toronto 2, Ontario,
October 3, 1945

TO THE HONOURABLE LESLIE E. BLACKWELL, K.C.,
Attorney-General of Ontario,
Parliament Buildings, Toronto 5, Ontario.

SIR:

I have the honour to submit herewith the First Report of The Liquor Authority Control Board of Ontario for the period ending March 31, 1945.

The Members of the Board, namely, Judge W. T. Robb, Chairman, William T. Nugent and J. Frederick Reid, were appointed immediately The Liquor Authority Control Act, 1944, was proclaimed by the Lieutenant-Governor in Council, on October 24, 1944. On August 1, 1945, J. Frederick Reid tendered his resignation and he was succeeded by John Franklin White.

The Province was divided into fourteen Authority Districts pursuant to the Act, and are as follows:

DISTRICT NUMBER	COMPRISING	DISTRICT CENTRE
1	Counties of Elgin (except Vienna), Essex, Kent and Lambton	WINDSOR
2	Counties of Bruce, Grey, Huron, Perth, Waterloo and Wellington	KITCHENER
3	Counties of Middlesex and Oxford	LONDON
4	Counties of Brant, Haldimand, Lincoln, Norfolk and Welland, (and <i>Vienna</i> only in Elgin)	ST. CATHARINES
5	Counties of Wentworth and Halton	HAMILTON
6	County of York	TORONTO
7	Counties of Durham, Ontario, Peterboro, Victoria and District of Haliburton	PETERBORO
8	Counties of Dufferin, Peel, Simcoe and Districts of Muskoka and Parry Sound	BARRIE
9	Counties of Hastings, Lennox, Northumber- land and Prince Edward	BELLEVILLE
10	Counties of Addington, Dundas, Frontenac, Glengarry, Grenville, Leeds and Stormont	BROCKVILLE
11	Counties of Carleton, Lanark, Prescott, Renfrew and Russell	OTTAWA
12	Districts of Kenora, Rainy River and Thunder Bay	FORT WILLIAM
13	Districts of Algoma, Manitoulin and Sudbury	SAULT STE. MARIE
14	Districts of Cochrane, Nipissing and Temiskaming	KIRKLAND LAKE

The Board held the following meetings:

Annual Meetings — one in each of the 14 Districts	14
Special Meetings — at District Centres	6
Special Meetings — at Head Office, Toronto	17
Meetings at Toronto (not classed as "special")	12

The Board employs twenty-four (24) inspectors. They make frequent inspections of all authorized premises in the Province. A monthly report is furnished in respect to each Authority as well as a detailed annual report. In addition, the inspectors submit special reports as they deem advisable. The many and varying duties of the inspectors include the matter of fire protection, observing the operation of the premises to make sure they are conducted according to legislation, cleanliness and hotel service generally, sterilization and cleansing of beer glasses and dispensing equipment.

On March 31, 1945, the end of the fiscal year, there were in existence 1,228 Hotel Authorities, of which 31 were Summer Hotels operating under an Authority for six months of the year; 145 Social Clubs; 123 Veteran and Labour Clubs; 223 Military Messes and 8 Steamship Authorities. (SCHEDULE I attached hereto contains the names and owners of said Authorities.)

NOTE.—During this period there were five (5) hotels destroyed by fire.

All of the Authorities listed in Schedule I were renewed for the year 1945-46 with the exception of: "The Wabash Hotel," St. Thomas.

SCHEDULE II sets forth detailed statement of Authorities transferred; and SCHEDULE III, a list of Authorities suspended. There were no cancellations during this period.

SCHEDULE IV attached hereto gives a detailed statement of the Board's expenses as of March 31, 1945.

The Board, in its short period of operation covered by this report, found unsatisfactory persons in charge of hotels who since have been replaced on the Board's Order.

There are some amendments to the Act and Regulations which will be suggested before the 1946 Session of the Legislature.

The Board is pleased to acknowledge its indebtedness to the Provincial Police and to several Municipal Police Officers for assistance. The Board is, also, appreciative of a loyal and efficient staff who have performed their duties faithfully and well.

Respectfully submitted by

W. T. ROBB,

Chairman

SCHEDULE No. 1

Authorities in Existence and the Names of the Owners Thereof—as of March 31, 1945

HOTELS

MUNICIPALITY	NAME OF HOTEL	NAME OF OWNER

MAXIM T. GRAY, O.L.S., Fort Erie.

The American Falls in Winter

FIFTY-NINTH ANNUAL REPORT

OF THE

NIAGARA PARKS COMMISSION

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The Niagara Parks Commission begs to submit, for the information of the Ontario Legislature, the fifty-ninth annual report covering the period from April 1, 1944 to October 31, 1945.

The present Commission, under the Chairmanship of the Honourable Charles Daley, Minister of Labour for the Province, was appointed on August 10, 1944, replacing the previous Commission under the Chairmanship of the Honourable T. B. McQuesten, K.C. Besides the Chairman, the members of the present Commission are: Fred M. Cairns, Vice-Chairman, of Niagara Falls; W. B. Rollason of St. Catharines; Harold G. Fox, K.C., Ph.D. of St. Catharines; T. H. Lewis of Welland; T. F. Forestell, K.C. of Fort Erie; Cecil Seord of Grantham Township and George R. Inglis of Niagara Falls. The new Commission held its first meeting on August 19, 1944.

For the greater portion of the period covered by this report, the country found itself still at war with the axis powers, and the Commission recognized this by deciding not to proceed with any extensive capital undertakings, with the exception of those which could not reasonably be postponed. The Commission did, however, decide to maintain thoroughly the Park System under its jurisdiction in so far as the availability of manpower and materials would permit. In connection with manpower, the Commission insisted on a definite policy of engaging returned service personnel whenever new people were to be taken on the staff, having regard of course to experience and ability. After the defeat of Germany on May 8, 1945, your Commission could, with some assurance, plan for future development.

On September 29, 1944, the barricades in Queen Victoria Park, erected by the military authorities for protection purposes, were removed and on December 15th, a similar set of barricades at the Queenston Power plant location were removed, so that for the first time since 1939 traffic was able to traverse the entire length of the Parkway from Fort Erie to Niagara-on-the-Lake, unhampered by military restrictions, with the exception of a short stretch from Dufferin Islands to Chippawa and early in 1945 this latter stretch was also opened up by the construction of a short detour road around the steel tower which is located about one-half mile south of Dufferin Islands. This tower, mentioned in earlier reports, is one of two (the other is located on an artificial island in the river) which support a cableway used to construct a submerged rock weir across the deep water channel of the river.

ILLUMINATION BOARD

Your Commission appointed at its first meeting, T. H. Lewis and Maxim T. Gray, the General Manager, as the representatives of the Commission to the

Niagara Falls Illumination Board. A brief review of the organization of this Board might not be out of place. It is an International Board with four members, namely, The City of Niagara Falls, N.Y., the City of Niagara Falls, Ontario, The Niagara Parks Commission and the Hydro-Electric Power Commission of Ontario. The City of Niagara Falls, N.Y. has six representatives, the City of Niagara Falls, Ontario, two members, The Niagara Parks Commission two members and the Hydro-Electric Power Commission one member. The Board maintains and operates the twenty-four searchlights which illuminate the American and Horseshoe Falls, the battery of lights being located on the Canadian side. Eight-twelfths of the cost is borne by the City of Niagara Falls, N.Y., one-twelfth by the City of Niagara Falls, Ontario, and three-twelfths by the Niagara Parks Commission. The Hydro-Electric Power Commission for Ontario provides the electric current gratis.

NEW WORKS

The removal of the barricades and the opening up of the southerly end of Queen Victoria Park to the public, brought up the matter of the extension of the ornamental iron and stone wall along the river bank. This wall ended at a point practically in line with the crest of the Falls, and in order to eliminate a hazard to the public, it was decided to extend this wall approximately 400 feet southerly. This work is being proceeded with now, the idea being to construct 200 feet this year and 200 feet in 1946.

The Table Rock Tunnels, giving a view from behind the Horseshoe Falls, had not been used since 1939. When they were examined in the fall of 1944, it was found that there was but $5\frac{1}{2}$ feet of rock left between the tunnel and the face of the gorge. This width had been close to 30 feet when this particular tunnel was constructed in 1923, so that the recession of the face of the gorge was a matter of 25 feet in 20 years. The Commission decided that this was too much of a hazard to the public and that it would be necessary to construct new tunnels. The firm of H. G. Acres and Company, Consulting Engineers, were retained to prepare plans and specifications and as a result of calling for tenders for this work, a contract was entered into with the Robertson Construction and Engineering Company, Limited, of Niagara Falls, Ontario. The main gallery of the new tunnel is located approximately 60 feet back from the main gallery of the old tunnel, so that it will be safe from any danger due to the recession of the gorge for a great many years to come. The contract price was \$42,942.10 and covers also, the lining of the new tunnels with concrete, including also electric lighting. The new tunnels were opened to the public on August 1, 1945, and immediately proceeded to prove their value to the Commission as a commercial asset, and also their value to the public as a scenic attraction.

One of the first things which the Commission concerned itself with was the possibility of constructing new greenhouses to replace the present greenhouses which were practically falling apart, and, as a result of a thorough survey as to a possible location for the new greenhouses, it was decided to proceed with this work. The Commission felt that this construction came under the category of necessary work. A contract was therefore entered into, early in 1945, with the Lord and Burnham Company, Limited, of St. Catharines, for the construction of ranges of greenhouses, including a work room, a palm house, an exhibition house, and several propagating houses, for a total price of \$119,044.00. The Commission is to do, with its own forces, certain work in this connection, including the stone facing around the front of the palm house, and construction of tables and benches in the workroom.

New Park Greenhouses—Construction Commenced, Fall, 1945

Table Rock Tunnel under the Horseshoe Falls

The Commission also installed insulation over the entire ceiling area of the Park Restaurant. Your Commission considered, also, whether it would be advisable or not to construct a permanent type of awning or roof covering over the balcony in front of the Park Restaurant, but it was decided the canvas awning would be the more satisfactory and, as a new awning was required this year, it was purchased from the Robert Soper Company, Limited, Hamilton, and installed just prior to the opening of the 1945 season.

The Commission also decided to proceed with an extension to the kitchen of the Queenston Restaurant. It has been found in operating this Restaurant over a period of 5 years, that the kitchen is too small and it will be possible, after it is enlarged, to more efficiently serve the public. The estimated cost of this is \$10,000.00 and will be done by the Commission's own forces.

In October 1945, the Commission decided to construct an implement shed at the School for Apprentice Gardeners. This is to be a one-storey, frame construction, twenty-two feet wide by fifty feet long. An alteration is to be made to the lecture hall, in order to provide room for an office and additional classrooms.

At Mather Park, in Fort Erie, it is realized the stone sea wall must be completed and the adjacent area of Mather Park filled in, so that this park may be completed and planted. It is the intention to complete this work as finances will permit.

SHORE PROTECTION

During 1945, considerable work was done in the way of riprapping with stone, the river bank, from Fort Erie to Chippawa. Due to the excessive high water, the erosion here became serious, during 1944 and 1945. One of the worst places is at the shipyards, but throughout the entire length there are scattered bad places. In 1944, the stretch of river bank between Usher's Creek and Chippawa was completed and this has prevented any further erosion there. It has been found that stone placed at the water's edge, at the base of the bank, had proved satisfactory in the past to prevent erosion. A considerable quantity of this work was done in 1908 and 1909, and it has proved of great value.

MAINTENANCE WORK

The usual maintenance work in connection with the Commission's properties, including repairing of roads, stone walls, ornamental iron railings, the repairing of park buildings and the constant renewal of painting has been carried on, diligently, by the Commission's staff.

The matter of leakage in the six-inch water line, running from Niagara Falls to Queenston, has been before the Commission and the repairing of leaks in this line has been going on, as the leaks are detected. To facilitate the matter of leak detecting, a leak detector was purchased and the Works Department is making a systematic examination of the line with a view to finding any leaks, which do not show up through the ground surface.

In this connection, it should be noted that the Township of Niagara was given permission, by agreement, in 1945, to connect to the end of this six-inch line, in Queenston Park, and by means of the construction of a storage reservoir and necessary water lines, to supply water to residents of Queenston Village and to the people having property along the parkway, from Queenston to Paradise Grove. The new reservoir will be entirely buried underground and is to be

located at the base of the first escarpment below the Queenston Restaurant, at about the same level as the caretaker's cottage. It will not interfere with any landscaping and, in fact, will not be visible from either the Park roadway or from Queenston Park.

The agreement between the Commission and the Township of Niagara is to run for a period of fifteen years.

Considerable maintenance work was done on the road surface between Chippawa and Fort Erie. The road areas where the bridges were widened were surfaced and other areas over this stretch, where disintegration had taken place due to frost action, were surfaced with stone chips and bituminous material.

It is realized that these repairs are only temporary. In the not too distant future this entire roadway may be resurfaced with bituminous material, brought to a proper cross section and properly drained.

HORTICULTURAL DEPARTMENT

Maintaining the boulevard and parks at a high standard during the war years has been difficult and trying, labour being difficult to procure and hard to retain, and it was found almost impossible to keep the grounds in good shape. Concentrated effort on the principal points such as Queen Victoria Park, Oakes Garden Theatre, Niagara Glen, Queenston Heights Park, Mather Park and Fort George, resulted in these points being kept in good condition.

With the ending of the war, it was possible to begin work on cleaning up the debris and refuse left by the military people after they had removed the barricades and buildings. Several areas in Queen Victoria Park required grading and seeding. Most of this work was done in the fall of 1944, and the lawns were in good shape for the spring of 1945, when the remainder of the barbed wire entanglement, stones and buildings were removed, and the grounds regained their natural beauty for the 1945 season.

The high cost of spring flowering bulbs and the difficulty in obtaining them in quantity, curtailed the fall planting of bulbs. However, with the purchase of approximately two thousand Darwin tulips for Mather Park, and the use of old bulbs, along with six to seven thousand violas and spring flowering plants such as arabis, polyanthus, and aubretias, the flower beds in Queen Victoria Park, Oakes Garden Theatre and extension, Queenston Heights Park and Mather Park were planted and presented a favourable display in the spring of 1945.

The annual chrysanthemum show was held in the dining room of the Park Restaurant early in November, and was admired by many visitors.

December 11, 1944 will be well remembered by the staff of the Niagara Parks Commission as one of the wildest and heaviest snowfalls in the history of the Niagara Peninsula. The heavy snowfall at that time, along with subsequent falls, curtailed all winter work, such as tree trimming, cleaning grounds, drainage, etc., as the staff had to concentrate on clearing roads and paths for transportation.

During the winter months of 1944-1945, there was little chance of the frost getting into the ground, consequently, the banks along the back of Queen Victoria Park were wet and soggy in the early spring. Wind blew down many trees and minor landslides occurred along the escarpment in Dufferin Islands.

Flower beds in Queen Victoria Park, Oakes Theatre, Mather Park, Lundy's

Lane Cemetery and Queenston Heights Park were planted in May 1944 with approximately fifty thousand summer bedding plants, which were propagated and grown in the greenhouse. With some variation of arrangement, the flower beds were planted in the spring of 1945. One has but to listen to the comments of the tourists and visitors to understand the appreciation and pleasure derived from these flower beds during the summer months.

Cut flowers were propagated and grown in the garden at the greenhouse to supply the Restaurants during the summer season, and an ample supply was on hand at all times.

At this time it would be well to mention the abnormal weather conditions that have prevailed during 1945. Heavy snow lying on the ground all winter prevented the frost from entering the ground. Early in March there was a continued warm spell which brought all vegetation along very fast. This was followed by a cold and wet period which had its effect on the fruit, flowers and trees in the district, with the result there was little fruit and the flowers and trees never fully recovered during the season. Heavy rains again prevailed during the months of September and October, curtailing the operations on the land. Continued heavy rainfalls caused the grass along the boulevard to make abnormal growth. Despite the many drawbacks the grass along the boulevard was cut three times.

The tree men were kept busy with the many fallen trees during the spring months, and in the summer much spraying was done, both for insect pests and poison ivy.

In September and October of 1945, the Stockdale property on the boulevard was cleaned up and ploughed ready for levelling and seeding in the spring.

Clearing, ploughing and cultivation of the property in front of the Trading Post at Fort George was completed in September.

On the Longhurst property in the vicinity of the Oak Grove, at Niagara-on-the-Lake, the peach orchard was cleared, foundation of the house filled in and graded, the ground ploughed and cultivated ready for harrowing and levelling in the spring. Clearing and cleaning up is being carried on in this area at the present time.

The woods alongside the driveway south of the Queenston Plant of the Hydro-Electric Power Commission has been cleared. This work will be continued during the winter.

Under great difficulties, the propagation of bedding plants, cut flowers and decorative plants was carried on at the greenhouse. Many times it was feared that the greenhouses would collapse under the weight of snow, or be blown away by the wind, and it became necessary to move the plants from one house to another in the middle of the night to protect them from the frost. It appeared almost hopeless to carry on. The greenhouse staff worked diligently and faithfully to protect the plants. While the stock suffered, no plants were lost by frost. Approximately fifty thousand bedding plants were propagated and used for bedding. Decorative plants, ferns and flowering plants were grown for use in the Restaurants.

TRAINING SCHOOL FOR APPRENTICE GARDENERS

There were ten apprentices at the School on April 1, 1944, six on August 1st and eleven on December 1, 1944. On November 1, 1945, there were nineteen

View in Oakes Garden Theatre

Niagara Glen Restaurant

students, twelve of them being returned men from the armed forces. Two of these are old pupils, Gordon McNair and Conrad Eidt, who have returned from the armed forces to complete their course.

Chickens provided approximately seven thousand eggs for the kitchen in 1944 and approximately ten thousand in 1945, the surplus being transferred to the Restaurants.

A good supply of vegetables was grown for the table in 1944. 1945 proved a very unfavourable year for vegetable growing on the clay ground at the School, until the latter part of the season when a plentiful supply was on hand.

The area in the rear of the building was developed by constructing a small lily pond around which is a driveway to give easy access for the delivery of coal. This project gave the students practical experience in the construction of driveways and lily ponds.

A root house was constructed in the fall of 1944, which will greatly facilitate the storage of vegetables for the winter.

The students were given practical work in the greenhouses during the winter months, and received lectures on fundamentals of gardening and garden mathematics, botany, etc. Practical demonstrations on the propagation of trees and shrubs by cutting, budding and grafting, were given by Mr. L. G. Riley, who has returned to the School after spending two and a half years in the Air Force.

Work was commenced in the fall of 1944 to complete the development of the rose garden, and many evergreens were planted. In the spring of 1945 further development was continued and the beds, which are ultimately to be planted with roses, were planted with hardy chrysanthemums. These were a riot of colour in the fall. This practical demonstration of the construction of a rose garden is providing splendid experience for the students, and it is hoped that the garden will be almost completed this fall.

A tile drainage system is now being installed whereby the low lying ground can be drained and better cultivation result. Several drains have been laid in the vistas.

New work and re-organization is now under way whereby the students will be more contented and have better facilities to study and become acquainted with all the branches of gardening.

GUESTS

The following guests were entertained by the Commission:

- | | |
|----------------|---|
| 1944—May 3rd | Archbishop of York and party. |
| June 4th-6th | Members of Australian Government and party of Australian newsmen. |
| July 11th | Canadian Women's Army Corps band, who gave two concerts in Queen Victoria Park. |
| July 26th-27th | General Oscar Fuentes, Chief of Chile's Military Mission and Chilean delegate to the Inter-American Defence Board, and party. |
| November 18th | National Resources Commission of China. |

1945—April 27th	Colonel Himet Singhi, highest ranking native Indian officer in the British Army, and party, including Sir Angus and Lady Fletcher.
May 16th-17th	General Batista of Cuba, and party.
May 23rd	Library Association Convention.
June 5th	Delegates to Y.W.C.A. convention.
June 20th	Canadian Federation of Mayors.
July 4th-5th	Badawi Pasha, Egyptian Foreign Minister, and party.
July 7th-8th	H. B. Hobson, Chairman of the Central Electric Board of Great Britain.
August 8th	Members of the International Committee to promote Navy Island.
September 23rd	Party of English Agriculturists.

In addition to these, many servicemen were entertained at dinner, on Sundays throughout the summer, at the Park Restaurant.

A conference of the Committee on Uniformity of Legislation, consisting of the Attorneys General of the various provinces, was held at The Commissioners' Quarters in the Park Restaurant from August 24th to the 29th, 1944.

PARK HISTORY

By the end of October 1945, the preparation of the Park history book was complete, and several completed chapters were in the hands of the printers to assemble into book form.

Some delay is expected with regard to the printing and binding, and the completed book is not expected to come off the press until early spring.

NIAGARA FALLS BRIDGE COMMISSION

Early during the term of the present Commission, the matter of the rights of the Niagara Falls Bridge Commission, where the Rainbow Bridge passes over Park lands, was discussed and the Commission's solicitor was asked to bring in a report setting forth the position. Further action is planned by the Commission, as the solicitor's opinion is that the Bridge Commission was given no permission to have the bridge cross park lands or to have the bridge piers and abutments established on Park lands.

MAID OF THE MIST STEAMBOAT COMPANY

The existing lease with this company expired in October 1944, and the Commission entered into a new lease with this Company for a further period of five years.

NIAGARA SPANISH AEROCAR COMPANY

This Commission took legal action to collect back rentals from this company, after unsuccessfully attempting to negotiate a new agreement.

A judgment was secured in the amount of \$3,250.00 plus costs. Subsequent payments have been made by the company.

This enterprise has been operated throughout the war, winter and summer, but has suffered financially in common with other like enterprises, due to travel and other restrictions.

KIRBY COLLECTION

The Commission purchased the Kirby collection of museum pieces and manuscripts. It is intended that these will be on display at Fort George. The purchase price was \$5,000.00.

FINANCIAL

The Commission purchased \$90,000.00 in Victory Bonds during the seventh Victory Loan. This money was part of the Mather legacy fund.

LANDS

The decision of the Ontario Municipal Board with regard to expropriation of the C. W. Dean property, Niagara-on-the-Lake, was rendered, amount allowed being \$800.00.

The Commission sold the property known as the Brodrick farm, consisting of 41.6 acres, for the sum of \$8,400.00, to Mr. A. Schmon. This consisted of the farm on the westerly side of the River Road, with the exception of a strip one hundred feet in depth along the frontage. This had been acquired several years ago because it was necessary to take the entire property when the property on the river side of the road was purchased.

The Commission also sold the property immediately north of the Brodrick farm on the westerly side of the road, retaining, in the same way, a strip of land one hundred feet in depth, along the frontage. This property had an area of 15.73 acres and was sold on the basis of \$125.00 per acre. The purchaser was Mr. A. Schmon.

ACCIDENTS

George Summers, Niagara-on-the-Lake, entered action against the Commission for alleged damages at Fort Mississauga. The case was tried at St. Catharines and was dismissed. Mr. Summers appealed the case but the appeal was disallowed.

All of which is respectfully submitted to Your Honour by:

THE NIAGARA PARKS COMMISSION

HON. CHARLES DALEY, Chairman

FRED M. CAIRNS, Vice-Chairman

WM. B. ROLLASON

HAROLD G. FOX, K.C., Ph.D.

T. H. LEWIS
